Annual report to contract holders for the twelve months ended December 31, 2008

# **ANNUAL REPORT**

### FOR CONTRACT HOLDERS OF SCUDDER DESTINATIONS<sup>™</sup>

AIM Variable Insurance Funds The Alger American Fund Credit Suisse Trust Dreyfus Investment Portfolios The Dreyfus Socially Responsible Growth Fund, Inc. DWS Investments VIT Funds DWS Variable Series I DWS Variable Series II

The Fund provides a complete list of its holdings four times in each fiscal year, at the quarter-ends. For the second and fourth quarters, the lists appear in the Fund's semiannual and annual reports to shareholders. For the first and third quarters, the Fund files the lists with the Securities and Exchange Commission (SEC) on Form N-Q. The Fund's Form N-Q filings are available on the SEC Web site, sec.gov. Copies of the Fund's Forms N-Q may be reviewed and copied at the SEC Public Reference Room in Washington, D.C. You can obtain information on the operation of the Public Reference Room, including information about duplicating fee charges, by calling 202 942 8090 or 800 732 0330, or by electronic request at the following E-mail address: publicinfo@sec.gov. The SEC file numbers for the Fund are 811-07452 and 033-57340. The Fund's most recent portfolio holdings, as filed on Form N-Q, have also been made available to insurance companies issuing variable annuity contracts and variable life insurance policies ("variable products") that invest in the Fund.

A description of the policies and procedures that the Fund uses to determine how to vote proxies relating to portfolio securities is available without charge, upon request, from our Client Services department at 800 410 4246 or on the Invesco Aim Web site, invescoaim.com. On the home page, scroll down and click on Proxy Policy. The information is also available on the SEC Web site, sec.gov.

Information regarding how the Fund voted proxies related to its portfolio securities during the 12 months ended June 30, 2008, is available at our Web site. Go to invescoaim.com, access the About Us tab, click on Required Notices and then click on Proxy Voting Activity. Next, select the Fund from the drop-down menu. The information is also available on the SEC Web site, sec.gov.

It is anticipated that the businesses of the affiliated investment adviser firms – Invesco Aim Advisors, Inc., Invesco Aim Capital Management, Inc., Invesco Private Asset Management, Inc. and Invesco Global Asset Management (N.A.), Inc. – will be combined into Invesco Institutional (N.A.), Inc., and the consolidated adviser firm will be renamed Invesco Advisers, Inc., on or about Aug. 1, 2009. Additional information will be posted at invescoaim.com on or about Aug. 1, 2009.

This report must be accompanied or preceded by a currently effective Fund prospectus and variable product prospectus, which contain more complete information, including sales charges and expenses. Investors should read each carefully before investing.

Invesco Aim Distributors, Inc.

## **Management's Discussion of Fund Performance**

#### Performance summary

Although there were no safe havens from widespread stock market losses, utilities stocks generally held up somewhat better than the broad market in 2008, due to their defensive nature. Consequently, Series I shares of AlM V.I. Utilities Fund, excluding variable product issuer charges, fared better than the broad market, as measured by the S&P 500 Index, for the year ended December 31, 2008. ▼ The Fund benefited from a litigation settlement, and its cash exposure. Conversely, the Fund's electric utilities and multi-utilities holdings detracted from performance. Your Fund's long-term performance appears later in this report.

#### Fund vs. Indexes

Total returns, 12/31/07 to 12/31/08, excluding variable product issuer charges. If variable product issuer charges were included, returns would be lower.

Series I Shares	-32.35%
Series II Shares	-32.51
S&P 500 Index <sup>▼</sup> (Broad Market Index)	-36.99
Lipper VUF Utility Funds Category Average <sup>▼</sup> (Peer Group)	-35.17
▼Linner Inc	

#### How we invest

We invest primarily in natural gas, electricity and telecommunication services companies, selecting stocks based on our empirical research of individual companies. Our fundamental analysis focuses on positive cash flows and predictable earnings. Our fundamental analysis seeks strong balance sheets, competent management and sustainable dividends and distributions.

We look for companies that may benefit from industry trends, such as increased demand for certain products and deregulation of state markets. We look for companies that are attractively valued relative to the rest of the market. We also monitor and may adjust industry and position weights according to prevailing economic trends such as gross domestic product (GDP) growth and interest rate changes.

<b>Portfolio Composition</b> By sector	
Utilities	77.3%
Telecommunication Services	15.2
Energy	5.7
Money Market Funds	
Plus Other Assets Less Liabilities	1.8

We seek to manage risk by:

- Diversifying across most industries and sub-industries within the utilities sector.
- Owning both regulated and unregulated utilities. Unregulated companies generally provide greater growth potential, while regulated firms generally provide more stable dividends and greater principal protection.
- Maintaining a reasonable cash position to avoid having to sell stocks during market downturns.
  - We may sell a stock for any of the
- following reasons:
- Earnings growth is threatened because of a deterioration in a firm's fundamentals or due to a change in the operating environment.
- Valuation becomes too high.
- Corporate strategy changes.

#### Market conditions and your Fund

Several factors contributed to the negative performance of most major market indexes for the fiscal year ended December 31, 2008.<sup>1</sup> The chief catalyst was the ongoing subprime loan crisis and its far reaching effects on overall credit availability. Although inflation weighed heavily on the minds of consumers and investors in the first half of 2008, falling home values and commodity prices alleviated short-term inflationary pressures beginning mid-year as unemployment and global economic instability took center stage.

The U.S. Federal Reserve Board (the Fed) continued the monetary easing policy it began in 2007. Since December 2007, the Fed cut the federal funds target rate from 4.25% to a range of zero to 0.25%<sup>2</sup> in an effort to inject liquidity into weakening credit markets. Real GDP contracted in the third and fourth quarters of 2008. This contraction was largely due to a decrease in personal consumption and residential investment. Inflation, as measured by the seasonally-adjusted Consumer Price Index, virtually ground to a halt following sharp declines in energy prices in the second half of the year. However, unemployment trended higher during the year and ultimately reached a seasonally adjusted rate of 7.2% in December.<sup>3</sup>

Against this backdrop, consumer staples, health care and utilities were among the best performing sectors of the S&P 500 Index. Conversely, financials, materials and information technology were the worst performing sectors.

Total Net Assets	\$82.4 million
Total Number of Holdings*	30

The Fund's holdings are subject to change, and there is no assurance that the Fund will continue to hold any particular security. \*Excluding money market fund holdings. Utilities stocks tend to be sensitive to interest rate movements because they generally pay dividends and can be particularly attractive when interest rates are low. Indeed, yields of many utility stocks generally supported utilities stocks somewhat as interest rates declined in 2008, causing the utilities sector to outperform the broad market as measured by the S&P 500 Index.

During the year, the wireless telecommunication services industry held up better than other industries in which the Fund was invested. The Fund also benefited from a litigation settlement during the year. Additionally, our cash position, which averaged 2.55% for the year and fell within our typical allocation, was a positive contributor against severe market volatility. On the other hand, Fund holdings in the electric utilities and multi-utilities industries generally detracted from performance.

Electric utility **Southern Company** was the largest equity contributor to Fund performance during the year. Although Southern operates as a regulated utility, it benefited from its positioning in states that offer fairly stable regulatory environments and growing customer bases. Telecom provider **FairPoint Communications**, another holding which was a top contributor to performance in 2008, benefited from the completion of its merger with **Verizon Communications'** (also a Fund holding) landline operations in northern New England.

On the other hand, **Williams Companies**, **EI Paso** and **Questar** – holdings leveraged to natural gas – were the largest detractors from Fund performance for the year. These gas companies are largely exploration and production driven. Therefore, their growth depends on successful production of new and existing wells, as well as the price of natural gas, both of which fell during the year.

Following recent events, we were less concerned about the possible repeal of the dividend tax cut as significant tax hikes seemed unlikely in the near term given economic uncertainty. Interest rate and inflationary trends, however, presented a cause for concern going forward.

Because carbon dioxide emissions remain a popular topic with legislators, we positioned the Fund with more exposure to natural gas and nuclear power companies. Natural gas has one-third the carbon dioxide emissions of coal. Nuclear power generation produces no greenhouse gas emissions. During the year, we purchased **Oneok**, which processes and distributes natural gas to Oklahoma, Kansas and Texas, and **Public Service Enterprise** Group, which supplies nuclear power to the Northeast and Mid-Atlantic markets. Additionally, we continued to maintain our focus on holding what we believed were attractively priced stocks of strong companies with reasonable growth prospects and attractive dividend yields.

As always, we thank you for your continued investment in AIM V.I. Utilities Fund.

1 Year	-32.51

Series II shares' inception date is April 30, 2004. Returns since that date are historical. All other returns are the blended returns of the historical performance of Series II shares since their inception and the restated historical performance of Series I shares (for periods prior to inception of Series II shares) adjusted to reflect the Rule 12b-1 fees applicable to Series II shares. The inception date of Series I shares is December 30, 1994.

The performance of the Fund's Series I and Series II share classes will differ primarily due to different class expenses. changes in value during the early years shown in the chart. The vertical axis, the one that indicates the dollar value of an investment, is constructed with each segment representing a percent change in the value of the investment. In this chart, each segment represents a

The performance data quoted represent past performance and cannot guarantee comparable future results; current performance may be lower or higher. Please contact your variable product issuer or financial advisor for the most recent month-end variable product performance. Performance figures reflect Fund expenses, reinvested distributions and changes in net asset value. Investment return and principal value will fluctuate so that you may have a gain or loss when you sell shares.

The net annual Fund operating expense ratio set forth in the most recent Fund prospectus as of the date of this report for Series I and Series II shares was 0.93% and 1.18%, respectively.<sup>1</sup> The total annual Fund operating expense ratio set forth in the most recent Fund prospectus as of the date of this report for Series I and Series II shares was 0.94% and 1.19%, respectively. The expense ratios presented above may vary from the expense ratios presented in other sections of this report that are based on expenses incurred during the period covered by this report.

doubling, or 100% change, in the value of the investment. In other words, the space between \$5,000 and \$10,000 is the same size as the space between \$10,000 and \$20,000, and so on.

AIM V.I. Utilities Fund, a series portfolio of AIM Variable Insurance Funds, is currently offered through insurance companies issuing variable products. You cannot purchase shares of the Fund directly. Performance figures given represent the Fund and are not intended to reflect actual variable product values. They do not reflect sales charges, expenses and fees assessed in connection with a variable product. Sales charges, expenses and fees, which are determined by the variable product issuers, will vary and will lower the total return.

The most recent month-end performance data at the Fund level, excluding variable product charges, is available on the Invesco Aim automated information line, 866 702-4402. As mentioned above, for the most recent month-end performance including variable product charges, please contact your variable product issuer or financial advisor.

 Total annual operating expenses less any contractual fee waivers and/or expense reimbursements by the advisor in effect through at least April 30, 2010. See current prospectus for more information.

#### AIM V.I. Utilities Fund's investment objectives are capital growth and income.

Unless otherwise stated, information presented in this report is as of December 31, 2008, and is based on total net assets.

■ Unless otherwise noted, all data provided by Invesco Aim.

#### Principal risks of investing in the Fund

Since a large percentage of the Fund's assets may be invested in securities of a limited number of companies, each investment has a greater effect on the Fund's overall performance, and any change in the value of those securities could significantly affect the value of your investment in the Fund.

Prices of equity securities change in response to many factors, including the historical and prospective earnings of the issuer, the value of its assets, general economic conditions, interest rates, investor perceptions and market liquidity.

Foreign securities have additional risks, including exchange rate changes, political and economic upheaval, relative lack of information, relatively low market liquidity, and the potential lack of strict financial and accounting controls and standards.

There is no guarantee that the investment techniques and risk analysis used by the Fund's portfolio managers will produce the desired results.

The prices of securities held by the Fund may decline in response to market risks.

The Fund's investments are concentrated in a comparatively narrow seqment of the economy. Consequently, the Fund may tend to be more volatile than other mutual funds, and the value of the Fund's investments may tend to rise and fall more rapidly.

Government regulation, difficulty in obtaining adequate financing and investment return, environmental issues, fuel prices for generation of electricity, natural gas availability, power marketing and trading risks, and risks associated with nuclear power facilities may adversely affect the market value of the Fund's holdings.

Although the Fund's return during certain periods was positively affected by its investments in initial public offerings (IPOs), there can be no assurance that the Fund will have favorable IPO investment opportunities in the future.

#### About indexes used in this report

The S&P 500<sup>®</sup> Index is a market capitalization-weighted index covering all major areas of the U.S. economy. It is not the 500 largest companies, but rather the most widely held 500 companies chosen with respect to market size, liquidity, and their industry.

The Lipper VUF Utility Funds Category Average represents an average of all of the variable insurance underlying funds in the Lipper Utility Funds category. These funds invest primarily in the equity securities of domestic and foreign companies providing utilities.

The Fund is not managed to track the performance of any particular index, including the indexes defined here, and consequently, the performance of the Fund may deviate significantly from the performance of the indexes.

A direct investment cannot be made in an index. Unless otherwise indicated. index results include reinvested dividends, and they do not reflect sales charges. Performance of an index of funds reflects fund expenses; performance of a market index does not.

#### Other information

The Chartered Financial Analyst<sup>®</sup> (CFA<sup>®</sup>) designation is a globally recognized standard for measuring the competence and integrity of investment professionals.

The returns shown in management's discussion of Fund performance are based on net asset values calculated for shareholder transactions. Generally accepted accounting principles require adjustments to be made to the net assets of the Fund at period end for financial reporting purposes, and as such, the net asset values for shareholder transactions and the returns based on those net asset values may differ from the net asset values and returns reported in the Financial Highlights. Additionally, the returns and net asset values shown throughout this report are at the Fund level only and do not include variable product issuer charges. If such charges were included, the total returns would be lower.

Industry classifications used in this report are generally according to the Global Industry Classification Standard, which was developed by and is the exclusive property and a service mark of MSCI Inc. and Standard & Poor's.

### **Notes to Financial Statements**

December 31, 2008

#### **NOTE 1—Significant Accounting Policies**

AIM V.I. Utilities Fund (the "Fund") is a series portfolio of AIM Variable Insurance Funds (the "Trust"). The Trust is a Delaware statutory trust registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as an open-end series management investment company consisting of twenty-one separate portfolios, (each constituting a "Fund"). The assets, liabilities and operations of each portfolio are accounted for separately. Information presented in these financial statements pertains only to the Fund. Matters affecting each Fund or class will be voted on exclusively by the shareholders of such Fund or class. Current Securities and Exchange Commission ("SEC") guidance, however, requires participating insurance companies offering separate accounts to vote shares proportionally in accordance with the instructions of the contract owners whose investments are funded by shares of each Fund or class.

The Fund's investment objectives are capital growth and income.

The Fund currently offers two classes of shares, Series I and Series II, both of which are offered to insurance company separate accounts funding variable annuity contracts and variable life insurance policies ("variable products").

The following is a summary of the significant accounting policies followed by the Fund in the preparation of its financial statements.

A. Security Valuations — Securities, including restricted securities, are valued according to the following policy.

A security listed or traded on an exchange (except convertible bonds) is valued at its last sales price or official closing price as of the close of the customary trading session on the exchange where the security is principally traded, or lacking any sales or official closing price on a particular day, the security may be valued at the closing bid price on that day. Securities traded in the over-the-counter market are valued based on prices furnished by independent pricing services or market makers. When such securities are valued by an independent pricing service they may be considered fair valued. Futures contracts are valued at the final settlement price set by an exchange on which they are principally traded. Listed options are valued at the mean between the last bid and the ask prices from the exchange on which they are principally traded. Options not listed on an exchange are valued by an independent source at the mean between the last bid and ask prices. For purposes of determining net asset value per share, futures and option contracts generally are valued 15 minutes after the close of the customary trading session of the New York Stock Exchange ("NYSE").

Investments in open-end and closed-end registered investment companies that do not trade on an exchange are valued at the end of day net asset value per share. Investments in open-end and closed-end registered investment companies that trade on an exchange are valued at the last sales price or official closing price as of the close of the customary trading session on the exchange where the security is principally traded.

Debt obligations (including convertible bonds) and unlisted equities are fair valued using an evaluated quote provided by an independent pricing service. Evaluated quotes provided by the pricing service may be determined without exclusive reliance on quoted prices, and may reflect appropriate factors such as institution-size trading in similar groups of securities, developments related to specific securities, dividend rate, yield, quality, type of issue, coupon rate, maturity, individual trading characteristics and other market data. Short-term obligations, including commercial paper, having 60 days or less to maturity are recorded at amortized cost which approximates value. Debt securities are subject to interest rate and credit risks. In addition, all debt securities involve some risk of default with respect to interest and/or principal payments.

Foreign securities (including foreign exchange contracts) are converted into U.S. dollar amounts using the applicable exchange rates as of the close of the NYSE. If market quotations are available and reliable for foreign exchange traded equity securities, the securities will be valued at the market quotations. Because trading hours for certain foreign securities end before the close of the NYSE, closing market quotations may become unreliable. If between the time trading ends on a particular security and the close of the customary trading session on the NYSE, events occur that are significant and may make the closing price unreliable, the Fund may fair value the security. If the event is likely to have affected the closing price of the security, the security will be valued at fair value in good faith using procedures approved by the Board of Trustees. Adjustments to closing prices to reflect fair value may also be based on a screening process of an independent pricing service to indicate the degree of certainty, based on historical data, that the closing price in the principal market where a foreign security trades is not the current value as of the close of the NYSE. Foreign securities meeting the approved degree of certainty that the price is not reflective of current value will be priced at the indication of fair value and may include information relating to sector indices, American Depositary Receipts and domestic and foreign index futures. Foreign securities may have additional risks including exchange rate changes, potential for sharply devalued currencies and high inflation, political and economical upheaval, the relative lack of issuer information, relatively low market liquidity and the potential lack of strict financial and accounting controls and standards.

Securities for which market prices are not provided by any of the above methods may be valued based upon quotes furnished by independent sources and are valued at the last bid price in the case of equity securities and in the case of debt obligations, the mean between the last bid and asked prices.

Securities for which market quotations are not readily available or are unreliable are valued at fair value as determined in good faith by or under the supervision of the Trust's officers following procedures approved by the Board of Trustees. Issuer specific events, market trends, bid/ask quotes of brokers and information providers and other market data may be reviewed in the course of making a good faith determination of a security's fair value.

Valuations change in response to many factors including the historical and prospective earnings of the issuer, the value of the issuer's assets, general economic conditions, interest rates, investor perceptions and market liquidity. Because of the inherent uncertainties of valuation, the values reflected in the financial statements may materially differ from the value received upon actual sale of those investments.

**B.** Securities Transactions and Investment Income — Securities transactions are accounted for on a trade date basis. Realized gains or losses on sales are computed on the basis of specific identification of the securities sold. Interest income is recorded on the accrual basis from settlement date. Dividend income is recorded on the ex-dividend date.

The Fund may periodically participate in litigation related to Fund investments. As such, the Fund may receive proceeds from litigation settlements. Any proceeds received are included in the Statement of Operations as realized gain/loss for investments no longer held and as unrealized gain/loss for investments still held.

Brokerage commissions and mark ups are considered transaction costs and are recorded as an increase to the cost basis of securities purchased and/or a reduction of proceeds on a sale of securities. Such transaction costs are included in the determination of realized and unrealized gain (loss) from investment securities reported in the Statement of Operations and the Statement of Changes in Net Assets and the realized and unrealized net gains (losses) on securities per share in the Financial Highlights. Transaction costs are included in the calculation of the Fund's net asset value and, accordingly, they reduce the Fund's total returns. These transaction costs are not considered operating expenses and are not reflected in net investment income reported in the Statement of Changes in Net Assets, or the net investment income per share and ratios of expenses and net investment income reported in the Financial Highlights, nor are they limited by any expense limitation arrangements between the Fund and the advisor.

The Fund allocates income and realized and unrealized capital gains and losses to a class based on the relative net assets of each class. **C. Country Determination** — For the purposes of making investment selection decisions and presentation in the Schedule of Investments, the investment advisor may determine the country in which an issuer is located and/or credit risk exposure based on various factors. These factors include the laws of the country under which the issuer is organized, where the issuer maintains a principal office, the country in which the issuer derives 50% or more of its total revenues and the country that has the primary market for the issuer's securities, as well as other criteria. Among the other criteria that may be evaluated for making this determination are the country in which the issuer maintains 50% or more of its assets, the type of security, financial guarantees and enhancements, the nature of the collateral and the sponsor organization. Country of issuer and/or credit risk exposure has been determined to be the United States of America unless otherwise noted.

- **D. Distributions** Distributions from income and net realized capital gain, if any, are generally paid to separate accounts of participating insurance companies annually and recorded on ex-dividend date.
- **E.** Federal Income Taxes The Fund intends to comply with the requirements of Subchapter M of the Internal Revenue Code necessary to qualify as a regulated investment company and to distribute substantially all of the Fund's taxable earnings to shareholders. As such, the Fund will not be subject to federal income taxes on otherwise taxable income (including net realized capital gain) that is distributed to shareholders. Therefore, no provision for federal income taxes is recorded in the financial statements.

The Fund files tax returns in the U.S. Federal jurisdiction and certain other jurisdictions. Generally the Fund is subject to examinations by such taxing authorities for up to three years after the filing of the return for the tax period.

- **F. Expenses** Fees provided for under the Rule 12b-1 plan of a particular class of the Fund and which are directly attributable to that class are charged to the operations of such class. All other expenses are allocated among the classes based on relative net assets.
- **G. Accounting Estimates** The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period including estimates and assumptions related to taxation. Actual results could differ from those estimates by a significant amount.
- **H. Indemnifications** Under the Trust's organizational documents, each Trustee, officer, employee or other agent of the Trust (including the Trust's investment manager) is indemnified against certain liabilities that may arise out of performance of their duties to the Fund. Additionally, in the normal course of business, the Fund enters into contracts that contain a variety of indemnification clauses. The Fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund that have not yet occurred. The risk of material loss as a result of such indemnification claims is considered remote.
- I. Other Risks The Fund's investments are concentrated in a comparatively narrow segment of the economy. Consequently, the Fund may tend to be more volatile than other mutual funds, and the value of the Fund's investments may tend to rise and fall more rapidly.

The Fund may invest a large percentage of assets in securities of a limited number of companies, such that each investment may have a greater effect on the Fund's overall performance, and any change in the value of those securities could significantly affect the value of your investment in the Fund. Government regulation, difficulties in obtaining adequate financing and investment return, environmental issues, prices of fuel for generation of electricity, availability of natural gas, risks associated with power marketing and trading, and risks associated with nuclear power facilities may adversely affect the market value of the Fund's holdings.

- J. Securities Lending The Fund may lend portfolio securities having a market value up to one-third of the Fund's total assets. Such loans are secured by collateral equal to no less than the market value of the loaned securities determined daily by the securities lending provider. Such collateral will be cash or debt securities issued or guaranteed by the U.S. Government or any of its sponsored agencies. Cash collateral received in connection with these loans is invested in short-term money market instruments or affiliated money market funds and is shown as such on the Schedule of Investments. It is the Fund's policy to obtain additional collateral from or return excess collateral to the borrower by the end of the next business day, following the valuation date of the securities loaned. Therefore, the value of the collateral held may be temporarily less than the value of the securities on loan. Lending securities entails a risk of loss to the Fund if and to the extent that the market value of the securities loaned were to increase and the borrower did not increase the collateral accordingly, and the borrower fails to return the securities. Upon the failure of the borrower to return the securities, collateral may be liquidated and the securities may be purchased on the open market to replace the loaned securities. The Fund could experience delays and costs in gaining access to the collateral. The Fund bears the risk of any deficiency in the amount of the collateral available for return to the borrower due to any loss on the collateral invested. Dividends received on cash collateral investments for securities lending transactions, which are net of compensation to counterparties, is included in Dividends from affiliates on the Statement of Operations. The aggregate value of securities out on loan is shown as a footnote on the Statement of Assets and Liabilities, if any.
- K. Foreign Currency Translations Foreign currency is valued at the close of the NYSE based on quotations posted by banks and major currency dealers. Portfolio securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollar amounts at date of valuation. Purchases and sales of portfolio securities (net of foreign taxes withheld on disposition) and income items denominated in foreign currencies are translated into U.S. dollar amounts on the respective dates of such transactions. The Fund does not separately account for the portion of the results of operations

resulting from changes in foreign exchange rates on investments and the fluctuations arising from changes in market prices of securities held. The combined results of changes in foreign exchange rates and the fluctuation of market prices on investments (net of estimated foreign tax withholding) are included with the net realized and unrealized gain or loss from investments in the Statement of Operations. Reported net realized foreign currency gains or losses arise from (i) sales of foreign currencies, (ii) currency gains or losses realized between the trade and settlement dates on securities transactions, and (iii) the difference between the amounts of dividends, interest, and foreign currency gains arise from changes in the fair values of assets and liabilities, other than investments in securities at fiscal period end, resulting from changes in exchange rates.

The Fund may invest in foreign securities which may be subject to foreign taxes on income, gains on investments or currency repatriation, a portion of which may be recoverable.

L. Foreign Currency Contracts — A foreign currency contract is an obligation to purchase or sell a specific currency for an agreed-upon price at a future date. The Fund may enter into a foreign currency contract to attempt to minimize the risk to the Fund from adverse changes in the relationship between currencies. The Fund may also enter into a foreign currency contract for the purchase or sale of a security denominated in a foreign currency in order to "lock in" the U.S. dollar price of that security. Fluctuations in the value of these contracts are recorded as unrealized appreciation (depreciation) until the contracts are closed. When these contracts are closed, realized gains (losses) are recorded. Realized and unrealized gains and losses on these contracts are included in the Statement of Operations. The Fund could be exposed to risk, which may be in excess of the amount reflected in the Statement of Assets and Liabilities, if counterparties to the contracts are unable to meet the terms of their contracts or if the value of the foreign currency changes unfavorably.

#### NOTE 2—Advisory Fees and Other Fees Paid to Affiliates

The Trust has entered into a master investment advisory agreement with Invesco Aim Advisors, Inc. (the "Advisor" or "Invesco Aim"). Under the terms of the investment advisory agreement, the Fund pays an advisory fee to the Advisor based on the annual rate of 0.60% of the Fund's average daily net assets.

Under the terms of a master sub-advisory agreement approved by shareholders of the Fund, effective May 1, 2008, between the Advisor and each of Invesco Asset Management Deutschland GmbH, Invesco Asset Management Limited, Invesco Asset Management (Japan) Limited, Invesco Australia Limited, Invesco Global Asset Management (N.A.), Inc., Invesco Hong Kong Limited, Invesco Institutional (N.A.), Inc., Invesco Senior Secured Management, Inc. and Invesco Trimark Ltd. (collectively, the "Affiliated Sub-Advisors") the Advisor, not the Fund, may pay 40% of the fees paid to the Advisor to any such Affiliated Sub-Advisor(s) that provide discretionary investment management services to the Fund based on the percentage of assets allocated to such Sub-Advisor(s).

The Advisor has contractually agreed to waive advisory fees and/or reimburse expenses to the extent necessary to limit total annual operating expenses (excluding certain items discussed below) of Series I shares to 0.93% and Series II shares to 1.18% of average daily net assets, through at least April 30, 2010. In determining the advisor's obligation to waive advisory fees and/or reimburse expenses, the following expenses are not taken into account, and could cause the net annual operating expenses to exceed the numbers reflected above: (i) interest; (ii) taxes; (iii) dividend expense on short sales; (iv) extraordinary items; (v) expenses related to a merger or reorganization, as approved by the Fund's Board of Trustees; and (vi) expenses that the Fund has incurred but did not actually pay because of an expense offset arrangement. Currently, in addition to the expense reimbursement arrangement with Invesco Ltd. ("Invesco") described more fully below, the only expense offset arrangements from which the Fund may benefit are in the form of credits that the Fund receives from banks where the Fund or its transfer agent has deposit accounts in which it holds uninvested cash. These credits are used to pay certain expenses incurred by the Fund.

Also, the Advisor has contractually agreed, through at least April 30, 2010, to waive the advisory fee payable by the Fund in an amount equal to 100% of the net advisory fees the Advisor receives from the affiliated money market funds on investments by the Fund of uninvested cash (excluding investments of cash collateral from securities lending) in such affiliated money market funds.

For the year ended December 31, 2008, the Advisor waived advisory fees of \$32,119.

At the request of the Trustees of the Trust, Invesco agreed to reimburse expenses incurred by the Fund in connection with market timing matters in the AIM Funds, which may include legal, audit, shareholder reporting, communications and trustee expenses. For the year ended December 31, 2008, Invesco did not reimburse any expenses.

The Trust has entered into a master administrative services agreement with Invesco Aim pursuant to which the Fund has agreed to pay Invesco Aim a fee for costs incurred in providing accounting services and fund administrative services to the Fund and to reimburse Invesco Aim for administrative services fees paid to insurance companies that have agreed to provide services to the participants of separate accounts. These administrative services provided by the insurance companies may include, among other things: the printing of prospectuses, financial reports and proxy statements and the delivery of the same to existing participants; the maintenance of master accounts; the facilitation of purchases and redemptions requested by the participants; and the servicing of participants' accounts. Pursuant to such agreement, for the year ended December 31, 2008, Invesco Aim was paid \$50,000 for accounting and fund administrative services and reimbursed \$290,852 for services provided by insurance companies.

The Trust has entered into a transfer agency and service agreement with Invesco Aim Investment Services, Inc. ("IAIS") pursuant to which the Fund has agreed to pay IAIS a fee for providing transfer agency and shareholder services to the Fund and reimburse IAIS for certain expenses incurred by IAIS in the course of providing such services. For the year ended December 31, 2008, expenses incurred under the agreement are shown in the Statement of Operations as transfer agent fees.

The Trust has entered into a master distribution agreement with Invesco Aim Distributors, Inc. ("IADI") to serve as the distributor for the Fund. The Trust has adopted a plan pursuant to Rule 12b-1 under the 1940 Act with respect to the Fund's Series II shares (the "Plan"). The Fund, pursuant to the Plan, pays IADI compensation at the annual rate of 0.25% of the Fund's average daily net assets of Series II shares. Of the Plan payments, up to 0.25% of the average daily net assets of the Series II shares may be paid to insurance companies who furnish continuing personal shareholder services to customers who purchase and own Series II shares of the Fund. For the year ended December 31, 2008, expenses incurred under the Plan are detailed in the Statement of Operations as distribution fees.

Certain officers and trustees of the Trust are officers and directors of Invesco Aim, IAIS and/or IADI.

#### **NOTE 3—Supplemental Information**

The Fund adopted the provisions of Statement of Financial Accounting Standards No. 157, "Fair Value Measurements" (SFAS 157), effective with the beginning of the Fund's fiscal year. SFAS 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SFAS 157 establishes a hierarchy that prioritizes the inputs to valuation methods giving the highest priority to readily available unadjusted quoted prices in an active market for identical assets (Level 1) and the lowest priority to significant unobservable inputs (Level 3) generally when market prices are not readily available or are unreliable. Based on the valuation inputs the securities or other investments are tiered into one of three levels. Changes in valuation methods may result in transfers in or out of an investment's assigned level,

Level 1 — Prices are determined using quoted prices in an active market for identical assets.

Level 2 — Prices are determined using other significant observable inputs. Observable inputs are inputs that other market participants may use in pricing a security. These may include quoted prices for similar securities, interest rates, prepayment speeds, credit risk and others.

Level 3 — Prices are determined using significant unobservable inputs. In situations where quoted prices or observable inputs are unavailable (for example, when there is little or no market activity for an investment at the end of the period), unobservable inputs may be used. Unobservable inputs reflect the Fund's own assumptions about the factors market participants would use in determining fair value of the securities or instruments and would be based on the best available information.

Below is a summary of the tiered valuation input levels, as of the end of the reporting period, December 31, 2008. The level assigned to the securities valuations may not be an indication of the risk or liquidity associated with investing in those securities. Because of the inherent uncertainties of valuation, the values reflected in the financial statements may materially differ from the value received upon actual sale of those investments.

Input Level	Investments in Securities
Level 1	\$77,738,204
Level 2	4,686,378
Level 3	_
	\$82,424,582

#### NOTE 4—Trustees' and Officers' Fees and Benefits

"Trustees' and Officers' Fees and Benefits" include amounts accrued by the Fund to pay remuneration to certain Trustees and Officers of the Fund. Trustees have the option to defer compensation payable by the Fund, and "Trustees' and Officers' Fees and Benefits" also include amounts accrued by the Fund to fund such deferred compensation amounts. Those Trustees who defer compensation have the option to select various AIM Funds in which their deferral accounts shall be deemed to be invested. Finally, certain current Trustees are eligible to participate in a retirement plan that provides for benefits to be paid upon retirement to Trustees over a period of time based on the number of years of service. The Fund may have certain former Trustees who also participate in a retirement plan and receive benefits under such plan. "Trustees' and Officers' Fees and Benefits" include amounts accrued by the Fund to fund such retirement benefits. Obligations under the deferred compensation and retirement plans represent unsecured claims against the general assets of the Fund.

During the year ended December 31, 2008, the Fund paid legal fees of \$3,432 for services rendered by Kramer, Levin, Naftalis & Frankel LLP as counsel to the Independent Trustees. A member of that firm is a Trustee of the Trust.

#### **NOTE 5—Cash Balances**

The Fund is permitted to temporarily carry a negative or overdrawn balance in its account with The State Street Bank and Trust Company, the custodian bank. To compensate the custodian bank for such overdrafts, the overdrawn Fund may either (i) leave funds as a compensating balance in the account so the custodian bank can be compensated by earning the additional interest; or (ii) compensate by paying the custodian bank at a rate agreed upon by the custodian bank and Invesco Aim, not to exceed the contractually agreed upon rate.

#### NOTE 6—Distributions to Shareholders and Tax Components of Net Assets

#### Tax Character of Distributions to Shareholders Paid During the Years Ended December 31, 2008 and 2007:

	2008	2007
Ordinary income	\$ 3,099,788	\$ 3,761,176
Long-term capital gain	11,182,329	6,594,335
Total distributions	\$14,282,117	\$10,355,511

#### Tax Components of Net Assets at Period-End:

	2008
Undistributed ordinary income	\$ 3,213,145
Undistributed long-term gain	810,064
Net unrealized appreciation (depreciation) — investments	(225,009)
Net unrealized appreciation — other investments	4,935
Temporary book/tax differences	(51,285)
Capital loss carryforward	(919,643)
Post-October deferrals	(173,340)
Shares of beneficial interest	79,762,001
Total net assets	\$82,420,868

The difference between book-basis and tax-basis unrealized appreciation (depreciation) is due to differences in the timing of recognition of gains and losses on investments for tax and book purposes. The Fund's net unrealized appreciation (depreciation) difference is attributable primarily to wash sales.

The temporary book/tax differences are a result of timing differences between book and tax recognition of income and/or expenses. The Fund's temporary book/tax differences are the result of the trustee deferral of compensation and retirement plan benefits.

Capital loss carryforward is calculated and reported as of a specific date. Results of transactions and other activity after that date may affect the amount of capital loss carryforward actually available for the Fund to utilize. The ability to utilize capital loss carryforward in the future may be limited under the Internal Revenue Code and related regulations based on the results of future transactions.

The Fund utilized \$919,643 of capital loss carryforward in the current period to offset net realized capital gain for federal income tax purposes. The Fund has a capital loss carryforward as of December 31, 2008 which expires as follows:

Expiration	Capital Loss Carryforward*
December 31, 2009	\$919,643

\* Capital loss carryforward as of the date listed above is reduced for limitations, if any, to the extent required by the Internal Revenue Code.

#### **NOTE 7—Investment Securities**

The aggregate amount of investment securities (other than short-term securities, U.S. Treasury obligations and money market funds, if any) purchased and sold by the Fund during the year ended December 31, 2008 was \$18,942,992 and \$41,289,520, respectively. Cost of investments on a tax basis includes the adjustments for financial reporting purposes as of the most recently completed Federal income tax reporting period-end.

#### Unrealized Appreciation (Depreciation) of Investment Securities on a Tax Basis

Aggregate unrealized appreciation of investment securities	\$ 11,412,323
Aggregate unrealized (depreciation) of investment securities	(11,637,332)
Net unrealized appreciation (depreciation) of investment securities	\$ (225,009)

Cost of investments for tax purposes is \$82,649,591.

#### **NOTE 8—Reclassification of Permanent Differences**

Primarily as a result of differing book/tax treatment of foreign currency transactions, on December 31, 2008, undistributed net investment income was decreased by \$7,610 and undistributed net realized gain (loss) was increased by \$7,610. This reclassification had no effect on the net assets of the Fund.

		Summary of S	Share Activit	:y		
		Year ended December 31,				
	20	08 <sup>(a)</sup>	20	2007		
	Shares	Amount	Shares	Amount		
Sold:

Reacquired:						
Series I	(2,890,405)	(56,861,198)	(2,965,731)	(70,076,626)		
Series II	(58,398)	(1,206,774)	(35,116)	(838,078)		
Net decrease in share activity	(475,163)	\$(14,236,839)	(30,990)	\$ (316,660)		

(a) There are entities that are record owners of more than 5% of the outstanding shares of the Fund and in the aggregate own 60% of the outstanding shares of the Fund. The Fund and the Fund's principal underwriter or advisor, are parties to participation agreements with these entities whereby these entities sell units of interest in separate accounts funding variable products that are invested in the Fund. The Fund, Invesco Aim and/or Invesco Aim affiliates may make payments to these entities, which are considered to be related to the Fund, for providing services to the Fund, Invesco Aim and or Invesco Aim affiliates including but not limited to services such as, securities brokerage, third party record keeping and account servicing and administrative services. The Trust has no knowledge as to whether all or any portion of the shares owned of record by these entities are also owned beneficially.

#### **NOTE 10—Financial Highlights**

The following schedule presents financial highlights for a share of the Fund outstanding throughout the periods indicated.

	Net asset value, beginning of period	Net investment income <sup>(a)</sup>	Net gains on securities (both realized and unrealized)	Total from investment operations	Dividends from net investment income	from net	Total Distributions	Net asset value, end of period		Net assets, end of period (000s omitted)	assets with fee waivers and/or expenses	Ratio of expenses to average net assets without fee waivers and/or expenses absorbed	investment income to average	Portfolio
Series I														
Year ended 12/31/08	\$23.97	\$0.52	\$(8.36)	\$(7.84)	\$(0.59)	\$(2.16)	\$(2.75)	\$13.38	(32.35)%	\$ 80,704	0.93% <sup>(d)</sup>	0.96% <sup>(d)</sup>	2.53% <sup>(d)</sup>	15%
Year ended 12/31/07	21.23	0.47	3.94	4.41	(0.47)	(1.20)	(1.67)	23.97	20.64	155,748	0.93	0.94	1.97	30

Series II														
Year ended 12/31/08	23.80	0.46	(8.28)	(7.82)	(0.52)	(2.16)	(2.68)	13.30	(32.51)	1,717	1.18 <sup>(d)</sup>	1.21 <sup>(d)</sup>	2.28 <sup>(d)</sup>	15
Year ended 12/31/07	21.12	0.41	3.91	4.32	(0.44)	(1.20)	(1.64)	23.80	20.32	3,293	1.18	1.19	1.72	30
Year ended 12/31/06	17.76	0.42	4.06	4.48	(0.69)	(0.43)	(1.12)	21.12	25.25	2,462	1.18	1.21	2.15	38
Year ended 12/31/05	15.57	0.38	2.20	2.58	(0.39)	—	(0.39)	17.76	16.55	801	1.18	1.21	2.24	49
Year ended 12/31/04 <sup>(e)</sup>	12.63	0.26	2.68	2.94	—	—	—	15.57	23.28	602	1.28 <sup>(f)</sup>	1.28 <sup>(f)</sup>	2.82 <sup>(f)</sup>	52

(a) Calculated using average shares outstanding. (b)

Includes adjustments in accordance with accounting principles generally accepted in the United States of America and as such, the net asset value for financial reporting purposes and the returns based upon those net asset values may differ from the net asset value and returns for shareholder transactions. Total returns are not annualized for periods less than one year, if applicable and do not reflect charges assessed in connection with a variable product, which if included would reduce total returns.

(c) Portfolio turnover is calculated at the fund level and is not annualized for periods less than one year, if applicable. (d)

Ratios are based on average daily net assets (000's omitted) of \$124,765 and \$2,377 for Series I and Series II, respectively. (e)

Commencement date of April 30, 2004. (f)

Annualized

#### NOTE 11—Legal Proceedings

Terms used in the Legal Proceedings Note are defined terms solely for the purpose of this note.

#### **Pending Litigation and Regulatory Inquiries**

Civil lawsuits, including purported class action and shareholder derivative suits, have been filed against certain of the AIM Funds, Invesco Funds Group, Inc. ("IFG"), Invesco Aim, IADI and/or related entities and individuals alleging that the defendants permitted improper market timing and related activity in the AIM Funds.

These lawsuits allege as theories of recovery, depending on the lawsuit, violations of various provisions of the Federal and state securities laws and the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), negligence, breach of fiduciary duty and/or breach of contract. These lawsuits seek remedies that include, depending on the lawsuit, damages, restitution, injunctive relief, imposition of a constructive trust, removal of certain directors and/or employees, various corrective measures under ERISA, rescission of certain AIM Funds' advisory agreements and/or distribution plans and recovery of all fees paid.

All lawsuits based on allegations of market timing, late trading and related issues were transferred to the United States District Court for the District of Maryland (the "MDL Court"). Pursuant to an Order of the MDL Court, plaintiffs in these lawsuits consolidated their claims for pre-trial purposes into three amended complaints against various Invesco Aim — and IFG-related parties: (i) a Consolidated Amended Class Action Complaint purportedly brought on behalf of shareholders of the AIM Funds; (ii) a Consolidated Amended Fund Derivative Complaint purportedly brought on behalf of the AIM Funds; and (iii) an Amended Class Action Complaint for Violations of ERISA purportedly brought on behalf of participants in the Invesco 401(k) plan. Based on orders issued by the MDL Court, all claims asserted against the AIM Funds that have been transferred to the MDL Court have been dismissed, although certain Funds remain nominal defendants in the Consolidated Amended Fund Derivative Complaint. On January 5, 2008, the parties reached an agreement in principle to settle both the Consolidated Amended Class Action Complaint and Consolidated Amended Fund Derivative Complaint, subject to the MDL Court approval. Individual class members have the right to object. On December 15, 2008, the parties reached an agreement in principle to settle members have the right to object to the MDL Court approval. Individual class members have the right to complex to the MDL Court approval. Individual class members have the right to complex to the MDL Court approval. Individual class members have the right context to the MDL Court approval. Individual class members have the right to complex to the settlement; however, the parties agreed that certain limited changes to benefit plans and participants' accounts would be made.

IFG, Invesco Aim, IADI and/or related entities and individuals have received inquiries from numerous regulators in the form of subpoenas or other oral or written requests for information and/or documents related to one or more of the following issues, among others, some of which concern one or more AIM Funds: market timing activity, late trading, fair value pricing, excessive or improper advisory and/or distribution fees, mutual fund sales practices, including revenue sharing and directed-brokerage arrangements, investments in securities of other registered investment companies, contractual plans, issues related to Section 529 college savings plans and procedures for locating lost security holders. IFG, Invesco Aim and IADI have advised the Fund that they are providing full cooperation with respect to these inquiries. Regulatory actions and/or additional civil lawsuits related to these or other issues may be filed against the AIM Funds, IFG, Invesco Aim and/or related entities and individuals in the future.

Management of Invesco Aim and the Fund believe that the outcome of the Pending Litigation and Regulatory Inquiries described above will have no material adverse affect on the Fund or on the ability of Invesco Aim and IADI to provide ongoing services to the Fund.

## **Report of Independent Registered Public Accounting Firm**

To the Board of Trustees of AIM Variable Insurance Funds and Shareholders of AIM V. I. Utilities Fund:

In our opinion, the accompanying statement of assets and liabilities, including the schedule of investments, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of AIM V.I. Utilities Fund (one of the funds constituting AIM Variable Insurance Funds, hereafter referred to as the "Fund") at December 31, 2008, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and the financial highlights for each of the periods indicated, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statement, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities at December 31, 2008 by correspondence with the custodian provide a reasonable basis for our opinion.

## Calculating your ongoing Fund expenses

#### Example

As a shareholder of the Fund, you incur ongoing costs, including management fees; distribution and/or service fees (12b-1); and other Fund expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with ongoing costs of investing in other mutual funds. The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period July 1, 2008, through December 31, 2008.

The actual and hypothetical expenses in the examples below do not represent the effect of any fees or other expenses assessed in connection with a variable product; if they did, the expenses shown would be higher while the ending account values shown would be lower.

#### **Actual expenses**

The table below provides information about actual account values and actual expenses. You may use the information in this table, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the table under the heading entitled "Actual Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

#### Hypothetical example for comparison purposes

The table below also provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return.

The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs. Therefore, the hypothetical information is useful in comparing ongoing costs, and will not help you determine the relative total costs of owning different funds.

		ACTL	JAL	HYPOTH (5% annual re expen		
Class	Beginning Account Value (07/01/08)	Ending Account Value (12/31/08) <sup>1</sup>	Expenses Paid During Period <sup>2</sup>	Ending Account Value (12/31/08)	Expenses Paid During Period <sup>2</sup>	Annualized Expense Ratio
Series I	\$1,000.00	\$697.40	\$3.97	\$1,020.46	\$4.72	0.93%
Series II	1,000.00	696.50	5.03	1,019.20	5.99	1.18

<sup>1</sup> The actual ending account value is based on the actual total return of the Fund for the period July 1, 2008, through December 31, 2008, after actual expenses and will differ from the hypothetical ending account value which is based on the Fund's expense ratio and a hypothetical annual return of 5% before expenses.

<sup>2</sup> Expenses are equal to the Fund's annualized expense ratio as indicated above multiplied by the average account value over the period, multiplied by 184/366 to reflect the most recent fiscal half year.

### **Tax Information**

Form 1099-DIV, Form 1042-S and other year-end tax information provide shareholders with actual calendar year amounts that should be included in their tax returns. Shareholders should consult their tax advisors.

The following distribution information is being provided as required by the Internal Revenue Code or to meet a specific state's requirement.

The Fund designates the following amounts or, if subsequently determined to be different, the maximum amount allowable for its fiscal year ended December 31, 2008:

#### Federal and State Income Tax

Long-Term Capital Gain Dividends	\$11,182,329
Corporate Dividends Received Deduction*	100.00%

\* The above percentage is based on ordinary income dividends paid to shareholders during the Fund's fiscal year.

## **Trustees and Officers**

The address of each trustee and officer of AIM Variable Insurance Funds (the "Trust"), is 11 Greenway Plaza, Suite 100, Houston, Texas 77046-1173. Each trustee oversees 104 portfolios in the AIM Funds complex. The trustees serve for the life of the Trust, subject to their earlier death, incapacitation, resignation, retirement or removal as more specifically provided in the Trust's organizational documents. Each officer serves for a one year term or until their successors are elected and qualified. Column two below includes length of time served with predecessor entities, if any.

### Dear Shareholders,

The last year in the markets has been as unreal and fantastic as something out of Lewis Carroll's *Alice's Adventures in* Wonderland. Much like our world today, Wonderland was a sometimes frightening and dangerous place, where nothing made sense and rules changed frequently. It's far too true these days that, as Lewis' protagonist would say, things have gotten curiouser and curiouser. And there are no signs that conditions will become less curious anytime soon. Although investors remain steeped in uncertainty, the situation has already achieved a level of historical significance in that online encyclopedia Wikipedia has an entry for it: "Global Financial Crisis of 2008."

Wikipedia marks the week of September 7, 2008, as the beginning, but we can trace the tumult back to late 2007, when the unraveling of the housing market appeared, at first, to be the bottom. Like a tumble down the rabbit hole, however, there was yet more room to fall. Alice's descent relates to our own. The hole, Lewis writes, "went straight on like a tunnel for some way, and then dipped suddenly down, so suddenly that Alice had not a moment to think about stopping herself before she found herself falling down what seemed to be a very deep well."

Indications that the subprime disaster was not the deepest part of the well appeared in the spring with the collapse of Bear Stearns. A deceptively quiet few months followed, and then in August, perhaps in an early sign of what broad distress was to come, consumer credit dropped for the first time since 1998, declining by \$7.9 billion. According to the Federal Reserve, it was the biggest monthly drop in more than half a century.

#### The Queen's Croquet Ground

By summer's end, the country's major financial institutions appeared as though they had been playing croquet with the Queen of Hearts, successful in her infamous demand, "Off with their heads!" Lehman Brothers was bankrupt, Bank of America had taken over embattled Merrill Lynch, the FDIC seized Washington Mutual — the U.S.'s largest savings and loan — and the Fed approved the multibillion dollar bailouts of Fannie Mae, Freddie Mac, and AIG.

In an effort to put some kind of bandage on the U.S.'s worsening economic wound, Congress passed the controversial \$700 billion Emergency Economic Stabilization Act of 2008 in early October. As the month pushed forward, however, we saw more evidence of just how low the markets were capable of going. With investors fixating on the threat of a recession, the markets reflected the uncertainty over whether or not we had hit a bottom; record-breaking drops and rises littered the month. In one five-day period in early October, the Dow Jones Industrial Average<sup>i</sup> lost 1,400 points. The period was topped the very next week during which the Dow traversed 1,600 points, from a high of 9,794 to a low of about 8,197. The S&P 500 Index<sup>ii</sup>, swung considerably, too, posting its biggest gain since the 1930s on October 13 before plunging two days later as retailers reported their sharpest sales drop in three years. The tumult didn't end there.

In early November, the U.S. underwent an executive regime change with the election of Barack Obama to the presidency. As we foretold, the election itself had a minimal impact on the economy. Instead, the U.S. — and global — markets for the rest of the month succumbed to their own mayhem. The economies of Germany and Japan were officially in recession (with the U.S. following in early December), an automotive industry rescue was in debate, controversy surrounded the way in which the funds from the financial bailout plan were to be dispersed, and stocks continued to plunge. On November 20, the major indices hit what we now think may have been the bottom: the S&P 500, down 49% for the year, had its lowest close since 1997, and the Dow and NASDAQ<sup>iii</sup> were at 5 1/2–year closing lows. On that day, the Dow was down 50% from its all-time high set in October 2007.

#### Who Stole the Tarts?

Taking a magnifying glass to the fourth quarter, U.S. GDP declined at an annual rate of 3.8%, the worst quarterly display since 1982. The primary contributor to GDP decline was the squeezing of the American consumer. Americans reigned in their spending after the impact of the government's tax rebates wore off, cutting back on purchases of cars, furniture, household appliances, clothes, and other items. Consumer spending, which typically accounts for two-thirds of economic growth, fell 3.5% in the quarter, after decreasing 3.8% in the third quarter.

Housing starts and permits, a sign of future construction, both plummeted to a record low annual rate in December. Housing starts fell 15.5% and building permits fell 10.7% from the prior month; sales of existing homes were down 3.5% in December compared with the same period a year earlier, according to the National Association of Realtors. The employment scene took a turn for the worse as well. The unemployment rate rose from 6.8% in November to 7.2% in December, a 15-year high; analysts said it could hit 8% or higher in 2009.

However, there were some brighter spots as several measures of U.S. economic performance unexpectedly turned positive in December. Compared to dismal November data, sales of existing homes rose 6.5% in December, reaching an annual rate of about 4.7 million, according to the National Association of Realtors. And the Conference Board's index of leading economic indicators increased 0.3% as the supply of money expanded. December's gain was the first in six months. The Consumer Price Index decline of 0.7% in December was slightly less drastic than November's decline of 1.7%

Exports in the fourth quarter declined 19.7% while imports dropped 15.7%, reflecting less activity with overseas buyers who were dealing with their own economic troubles. One year ago, we could say that the global economy was functioning separately from the U.S. economy: still healthy, still humming. But international markets are now also under pressure. With European recession official and U.S. exports weaker, it has become clear that any stability beyond the U.S. has been seriously diluted. China, however, holds more sway than it has in a long time; it is the largest holder of U.S. Treasuries and its huge trade surplus has helped it accumulate more foreign-currency reserves than any other country.

#### A Mad Tea Party

Like the Mad Hatter's watch that told only the day of the month and not the time, watching the nearly hour-by-hour destruction of the financial services sector became far too painful. Although the tea party borne from the overconfidence in the credit and housing markets has now become significantly smaller, we may not have seen the end of the chaos in financial services. It has been and continues to be massively reshaped and while some have not survived and others have had opportunities radically altered, there are some that will likely emerge better companies; our analysts are actively searching for those companies — across all sectors.

#### Through the Looking Glass

Carroll's follow up to Alice's Adventures in Wonderland — Through the Looking-Glass, and What Alice Found There — contains one of the greatest nonsensical poems ever written: Jabberwocky, which contains lines such as, "All mimsy were the borogoves,/And the mome raths outgrabe."

Similarly, these are mimsy, nonsensical times. However, we still do not believe that the global financial system is in dire jeopardy. In fact, we could have already hit the bottom in the equity market. And with a bottom comes opportunity. At the moment, stocks remain at their lowest valuations since the early 1980s; comparatively, home values are still above where they were in the 1990s.

The vast concern over whether we have hit the bottom certainly falls in the category of "curiouser." Growth may continue to be depressed in the near future, but we believe there is hope for a gradual recovery in 2009. Historically, the market has found the bottom and begun to rebound six to nine months ahead of an official recovery. Surveys of economists suggest the current recession will last throughout 2009, which, if the stock market follows a historical looking glass, would suggest it would bottom out in mid-2009. This estimate also — and perhaps too nicely — matches the 20-month average duration of bear markets since 1937, putting a similar stake in the ground for the bottom of this bear market at June of 2009. Unfortunately, these are only averages, meant, like records, to be broken. We have already, for example, fallen well below the average bear market decline (again since 1937) of roughly 34% with the S&P 500 decline of 49% that occurred between January and November.

In 2008, high-quality companies with higher expected growth rates — the kinds of companies in which Alger invests — were punished by the market. Now in 2009, our investment firm has entered its 45th year in business. We have weathered many times of frightening uncertainty often coupled with deep bear markets. In each of those periods, Alger investment professionals have remained true, focused, and disciplined in executing upon our investment philosophy and process and on seeking out stock opportunities where others "fold" or "flee." We are confident now that, as in past bear markets, our discipline will allow us to fully participate in the upside of growth stocks when the markets once again reward high-quality, high-growth companies.

Why? At Alger, we think these difficult times favor our style of investing, which seeks out high-growth, high-quality companies. Specifically, by analyzing companies' financials and looking for "high quality," we are looking for companies with strong balance sheets, strong market positions, strong management teams — the ingredients that help any company prosper in good times and endure difficult ones. Further, to focus on "high-growth" companies might seem odd in a period when most companies are finding it difficult to even hold course. But, to this end, our sector analysts focus on identifying companies that — after this recession and over the longer term — we believe will be the market-share gainers, the shareholder-value generators, and the creators of new products and services in their sectors *despite* the recession. While, at present, all companies are focused on cost-cutting and tiptoeing through the madness of this recession, it is never more true than during times of recession that the strongest companies plant the seeds for higher future growth and, we believe, production of superior investment results for their shareholders.

Alice's Adventures in Wonderland was a knowing children's tale, an allegory meant to entertain the youngest generations and help them navigate the absurdities of an adult world. In the end, Alice woke up — a luxury that we, unfortunately, do not have. What we do have are defining principles and processes, expertise, and experience that have carried us through and will continue to enable us to guide our investors to a successful tomorrow. Like Alice in Wonderland, we've been thrust into a bizarre world. But Carroll

also wrote *Through the Looking-Glass*, an almost equally as successful sequel to his famous story; now, we are eagerly awaiting the sequel to ours.

Respectfully submitted,

and go aley

Daniel C. Chung Chief Investment Officer

The Nasdaq Composite Index is a market value-weighted index that measures all domestic and non-U.S.-based securities listed on the Nasdaq stock market.

Investors cannot invest directly in an index. Index performance does not reflect the deduction for fees, expenses, or taxes.

This report and the financial statements contained herein are submitted for the general information of shareholders of the Fund.

This report is not authorized for distribution to prospective investors in the Fund unless proceeded or accompanied by an effective prospectus for the Fund. Fund performance returns represent the annual period return of Class O shares prior to the deduction of any sales charges. The performance data quoted represents past performance, which is not an indication or guarantee of future results. The investment return and principal value of an investment in a portfolio will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted. For performance data current to the most recent month-end, visit us at www.alger.com, or call us at (800) 992-3863.

The views and opinions of the Fund's management in this report are as of the date of the shareholder letter and are subject to change at any time subsequent to this date. There is no guarantee that any of the assumptions that formed the basis for the opinions stated herein are accurate or that they will materialize. Any securities mentioned should be considered in the context of the construction of an overall portfolio of securities and therefore reference to them should not be construed as a recommendation or offer to purchase or sell any such security. Inclusion of such securities in a portfolio and transactions in such securities, if any, may be for a variety of reasons, including without limitation, in response to cash flows, inclusion in a benchmark and risk control. The reference to a specific security should also be understood in such context and not viewed as a statement that the security is a significant holding in a portfolio. Please refer to the Schedule of Investments for each portfolio which is included in this report for a complete list of portfolio holdings as of December 31, 2008. Securities mentioned in the shareholder letter, if not found in the Schedule of Investments, were held by the Fund during the Fund's fiscal year.

#### A Word About Risk

Growth stocks tend to be more volatile than other stocks as the price of growth stocks tends to be higher in relation to their companies' earnings and may be more sensitive to market, political, and economic developments. Stocks of small- and mid-sized companies are subject to greater risk than stocks of larger, more established companies owing to such factors as limited liquidity, inexperienced management, and limited financial resources. Portfolios that invest in fixed-income securities, such as the Balanced Portfolio, are subject to the fixed-income securities' sensitivity to interest rate movements; their market values tend to fall when interest rates rise and to rise when interest rates fall. These portfolios are also subject to the risk of a decline in the value of the portfolio's securities in the event of an issue's falling credit rating or actual default. Portfolios that participate in leveraging, such as the Capital Appreciation Portfolio, are subject to the risk that borrowing money to leverage will exceed the returns for securities purchased or that the securities purchased may actually go down in value; thus, the portfolio's net asset value can decrease more quickly than if the portfolio had not borrowed. For a more detailed discussion of the risks associated with a Portfolio, please see the Portfolio's Prospectus.

Mutual fund portfolios are not insured by the FDIC, are not deposits or other obligations of, or guaranteed by banks, and are subject to investment risks, including possible loss of principal amount invested.

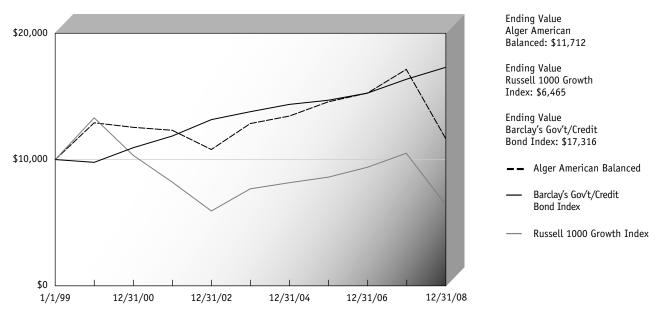

Before investing, carefully consider the Portfolio's investment objective, risks, charges, and expenses. The Portfolio's prospectus contains this and other information about the Portfolio, and may be obtained by asking your financial advisor, calling us at (800) 992-3863, or visiting our website at www.alger.com, or contacting the Portfolio's distributor, Fred Alger & Company, Incorporated, 111 Fifth Avenue, New York 10003. Member NYSE Euronext, SIPC. Read the prospectus carefully before investing.

<sup>&</sup>lt;sup>1</sup> The Dow Jones Industrial Average is an index of common stocks comprised of major industrial companies and assumes reinvestment of dividends. It is frequently used as a general measure of stock market performance.

<sup>&</sup>lt;sup>ii</sup> Standard & Poor's 500 Index is an index of the 500 largest and most profitable companies in the United States.

#### HYPOTHETICAL \$10,000 INVESTMENT

- 10 years ended December 31, 2008

The chart above illustrates the growth in value of a hypothetical \$10,000 investment made in Alger American Balanced Class O shares, the Russell 1000 Growth Index, and the Barclay's Gov't/Credit Bond Index for the ten years ended December 31, 2008. Figures for the Alger American Balanced Class O shares, the Russell 1000 Growth Index (an unmanaged index of common stocks), and the Barclay's Gov't/Credit Bond Index (an unmanaged index of government and corporate bonds), include reinvestment of dividends and/or interest. Performance for the Alger American Balanced Class S shares will vary from the results shown above due to differences in expenses that class bears and cash flows to that share class.

PERFORMANCE COMPARISON THROUGH DECEMBER 31, 2008				
AVERAGE ANNUAL TOTAL RETURNS				
	1	5	10	SINCE
	YEAR	YEARS	YEARS	INCEPTION
<b>Class 0 (Inception 9/5/89)</b>	(31.76)%	(1.86)%	1.59%	6.51%
Russell 1000 Growth Index	(38.43)%	(3.42)%	(4.27)%	6.17%
Barclay's Gov't/Credit Bond Index	5.71%	4.64%	5.64%	7.22%
<b>Class S (Inception 5/1/02)</b>	(31.90)%	(1.69)%		0.01%
Russell 1000 Growth Index	(38.43)%	(3.42)%		(1.91)%
Barclay's Gov't/Credit Bond Index	5.71%	4.64%		5.59%

The performance data quoted represent past performance, which is not an indication or a guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. For performance current to the most recent month-end, visit us at www.alger.com, or call us at (800) 254-3797.

Returns indicated assume reinvestment of all distributions, no transaction costs or taxes, and are net of management fees and fund operating expenses only. Total return does not include deductions at the portfolio or contract level for cost of insurance charges, premium load, administrative charges, mortality and expense risk charges or other charges that may be incurred under the variable annuity contract, variable life insurance plan or retirement plan for which the portfolio serves as an underlying investment vehicle. If these charges were deducted, the total return figures would be lower. Please refer to the variable insurance product or retirement plan disclosure documents for any additional applicable expenses. Investing in the stock market involves gains and losses and may not be suitable for all investors.

### THE ALGER AMERICAN FUND | NOTES TO FINANCIAL STATEMENTS Alger American Balanced Portfolio

#### NOTE 1 — General:

The Alger American Fund (the "Fund") is a diversified, open-end registered investment company organized as a business trust under the laws of the Commonwealth of Massachusetts. The Fund operates as a series company currently issuing seven series of shares of beneficial interest: American LargeCap Growth Portfolio (formerly known as American Growth Portfolio), American SmallCap Growth Portfolio (formerly known as American Small Capitalization Portfolio), American Income and Growth Portfolio, American Balanced Portfolio, American MidCap Growth Portfolio, American Capital Appreciation Portfolio (formerly known as American Leveraged AllCap Growth Portfolio) and American SmallCap and MidCap Growth Portfolio. These Financial Statements include only the American Balanced Portfolio (the "Portfolio"). The Portfolio's investment objectives are current income and long-term capital appreciation which it seeks to achieve through investing in equity and fixed income securities. Shares of the Portfolio are available and are being marketed exclusively as a pooled funding vehicle for qualified retirement plans and for life insurance companies writing all types of variable annuity contracts and variable life insurance policies.

The Portfolio offers Class O and Class S shares. Each class has identical rights to assets and earnings except that only Class S shares have a plan of distribution and bear the related expenses.

#### NOTE 2 — Significant Accounting Policies:

(a) Investment Valuation: Investments of the Portfolio are generally valued on each day the New York Stock Exchange (the "NYSE") is open as of the close of the NYSE (normally 4:00 p.m. Eastern time). Securities for which such information is readily available are valued at the last reported sales price or official closing price as reported by an independent pricing service on the primary market or exchange on which they are traded. In the absence of reported sales, securities are valued at a price within the bid and asked price or, in the absence of a recent bid or asked price, the equivalent as obtained from one or more of the major market makers for the securities to be valued.

Securities for which market quotations are not readily available or for which the market quotations do not, in the opinion of the investment advisor, reflect the securities true values are valued at fair value, as determined in good faith pursuant to procedures established by the Board of Trustees.

Securities in which the Portfolio invests may be traded in markets that close before the close of the NYSE. Developments that occur between the close of the foreign markets and the close of the NYSE (normally 4:00 p.m. Eastern time) may result in adjustments to closing prices to reflect what the investment advisor, pursuant to policies established by the Board of Trustees, believes to be the fair value of these securities as of the close of the NYSE. The Portfolio may also fair value securities in other situations, for example, when a particular foreign market is closed but the Portfolio is open. Various factors may be reviewed in order to make a good faith determination of a security's fair value. These factors may include, but are not limited to, the type and cost of the security; contractual or legal restrictions on resale of the security; relevant financial or business developments of the issuer; actively traded similar or related securities; conversion or exchange rights on the security; related corporate actions; and changes in overall market conditions.

Securities having a remaining maturity of sixty days or less are valued at amortized cost which approximates market value.

Effective January 1, 2008, the Fund adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* ("FAS 157"). In accordance with FAS 157, fair value is defined as the price that the Fund would receive upon selling an investment in a timely transaction to an independent buyer in the principal or most advantageous market of the investment. FAS 157 established a three-tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability and may be observable or unobservable. Observable inputs are based on market data obtained from sources independent of the Fund. Unobservable inputs are inputs that reflect the Fund's own assumptions based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad Levels listed below.

- Level 1 quoted prices in active markets for identical investments
- Level 2 significant other observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For example, money market securities are valued using amortized cost, in accordance with rules under

the Investment Company Act of 1940 (the "1940 Act"). Generally, amortized cost approximates the current fair value of a security, but since the value is not obtained from a quoted price in an active market, such securities are reflected as Level 2.

The Fund's valuation techniques are consistent with the market approach whereby prices and other relevant information generated by market transactions involving identical or comparable assets are used to measure fair value.

The following is a summary of the inputs used as of December 31, 2008 in valuing the Portfolio's investments carried at fair value:

		FAIR VALUE MEASUREMENTS			
DESCRIPTION	PORTFOLIO TOTAL	LEVEL 1	LEVEL 2	LEVEL 3	
Trading securities	\$ 118,761,502	\$ 76,363,125	\$ 42,398,377	\$ —	
Total	\$118,761,502	\$76,363,125	\$42,398,377	—	
				FAIR VALUE MEASUREMENTS USING SIGNIFICANT UNOBSERVABLE INPUTS (LEVEL 3)	
				Trading Securities	
Opening balance at Decembe	er 31, 2007			\$ 2,650,086	
Net realized and unrealized	d gain (loss) on investments, fo	preign currency and op	otions	(1,224,469)	
Purchases, issuances, and	settlements			(398,234)	
Transfers in and/or out of	Level 3			(1,027,383)	
Closing balance at December	31, 2008			\$ —	
foreign currency and option	and unrealized gain (loss) on ns for the period attributable ) relating to investments still	to change in unreali		\$ —	

(b) Security Transactions and Investment Income: Security transactions are recorded on a trade date basis. Resulting receivables and payables are carried at amounts which approximate fair value. Realized gains and losses from security transactions are recorded on the identified cost basis. Dividend income is recognized on the ex-dividend date and interest income is recognized on the accrual basis. Premiums and discounts on debt securities purchased are amortized or accreted over the lives of the respective securities.

(c) Foreign Currency Transactions: The books and records of the Portfolio are maintained in U.S. dollars. Foreign currencies, investments and other assets and liabilities are translated into U.S. dollars at the prevailing rates of exchange on the valuation date. Purchases and sales of investment securities and income and expenses are translated into U.S. dollars at the prevailing exchange rates on the respective dates of such transactions.

Net realized gains and losses on foreign currency transactions represent net gains and losses from the disposition of foreign currencies, currency gains and losses realized between the trade dates and settlement dates of security transactions, and the difference between the amount of net investment income accrued and the U.S. dollar amount actually received. The effects of changes in foreign currency exchange rates on investments in securities are included in realized and unrealized gain or loss on investments in the Statement of Operations.

(d) Option Contracts: When a Portfolio writes an option, an amount equal to the premium received by the Portfolio is recorded as a liability and is subsequently adjusted to the current fair value of the option written. Premiums received from writing options that expire unexercised are treated by the Portfolio on the expiration date as realized gains from investments. The difference between the premium and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or, if the premium is less than the amount paid for the closing purchase transaction, as a realized loss. If a written call option is exercised, the premium is added to the proceeds from the sale of the underlying security in determining whether the Portfolio has realized a gain or loss. If a written put option is exercised, the premium reduces the cost basis of the securities purchased by the Portfolio. The Portfolio as writer of an option bears the market risk of an unfavorable change in the price of the security underlying the written option.

The Portfolio may also purchase put and call options. Purchasing call and put options tends to decrease the Portfolio's exposure to the underlying instrument. The Portfolio pays a premium which is included in the Portfolio's Statement of Assets and Liabilities as an investment and subsequently marked to market to reflect the current value of the option. Premiums paid

for purchasing options which expire are treated as realized losses. The risk associated with purchasing put and call options is limited to the premium paid. Premiums paid for purchasing options which are exercised or closed are added to the amounts paid or offset against the proceeds on the underlying security to determine the realized gain or loss.

(e) Lending of Portfolio Securities: The Portfolio may lends its securities to financial institutions, provided that the market value of the securities loaned will not at any time exceed one third of the Portfolio's total assets. The Portfolio earns fees on the securities loaned. In order to protect against the risk of failure by the borrower to return the securities loaned or any delay in the delivery of such securities, the loan is collateralized by cash, letters of credit or U.S. Government securities that are maintained in an amount equal to at least 100 percent of the current market value of the loaned securities. The market value of the loaned securities is determined at the close of business of the Portfolio and any required additional collateral is delivered to the Portfolio on the next business day. There were no securities on loan during the year ended December 31, 2008.

(f) Dividends to Shareholders: Dividends payable to shareholders are recorded by the Portfolio on the ex-dividend date.

Dividends from net investment income are declared and paid annually. Dividends from net realized gains, offset by any loss carryforward, are declared and paid annually after the end of the fiscal year in which earned. Each class is treated separately in determining the amounts of dividends of net investment income and capital gains payable to holders of its shares.

The characterization of distributions to shareholders for financial reporting purposes is determined in accordance with federal income tax rules. Therefore, the source of the Portfolio's distributions may be shown in the accompanying financial statements as either from, or in excess of, net investment income or net realized gain on investment transactions, or return of capital, depending on the type of book/tax differences that may exist.

Capital accounts within the financial statements are adjusted for permanent book/tax differences. Reclassifications result primarily from the difference in tax treatment of net operating losses, premium/discount of debt securities, realized gain loss from foreign currency transactions, realized gains from redemptions in kind, if any, and reclassification of distributions. The reclassifications have no impact on the net asset values of the Portfolio and are designed to present the Portfolio's capital accounts on a tax basis.

(g) Federal Income Taxes: It is the Portfolio's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of the taxable income, including net realized capital gains, of the Portfolio to its respective shareholders. Therefore, no federal income tax provision is required. The Portfolio is treated as a separate entity for the purpose of determining such compliance.

(h) Allocation Methods: The Fund accounts separately for the assets, liabilities and operations of each Portfolio. Expenses directly attributable to each Portfolio are charged to that Portfolio's operations; expenses which are applicable to all Portfolios are allocated among them based on net assets. Income, realized and unrealized gains and losses, and expenses of each Portfolio are allocated among the Portfolio's classes based on relative net assets, with the exception of distribution fees, which are only applicable to Class S shares.

(i) Indemnification: The Fund enters into contracts that contain a variety of indemnification provisions. The Fund's maximum exposure under these arrangements is unknown. The Fund does not anticipate recognizing any loss related to these arrangements.

(j) Other: These financial statements have been prepared in accordance with U.S. generally accepted accounting principles using estimates and assumptions that affect the reported amounts therein. Actual results may differ from those estimates.

#### NOTE 3 — Investment Advisory Fees and Other Transactions with Affiliates:

(a) Investment Advisory and Administration Fees: Fees incurred by the Portfolio, pursuant to the provisions of the Fund's Investment Advisory Agreement and Administration Agreement with Fred Alger Management, Inc. ("Alger Management"), are payable monthly and computed based on the average daily net assets of the Portfolio at the following annual rates:

Advisory Fee	Administration Fee through March 16, 2008	Administration Fee Effective March 17, 2008
.710%	.04%	.0275%

As part of the settlement with the New York State Attorney General (see Note 8—Litigation) Alger Management has agreed to reduce its advisory fee to 0.67% for the Portfolio for the period from December 1, 2006 through November 30, 2011.

#### THE ALGER AMERICAN FUND | NOTES TO FINANCIAL STATEMENTS (Continued) Alger American Balanced Portfolio

(b) Distribution Fees: Class S shares—The Fund has adopted a Distribution Plan pursuant to which Class S shares of each Portfolio pay Fred Alger & Company, Incorporated, the Fund's distributor (the "Distributor"), a fee at the annual rate of .25% of the respective average daily net assets of the Class S shares of the designated Portfolio to compensate the Distributor for its activities and expenses incurred in distributing the Class S shares. The fees paid may be more or less than the expenses incurred by the Distributor.

(c) Brokerage Commissions: During the year ended December 31, 2008, the Portfolio paid the Distributor \$115,252, in connection with securities transactions.

(d) Shareholder Administrative Fees: The Fund has entered into a shareholder administrative service agreement with Alger Management to compensate Alger Management on a per account basis for its liaison and administrative oversight of Boston Financial Data Services, Inc. ("BFDS"), the transfer agent for the Fund and other related services. During the year ended December 31, 2008, the Portfolio incurred fees of \$72, for these services provided by Alger Management which are included in transfer agent fees and expenses.

(e) Other: Certain trustees and officers of the Fund are directors and officers of Alger Management and the Distributor. Each Portfolio pays each Trustee who is not affiliated with the Advisor or its affiliates \$500 for each meeting attended, to a maximum of \$2,000 per annum. The Chairman of the Board of Trustees receives an additional annual fee of \$10,000 which is paid, pro rata, by all portfolios managed by Alger Management. Additionally, each member of the audit committee receives an additional \$50 from each Portfolio for each audit committee meeting attended, to a maximum of \$200 per annum.

#### **NOTE 4** — Securities Transactions:

Purchases and sales of securities, other than U.S. Government securities and short-term securities, for the year ended December 31, 2008, were \$134,077,208 and \$166,845,701, respectively.

#### NOTE 5 — Lines of Credit:

The Fund participated in \$50 million committed lines of credits with other mutual funds managed by Alger Management through March 14, 2008. All borrowings had variable interest rates and were payable on demand.

Effective March 17, 2008, the Portfolio borrowed from its custodian on a uncommitted basis. For the year ended December 31, 2008, the Portfolio had the following borrowings:

AVERAGE DAILY	WEIGHTED AVERAG	
BORROWING	INTEREST RATE	
\$34,044	3.50%	

#### NOTE 6 — Share Capital:

The Fund has an unlimited number of authorized shares of beneficial interest of \$.001 par value which are divided into seven series. The Portfolio is divided into two separate classes.

During the year ended December 31, 2008, transactions of shares of beneficial interest were as follows:

	SHARES		AMOUNT
Class 0:			
Shares sold	719,749	\$	8,700,463
Dividends reinvested	2,204,542		26,851,326
Shares redeemed	(4,521,385)	(	50,335,917)
Net decrease	(1,597,094)	\$(1	4,784,128)
Class S:			
Shares sold	5,905	\$	86,175
Dividends reinvested	2,268		30,168
Shares redeemed	(10,551)		(149,220)
Net decrease	(2,378)	\$	(32,877)

#### THE ALGER AMERICAN FUND | NOTES TO FINANCIAL STATEMENTS (Continued) Alger American Balanced Portfolio

	SHARES	AMOUNT
Class 0:		
Shares sold	864,949	\$ 12,525,830
Dividends reinvested	1,420,072	19,582,787
Shares redeemed	(4,987,896)	(71,690,195)
Net decrease	(2,702,875)	\$(39,581,578)
Class S:		
Shares sold	30,393	\$ 448,331
Dividends reinvested	842	12,304
Shares redeemed	(2,212,864)	(33,393,184)
Net decrease	(2,181,629)	\$(32,932,549)

During the year ended December 31, 2007, transactions of shares of beneficial interest were as follows:

#### NOTE 7 — Tax Character of Distributions to Shareholders:

The tax character of distributions paid during the years ended December 31, 2008 and December 31, 2007 were as follows:

	YEAR ENDED DECEMBER 31, 2008	YEAR ENDED DECEMBER 31, 2007
Distributions paid from:		
Ordinary Income	\$ 24,371,251	\$ 18,216,201
Long-Term capital gains	2,510,243	1,378,890
Total distributions paid	\$26,881,494	\$19,595,091

As of December 31, 2008, the components of distributable earnings on a tax basis were as follows:

Undistributed ordinary income	\$ 3,921,626
Undistributed long-term gain	_
Unrealized appreciation (depreciation)	(39,128,380)

The difference between book-basis and tax-basis unrealized appreciation (depreciation) is determined annually and is attributable primarily to the tax deferral of losses on wash sales, the tax treatment of premium/discount on debt securities, realization of unrealized appreciation of Passive Foreign Investment Companies, return of capital from Real Estate Investment Trust investments and investments in Partnerships.

At December 31, 2008, the Portfolio, for federal income tax purposes, had capital loss carryforwards which expire as set forth in the table below. These amounts may be applied against future net realized gains until the earlier of their utilization or expiration.

EXPIRATION DATE	
<b>2016</b> \$5,024,513	

Net capital losses incurred after October 31 and within the taxable year are deemed to arise on the first business day of the fund's next taxable year. For the period ended December 31, 2008, the amount of deferral for the Portfolio was \$11,806,033.

#### NOTE 8 — Litigation:

Alger Management has responded to inquiries, document requests and/or subpoenas from various regulatory authorities, in connection with their investigations of practices in the mutual fund industry identified as "market timing" and "late trading." On October 11, 2006, Alger Management, Alger Inc. and Alger Shareholder Services, Inc. executed an Assurance of Discontinuance with the Office of the New York State Attorney General ("NYAG"). On January 18, 2007 the Securities and Exchange Commission issued an order implementing settlements reached with Alger Management and Alger Inc. As part of the settlements with the Commission and the NYAG, without admitting or denying liability, the firms paid \$30 million to reimburse fund shareholders and a fine of \$10 million; and agreed to certain other remedial measures including a reduction in management fees of \$1 million per year for five years. The entire \$40 million and fee reduction will be available for the benefit of

investors. Alger Management has advised the Fund that the settlement has not adversely affected the operations of Alger Management, Alger Inc. or their affiliates, or adversely affected their ability to continue to provide services to the Fund.

On August 31, 2005, the West Virginia Securities Commissioner (the "WVSC") in an ex parte Summary Order to Cease and Desist and Notice of Right to Hearing concluded that Alger Management and Alger Inc. had violated the West Virginia Uniform Securities Act (the "WVUSA"), and ordered Alger Management and Alger Inc. to cease and desist from further violations of the WVUSA by engaging in the market-timing related conduct described in the order. The ex parte order provided notice of their right to a hearing with respect to the violations of law asserted by the WVSC. Other firms unaffiliated with Alger Management were served with similar orders. Alger Management and Alger Inc. intend to request a hearing for the purpose of seeking to vacate or modify the order.

In addition, in 2003 and 2004 several purported class actions and shareholder derivative suits were filed against various parties in the mutual fund industry, including Alger Management, certain mutual funds managed by Alger Management (the "Alger Mutual Funds"), and certain current and former Alger Mutual Fund trustees and officers, alleging wrongful conduct related to market-timing and late-trading by mutual fund shareholders. These cases were transferred to the U.S. District Court of Maryland by the Judicial Panel on Multidistrict Litigation for consolidated pre-trial proceedings. In September 2004, consolidated amended complaints involving these cases — a Consolidated Amended Fund Derivative Complaint (the "Derivative Complaint") and two substantially identical Consolidated Amended Class Action Complaints (together, the "Class Action Complaint") — were filed in the Maryland federal district court under the caption number 1:04-MD-15863 (JFM). In April 2005, a civil lawsuit involving similar allegations was filed by the West Virginia Attorney General and also transferred to the Maryland District Court, but such lawsuit has since been withdrawn.

The Derivative Complaint (which was later amended a second time) alleged (i) violations, by Alger Management and, depending on the specific offense alleged, by Alger Inc. and/or the fund trustee defendants, of Sections 36(a), 36(b), 47, and 48 of the Investment Company Act of 1940, as amended (the "1940 Act") and of Sections 206 and 215 of the Investment Advisers Act of 1940, as amended, breach of fiduciary duty, and breach of contract, (ii) various offenses by other third-party defendants, and (iii) unjust enrichment by all the named defendants. The Class Action Complaint alleged, in addition to the offenses listed above, (i) violations, by Alger Management, Alger Inc., their affiliates, the funds named as defendants, including the Fund, and the current and former fund trustees and officers, of Sections 11, 12(a)(2), and 15 of the Securities Act of 1933, as amended, Sections 10(b) (and Rule 10b-5 thereunder) and 20(a) of the Securities Exchange Act of 1934, as amended, (the "1934 Act"), and Section 34(b) of the Investment Company Act, (ii) breach of contract by the funds named as defendants, and (iii) unjust enrichment of the defendants.

Motions to dismiss the Class Action Complaint and the Derivative Complaint were subsequently filed.

As a result of a series of court orders, all claims in the Class Action Complaint and the Derivative Complaint have been dismissed, other than claims under the 1934 Act against Alger Management, Alger Inc., Alger Associates, Inc. and Alger Shareholder Services, Inc., and certain present and former members of the senior management of Alger Management and/or Alger Inc., and claims under Section 36(b) of the Investment Company Act against Alger Management, Alger Inc., Alger Associates, Inc. and Alger Shareholder Services, Inc.

The class and derivative suits have been settled in principle, but such settlement is subject to court approval.

#### Note 9 — Recent Accounting Pronouncements

On March 19, 2008, the FASB released Statement of Financial Accounting Standards No. 161, "Disclosures about Derivative Instruments and Hedging Activities" ("FAS 161"). FAS 161 requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of and gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. The application of FAS 161 is required for fiscal years and interim periods beginning after November 15, 2008. At this time, management is evaluating the implications of FAS 161 and believes the adoption of FAS 161 will have no material impact on the Fund's financial statements.

#### THE ALGER AMERICAN FUND Alger American Balanced Portfolio REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

#### To the Shareholders and Board of Trustees of The Alger American Fund:

We have audited the accompanying statement of assets and liabilities, including the schedule of investments, of The Alger American Balanced Portfolio (one of the portfolios constituting The Alger American Fund) (the "Fund") as of December 31, 2008, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Fund's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the accounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of December 31, 2008, by correspondence with custodians and brokers or by other appropriate auditing procedures where replies from brokers were not received. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above, present fairly, in all material respects, the financial position of The Alger American Balanced Portfolio at December 31, 2008, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended, in conformity with U.S. generally accepted accounting principles.

Ernst + Young LLP

New York, New York February 10, 2009

#### Shareholder Expense Example

As a shareholder of a Portfolio, you incur two types of costs: transaction costs, if applicable; and ongoing costs, including management fees, distribution (12b-1) fees, if applicable, and other fund expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in a Portfolio and to compare these costs with the ongoing costs of investing in other mutual funds.

The example below is based on an investment of \$1,000 invested at the beginning of the six-month period starting July 1, 2008 and ending December 31, 2008.

#### **Actual Expenses**

The first line for each class of shares in the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you would have paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During the Period" to estimate the expenses you paid on your account during this period.

#### Hypothetical Example for Comparison Purposes

The second line for each class of shares in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio's actual expense ratios for each class of shares and an assumed rate of return of 5% per year before expenses, which is not the Portfolio's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in a Portfolio and other funds. To do so, compare this 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transaction costs or deduction of insurance charges against assets or annuities. Therefore, the second line under each class of shares in the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

		Beginning Account Value July 1, 2008	Ending Account Value December 31, 2008	Expenses Paid During the Period July 1, 2008 to December 31, 2008 (b)	Ratio of Expenses to Average Net Assets For the Six Months Ended December 31, 2008 (c)
Class O	Actual	\$1,000.00	\$ 748.70	\$3.56	0.81%
	Hypothetical	1,000.00	1,021.06	4.12	0.81
Class S	Actual	1,000.00	748.40	4.66	1.06
	Hypothetical	1,000.00	1,019.81	5.38	1.06

(a) 5% annual return before expenses.

(b) Expenses are equal to the annualized expense ratio of the respective share class, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period).

(c) Annualized.

#### Trustees and Officers of the Fund (Unaudited)

Information about the Trustees and officers of the Fund is set forth below. In the table the term "Alger Fund Complex" refers to the Fund, The Alger Funds II, The Alger Funds, The Alger Institutional Funds, The Alger China-U.S. Growth Fund and Castle Convertible Fund, Inc., each of which is a registered investment company managed by Fred Alger Management, Inc. ("Alger Management"). Each Trustee serves until an event of termination, such as death or resignation, or until his successor is duly elected; each officer's term of office is one year. Unless otherwise noted, the address of each person named below is 111 Fifth Avenue, New York, NY 10003.

Name, Age, Position with the Fund	Principal Occupations	Trustee and/or Officer Since	Number of Portfolios in the Alger Fund Complex which are Overseen by Trustee
INTERESTED TRUSTEES			
Hilary M. Alger, CFA (47)	Director of Development, Pennsylvania Ballet since 2004; Associate Director of Development, College of Arts and Sciences and Graduate School, University of Virginia 1999-2003.	2003	27
NON-INTERESTED TRUSTEES			
Charles F. Baird, Jr. (55)	Managing Partner of North Castle Partners, a private equity securities group; Chairman of Leiner Health Products, Enzymatic Therapy and Caleel & Hayden (skincare business); former Chairman of Elizabeth Arden Day Spas, Naked Juice, Equinox (fitness company) and EAS (manufacturer of nutritional products). Formerly Managing Director of AEA Investors, Inc.	2007	27
Roger P. Cheever (63)	Associate Vice President For Principal Gifts, and Senior Associate Dean of Development, Harvard University. Formerly Deputy Director of the Harvard College Fund.	2007	27
Lester L. Colbert, Jr. (74)	Private investor since 1988. Formerly, Chairman of the Board, President and Chief Executive Officer of Xidex Corporation (manufacturer of computer information media).	2007	27
Stephen E. O'Neil (76)	Attorney; Private investor since 1981. Formerly of Counsel to the law firm of Kohler & Barnes.	1988	27

#### Investment Management Agreement Renewal (Unaudited)

At an in-person meeting held on September 9, 2008, the Trustees, including the Independent Trustees, unanimously approved renewal of the Investment Advisory Agreement between the Fund and Alger Management (the "Agreement"). The Independent Trustees were assisted in their review by independent legal counsel and met with counsel in executive session separate from representatives of Alger Management.

In evaluating the Agreement, the Trustees drew on materials that they had requested and which were provided to them in advance of the meeting by Alger Management and by counsel. The materials covered, among other matters, (i) the nature, extent and quality of the services provided by Alger Management under the Agreement, (ii) the investment performance of the Fund's portfolios (each a "Portfolio"), (iii) the costs to Alger Management of its services and the profits realized by Alger Management and Alger Inc. from their relationship with the Fund, and (iv) the extent to which economies of scale would be realized if and as the Portfolios grow and whether the fee levels in the Agreement reflect these economies of scale. These materials included an analysis of the Portfolios and Alger Management's services by Callan Associates Inc. ("Callan"), an independent consulting firm whose specialties include assistance to fund trustees and directors in their review of advisory contracts pursuant to section 15(c) of the Investment Company Act of 1940. At the meeting, senior Callan personnel provided a presentation to the Trustees based on the Callan materials.

In deciding whether to approve renewal of the Agreement, the Trustees considered various factors, including those enumerated above. They also considered other direct and indirect benefits to Alger Management and its affiliates from their relationship with the Fund.

Nature, Extent and Quality of Services. In considering the nature, extent and quality of the services provided by Alger Management pursuant to the Agreement, the Trustees relied on their prior experience as Trustees of the Fund, their familiarity with the personnel and resources of Alger Management and its affiliates, and the materials provided at the meeting. They noted that under the Agreement Alger Management is responsible for managing the investment operations of the Portfolios. They also noted that administrative, compliance, reporting and accounting services necessary for the conduct of the Fund's affairs are provided by Alger Management under the separate Administration Agreement. The Trustees reviewed the background and experience of Alger Management's senior investment management personnel, including the individuals currently responsible for the investment operations of the Portfolios. They also considered the resources, operational structures and practices of Alger Management in managing each Portfolio, as well as Alger Management's overall investment management business. They noted especially Alger Management's history of expertise in managing portfolios of "growth" stocks and that, according to an analysis provided by Callan, the characteristics of each equity Portfolio had been typical of a fund that holds itself out to investors as growth-oriented. They also took notice of the ability of the manager of the fixed-income portion of the Balanced Portfolio to manage fixed-income instruments across the credit and credit quality spectra. The Trustees concluded that Alger Management's experience, resources and strength in the areas of importance to the Fund are considerable. The Trustees considered the level and depth of Alger Management's ability to execute portfolio transactions to effect investment decisions, including those through Alger Inc. The Trustees also considered the ongoing enhancements to the control and compliance environment at Alger Management and within the Fund.

**Investment Performance of the Funds.** Drawing upon information provided at the meeting by Alger Management as well as Callan and upon reports provided to the Trustees by Alger Management throughout the preceding year, the Trustees reviewed each Portfolio's returns (other than those of the SmallCap and MidCap Portfolio, which had been operating for one quarter only) for the year-to-date (at 6/30/08), last-quarter, and 1-, 3-, 5-, and 10-year periods to the extent available (and its year-by-year returns) and compared them with benchmark and peer-group data for the same periods. They noted that the performance of each of the equity Portfolios, which had generally been satisfactory in recent periods (or longer), was disappointing for the year to date. Noting that the 2008 market environment for domestic stocks in general and for "growth" stocks in particular had thus far been challenging in 2008, the Trustees discussed the Portfolios' recent performance with Alger Management and the performance prospects for the remainder of the year and beyond. The Trustees noted that the performance of the Balanced Portfolio, which had been improving relative to its peers and benchmarks, had lagged by both measures for the year to date but had shown marked improvement during the quarter ended June 30, 2008. As presented in the Callan materials, the performance of the Income & Growth Portfolio lagged that of its peers and benchmark by particularly wide margins during 2007 and 2008, negatively affecting the 3- and 5-year cumulative returns. The Trustees discussed with Alger Management the Portfolio's performance and Alger Management's plans for improvement.

Fund Fees and Expense Ratios; Profitability to Alger Management and its Affiliates. The Trustees considered the profitability of the Investment Advisory Agreement to Alger Management and its affiliates, and the methodology used by Alger Management in determining such profitability. The Trustees reviewed previously-provided data on each Portfolio's profitability to Alger Management and its affiliates for the year ended June 30, 2008 . In addition, the Trustees reviewed each Portfolio's management fee and expense ratio and compared them with a group of comparable funds. In order to assist the Trustees in this comparison, Callan had provided the Trustees with comparative information with respect to fees paid, and expense ratios incurred, by similar funds. That information indicated that while most fees and expense ratios were near or below the median, the fees of the Balanced Portfolio and the Capital Appreciation Portfolio and the Class-S expense ratios of all Portfolios except the Income & Growth Portfolio were above the median. In the latter cases, the Trustees determined that such information should be taken into account in weighing the size of the fee against the nature, extent and quality of the services provided. After discussing with representatives of the Adviser and Callan the methodologies used in computing the costs that formed the bases of the profitability calculations, the Trustees turned to the profitability data provided. After analysis and discussion, they concluded that, to the extent that Alger Management's and its affiliates' relationships with the Portfolios had been profitable to either or both of those entities in the case of one or more Portfolios, the profit margin in each case was not unacceptable.

**Economies of Scale.** On the basis of their discussions with management and their analysis of information provided at the meeting, the Trustees determined that the nature of the Portfolios and their operations is such that Alger Management is likely to realize economies of scale in the management of each Portfolio at some point as (and if) it grows in size, but that adoption

of breakpoints in one or more of the advisory fees, while possibly appropriate at a later date, could await further analysis of the sources and potential scale of the economies and the fee structure that would best reflect them. Accordingly, the Trustees requested that Alger Management address this topic with the Trustees at future meetings.

**Other Benefits to Alger Management.** The Trustees considered whether Alger Management benefits in other ways from its relationship with the Fund. They noted that Alger Management maintains soft-dollar arrangements in connection with the equity Portfolios' brokerage transactions, reports on which are regularly supplied to the Trustees at their quarterly meetings and summaries of which, listing commissions by Portfolio through June 30, 2008 and December 31, 2007, had been included in the materials supplied prior to the meeting. The Trustees also noted that Alger Management receives fees from the Portfolios under the Administration Agreement, that Alger, Inc. provides a substantial portion of the Portfolios' equity brokerage and that Alger Management also receives fees from the Fund under a shareholder services agreement. The Trustees had been provided with information regarding, and had considered, the administration fee, brokerage and shareholder services fee benefits in connection with their review of the profitability to Alger Management and its affiliates of their relationships with the Fund. As to other benefits received, the Trustees decided that none were so significant as to render Alger Management's fees excessive.

**Conclusions and Determinations.** At the conclusion of these discussions, each of the Independent Trustees expressed the opinion that he had been furnished with sufficient information to make an informed business decision with respect to renewal of the Investment Advisory Agreement. Based on its discussions and considerations as described above, the Board made the following conclusions and determinations:

The Board concluded that the nature, extent and quality of the services provided to each Portfolio by Alger Management are adequate and appropriate.

The Board was generally satisfied with the performance of each of the Portfolios on a relatively long-term basis, but determined to monitor the progress of Alger Management's steps to improve the performance of the equity Portfolios and the Income & Growth Portfolio by comparison with that of the first half of 2008 (as well as 2007 in the case of the Income & Growth Portfolio).

The Board concluded that each advisory fee paid to Alger Management was reasonable in light of comparative performance and expense and advisory fee information, costs of the services provided and profits to be realized and benefits derived or to be derived by Alger Management and its affiliates from the relationship with the Portfolio.

The Board determined that there were not at this time significant economies of scale to be realized by Alger Management in managing the Portfolios' assets but that, to the extent that material economies of scale should be realized in the future, the Board would seek to ensure that they were shared with the applicable Portfolio.

The Board considered these conclusions and determinations and, without any one factor being dispositive, determined with respect to each Portfolio that renewal of the Investment Advisory Agreement was in the best interests of the Portfolio and its shareholders.

#### **Proxy Voting Policies**

A description of the policies and procedures the Fund uses to determine how to vote proxies relating to portfolio securities and the proxy voting record is available, without charge, by calling (800) 992-3863 or online on the Fund's website at http://www.alger.com or on the SEC's website at http://www.sec.gov.

#### **Fund Holdings**

The Portfolio's most recent month end portfolio holdings are available approximately sixty days after month end on the Fund's website at www.alger.com. The Portfolio also files its complete schedule of portfolio holdings with the SEC for the first and third quarter of each fiscal year on Form N-Q. Forms N-Q are available online on the SEC's website at www.sec.gov or may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. Information regarding the operation of the SEC's Public Reference Room may be obtained by calling 1-800-SEC-0330. A copy of the most recent quarterly holdings may also be obtained from the Fund by calling (800) 992-3863.

Additional Information (Unaudited)	23

#### Dear Shareholders,

The last year in the markets has been as unreal and fantastic as something out of Lewis Carroll's *Alice's Adventures in* Wonderland. Much like our world today, Wonderland was a sometimes frightening and dangerous place, where nothing made sense and rules changed frequently. It's far too true these days that, as Lewis' protagonist would say, things have gotten curiouser and curiouser. And there are no signs that conditions will become less curious anytime soon. Although investors remain steeped in uncertainty, the situation has already achieved a level of historical significance in that online encyclopedia Wikipedia has an entry for it: "Global Financial Crisis of 2008."

Wikipedia marks the week of September 7, 2008, as the beginning, but we can trace the tumult back to late 2007, when the unraveling of the housing market appeared, at first, to be the bottom. Like a tumble down the rabbit hole, however, there was yet more room to fall. Alice's descent relates to our own. The hole, Lewis writes, "went straight on like a tunnel for some way, and then dipped suddenly down, so suddenly that Alice had not a moment to think about stopping herself before she found herself falling down what seemed to be a very deep well."

Indications that the subprime disaster was not the deepest part of the well appeared in the spring with the collapse of Bear Stearns. A deceptively quiet few months followed, and then in August, perhaps in an early sign of what broad distress was to come, consumer credit dropped for the first time since 1998, declining by \$7.9 billion. According to the Federal Reserve, it was the biggest monthly drop in more than half a century.

#### The Queen's Croquet Ground

By summer's end, the country's major financial institutions appeared as though they had been playing croquet with the Queen of Hearts, successful in her infamous demand, "Off with their heads!" Lehman Brothers was bankrupt, Bank of America had taken over embattled Merrill Lynch, the FDIC seized Washington Mutual — the U.S.'s largest savings and loan — and the Fed approved the multibillion dollar bailouts of Fannie Mae, Freddie Mac, and AIG.

In an effort to put some kind of bandage on the U.S.'s worsening economic wound, Congress passed the controversial \$700 billion Emergency Economic Stabilization Act of 2008 in early October. As the month pushed forward, however, we saw more evidence of just how low the markets were capable of going. With investors fixating on the threat of a recession, the markets reflected the uncertainty over whether or not we had hit a bottom; record-breaking drops and rises littered the month. In one five-day period in early October, the Dow Jones Industrial Average<sup>i</sup> lost 1,400 points. The period was topped the very next week during which the Dow traversed 1,600 points, from a high of 9,794 to a low of about 8,197. The S&P 500 Index<sup>ii</sup>, swung considerably, too, posting its biggest gain since the 1930s on October 13 before plunging two days later as retailers reported their sharpest sales drop in three years. The tumult didn't end there.

In early November, the U.S. underwent an executive regime change with the election of Barack Obama to the presidency. As we foretold, the election itself had a minimal impact on the economy. Instead, the U.S. — and global — markets for the rest of the month succumbed to their own mayhem. The economies of Germany and Japan were officially in recession (with the U.S. following in early December), an automotive industry rescue was in debate, controversy surrounded the way in which the funds from the financial bailout plan were to be dispersed, and stocks continued to plunge. On November 20, the major indices hit what we now think may have been the bottom: the S&P 500, down 49% for the year, had its lowest close since 1997, and the Dow and NASDAQ<sup>iiii</sup> were at 5 1/2–year closing lows. On that day, the Dow was down 50% from its all-time high set in October 2007.

#### Who Stole the Tarts?

Taking a magnifying glass to the fourth quarter, U.S. GDP declined at an annual rate of 3.8%, the worst quarterly display since 1982. The primary contributor to GDP decline was the squeezing of the American consumer. Americans reigned in their spending after the impact of the government's tax rebates wore off, cutting back on purchases of cars, furniture, household appliances, clothes, and other items. Consumer spending, which typically accounts for two-thirds of economic growth, fell 3.5% in the quarter, after decreasing 3.8% in the third quarter.

Housing starts and permits, a sign of future construction, both plummeted to a record low annual rate in December. Housing starts fell 15.5% and building permits fell 10.7% from the prior month; sales of existing homes were down 3.5% in December compared with the same period a year earlier, according to the National Association of Realtors. The employment scene took a turn for the worse as well. The unemployment rate rose from 6.8% in November to 7.2% in December, a 15-year high; analysts said it could hit 8% or higher in 2009.

However, there were some brighter spots as several measures of U.S. economic performance unexpectedly turned positive in December. Compared to dismal November data, sales of existing homes rose 6.5% in December, reaching an annual rate of about 4.7 million, according to the National Association of Realtors. And the Conference Board's index of leading economic indicators increased 0.3% as the supply of money expanded. December's gain was the first in six months. The Consumer Price Index decline of 0.7% in December was slightly less drastic than November's decline of 1.7%

Exports in the fourth quarter declined 19.7% while imports dropped 15.7%, reflecting less activity with overseas buyers who were dealing with their own economic troubles. One year ago, we could say that the global economy was functioning separately from the U.S. economy: still healthy, still humming. But international markets are now also under pressure. With European recession official and U.S. exports weaker, it has become clear that any stability beyond the U.S. has been seriously diluted. China, however, holds more sway than it has in a long time; it is the largest holder of U.S. Treasuries and its huge trade surplus has helped it accumulate more foreign-currency reserves than any other country.

#### A Mad Tea Party

Like the Mad Hatter's watch that told only the day of the month and not the time, watching the nearly hour-by-hour destruction of the financial services sector became far too painful. Although the tea party borne from the overconfidence in the credit and housing markets has now become significantly smaller, we may not have seen the end of the chaos in financial services. It has been and continues to be massively reshaped and while some have not survived and others have had opportunities radically altered, there are some that will likely emerge better companies; our analysts are actively searching for those companies — across all sectors.

#### Through the Looking Glass

Carroll's follow up to Alice's Adventures in Wonderland — Through the Looking-Glass, and What Alice Found There — contains one of the greatest nonsensical poems ever written: Jabberwocky, which contains lines such as, "All mimsy were the borogoves,/And the mome raths outgrabe."

Similarly, these are mimsy, nonsensical times. However, we still do not believe that the global financial system is in dire jeopardy. In fact, we could have already hit the bottom in the equity market. And with a bottom comes opportunity. At the moment, stocks remain at their lowest valuations since the early 1980s; comparatively, home values are still above where they were in the 1990s.

The vast concern over whether we have hit the bottom certainly falls in the category of "curiouser." Growth may continue to be depressed in the near future, but we believe there is hope for a gradual recovery in 2009. Historically, the market has found the bottom and begun to rebound six to nine months ahead of an official recovery. Surveys of economists suggest the current recession will last throughout 2009, which, if the stock market follows a historical looking glass, would suggest it would bottom out in mid-2009. This estimate also — and perhaps too nicely — matches the 20-month average duration of bear markets since 1937, putting a similar stake in the ground for the bottom of this bear market at June of 2009. Unfortunately, these are only averages, meant, like records, to be broken. We have already, for example, fallen well below the average bear market decline (again since 1937) of roughly 34% with the S&P 500 decline of 49% that occurred between January and November.

In 2008, high-quality companies with higher expected growth rates — the kinds of companies in which Alger invests — were punished by the market. Now in 2009, our investment firm has entered its 45th year in business. We have weathered many times of frightening uncertainty often coupled with deep bear markets. In each of those periods, Alger investment professionals have remained true, focused, and disciplined in executing upon our investment philosophy and process and on seeking out stock opportunities where others "fold" or "flee." We are confident now that, as in past bear markets, our discipline will allow us to fully participate in the upside of growth stocks when the markets once again reward high-quality, high-growth companies.

Why? At Alger, we think these difficult times favor our style of investing, which seeks out high-growth, high-quality companies. Specifically, by analyzing companies' financials and looking for "high quality," we are looking for companies with strong balance sheets, strong market positions, strong management teams — the ingredients that help any company prosper in good times and endure difficult ones. Further, to focus on "high-growth" companies might seem odd in a period when most companies are finding it difficult to even hold course. But, to this end, our sector analysts focus on identifying companies that — after this recession and over the longer term — we believe will be the market-share gainers, the shareholder-value generators, and the creators of new products and services in their sectors *despite* the recession. While, at present, all companies are focused on cost-cutting and tiptoeing through the madness of this recession, it is never more true than during times of recession that the strongest companies plant the seeds for higher future growth and, we believe, production of superior investment results for their shareholders.

Alice's Adventures in Wonderland was a knowing children's tale, an allegory meant to entertain the youngest generations and help them navigate the absurdities of an adult world. In the end, Alice woke up — a luxury that we, unfortunately, do not have. What we do have are defining principles and processes, expertise, and experience that have carried us through and will continue to enable us to guide our investors to a successful tomorrow. Like Alice in Wonderland, we've been thrust into a bizarre world. But Carroll

also wrote *Through the Looking-Glass*, an almost equally as successful sequel to his famous story; now, we are eagerly awaiting the sequel to ours.

Respectfully submitted,

and go aley

Daniel C. Chung Chief Investment Officer

The Nasdaq Composite Index is a market value-weighted index that measures all domestic and non-U.S.-based securities listed on the Nasdaq stock market.

Investors cannot invest directly in an index. Index performance does not reflect the deduction for fees, expenses, or taxes.

This report and the financial statements contained herein are submitted for the general information of shareholders of the Fund.

This report is not authorized for distribution to prospective investors in the Fund unless proceeded or accompanied by an effective prospectus for the Fund. Fund performance returns represent the annual period return of Class O shares prior to the deduction of any sales charges. The performance data quoted represents past performance, which is not an indication or guarantee of future results. The investment return and principal value of an investment in a portfolio will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted. For performance data current to the most recent month-end, visit us at www.alger.com, or call us at (800) 992-3863.

The views and opinions of the Fund's management in this report are as of the date of the shareholder letter and are subject to change at any time subsequent to this date. There is no guarantee that any of the assumptions that formed the basis for the opinions stated herein are accurate or that they will materialize. Any securities mentioned should be considered in the context of the construction of an overall portfolio of securities and therefore reference to them should not be construed as a recommendation or offer to purchase or sell any such security. Inclusion of such securities in a portfolio and transactions in such securities, if any, may be for a variety of reasons, including without limitation, in response to cash flows, inclusion in a benchmark and risk control. The reference to a specific security should also be understood in such context and not viewed as a statement that the security is a significant holding in a portfolio. Please refer to the Schedule of Investments for each portfolio which is included in this report for a complete list of portfolio holdings as of December 31, 2008. Securities mentioned in the shareholder letter, if not found in the Schedule of Investments, were held by the Fund during the Fund's fiscal year.

#### A Word About Risk

Growth stocks tend to be more volatile than other stocks as the price of growth stocks tends to be higher in relation to their companies' earnings and may be more sensitive to market, political, and economic developments. Stocks of small- and mid-sized companies are subject to greater risk than stocks of larger, more established companies owing to such factors as limited liquidity, inexperienced management, and limited financial resources. Portfolios that invest in fixed-income securities, such as the Balanced Portfolio, are subject to the fixed-income securities' sensitivity to interest rate movements; their market values tend to fall when interest rates rise and to rise when interest rates fall. These portfolios are also subject to the risk of a decline in the value of the portfolio's securities in the event of an issue's falling credit rating or actual default. Portfolios that participate in leveraging, such as the Capital Appreciation Portfolio, are subject to the risk that borrowing money to leverage will exceed the returns for securities purchased or that the securities purchased may actually go down in value; thus, the portfolio's net asset value can decrease more quickly than if the portfolio had not borrowed. For a more detailed discussion of the risks associated with a Portfolio, please see the Portfolio's Prospectus.

Mutual fund portfolios are not insured by the FDIC, are not deposits or other obligations of, or guaranteed by banks, and are subject to investment risks, including possible loss of principal amount invested.

Before investing, carefully consider the Portfolio's investment objective, risks, charges, and expenses. The Portfolio's prospectus contains this and other information about the Portfolio, and may be obtained by asking your financial advisor, calling us at (800) 992-3863, or visiting our website at www.alger.com, or contacting the Portfolio's distributor, Fred Alger & Company, Incorporated, 111 Fifth Avenue, New York 10003. Member NYSE Euronext, SIPC. Read the prospectus carefully before investing.

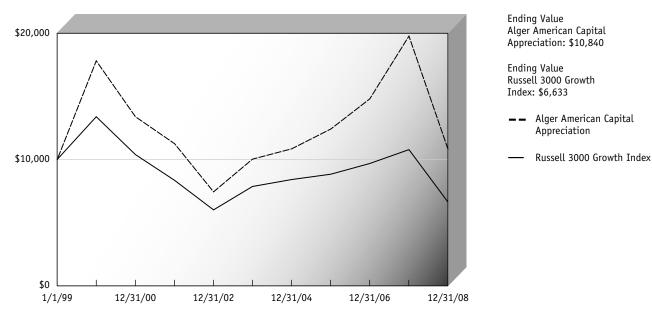

<sup>&</sup>lt;sup>1</sup> The Dow Jones Industrial Average is an index of common stocks comprised of major industrial companies and assumes reinvestment of dividends. It is frequently used as a general measure of stock market performance.

<sup>&</sup>lt;sup>ii</sup> Standard & Poor's 500 Index is an index of the 500 largest and most profitable companies in the United States.

#### ALGER AMERICAN CAPITAL APPRECIATION PORTFOLIO Portfolio Highlights Through December 31, 2008

#### HYPOTHETICAL \$10,000 INVESTMENT

- 10 years ended December 31, 2008

The chart above illustrates the growth in value of a hypothetical \$10,000 investment made in Alger American Capital Appreciation Class O shares and the Russell 3000 Growth Index for the ten years ended December 31, 2008. Figures for the Alger American Capital Appreciation Class O shares and the Russell 3000 Growth Index (an unmanaged index of common stocks), include reinvestment of dividends. Performance for Alger American Capital Appreciation Class S shares will vary from the results shown above due to differences in expenses that class bears.

PERFORMANCE COMPARISON THROUGH DECEMBER 31, 2008				
AVERAGE ANNUAL TOTAL RETURNS				
	1	5	10	SINCE
	YEAR	YEARS	YEARS	INCEPTION
CLASS 0 (INCEPTION 1/25/95)	(45.13)%	1.59%	0.81%	10.45%
Russell 3000 Growth Index	(38.45)%	(3.34)%	(4.02)%	4.69%
CLASS S (INCEPTION 5/1/02)	(45.28)%	1.32%	_	0.72%
Russell 3000 Growth Index	(38.45)%	(3.34)%		(1.82)%

The performance data quoted represent past performance, which is not an indication or a guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. For performance current to the most recent month-end, visit us at www.alger.com, or call us at (800) 254-3797.

Returns indicated assume reinvestment of all distributions, no transaction costs or taxes, and are net of management fees and fund operating expenses only. Total return does not include deductions at the portfolio or contract level for cost of insurance charges, premium load, administrative charges, mortality and expense risk charges or other charges that may be incurred under the variable annuity contract, variable life insurance plan or retirement plan for which the portfolio serves as an underlying investment vehicle. If these charges were deducted, the total return figures would be lower. Please refer to the variable insurance product or retirement plan disclosure documents for any additional applicable expenses. Investing in the stock market involves gains and losses and may not be suitable for all investors.

#### THE ALGER AMERICAN FUND | NOTES TO FINANCIAL STATEMENTS Alger American Capital Appreciation Portfolio

#### NOTE 1 — General:

The Alger American Fund (the "Fund") is a diversified, open-end registered investment company organized as a business trust under the laws of the Commonwealth of Massachusetts. The Fund operates as a series company currently issuing seven series of shares of beneficial interest: American LargeCap Growth Portfolio (formerly known as American Growth Portfolio), American SmallCap Growth Portfolio (formerly known as American Small Capitalization Portfolio), American Income and Growth Portfolio, American Balanced Portfolio, American MidCap Growth Portfolio, American Capital Appreciation Portfolio (formerly known as American Leveraged AllCap Growth Portfolio) and American SmallCap and MidCap Growth Portfolio. These Financial Statements include only the American Capital Appreciation Portfolio (the "Portfolio"). The Portfolio invests primarily in equity securities and has an investment objective of long-term capital appreciation. Shares of the Portfolio are available and are being marketed exclusively as a pooled funding vehicle for qualified retirement plans and for life insurance companies writing all types of variable annuity contracts and variable life insurance policies.

The Portfolio offers Class O and Class S shares. Each class has identical rights to assets and earnings except that only Class S shares have a plan of distribution and bear the related expenses.

The Portfolio changed its name to Alger American SmallCap Growth Portfolio effective May 1, 2008.

## NOTE 2 — Significant Accounting Policies:

(a) Investment Valuation: Investments of the Portfolio are generally valued on each day the New York Stock Exchange (the "NYSE") is open as of the close of the NYSE (normally 4:00 p.m. Eastern time). Securities for which such information is readily available are valued at the last reported sales price or official closing price as reported by an independent pricing service on the primary market or exchange on which they are traded. In the absence of reported sales, securities are valued at a price within the bid and asked price or, in the absence of a recent bid or asked price, the equivalent as obtained from one or more of the major market makers for the securities to be valued.

Securities for which market quotations are not readily available or for which the market quotations do not, in the opinion of the investment advisor, reflect the securities true values are valued at fair value, as determined in good faith pursuant to procedures established by the Board of Trustees.

Securities in which the Portfolio invests may be traded in markets that close before the close of the NYSE. Developments that occur between the close of the foreign markets and the close of the NYSE (normally 4:00 p.m. Eastern time) may result in adjustments to closing prices to reflect what the investment advisor, pursuant to policies established by the Board of Trustees, believes to be the fair value of these securities as of the close of the NYSE. The Portfolio may also fair value securities in other situations, for example, when a particular foreign market is closed but the Portfolio is open. Various factors may be reviewed in order to make a good faith determination of a security's fair value. These factors may include, but are not limited to, the type and cost of the security; contractual or legal restrictions on resale of the security; relevant financial or business developments of the issuer; actively traded similar or related securities; conversion or exchange rights on the security; related corporate actions; and changes in overall market conditions.

Securities having a remaining maturity of sixty days or less are valued at amortized cost which approximates market value.

Effective January 1, 2008, the Fund adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* ("FAS 157"). In accordance with FAS 157, fair value is defined as the price that the Fund would receive upon selling an investment in a timely transaction to an independent buyer in the principal or most advantageous market of the investment. FAS 157 established a three-tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability and may be observable or unobservable. Observable inputs are based on market data obtained from sources independent of the Fund. Unobservable inputs are inputs that reflect the Fund's own assumptions based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad Levels listed below.

- Level 1 quoted prices in active markets for identical investments
- Level 2 significant other observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For example, money market securities are valued using amortized cost, in accordance with rules under

the Investment Company Act of 1940 (the "1940 Act"). Generally, amortized cost approximates the current fair value of a security, but since the value is not obtained from a quoted price in an active market, such securities are reflected as Level 2.

The Fund's valuation techniques are consistent with the market approach whereby prices and other relevant information generated by market transactions involving identical or comparable assets are used to measure fair value.

The following is a summary of the inputs used as of December 31, 2008 in valuing the Portfolio's investments carried at fair value:

		FAIR VALUE MEASUREMENTS			
DESCRIPTION	PORTFOLIO TOTAL	LEVEL 1	LEVEL 2	LEV	/EL 3
Trading securities	\$ 187,679,052	\$ 187,315,677	\$ 363,375	\$	—
Total	\$187,679,052	\$187,315,677	\$363,375		—

(b) Security Transactions and Investment Income: Security transactions are recorded on a trade date basis. Resulting receivables and payables are carried at amounts which approximate fair value. Realized gains and losses from security transactions are recorded on the identified cost basis. Dividend income is recognized on the ex-dividend date and interest income is recognized on the accrual basis. Premiums and discounts on debt securities purchased are amortized or accreted over the lives of the respective securities.

(c) Foreign Currency Transactions: The books and records of the Portfolio are maintained in U.S. dollars. Foreign currencies, investments and other assets and liabilities are translated into U.S. dollars at the prevailing rates of exchange on the valuation date. Purchases and sales of investment securities and income and expenses are translated into U.S. dollars at the prevailing exchange rates on the respective dates of such transactions.

Net realized gains and losses on foreign currency transactions represent net gains and losses from the disposition of foreign currencies, currency gains and losses realized between the trade dates and settlement dates of security transactions, and the difference between the amount of net investment income accrued and the U.S. dollar amount actually received. The effects of changes in foreign currency exchange rates on investments in securities are included in realized and unrealized gain or loss on investments in the Statement of Operations.

(d) Option Contracts: When a Portfolio writes an option, an amount equal to the premium received by the Portfolio is recorded as a liability and is subsequently adjusted to the current fair value of the option written. Premiums received from writing options that expire unexercised are treated by the Portfolio on the expiration date as realized gains from investments. The difference between the premium and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or, if the premium is less than the amount paid for the closing purchase transaction, as a realized loss. If a written call option is exercised, the premium is added to the proceeds from the sale of the underlying security in determining whether the Portfolio has realized a gain or loss. If a written put option is exercised, the premium reduces the cost basis of the securities purchased by the Portfolio. The Portfolio as writer of an option bears the market risk of an unfavorable change in the price of the security underlying the written option.

The Portfolio may also purchase put and call options. Purchasing call and put options tends to decrease the Portfolio's exposure to the underlying instrument. The Portfolio pays a premium which is included in the Portfolio's Statement of Assets and Liabilities as an investment and subsequently marked to market to reflect the current value of the option. Premiums paid for purchasing options which expire are treated as realized losses. The risk associated with purchasing put and call options is limited to the premium paid. Premiums paid for purchasing options which are exercised or closed are added to the amounts paid or offset against the proceeds on the underlying security to determine the realized gain or loss.

(e) Lending of Portfolio Securities: The Portfolio may lend its securities to financial institutions, provided that the market value of the securities loaned will not at any time exceed one third of the Portfolio's total assets. The Portfolio earns fees on the securities loaned. In order to protect against the risk of failure by the borrower to return the securities loaned or any delay in the delivery of such securities, the loan is collateralized by cash, letters of credit or U.S. Government securities that are maintained in an amount equal to at least 100 percent of the current market value of the loaned securities. The market value of the loaned securities is determined at the close of business of the Portfolio and any required additional collateral is delivered to the Portfolio on the next business day. There were no securities on loan during the year ended December 31, 2008.

(f) Dividends to Shareholders: Dividends payable to shareholders are recorded by the Portfolio on the ex-dividend date.

Dividends from net investment income are declared and paid annually. Dividends from net realized gains, offset by any loss carryforward, are declared and paid annually after the end of the fiscal year in which earned. Each class is treated separately in determining the amounts of dividends of net investment income and capital gains payable to holders of its shares.

# THE ALGER AMERICAN FUND | NOTES TO FINANCIAL STATEMENTS (Continued) Alger American Capital Appreciation Portfolio

The characterization of distributions to shareholders for financial reporting purposes is determined in accordance with federal income tax rules. Therefore, the source of the Portfolio's distributions may be shown in the accompanying financial statements as either from, or in excess of, net investment income or net realized gain on investment transactions, or return of capital, depending on the type of book/tax differences that may exist.

Capital accounts within the financial statements are adjusted for permanent book/tax differences. Reclassifications result primarily from the difference in tax treatment of net operating losses, premium/discount of debt securities, realized gain loss from foreign currency transactions, realized gains from redemptions in kind, if any, and reclassification of distributions. The reclassifications have no impact on the net asset values of the Portfolio and are designed to present the Portfolio's capital accounts on a tax basis.

(g) Federal Income Taxes: It is the Portfolios' policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of the taxable income, including net realized capital gains, of the Portfolio to its respective shareholders. Therefore, no federal income tax provision is required. The Portfolio is treated as a separate entity for the purpose of determining such compliance.

(h) Allocation Methods: The Fund accounts separately for the assets, liabilities and operations of each Portfolio. Expenses directly attributable to each Portfolio are charged to that Portfolio's operations; expenses which are applicable to all Portfolios are allocated among them based on net assets. Income, realized and unrealized gains and losses, and expenses of each Portfolio are allocated among the Portfolio's classes based on relative net assets, with the exception of distribution fees, which are only applicable to Class S shares.

(i) Indemnification: The Fund enters into contracts that contain a variety of indemnification provisions. The Fund's maximum exposure under these arrangements is unknown. The Fund does not anticipate recognizing any loss related to these arrangements.

(j) Other: These financial statements have been prepared in accordance with U.S. generally accepted accounting principles using estimates and assumptions that affect the reported amounts therein. Actual results may differ from those estimates.

#### NOTE 3 — Investment Advisory Fees and Other Transactions with Affiliates:

(a) Investment Advisory and Administration Fees: Fees incurred by the Portfolio, pursuant to the provisions of the Fund's Investment Advisory Agreement and Administration Agreement with Fred Alger Management, Inc. ("Alger Management"), are payable monthly and computed based on the average daily net assets of the Portfolio at the following annual rates:

Advisory Fee	Administration Fee through March 16, 2008	Administration Fee Effective March 17, 2008
.810%	.04%	.0275%

As part of the settlement with the New York State Attorney General (see Note 8—Litigation) Alger Management has agreed to reduce its advisory fee to 0.775% for the Portfolio for the period from December 1, 2006 through November 30, 2011.

(b) Distribution Fees: Class S shares—The Fund has adopted a Distribution Plan pursuant to which Class S shares of each Portfolio pay Fred Alger & Company, Incorporated, the Fund's distributor (the "Distributor"), a fee at the annual rate of .25% of the respective average daily net assets of the Class S shares of the designated Portfolio to compensate the Distributor for its activities and expenses incurred in distributing the Class S shares. The fees paid may be more or less than the expenses incurred by the Distributor.

(c) Brokerage Commissions: During the year ended December 31, 2008, the Portfolio paid the Distributor \$794,900 in connection with securities transactions.

(d) Shareholder Administrative Fees: The Fund has entered into a shareholder administrative service agreement with Alger Management to compensate Alger Management on a per account basis for its liaison and administrative oversight of Boston Financial Data Services, Inc. ("BFDS"), the transfer agent for the Fund and other related services. During the year ended December 31, 2008, the Portfolio incurred fees of \$237 for these services provided by Alger Management which are included in transfer agent fees and expenses.

(e) Other: Certain trustees and officers of the Fund are directors and officers of Alger Management and the Distributor. Each Portfolio pays each Trustee who is not affiliated with the Advisor or its affiliates \$500 for each meeting attended, to a maximum of \$2,000 per annum. The Chairman of the Board of Trustees receives an additional annual fee of \$10,000 which is paid, pro rata, by all portfolios managed by Alger Management. Additionally, each member of the audit committee receives an additional \$50 from each Portfolio for each audit committee meeting attended, to a maximum of \$200 per annum.

#### THE ALGER AMERICAN FUND | NOTES TO FINANCIAL STATEMENTS (Continued) Alger American Capital Appreciation Portfolio

## **NOTE 4** — Securities Transactions:

Purchases and sales of securities, other than U.S. Government securities and short-term securities, for the year ended December 31, 2008, were \$958,773,216 and \$1,013,016,378, respectively.

Written call and put option activity for the year ended December 31, 2008 was as follows:

	NUMBER OF CONTRACTS	PREMIUMS RECEIVED
Options outstanding at December 31, 2007	_	\$ —
Options written	2,721	1,097,892
Options closed or expired	(2,721)	(1,097,892)
Options exercised		_
Options outstanding at December 31, 2008		\$ —

#### NOTE 5 — Lines of Credit:

The Fund participated in \$50 million committed lines of credits with other mutual funds managed by Alger Management through March 14, 2008. All borrowings had variable interest rates and were payable on demand.

The Portfolio may borrow under these lines up to 1/3 of the value of its assets to purchase additional securities. To the extent the Portfolio borrows under these lines, it must pledge securities with a total value of at least twice the amount borrowed. Effective March 17, 2008, the Portfolio borrowed from its custodian on a uncommitted basis. For the year ended December 31, 2008, the Portfolio had the following borrowings:

AVERAGE DAILY	WEIGHTED AVERAGE
BORROWING	INTEREST RATE
\$27,378	3.63%

## NOTE 6 — Share Capital:

The Fund has an unlimited number of authorized shares of beneficial interest of \$.001 par value which are divided into seven series. The Portfolio is divided into two separate classes.

During the year ended December 31, 2008, transactions of shares of beneficial interest were as follows:

	SHARES	AMOUNT
Class 0:		
Shares sold	943,508	\$ 43,208,599
Shares redeemed	(2,402,630)	(102,731,002)
Net decrease	(1,459,122)	\$(59,522,403)
Class S:		
Shares sold	89,652	\$ 3,940,202
Shares redeemed	(156,788)	(6,736,946)
Net decrease	(67,136)	\$ (2,796,744)

During the year ended December 31, 2007, transactions of shares of beneficial interest were as follows:

	SHARES	AMOUNT
Class 0:		
Shares sold	2,105,073	\$104,048,525
Shares redeemed	(1,798,562)	(87,027,140)
Net increase	306,511	\$17,021,385
Class S:		
Shares sold	351,063	\$ 16,454,197
Shares redeemed	(552,284)	(25,491,276)
Net decrease	(201,221)	\$ (9,037,079)

## NOTE 7 — Tax Character of Distributions to Shareholders:

During the years ended December 31, 2008 and December 31, 2007, there were no distributions paid.

As of December 31, 2008, the components of distributable earnings on a tax basis were as follows:

Undistributed ordinary income	\$ —	
Undistributed long-term gain	—	
Unrealized appreciation (depreciation)	(47,893,438)	

The difference between book-basis and tax-basis unrealized appreciation (depreciation) is determined annually and is attributable primarily to the tax deferral of losses on wash sales, the tax treatment of premium/discount on debt securities, realization of unrealized appreciation of Passive Foreign Investment Companies, return of capital from Real Estate Investment Trust investments, and investments in Partnerships.

At December 31, 2008, the Portfolio, for federal income tax purposes, had capital loss carryforwards which expire as set forth in the table below. These amounts may be applied against future net realized gains until the earlier of their utilization or expiration.

EXPIRATION DATE					
2010	2011	2016	TOTAL		
\$52,924	\$—	\$56,271,121	\$56,324,045		

Net capital losses incurred after October 31 and within the taxable year are deemed to arise on the first business day of the fund's next taxable year. For the period ended December 31, 2008, the amount of deferral for the Portfolio was \$46,101,071.

## NOTE 8 — Litigation:

Alger Management has responded to inquiries, document requests and/or subpoenas from various regulatory authorities, in connection with their investigations of practices in the mutual fund industry identified as "market timing" and "late trading." On October 11, 2006, Alger Management, Alger Inc. and Alger Shareholder Services, Inc. executed an Assurance of Discontinuance with the Office of the New York State Attorney General ("NYAG"). On January 18, 2007 the Securities and Exchange Commission issued an order implementing settlements reached with Alger Management and Alger Inc. As part of the settlements with the Commission and the NYAG, without admitting or denying liability, the firms paid \$30 million to reimburse fund shareholders and a fine of \$10 million; and agreed to certain other remedial measures including a reduction in management fees of \$1 million per year for five years. The entire \$40 million and fee reduction will be available for the benefit of investors. Alger Management has advised the Fund that the settlement has not adversely affected the operations of Alger Management, Alger Inc. or their affiliates, or adversely affected their ability to continue to provide services to the Fund.

On August 31, 2005, the West Virginia Securities Commissioner (the "WVSC") in an ex parte Summary Order to Cease and Desist and Notice of Right to Hearing concluded that Alger Management and Alger Inc. had violated the West Virginia Uniform Securities Act (the "WVUSA"), and ordered Alger Management and Alger Inc. to cease and desist from further violations of the WVUSA by engaging in the market-timing related conduct described in the order. The ex parte order provided notice of their right to a hearing with respect to the violations of law asserted by the WVSC. Other firms unaffiliated with Alger Management were served with similar orders. Alger Management and Alger Inc. intend to request a hearing for the purpose of seeking to vacate or modify the order.

In addition, in 2003 and 2004 several purported class actions and shareholder derivative suits were filed against various parties in the mutual fund industry, including Alger Management, certain mutual funds managed by Alger Management (the "Alger Mutual Funds"), and certain current and former Alger Mutual Fund trustees and officers, alleging wrongful conduct related to market-timing and late-trading by mutual fund shareholders. These cases were transferred to the U.S. District Court of Maryland by the Judicial Panel on Multidistrict Litigation for consolidated pre-trial proceedings. In September 2004, consolidated amended complaints involving these cases — a Consolidated Amended Fund Derivative Complaint (the "Derivative Complaint") and two substantially identical Consolidated Amended Class Action Complaints (together, the "Class Action Complaint") — were filed in the Maryland federal district court under the caption number 1:04-MD-15863 (JFM). In April 2005, a civil lawsuit involving similar allegations was filed by the West Virginia Attorney General and also transferred to the Maryland District Court, but such lawsuit has since been withdrawn.

The Derivative Complaint (which was later amended a second time) alleged (i) violations, by Alger Management and, depending on the specific offense alleged, by Alger Inc. and/or the fund trustee defendants, of Sections 36(a), 36(b), 47, and 48 of the

# THE ALGER AMERICAN FUND | NOTES TO FINANCIAL STATEMENTS (Continued) Alger American Capital Appreciation Portfolio

Investment Company Act of 1940, as amended (the "1940 Act") and of Sections 206 and 215 of the Investment Advisers Act of 1940, as amended, breach of fiduciary duty, and breach of contract, (ii) various offenses by other third-party defendants, and (iii) unjust enrichment by all the named defendants. The Class Action Complaint alleged, in addition to the offenses listed above, (i) violations, by Alger Management, Alger Inc., their affiliates, the funds named as defendants, including the Fund, and the current and former fund trustees and officers, of Sections 11, 12(a)(2), and 15 of the Securities Act of 1933, as amended, Sections 10(b) (and Rule 10b-5 thereunder) and 20(a) of the Securities Exchange Act of 1934, as amended, (the "1934 Act"), and Section 34(b) of the Investment Company Act, (ii) breach of contract by the funds named as defendants, and (iii) unjust enrichment of the defendants.

Motions to dismiss the Class Action Complaint and the Derivative Complaint were subsequently filed.

As a result of a series of court orders, all claims in the Class Action Complaint and the Derivative Complaint have been dismissed, other than claims under the 1934 Act against Alger Management, Alger Inc., Alger Associates, Inc. and Alger Shareholder Services, Inc., and certain present and former members of the senior management of Alger Management and/or Alger Inc., and claims under Section 36(b) of the Investment Company Act against Alger Management, Alger Inc., Alger Associates, Inc. and Alger Shareholder Services, Inc.

The class and derivative suits have been settled in principle, but such settlement is subject to court approval.

## Note 9 — Recent Accounting Pronouncements

On March 19, 2008, the FASB released Statement of Financial Accounting Standards No. 161, "Disclosures about Derivative Instruments and Hedging Activities" ("FAS 161"). FAS 161 requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of and gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. The application of FAS 161 is required for fiscal years and interim periods beginning after November 15, 2008. At this time, management is evaluating the implications of FAS 161 and believes the adoption of FAS 161 will have no material impact on the Fund's financial statements.

## To the Shareholders and Board of Trustees of The Alger American Fund:

We have audited the accompanying statement of assets and liabilities, including the schedule of investments, of The Alger American Capital Appreciation Portfolio (one of the portfolios constituting The Alger American (Fund) (the "Fund") as of December 31, 2008, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Fund's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the accounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of December 31, 2008, by correspondence with custodians and brokers or by other appropriate auditing procedures where replies from brokers were not received. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above, present fairly, in all material respects, the financial position of The Alger American Capital Appreciation Portfolio at December 31, 2008, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended, in conformity with U.S. generally accepted accounting principles.

Ernst + Young LLP

New York, New York February 10, 2009

#### Shareholder Expense Example

As a shareholder of a Portfolio, you incur two types of costs: transaction costs, if applicable; and ongoing costs, including management fees, distribution (12b-1) fees, if applicable, and other fund expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in a Portfolio and to compare these costs with the ongoing costs of investing in other mutual funds.

The example below is based on an investment of \$1,000 invested at the beginning of the six-month period starting July 1, 2008 and ending December 31, 2008.

#### **Actual Expenses**

The first line for each class of shares in the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you would have paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During the Period" to estimate the expenses you paid on your account during this period.

#### Hypothetical Example for Comparison Purposes

The second line for each class of shares in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio's actual expense ratios for each class of shares and an assumed rate of return of 5% per year before expenses, which is not the Portfolio's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in a Portfolio and other funds. To do so, compare this 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transaction costs or deduction of insurance charges against assets or annuities. Therefore, the second line under each class of shares in the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

		Beginning Account Value July 1, 2008	Ending Account Value December 31, 2008	Expenses Paid During the Period July 1, 2008 to December 31, 2008 (b)	Ratio of Expenses to Average Net Assets For the Six Months Ended December 31, 2008 (c)
Class O	Actual	\$1,000.00	\$ 632.50	\$3.73	0.91%
	Hypothetical	1,000.00	1,020.56	4.62	0.91
Class S	Actual	1,000.00	631.60	4.76	1.16
	Hypothetical	1,000.00	1,019.30	5.89	1.16

(a) 5% annual return before expenses.

(b) Expenses are equal to the annualized expense ratio of the respective share class, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period).

(c) Annualized.

## Trustees and Officers of the Fund (Unaudited)

Information about the Trustees and officers of the Fund is set forth below. In the table the term "Alger Fund Complex" refers to the Fund, The Alger Funds II, The Alger Funds, The Alger Institutional Funds, The Alger China-U.S. Growth Fund and Castle Convertible Fund, Inc., each of which is a registered investment company managed by Fred Alger Management, Inc. ("Alger Management"). Each Trustee serves until an event of termination, such as death or resignation, or until his successor is duly elected; each officer's term of office is one year. Unless otherwise noted, the address of each person named below is 111 Fifth Avenue, New York, NY 10003.

Name, Age, Position with the Fund	Principal Occupations	Trustee and/or Officer Since	Number of Portfolios in the Alger Fund Complex which are Overseen by Trustee
INTERESTED TRUSTEES			
Hilary M. Alger, CFA (47)	Director of Development, Pennsylvania Ballet since 2004; Associate Director of Development, College of Arts and Sciences and Graduate School, University of Virginia 1999-2003.	2003	27
NON-INTERESTED TRUSTEES			
Charles F. Baird, Jr. (55)	Managing Partner of North Castle Partners, a private equity securities group; Chairman of Leiner Health Products, Enzymatic Therapy and Caleel & Hayden (skincare business); former Chairman of Elizabeth Arden Day Spas, Naked Juice, Equinox (fitness company) and EAS (manufacturer of nutritional products). Formerly Managing Director of AEA Investors, Inc.	2007	27
Roger P. Cheever (63)	Associate Vice President For Principal Gifts, and Senior Associate Dean of Development, Harvard University. Formerly Deputy Director of the Harvard College Fund.	2007	27
Lester L. Colbert, Jr. (74)	Private investor since 1988. Formerly, Chairman of the Board, President and Chief Executive Officer of Xidex Corporation (manufacturer of computer information media).	2007	27
Stephen E. O'Neil (76)	Attorney; Private investor since 1981. Formerly of Counsel to the law firm of Kohler & Barnes.	1988	27
David Rosenberg (46)	Associate Professor of Law since January 2006 (Assistant Professor 2000-2005), Zicklin School of Business, Baruch College, City University of New York.	2007	27 -2

#### **Investment Management Agreement Renewal (Unaudited)**

At an in-person meeting held on September 9, 2008, the Trustees, including the Independent Trustees, unanimously approved renewal of the Investment Advisory Agreement between the Fund and Alger Management (the "Agreement"). The Independent Trustees were assisted in their review by independent legal counsel and met with counsel in executive session separate from representatives of Alger Management.

In evaluating the Agreement, the Trustees drew on materials that they had requested and which were provided to them in advance of the meeting by Alger Management and by counsel. The materials covered, among other matters, (i) the nature, extent and quality of the services provided by Alger Management under the Agreement, (ii) the investment performance of the Fund's portfolios (each a "Portfolio"), (iii) the costs to Alger Management of its services and the profits realized by Alger Management and Alger Inc. from their relationship with the Fund, and (iv) the extent to which economies of scale would be realized if and as the Portfolios grow and whether the fee levels in the Agreement reflect these economies of scale. These materials included an analysis of the Portfolios and Alger Management's services by Callan Associates Inc. ("Callan"), an independent consulting firm whose specialties include assistance to fund trustees and directors in their review of advisory contracts pursuant to section 15(c) of the Investment Company Act of 1940. At the meeting, senior Callan personnel provided a presentation to the Trustees based on the Callan materials.

In deciding whether to approve renewal of the Agreement, the Trustees considered various factors, including those enumerated above. They also considered other direct and indirect benefits to Alger Management and its affiliates from their relationship with the Fund.

Nature, Extent and Quality of Services. In considering the nature, extent and quality of the services provided by Alger Management pursuant to the Agreement, the Trustees relied on their prior experience as Trustees of the Fund, their familiarity with the personnel and resources of Alger Management and its affiliates, and the materials provided at the meeting. They noted that under the Agreement Alger Management is responsible for managing the investment operations of the Portfolios. They also noted that administrative, compliance, reporting and accounting services necessary for the conduct of the Fund's affairs are provided by Alger Management under the separate Administration Agreement. The Trustees reviewed the background and experience of Alger Management's senior investment management personnel, including the individuals currently responsible for the investment operations of the Portfolios. They also considered the resources, operational structures and practices of Alger Management in managing each Portfolio, as well as Alger Management's overall investment management business. They noted especially Alger Management's history of expertise in managing portfolios of "growth" stocks and that, according to an analysis provided by Callan, the characteristics of each equity Portfolio had been typical of a fund that holds itself out to investors as growth-oriented. They also took notice of the ability of the manager of the fixed-income portion of the Balanced Portfolio to manage fixed-income instruments across the credit and credit quality spectra. The Trustees concluded that Alger Management's experience, resources and strength in the areas of importance to the Fund are considerable. The Trustees considered the level and depth of Alger Management's ability to execute portfolio transactions to effect investment decisions, including those through Alger Inc. The Trustees also considered the ongoing enhancements to the control and compliance environment at Alger Management and within the Fund.

**Investment Performance of the Funds.** Drawing upon information provided at the meeting by Alger Management as well as Callan and upon reports provided to the Trustees by Alger Management throughout the preceding year, the Trustees reviewed each Portfolio's returns (other than those of the SmallCap and MidCap Portfolio, which had been operating for one quarter only) for the year-to-date (at 6/30/08), last-quarter, and 1-, 3-, 5-, and 10-year periods to the extent available (and its year-by-year returns) and compared them with benchmark and peer-group data for the same periods. They noted that the performance of each of the equity Portfolios, which had generally been satisfactory in recent periods (or longer), was disappointing for the year to date. Noting that the 2008 market environment for domestic stocks in general and for "growth" stocks in particular had thus far been challenging in 2008, the Trustees discussed the Portfolios' recent performance with Alger Management and the performance prospects for the remainder of the year and beyond. The Trustees noted that the performance of the Balanced Portfolio, which had been improving relative to its peers and benchmarks, had lagged by both measures for the year to date but had shown marked improvement during the quarter ended June 30, 2008. As presented in the Callan materials, the performance of the Income & Growth Portfolio lagged that of its peers and benchmark by particularly wide margins during 2007 and 2008, negatively affecting the 3- and 5-year cumulative returns. The Trustees discussed with Alger Management the Portfolio's performance and Alger Management's plans for improvement.

Fund Fees and Expense Ratios; Profitability to Alger Management and its Affiliates. The Trustees considered the profitability of the Investment Advisory Agreement to Alger Management and its affiliates, and the methodology used by Alger Management in determining such profitability. The Trustees reviewed previously-provided data on each Portfolio's profitability to Alger Management and its affiliates for the year ended June 30, 2008 . In addition, the Trustees reviewed each Portfolio's management fee and expense ratio and compared them with a group of comparable funds. In order to assist the Trustees in this comparison, Callan had provided the Trustees with comparative information with respect to fees paid, and expense ratios incurred, by similar funds. That information indicated that while most fees and expense ratios were near or below the median, the fees of the Balanced Portfolio and the Capital Appreciation Portfolio and the Class-S expense ratios of all Portfolios except the Income & Growth Portfolio were above the median. In the latter cases, the Trustees determined that such information should be taken into account in weighing the size of the fee against the nature, extent and quality of the services provided. After discussing with representatives of the Adviser and Callan the methodologies used in computing the costs that formed the bases of the profitability calculations, the Trustees turned to the profitability data provided. After analysis and discussion, they concluded that, to the extent that Alger Management's and its affiliates' relationships with the Portfolios had been profitable to either or both of those entities in the case of one or more Portfolios, the profit margin in each case was not unacceptable.

**Economies of Scale.** On the basis of their discussions with management and their analysis of information provided at the meeting, the Trustees determined that the nature of the Portfolios and their operations is such that Alger Management is likely to realize economies of scale in the management of each Portfolio at some point as (and if) it grows in size, but that adoption of breakpoints in one or more of the advisory fees, while possibly appropriate at a later date, could await further analysis of the sources and potential scale of the economies and the fee structure that would best reflect them. Accordingly, the Trustees requested that Alger Management address this topic with the Trustees at future meetings.

**Other Benefits to Alger Management.** The Trustees considered whether Alger Management benefits in other ways from its relationship with the Fund. They noted that Alger Management maintains soft-dollar arrangements in connection with the equity Portfolios' brokerage transactions, reports on which are regularly supplied to the Trustees at their quarterly meetings and summaries of which, listing commissions by Portfolio through June 30, 2008 and December 31, 2007, had been included in the materials supplied prior to the meeting. The Trustees also noted that Alger Management receives fees from the Portfolios under the Administration Agreement, that Alger, Inc. provides a substantial portion of the Portfolios' equity brokerage and that Alger Management also receives fees from the Fund under a shareholder services agreement. The Trustees had been provided with information regarding, and had considered, the administration fee, brokerage and shareholder services

fee benefits in connection with their review of the profitability to Alger Management and its affiliates of their relationships with the Fund. As to other benefits received, the Trustees decided that none were so significant as to render Alger Management's fees excessive.

**Conclusions and Determinations.** At the conclusion of these discussions, each of the Independent Trustees expressed the opinion that he had been furnished with sufficient information to make an informed business decision with respect to renewal of the Investment Advisory Agreement. Based on its discussions and considerations as described above, the Board made the following conclusions and determinations:

The Board concluded that the nature, extent and quality of the services provided to each Portfolio by Alger Management are adequate and appropriate.

The Board was generally satisfied with the performance of each of the Portfolios on a relatively long-term basis, but determined to monitor the progress of Alger Management's steps to improve the performance of the equity Portfolios and the Income & Growth Portfolio by comparison with that of the first half of 2008 (as well as 2007 in the case of the Income & Growth Portfolio).

The Board concluded that each advisory fee paid to Alger Management was reasonable in light of comparative performance and expense and advisory fee information, costs of the services provided and profits to be realized and benefits derived or to be derived by Alger Management and its affiliates from the relationship with the Portfolio.

The Board determined that there were not at this time significant economies of scale to be realized by Alger Management in managing the Portfolios' assets but that, to the extent that material economies of scale should be realized in the future, the Board would seek to ensure that they were shared with the applicable Portfolio.

The Board considered these conclusions and determinations and, without any one factor being dispositive, determined with respect to each Portfolio that renewal of the Investment Advisory Agreement was in the best interests of the Portfolio and its shareholders.

## **Proxy Voting Policies**

A description of the policies and procedures the Fund uses to determine how to vote proxies relating to portfolio securities and the proxy voting record is available, without charge, by calling (800) 992-3863 or online on the Fund's website at http://www.alger.com or on the SEC's website at http://www.sec.gov.

#### **Fund Holdings**

The Portfolio's most recent month end portfolio holdings are available approximately sixty days after month end on the Fund's website at www.alger.com. The Portfolio also files its complete schedule of portfolio holdings with the SEC for the first and third quarter of each fiscal year on Form N-Q. Forms N-Q are available online on the SEC's website at www.sec.gov or may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. Information regarding the operation of the SEC's Public Reference Room may be obtained by calling 1-800-SEC-0330. A copy of the most recent quarterly holdings may also be obtained from the Fund by calling (800) 992-3863.

## **CREDIT SUISSE FUNDS**

Credit Suisse Trust (the "Trust") shares are not available directly to individual investors, but may be offered only through certain insurance products and pension and retirement plans.

The Trust's investment objectives, risks, charges and expenses (which should be considered carefully before investing), and more complete information about the Trust, are provided in the *Prospectus*, which should be read carefully before investing. You may obtain additional copies by calling 800-222-8977 or by writing to Credit Suisse Trust, P.O. Box 55030, Boston, MA 02205-5030.

Credit Suisse Asset Management Securities, Inc., Distributor, is located at Eleven Madison Avenue, New York, NY 10010. The Trust is advised by Credit Suisse Asset Management, LLC.

The views of the Portfolio's management are as of the date of the letter and the Portfolio holdings described in this document are as of December 31, 2008; these views and Portfolio holdings may have changed subsequent to these dates. Nothing in this document is a recommendation to purchase or sell securities.

Portfolio shares are not deposits or other obligations of Credit Suisse Asset Management, LLC ("Credit Suisse") or any affiliate, are not FDIC-insured and are not guaranteed by Credit Suisse or any affiliate. Portfolio investments are subject to investment risks, including loss of your investment.

February 2, 2009

Dear Shareholder:

For the twelve-month period ended December 31, 2008, Credit Suisse Trust — Emerging Markets Portfolio (the "Portfolio")<sup>1</sup> declined 54.80%, versus a decrease of 53.18% for its benchmark, the Morgan Stanley Capital International Emerging Markets Free Index (MSCI EM).<sup>2</sup>

#### Market Review: Emerging markets hard hit by global deleveraging

The year ended December 31, 2008 was a difficult one for almost all asset classes and emerging markets were no exception. Emerging market equities suffered their largest ever calendar year decline. A collapse of risk appetite and the ongoing credit freeze drove substantial redemptions in the asset class and resulted in declines across all markets, sectors and stocks.

Performance over the year was marked by several stages. In the first half of the year, rising energy and food prices lifted inflation above target rates and resulted in monetary tightening across many markets, which proved to be a strong de-rating force for emerging markets, particularly China. During this period, commodity suppliers (such as Brazil and Russia) and materials stocks were virtually the only outperformers. Markets entered a new phase of downturn in June and July as key commodity prices peaked, leading to large redemptions in BRIC and emerging market funds. The crisis deepened with the Lehman Brothers bankruptcy in September and Iceland's banking crisis in October, which prompted a collapse in risk appetite globally and exacerbated credit scarcity. Markets with poor external fundamentals and weak banking systems (such as those in Hungary and smaller central European countries) came under intense pressure, while a flight to the dollar produced severe weakening in many emerging market currencies. The downturn in markets finally stabilized in late October, following the announcement of aggressive policy measures in developed markets and the announcement of fiscal stimulus by China. Markets staged a year-end rally led by China and material stocks in particular.

#### Strategic Review and Outlook: More challenges ahead

For the year ended December 31, 2008, the Portfolio slightly underperformed the benchmark. In general, it was a very hard year for performance given the extreme levels of market volatility and the indiscriminate sell-off that hit large cap stocks across all sectors and resulted in massive redemptions from emerging markets. Specifically, the Portfolio's country position and stock selection in Brazil, India and China contributed positively to performance, while stock selection in Russia, South Africa and Mexico detracted from performance.

After a long bull market in emerging markets in which liquidity lifted all boats, we expect the market environment to remain challenging for emerging markets. On the negative side, to the extent that emerging markets remain a cyclical asset class, the global backdrop remains uncertain. The full impact of the downturn in growth in developed markets has yet to be seen, while economic momentum has been decreasing rapidly across emerging markets. On the positive side, fourth quarter gains and the abatement of some of the panic selling that took place in September and October provides a more stable basis for markets going forward. While we expect investor sentiment to remain cautious, the worst of the develeraging may be behind us. Valuations on the whole remain attractive, although we do not see this as significant enough catalyst for a serious return of capital to the asset class. In our opinion, any significant rally in emerging markets is likely to require global catalysts — narrower credit spreads, some stabilization in economic growth momentum and signs that the Chinese policy stimulus is working. We believe that macro and micro fundamentals will become more important in the coming year as differentiating factors for performance.

We remain focused on markets and companies less exposed to reductions in credit availability. For example, on a country level, we will focus on companies with stronger external balance sheets (lower external debt and financing needs/current account surpluses). On a company level, we will look for those with lower cash requirements and good corporate governance. While we expect there to be rallies in cyclical sectors, our portfolios are more broadly focused on domestic interest-rate sensitive sectors, defensive sectors (such as telecom and utilities), and areas that should benefit from countercyclical macroeconomic policies.

The Credit Suisse Emerging Markets Team

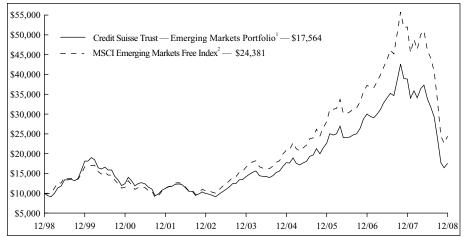

Neil Gregson Annabel Betz Matthew J.K. Hickman Stephen Parr

International investing entails special risk considerations, including currency fluctuations, lower liquidity, economic and political risks, and differences in accounting methods; these risks are generally heightened for emerging-market investments. The Portfolio may involve a greater degree of risk than other funds that seek capital growth by investing in larger, more developed markets.

In addition to historical information, this report contains forward-looking statements, which may concern, among other things, domestic and foreign market, industry and

economic trends and developments and government regulation and their potential impact on the Portfolio's investments. These statements are subject to risks and uncertainties and actual trends, developments and regulations in the future, and their impact on the Portfolio could be materially different from those projected, anticipated or implied. The Portfolio has no obligation to update or revise forward-looking statements.

## Average Annual Returns as of December 31, 2008<sup>1</sup>

			Since
1 Year	5 Years	10 Years	Inception <sup>3</sup>
(54.80)%	4.38%	5.79%	3.45%

Returns represent past performance and include change in share price and reinvestment of dividends and capital gains. **Past performance cannot guarantee** *future results.* The current performance of the Portfolio may be lower or higher than the figures shown. Returns and share price will fluctuate, and redemption value may be more or less than original cost. The performance results do not reflect the deduction of taxes that a shareholder would pay on portfolio distributions or the redemption of portfolio shares. Performance includes the effect of deducting expenses, but does not include charges and expenses attributable to any particular variable contract or plan. Accordingly, the Prospectus of the sponsoring Participating Insurance Company separate account or plan documents or other informational materials supplied by plan sponsors should be carefully reviewed for information on relevant charges and expenses. Excluding these charges and expenses from quotations of performance has the effect of increasing the performance quoted, and the effect of these charges should be considered when comparing performance to that of other mutual funds. Performance information current to the most recent month-end is available at www.credit-suisse.com/us.

*The annualized gross expense ratio is* 1.29%*. The annualized net expense ratio after fee waivers and/or expense reimbursements is* 1.04%*.* 

<sup>&</sup>lt;sup>1</sup> Fee waivers and/or expense reimbursements may reduce expenses for the Portfolio, without which performance would be lower. Waivers and/or reimbursements may be discontinued at any time.

<sup>&</sup>lt;sup>2</sup> The Morgan Stanley Capital International Emerging Markets Free Index is a free float-adjusted market capitalization index that is designed to measure equity market performance in the global emerging markets. It is the exclusive property of Morgan Stanley Capital International Inc. Investors cannot invest directly in an index.

<sup>&</sup>lt;sup>3</sup> Inception date 12/31/97.

#### Information About Your Portfolio's Expenses

As an investor of the Portfolio, you incur two types of costs: ongoing expenses and transaction costs. Ongoing expenses include management fees, distribution and service (12b-1) fees and other Portfolio expenses. Examples of transaction costs include sales charges (loads), redemption fees and account maintenance fees, which are not shown in this section and which would result in higher total expenses. The following table is intended to help you understand your ongoing expenses of investing in the Portfolio and to help you compare these expenses with the ongoing expenses of investing in other mutual funds. The table is based on an investment of \$1,000 made at the beginning of the six month period ended December 31, 2008.

The table illustrates your Portfolio's expenses in two ways:

- Actual Portfolio Return. This helps you estimate the actual dollar amount of ongoing expenses paid on a \$1,000 investment in the Portfolio using the Portfolio's actual return during the period. To estimate the expenses you paid over the period, simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the "Expenses Paid per \$1,000" line under the share class you hold.
- Hypothetical 5% Portfolio Return. This helps you to compare your Portfolio's ongoing expenses with those of other mutual funds using the Portfolio's actual expense ratio and a hypothetical rate of return of 5% per year before expenses. Examples using a 5% hypothetical portfolio return may be found in the shareholder reports of other mutual funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in these tables are meant to highlight your ongoing expenses only and do not reflect any transaction costs, such as sales charges (loads) or redemption fees. If these transaction costs had been included, your costs would have been higher. The "Expenses Paid per \$1,000" line of the tables is useful in comparing ongoing expenses only and will not help you determine the relative total expenses of owning different funds.

#### Expenses and Value for a \$1,000 Investment for the six month period ended December 31, 2008

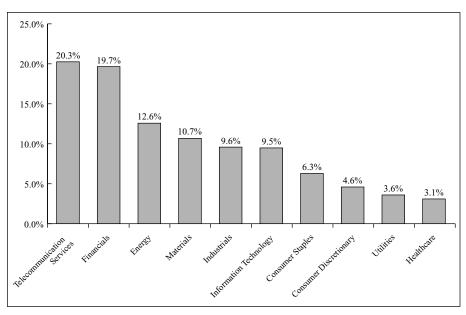

Actual Portfolio Return Beginning Account Value 7/1/08 Ending Account Value 12/31/08 Expenses Paid per \$1,000*	\$1,000.00 \$519.60 \$3.59
<b>Hypothetical 5% Portfolio Return</b> Beginning Account Value 7/1/08 Ending Account Value 12/31/08 Expenses Paid per \$1,000*	\$1,000.00 \$1,020.41 \$4.77
Annualized Expense Ratios*	0.94%

\* Expenses are equal to the Portfolio's annualized expense ratio multiplied by the average account value over the period, multiplied by the number of days in the most recent fiscal half year period, then divided by 366.

The "Expenses Paid per \$1,000" and the "Annualized Expense Ratios" in the tables are based on actual expenses paid by the Portfolio during the period, net of fee waivers and/or expense reimbursements. If those fee waivers and/or expense reimbursements had not been in effect, the Portfolio's actual expenses would have been higher. Expenses do not reflect additional charges and expenses that are, or may be, imposed under the variable contracts or plans. Such charges and expenses are described in the prospectus of the insurance company separate account or in the plan documents or other informational materials supplied by plan sponsors. The Portfolio's expenses should be considered with these charges and expenses in evaluating the overall cost of investing in the separate account.

For more information, please refer to the Portfolio's prospectus.

#### **SECTOR BREAKDOWN\***

## Credit Suisse Trust — Emerging Markets Portfolio Financial Highlights

(For a Share of the Portfolio Outstanding Throughout Each Year)

	For the Year Ended December 31,				
	2008	2007	2006	2005	2004
Per share data Net asset value, beginning of year	\$ 23.58	<u>\$ 21.85</u>	<u>\$ 16.82</u>	<u>\$ 13.25</u>	<u>\$ 10.63</u>
INVESTMENT OPERATIONS Net investment income Net gain (loss) on investments and foreign currency related items	0.25	0.37	0.21	0.14	0.12
(both realized and unrealized)	<u>(10.11</u> ) <sup>1</sup>	5.58	5.19	3.53	2.53
Total from investment operations	(9.86)	5.95	5.40	3.67	2.65
<b>LESS DIVIDENDS AND DISTRIBUTIONS</b> Dividends from net investment income Distributions from net realized gains	(0.34) (9.30)	(0.37) (3.85)	(0.11) (0.26)	(0.10)	(0.03)
Total dividends and distributions	(9.64)	(4.22)	(0.37)	(0.10)	(0.03)
Net asset value, end of year	\$ 4.08	\$ 23.58	\$ 21.85	\$ 16.82	\$ 13.25
Total return <sup>2</sup>	(54.80)%	29.44%	32.51%	27.84%	25.02%
RATIOS AND SUPPLEMENTAL DATA					
Net assets, end of year (000s omitted)	\$53,245	\$179,817	\$242,319	\$186,190	\$115,224
Ratio of expenses to average net assets	1.04%	1.30%	1.36%	1.40%	1.40%
Ratio of net investment income to average net assets Decrease reflected in above operating expense	1.40%	0.94%	1.11%	1.11%	1.21%
ratios due to waivers/reimbursements	0.25%	0.15%	0.23%	0.25%	0.29%
Portfolio turnover rate	61%	62%	80%	77%	121%

<sup>1</sup> The investment adviser fully reimbursed the Portfolio for a loss on a transaction not meeting the Portfolio's investment guidelines, which otherwise would have reduced the amount by \$0.01 (Note 3).

<sup>2</sup> Total returns are historical and assume changes in share price and reinvestment of all dividends and distributions. Had certain expenses not been reduced during the years shown, total returns would have been lower. Total returns do not reflect charges and expenses attributable to any particular variable contract or plan.

See Accompanying Notes to Financial Statements.

#### Note 1. Organization

Credit Suisse Trust (the "Trust") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"), and currently offers eight managed investment portfolios of which one, the Emerging Markets Portfolio (the "Portfolio"), is included in this report. The Portfolio is a diversified investment fund that seeks long-term growth of capital. Shares of the Portfolio are not available directly to individual investors but may be offered only through (a) variable annuity contracts and variable life insurance contracts offered by separate accounts of certain insurance companies and (b) tax-qualified pension and retirement plans. The Portfolio may not be available in connection with a particular contract or plan. The Trust was organized under the laws of the Commonwealth of Massachusetts as a business trust on March 15, 1995.

#### Note 2. Significant Accounting Policies

A) SECURITY VALUATION — The net asset value of the Portfolio is determined daily as of the close of regular trading on the New York Stock Exchange, Inc. (the "Exchange") on each day the Exchange is open for business. Equity investments are valued at market value, which is generally determined using the closing price on the exchange or market on which the security is primarily traded at the time of valuation (the "Valuation Time"). If no sales are reported, equity investments are generally valued at the most recent bid quotation as of the Valuation Time or at the lowest asked quotation in the case of a short sale of securities. Debt securities with a remaining maturity greater than 60 days are valued in accordance with the price supplied by a pricing service, which may use a matrix, formula or other objective method that takes into consideration market indices, yield curves and other specific adjustments. Debt obligations that will mature in 60 days or less are valued on the basis of amortized cost, which approximates market value, unless it is determined that using this method would not represent fair value. Investments in mutual funds are valued at the mutual fund's closing net asset value per share on the day of valuation. Securities and other assets for which market quotations are not readily available, or whose values have been materially affected by events occurring before the Portfolio's Valuation Time but after the close of the securities' primary markets, are valued at fair value as determined in good faith by, or under the direction of, the Board of Trustees under procedures established by the Board of Trustees. The Portfolio may utilize a service provided by an independent third party which has been approved by the Board of Trustees to fair value certain securities. When fair-value pricing is employed, the prices of securities used by a portfolio to calculate its net asset value may differ from quoted or published prices for the same securities.

#### Note 2. Significant Accounting Policies

The Portfolio adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements ("FAS 157"), effective January 1, 2008. In accordance with FAS 157, fair value is defined as the price that the Portfolio would receive upon selling an investment in a timely transaction to an independent buyer in the principal or most advantageous market of the investment. FAS 157 established a three-tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk, for example, the risk inherent in a particular valuation technique used to measure fair value including such a pricing model and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad Levels listed below.

- Level 1 quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Portfolio's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used as of December 31, 2008 in valuing the Portfolio's investments carried at value:

Valuation Inputs	Investments in Securities	Other Financial Instruments*
Level 1 – Quoted Prices	\$17,732,255	\$ —
Level 2 – Other Significant Observable Inputs	34,644,304	—
Level 3 – Significant Unobservable Inputs		
Total	\$52,376,559	\$

\*Other financial instruments include futures, forwards and swap contracts.

#### Note 2. Significant Accounting Policies

B) FOREIGN CURRENCY TRANSACTIONS — The books and records of the Portfolio are maintained in U.S. dollars. Transactions denominated in foreign currencies are recorded at the current prevailing exchange rates. All assets and liabilities denominated in foreign currencies are translated into U.S. dollar amounts at the current exchange rate at the end of the period. Translation gains or losses resulting from changes in the exchange rate during the reporting period and realized gains and losses on the settlement of foreign currency transactions are reported in the results of operations for the current period. The Portfolio does not isolate that portion of realized gains and losses on investments in *equity* securities which is due to changes in the foreign exchange rate from that which is due to changes in market prices of equity securities. The Portfolio isolates that portion of realized gains and losses on investments in *debt* securities which is due to changes in the foreign exchange rate from that which is due to changes in the foreign exchange rate from that which is due to changes in the foreign exchange rate from that which is due to changes in the foreign exchange rate from that which is due to changes in the foreign exchange

C) SECURITY TRANSACTIONS AND INVESTMENT INCOME — Security transactions are accounted for on a trade date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. The cost of investments sold is determined by use of the specific identification method for both financial reporting and income tax purposes.

D) DIVIDENDS AND DISTRIBUTIONS TO SHAREHOLDERS — Dividends from net investment income and distributions of net realized capital gains, if any, are declared and paid at least annually. However, to the extent that a net realized capital gain can be reduced by a capital loss carryforward, such gain will not be distributed. Income and capital gain distributions are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States of America ("GAAP").

E) FEDERAL INCOME TAXES — No provision is made for federal taxes as it is the Portfolio's intention to continue to qualify for and elect the tax treatment applicable to regulated investment companies under the Internal Revenue Code of 1986, as amended, and to make the requisite distributions to its shareholders, which will be sufficient to relieve it from federal income and excise taxes.

During June 2006, the Financial Accounting Standards Board ("FASB") issued FASB Interpretation 48 ("FIN 48" or the "Interpretation"), *Accounting for Uncertainty in Income Taxes – an interpretation of FASB statement 109*. The Portfolio has reviewed its current tax positions and has determined that no provision for income tax is required in the Portfolio's financial statements. The Portfolio's

#### Note 2. Significant Accounting Policies

federal tax returns for the prior three fiscal years remain subject to examination by the Internal Revenue Service.

F) USE OF ESTIMATES — The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from these estimates.

G) SHORT-TERM INVESTMENTS — The Portfolio, together with other funds/portfolios advised by Credit Suisse Asset Management, LLC ("Credit Suisse"), an indirect, wholly-owned subsidiary of Credit Suisse Group AG, pools available cash into either a short-term variable rate time deposit issued by State Street Bank and Trust Company ("SSB"), the Portfolio's custodian, or a money market fund advised by Credit Suisse. The short-term time deposit issued by SSB is a variable rate account classified as a short-term investment.

H) FORWARD FOREIGN CURRENCY CONTRACTS — The Portfolio may enter into forward foreign currency contracts for the purchase or sale of a specific foreign currency at a fixed price on a future date. Risks may arise upon entering into these contracts from the potential inability of counterparties to meet the terms of their contracts and from unanticipated movements in the value of a foreign currency. The Portfolio will enter into forward foreign currency contracts primarily for hedging purposes. Forward foreign currency contracts are adjusted by the daily forward exchange rate of the underlying currency and any gains or losses are recorded for financial statement purposes as unrealized until the contract settlement date or an offsetting position is entered into. At December 31, 2008, the Portfolio had no open forward foreign currency contracts.

I) SECURITIES LENDING — Loans of securities are required at all times to be secured by collateral at least equal to 102% of the market value of domestic securities on loan (including any accrued interest thereon) and 105% of the market value of foreign securities on loan (including any accrued interest thereon). Cash collateral received by the Portfolio in connection with securities lending activity may be pooled together with cash collateral for other funds/portfolios advised by Credit Suisse and may be invested in a variety of investments, including certain Credit Suisse-advised funds, funds advised by SSB, the Portfolio's securities lending agent, or money market instruments. However, in the event of default or bankruptcy by the other party to the

#### **Note 2. Significant Accounting Policies**

agreement, realization and/or retention of the collateral may be subject to legal proceedings.

SSB has been engaged by the Portfolio to act as the Portfolio's securities lending agent. The Portfolio's securities lending arrangement provides that the Portfolio and SSB will share the net income earned from securities lending activities. During the year ended December 31, 2008, total earnings from the Portfolio's investment in cash collateral received in connection with securities lending arrangements was \$415,019, of which \$239,963 was rebated to borrowers (brokers). The Portfolio retained \$140,492 in income from the cash collateral investment, and SSB, as lending agent, was paid \$34,564. The Portfolio may also be entitled to certain minimum amounts of income from its securities lending activities. Securities lending income is accrued as earned.

J) OTHER — The Portfolio may invest in securities of foreign countries and governments which involve certain risks in addition to those inherent in domestic investments. Such risks generally include, among others, currency risk (fluctuations in currency exchange rates), information risk (key information may be inaccurate or unavailable) and political risk (expropriation, nationalization or the imposition of capital or currency controls or punitive taxes). Other risks of investing in foreign securities include liquidity and valuation risks.

The Portfolio's investments in securities of issuers located in less developed countries considered to be "emerging markets" involve risks in addition to those generally applicable to foreign securities. Focusing on emerging (less developed) markets involves higher levels of risk, including increased currency, information, liquidity, market, political and valuation risks. Deficiencies in regulatory oversight, market infrastructure, shareholder protections and company laws could expose the Portfolio to operational and other risks as well. Some countries may have restrictions that could limit the Portfolio's access to attractive investment opportunities. Additionally, emerging markets often face serious economic problems (such as high external debt, inflation and unemployment) that could subject the Portfolio to increased volatility or substantial declines in value.

The Portfolio may be subject to taxes imposed by countries in which it invests with respect to its investments in issuers existing or operating in such countries. Such taxes are generally based on income earned or repatriated and capital gains realized on the sale of such investments. The Portfolio accrues such taxes when the related income is earned or gains are realized.

#### Note 3. Transactions with Affiliates and Related Parties

Credit Suisse serves as investment adviser for the Portfolio. Effective October 1, 2006, the Portfolio pays Credit Suisse for its advisory services a fee that consists of two components: (1) a monthly base management fee calculated by applying a fixed rate of 1.20% ("Base Fee"), plus or minus (2) a performance-fee adjustment ("Performance Adjustment") calculated by applying a variable rate of up to 0.20% (positive or negative) to the Portfolio's average daily net assets during the applicable performance measurement period. The performance measurement period will generally be 36 months. During the period from October 1, 2006 through September 30, 2007, only the Base Fee applied to the Portfolio. The fee adjustment went into effect on October 1, 2007. After 12 months have passed, the measurement period will be equal to the number of months that have elapsed since October 1, 2006 until 36 months has passed, after which the measurement period will become 36 months. The Base Fee and Performance Adjustment are calculated and accrued daily. The investment advisory fee is paid monthly in arrears. No Performance Adjustment will be applied unless the difference between the Portfolio's investment performance and the investment record of the MSCI Emerging Markets Free Index, the Portfolio's benchmark index (the "Index"), is 1.00% or greater (plus or minus) during the applicable performance measurement period. For purposes of computing the Base Fee and the Performance Adjustment, net assets will be averaged over different periods (average daily net assets during the relevant month for the Base Fee, versus average daily net assets during the performance measurement period for the Performance Adjustment). The investment performance of the Portfolio for the performance measurement period is used to calculate the Portfolio's Performance Adjustment. After Credit Suisse determines whether the Portfolio's performance was above or below the Index by comparing the investment performance of the Portfolio against the investment record of the Index, Credit Suisse will apply the Performance Adjustment (positive or negative) across the Portfolio.

The following table shows the structure of the Performance Adjustment. No Performance Adjustment will be applied unless the difference between the Portfolio's investment performance and the investment record of the Index is 1.00% or greater (plus or minus) during the applicable performance measurement period.

#### Annualized Return Net of Expenses) Performance **Relative to Index** Adjustment Over 2.00% +0.20% 1.00% to 2.00% +0.10% Base Fee plus/minus 0.00% to 1.00% None 0.00% to -1.00% None -1.00% to -2.00% -0.10% Over -2.00% -0.20%

#### Note 3. Transactions with Affiliates and Related Parties

For the year ended December 31, 2008, investment advisory fees earned and voluntarily waived were \$1,395,384 and \$289,647, respectively, less a performance fee adjustment of \$362,017. Credit Suisse will not recapture from the Portfolio any fees it waived during the year ended December 31, 2008. Fee waivers and reimbursements are voluntary and may be discontinued by Credit Suisse at any time.

Credit Suisse Asset Management Limited ("Credit Suisse U.K.") and Credit Suisse Asset Management Limited ("Credit Suisse Australia"), each an affiliate of Credit Suisse, are sub-investment advisers to the Portfolio (the "Sub-Advisers"). Credit Suisse U.K.'s and Credit Suisse Australia's sub-investment advisory fees are paid by Credit Suisse out of Credit Suisse's net investment advisory fee and are not paid by the Portfolio. As of October 1, 2008, Credit Suisse Australia no longer serves as sub-investment advisor to the Portfolio.

Credit Suisse reimbursed the Portfolio for a \$116,350 loss incurred on a transaction in September 2008 not meeting the Portfolio's investment guidelines. The reimbursement was recorded as a receivable as of December 31, 2008 and Credit Suisse subsequently made the payment in January 2009.

Credit Suisse Asset Management Securities, Inc. ("CSAMSI"), an affiliate of Credit Suisse, and SSB serve as co-administrators to the Portfolio. For its co-administrative services, CSAMSI currently receives a fee calculated at an annual rate of 0.09% of the Portfolio's average daily net assets. For the year ended December 31, 2008, co-administrative services fees earned by CSAMSI were \$104,654.

For its co-administrative services, SSB receives a fee, exclusive of out-of-pocket expenses, calculated in total for all the Credit Suisse funds/portfolios co-administered by SSB and allocated based upon the relative average net assets of each fund/portfolio, subject to an annual minimum fee. For the year ended December 31, 2008, co-administrative services fees earned by SSB (including out-of-pocket expenses) were \$54,770.

In addition to serving as the Portfolio's co-administrator, CSAMSI currently serves as distributor of the Portfolio's shares without compensation.

#### Note 3. Transactions with Affiliates and Related Parties

Merrill Corporation ("Merrill"), an affiliate of Credit Suisse, has been engaged by the Portfolio to provide certain financial printing and fulfillment services. For the year ended December 31, 2008, Merrill was paid \$22,884 for its services to the Portfolio.

#### Note 4. Line of Credit

The Portfolio, together with other funds/portfolios advised by Credit Suisse (collectively, the "Participating Funds"), participates in a \$50 million committed, unsecured line of credit facility ("Credit Facility") for temporary or emergency purposes with SSB. Under the terms of the Credit Facility, the Participating Funds pay an aggregate commitment fee at a rate of 0.10% per annum on the average unused amount of the Credit Facility, which is allocated among the Participating Funds in such manner as is determined by the governing Boards of the Participating Funds. In addition, the Participating Funds pay interest on borrowings at the Federal Funds rate plus 0.50%. At December 31, 2008, the Portfolio had no loans outstanding under the Credit Facility. During the year ended December 31, 2008, the Portfolio had borrowings under the Credit Facility as follows:

Average Daily	Weighted Average	Maximum Daily
Loan Balance	Interest Rate%	Loan Outstanding
\$4,499,486	4.160%	\$14,314,000

#### Note 5. Purchases and Sales of Securities

For the year ended December 31, 2008, purchases and sales of investment securities (excluding short-term investments) were \$69,224,575 and \$108,177,580, respectively.

#### Note 6. Capital Share Transactions

The Trust is authorized to issue an unlimited number of full and fractional shares of beneficial interest, \$.001 par value per share. Transactions in capital shares of the Portfolio were as follows:

	For the Year Ended December 31, 2008	For the Year Ended December 31, 2007
Shares sold	1,008,819	1,735,883
Shares issued in reinvestment of		4 004 007
dividends and distributions	9,915,642	1,264,207
Shares redeemed	<u>(5,490,383</u> )	<u>(6,461,658)</u>
Net increase (decrease)	5,434,078	(3,461,568)

#### **Note 6. Capital Share Transactions**

On December 31, 2008, the number of shareholders that held 5% or more of the outstanding shares of the Portfolio was as follows:

Number of	Approximate Percentage
Shareholders	of Outstanding Shares
3	92%

Some of the shareholders are omnibus accounts, which hold shares on behalf of individual shareholders.

#### Note 7. Federal Income Taxes

Income and capital gain distributions are determined in accordance with federal income tax regulations, which may differ from GAAP.

The tax characteristics of dividends and distributions paid during the years ended December 31, 2008 and 2007, respectively, by the Portfolio were as follows:

Ordinary	Ordinary Income		Capital Gain
2008	2007	2008	2007
\$18,662,110	\$10,113,031	\$40,633,432	\$16,650,233

The tax basis components of distributable earnings differ from the amounts reflected in the Statement of Assets and Liabilities by temporary book/tax differences. These differences are primarily due to losses deferred on wash sales, mark-to-market of forward contracts, mark-to-market income from Passive Foreign Investment Companies and deferral of post-October losses.

At December 31, 2008, the components of distributable earnings on a tax basis were as follows:

Undistributed net investment income	\$	943,224
Accumulated realized gain		2,147,792
Unrealized depreciation	(	11,890,458)
Deferral of post – October capital losses		(5,508,381)
Deferral of post – October ordinary and currency losses		(35,556)
	\$(	14,343,379)

At December 31, 2008, the identified cost for federal income tax purposes, as well as the gross unrealized appreciation from investments for those securities having an excess of value over cost, gross unrealized depreciation from investments for those securities having an excess of cost over value and the net unrealized depreciation from investments were \$64,251,355, \$10,305,035, \$(22,179,831) and \$(11,874,796), respectively.

At December 31, 2008, the Portfolio reclassified \$122,431 from accumulated net realized loss from investments to undistributed net investment income, to

#### Note 7. Federal Income Taxes

adjust for current period permanent book/tax differences of foreign currency transactions, realized capital gains tax and the sale of Passive Foreign Investment Companies. Net assets were not affected by these reclassifications.

#### Note 8. Contingencies

In the normal course of business, the Portfolio may provide general indemnifications pursuant to certain contracts and organizational documents. The Portfolio's maximum exposure under these arrangements is dependent on future claims that may be made against the Portfolio and, therefore, cannot be estimated; however, based on experience, the risk of loss from such claims is considered remote.

#### Note 9. Recent Accounting Pronouncements

In March 2008, FASB issued Statement of Financial Accounting Standards No. 161, *Disclosures about Derivative Instruments and Hedging Activities* ("FAS 161"), an amendment of FASB Statement No. 133. FAS 161 requires enhanced disclosures about (a) how and why an entity uses derivative instruments, (b) how derivative instruments and hedging activities are accounted for, and (c) how derivative instruments and related hedging activities affect a fund's financial position, financial performance, and cash flows. Management of the Portfolio does not believe the adoption of FAS 161 will materially impact the financial statement amounts, but will require additional disclosures. This will include qualitative and quantitative disclosures on derivative positions existing at period end and the effect of using derivatives during the reporting period. FAS 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008.

#### Credit Suisse Trust — Emerging Markets Portfolio Report of Independent Registered Public Accounting Firm

To the Board of Trustees of Credit Suisse Trust and Shareholders of Credit Suisse Trust — Emerging Markets Portfolio:

In our opinion, the accompanying statement of assets and liabilities, including the schedule of investments, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of Emerging Markets Portfolio (the "Portfolio"), a portfolio of the Credit Suisse Trust, at December 31, 2008, the results of its operations for the year then ended and the changes in its net assets and financial highlights for the periods presented, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Portfolio's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit, which included confirmation of securities at December 31, 2008 by correspondence with the custodian and brokers, provides a reasonable basis for our opinion.

PricewaterhouseCoopers LLP

Baltimore, Maryland February 24, 2009

#### Credit Suisse Trust — Emerging Markets Portfolio Board Approval of Advisory Agreement (unaudited)

In approving the renewal of the current Advisory and Sub-Advisory Agreements, the Board of Trustees, including the Independent Trustees, at a meeting held on November 18 and 19, 2008, considered the following factors with respect to the Emerging Markets Portfolio (the "Portfolio"):

#### Investment Advisory Fee Rates

The Board reviewed and considered the current contractual advisory fee with a base rate of 1.20% for the Portfolio plus a variable performance adjustment fee based upon the Portfolio's performance relative to its benchmark during a performance adjustment period ("Contractual Advisory Fee"), in light of the extent and quality of the advisory services provided by Credit Suisse Asset Management, LLC ("Credit Suisse") or Credit Suisse Asset Management Limited ("Credit Suisse U.K."). The Board also reviewed and considered the fee waivers and/or expense reimbursement arrangements currently in place for the Portfolio and considered the actual fee rate of 0.78% paid by the Portfolio after taking waivers and reimbursements into account ("Net Advisory Fee"). The Board acknowledged that voluntary fee waivers and expense reimbursements could be discontinued at any time. The Board noted that the compensation paid to Credit Suisse U.K. (the "Sub-Adviser") does not increase the fees or expenses otherwise incurred by the Portfolio's shareholders.

Additionally, the Board received and considered information comparing the Portfolio's Contractual Advisory Fee, Net Advisory Fee and the Portfolio's overall expenses with those of funds in both the relevant expense group ("Expense Group") and universe of funds ("Expense Universe") provided by Lipper Inc., an independent provider of investment company data.

## Nature, Extent and Quality of the Services under the Advisory and

#### Sub-Advisory Agreements

The Board received and considered information regarding the nature, extent and quality of services provided to the Portfolio by Credit Suisse under the Advisory Agreement and by the Sub-Adviser under the Sub-Advisory Agreement. The Board also noted information received at regular meetings throughout the year related to the services rendered by Credit Suisse and the Sub-Adviser. The Board reviewed background information about Credit Suisse and the Sub-Adviser, including their respective Forms ADV. The Board considered the background and experience of both Credit Suisse's and the Sub-Adviser's senior management and the expertise of, and the amount of attention given to the Portfolio by, senior personnel of Credit Suisse and the Sub-Adviser. With respect to the Sub-Adviser, the Board also considered their expertise in managing the types of global investments that the Portfolio utilizes in its investment strategy. In addition, the Board reviewed the qualifications, backgrounds and responsibilities of the portfolio management team primarily responsible for the day-to-day portfolio management of the Portfolio and the extent of the resources devoted to research and analysis of actual and potential investments. The Board also received and considered information about the nature, extent and quality of services and fee rates offered to other Credit Suisse clients for comparable services.

In approving the Sub-Advisory Agreement, the Board also considered the benefits of retaining Credit Suisse's United Kingdom affiliate given the increased complexity of the domestic and international securities markets, specifically that retention of Credit Suisse U.K. expands the universe of companies and countries from which investment opportunities could be sought.

#### Portfolio Performance

The Board received and considered the performance results of the Portfolio over time, along with comparisons both to the relevant performance group ("Performance Group") and universe of funds ("Performance Universe") for the Portfolio. The Board was provided with a description of the methodology used to arrive at the funds included in the Performance Group and the Performance Universe.

#### Credit Suisse Profitability

The Board received and considered a profitability analysis of Credit Suisse based on the fees payable under the Advisory Agreement for the Portfolio, including any fee waivers or fee caps, as well as other relationships between the Portfolio on the one hand and Credit Suisse affiliates on the other. The Board received profitability information for the other funds in the Credit Suisse family of funds.

#### Economies of Scale

The Board considered whether economies of scale in the provision of services to the Portfolio were being passed along to the shareholders. Accordingly, the Board considered whether alternative fee structures (such as breakpoint fee

#### Credit Suisse Trust — Emerging Markets Portfolio Board Approval of Advisory Agreement (unaudited) (continued)

structures) would be more appropriate or reasonable taking into consideration economies of scale or other efficiencies that might accrue from increases in the Portfolio's asset levels.

#### Other Benefits to Credit Suisse

The Board considered other benefits received by Credit Suisse, the Sub-Adviser and their affiliates as a result of their relationship with the Portfolio. Such benefits include, among others, research arrangements with brokers who execute transactions on behalf of the Portfolio, administrative and brokerage relationships with affiliates of Credit Suisse and the Sub-Adviser and benefits potentially derived from an increase in Credit Suisse's and the Sub-Adviser's businesses as a result of their relationship with the Portfolio (such as the ability to market to shareholders other financial products offered by Credit Suisse, the Sub-Adviser and their affiliates).

The Board considered the standards applied in seeking best execution, whether and to what extent soft dollar credits are sought and how any such credits are utilized, any benefits that may be achieved by using an affiliated broker and the existence of quality controls applicable to brokerage allocation procedures. The Board also reviewed Credit Suisse's and the Sub-Adviser's method for allocating portfolio investment opportunities among their advisory clients.

#### Conclusions

In selecting Credit Suisse and the Sub-Adviser, and approving the Advisory Agreement and the investment advisory fee under such agreement and the Sub-Advisory Agreement, the Board concluded that:

- Although the combined Contractual Advisory Fee and co-administration fees were the highest in the Expense Group, the Net Advisory Fee and actual total expenses were the lowest in the Expense Group. The Board considered the fee to be reasonable.
- The Board was aware that the Portfolio's performance was below most funds in the Performance Group and the Performance Universe for all periods reviewed. The Board noted that the performance-based fee adjustment, which went into effect in October 2007, had been adopted to more closely align Credit Suisse's interests with the interests of the Portfolio's shareholders, which could result in improved investment performance over time for the benefit of all shareholders. The Board would continue to monitor steps taken by Credit Suisse to improve performance.

#### Credit Suisse Trust — Emerging Markets Portfolio Board Approval of Advisory Agreement (unaudited) (continued)

- Aside from performance (as described above), the Board was satisfied with the nature and extent of the investment advisory services provided to the Portfolio by Credit Suisse and the Sub-Adviser and that, based on dialogue with management and counsel, the services provided by Credit Suisse under the Advisory Agreement and by the Sub-Adviser under the Sub-Advisory Agreement are typical of, and consistent with, those provided to similar mutual funds by other investment advisers.
- In light of the costs of providing investment management and other services to the Portfolio and Credit Suisse's ongoing commitment to the Portfolio and willingness to waive fees and expenses, the profits and other ancillary benefits that Credit Suisse and its affiliates received were considered reasonable.
- Credit Suisse's profitability based on fees payable under the Advisory Agreement was reasonable in light of the nature, extent and quality of the services provided to the Portfolio thereunder.
- In light of the amount of the Net Advisory Fee and actual total expenses, the Portfolio's current fee structure was considered reasonable.

No single factor reviewed by the Board was identified by the Board as the principal factor in determining whether to approve the Advisory Agreement and the Sub-Advisory Agreement. The Independent Trustees were advised by separate independent legal counsel throughout the process.

## CREDIT SUISSE TRUST GLOBAL SMALL CAP PORTFOLIO

Credit Suisse Trust (the "Trust") shares are not available directly to individual investors, but may be offered only through certain insurance products and pension and retirement plans.

The Trust's investment objectives, risks, charges and expenses (which should be considered carefully before investing), and more complete information about the Trust, are provided in the *Prospectus*, which should be read carefully before investing. You may obtain additional copies by calling 800-222-8977 or by writing to Credit Suisse Trust, P.O. Box 55030, Boston, MA 02205-5030.

Credit Suisse Asset Management Securities, Inc., Distributor, is located at Eleven Madison Avenue, New York, NY 10010. The Trust is advised by Credit Suisse Asset Management, LLC.

The views of the Portfolio's management are as of the date of the letter and the Portfolio holdings described in this document are as of December 31, 2008; these views and Portfolio holdings may have changed subsequent to these dates. Nothing in this document is a recommendation to purchase or sell securities.

Portfolio shares are not deposits or other obligations of Credit Suisse Asset Management, LLC ("Credit Suisse") or any affiliate, are not FDIC-insured and are not guaranteed by Credit Suisse or any affiliate. Portfolio investments are subject to investment risks, including loss of your investment.

January 29, 2009

Dear Shareholder:

For the twelve months ended December 31, 2008, Credit Suisse Trust — Global Small Cap Portfolio (the "Portfolio")<sup>1</sup> had a loss of -46.75%, versus a loss of -42.91% for its benchmark, the Morgan Stanley Capital International World Small Cap Index.<sup>2</sup>

#### Market Review: A volatile year

The fiscal year ending December 31, 2008 was a tumultuous one marked by dramatic losses in the equity markets. Though 2008 will undoubtedly be remembered, most of us would rather forget it. The MSCI World Small Cap Index, the Portfolio's benchmark, declined 42.91%. Though this was the Index's worst performance on record, it was only 1% worse than the MSCI World Index, which includes securities of companies in all capitalization ranges.

In the United States, central bank target interest rates declined to their lowest level ever at 0% - 0.25%. Additionally, several household names like investment bank Lehman Brothers, global insurer AIG, mortgage and savings providers HBOS and Washington Mutual, and international financial services provider Fortis either went bankrupt or came very close to it. A series of hedge funds imploded — culminating in the \$50 billion Madoff scandal, where Bernard Madoff (Chairman of Bernard L. Madoff Investment Securities LLC and former NASDAQ chairman) was accused of what may turn out to be the largest investor fraud ever committed.

Within equities, defensive securities and low beta regions and sectors performed best. For the year, Japanese and American securities, healthcare, consumer staples and telecommunications performed relatively better than the market. Conversely, emerging markets, financials and materials performed relatively worse. Banks in particular performed very poorly as losses eroded shareholder equity, forcing capital raises and, in many cases, leaving current shareholders with almost no equity. Investors moved to low-leverage, high-quality assets as deleveraging forced sellers into the market. This effect was especially felt in Russia (whose market ended the year down 72%) and commodities, both relatively thinly traded markets.

Domestically, the U.S. housing sector continued to weaken in 2008, as evidenced by the S&P/Case Shiller U.S. Home Price Index, which measures home prices in 20 U.S. metropolitan areas. In October, the index was down 18% from a year earlier. The drop was more than originally forecast and has been falling every month since January 2007.

Additionally, unemployment continued to rise in 2008, with increased job losses in all major industry sectors. Non-farm payrolls fell by 533,000 jobs in November, following losses of 403,000 in September and 320,000 in October. The household unemployment rate was 6.7%.

# Strategic Review and Portfolio Outlook: Confidence and liquidity need to be restored

For the annual period ending December 31, 2008, the Fund underperformed its benchmark. Asset allocation and stock selection in financials added to performance — though these same factors detracted domestically. Several additional factors detracted from performance: A large underweight in Japanese securities had a material effect on performance due to the strength in the Japanese yen, positions in Russia fell meaningfully over the year and, though exposure to Russian securities was reduced, performance was affected; also, stock selection in the United States, particularly in the energy and health care sectors, was poor.

The small cap market posed additional difficulties. By nature, small cap stocks are less liquid and more risky, and with the credit crisis and liquidation of numerous funds and hedge funds in the second half of the year, volatility increased in the small cap market. In part, this is because hedge funds tend to have more investments in small caps than do retail funds, and as the hedge funds unwound, the sell off of small caps caused a depression in prices.

Within the Fund, we continue to believe that the markets will ultimately differentiate between stronger businesses with better prospects, though this has not been the case in the sell-off so far. Additionally, we are adopting a barbell strategy that will focus equally on high quality companies with better-thanaverage long-term return profiles and organic growth potential and on cyclical companies with some balance sheet leverage, very low expectations and longlived assets or brands.

Internationally, the Fund's largest overweight position is in healthcare where there are very strong global secular themes such as obesity, immunology, vaccines and advances in technology. The companies we are invested in have strong competitive positions, are often leaders in their fields and have strong balance sheets and attractive valuations. We expect consolidation to occur in this space and have already seen very large premiums paid for takeovers in 2009.

We believe that 2009 may be another year of bankruptcies. Though credit markets may be beginning to return to normal, banks are still unwilling to lend and have limited capacity to do so. In this environment, highly indebted companies with high fixed costs and rapidly declining volumes will not have the financial flexibility to weather the storm. We will focus on avoiding these companies for 2009. Globally, the economic outlook remains poor. Gross domestic product (GDP) growth will be the lowest for decades as both emerging and developed economies experience synchronized recessions. Central banks and governments will battle with deflation and trying to increase liquidity. By the end of 2009, we expect investors to become concerned with inflationary pressures and the long-term effects of the current policy response. However, this is not an average downturn and we expect global earnings to continue to drop sharply from here — reflecting the collapse in global demand experienced in the fourth quarter of 2008. However, with earnings declining, it is not impossible for stocks to react positively, even though traditionally this has only occurred for short periods of time. The market is a discounting mechanism. It may be possible that investors have already fully priced in the potential for earnings declines.

Globally, valuations look cheap on an absolute basis and very attractive relative to defensive assets such as government bonds and cash. The MSCI World trailing price earnings estimate is 11x (a level not seen since the 1980's). On a price-to-book basis, the MSCI World is now below 1.5x and its historical long-term average is 2.1x. Relative to U.S. bonds, equities now have a dividend yield higher than 10-year government bonds — a fact, however, that may be pointing to unsustainably low bond yields rather than attractive equities.

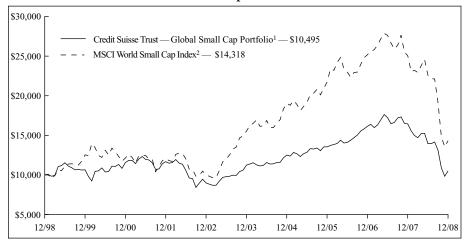

In our opinion, 2009 will be volatile, with sharp rallies and steep declines. However, overall we expect that the markets will end the year up from the lows of 2008.

Robert Graham-Brown Portfolio Manager

International investing entails special risk considerations, including currency fluctuations, lower liquidity, economic and political risks, and differences in accounting methods. Because of the nature of the Portfolio's investments in start-up and other small companies and certain aggressive strategies it may use, an investment in the Portfolio may be more volatile and less liquid than investments in larger companies and may not be appropriate for all investors.

In addition to historical information, this report contains forward-looking statements, which may concern, among other things, domestic and foreign market, industry and economic trends and developments and government regulation and their potential impact on the Portfolio's investments. These statements are subject to risks and uncertainties and actual trends, developments and regulations in the future, and their impact on the Portfolio could be materially different from those projected, anticipated or implied. The Portfolio has no obligation to update or revise forward-looking statements.

(46.75)%	(4.52)%	(3.14)%	(1.23)%

Returns represent past performance and include change in share price and reinvestment of dividends and capital gains. **Past performance cannot guarantee** *future results.* The current performance of the Portfolio may be lower or higher than the figures shown. Returns and share price will fluctuate, and redemption value may be more or less than original cost. The performance results do not reflect the deduction of taxes that a shareholder would pay on portfolio distributions or the redemption of portfolio shares. Performance includes the effect of deducting expenses, but does not include charges and expenses attributable to any particular variable contract or plan. Accordingly, the Prospectus of the sponsoring Participating Insurance Company separate account or plan documents or other informational materials supplied by plan sponsors should be carefully reviewed for information on relevant charges and expenses. Excluding these charges and expenses from quotations of performance has the effect of increasing the performance quoted, and the effect of these charges should be considered when comparing performance to that of other mutual funds. Performance information current to the most recent month-end is available at www.credit-suisse.com/us.

*The annualized gross expense ratio is* 1.88%*. The annualized net expense ratio after fee waivers and/or expense reimbursements is* 1.00%*.* 

<sup>&</sup>lt;sup>1</sup> Fee waivers and/or expense reimbursements may reduce expenses for the Portfolio, without which performance would be lower. Waivers and/or reimbursements may be discontinued at any time.

<sup>&</sup>lt;sup>2</sup> The Morgan Stanley Capital International World Small Cap Index is an unmanaged broad-based index comprised of small cap companies from 23 developed markets. Index returns are price only and do not reflect the reinvestment of dividends. It is the exclusive property of Morgan Stanley Capital International Inc. Investors cannot invest directly in an index.

<sup>&</sup>lt;sup>3</sup> Inception date 9/30/96.

#### Information About Your Portfolio's Expenses

As an investor of the Portfolio, you incur two types of costs: ongoing expenses and transaction costs. Ongoing expenses include management fees, distribution and service (12b-1) fees and other Portfolio expenses. Examples of transaction costs include sales charges (loads), redemption fees and account maintenance fees, which are not shown in this section and which would result in higher total expenses. The following table is intended to help you understand your ongoing expenses of investing in the Portfolio and to help you compare these expenses with the ongoing expenses of investing in other mutual funds. The table is based on an investment of \$1,000 made at the beginning of the six month period ended December 31, 2008.

The table illustrates your Portfolio's expenses in two ways:

- Actual Portfolio Return. This helps you estimate the actual dollar amount of ongoing expenses paid on a \$1,000 investment in the Portfolio using the Portfolio's actual return during the period. To estimate the expenses you paid over the period, simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the "Expenses Paid per \$1,000" line under the share class you hold.
- Hypothetical 5% Portfolio Return. This helps you to compare your Portfolio's ongoing expenses with those of other mutual funds using the Portfolio's actual expense ratio and a hypothetical rate of return of 5% per year before expenses. Examples using a 5% hypothetical portfolio return may be found in the shareholder reports of other mutual funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in these tables are meant to highlight your ongoing expenses only and do not reflect any transaction costs, such as sales charges (loads) or redemption fees. If these transaction costs had been included, your costs would have been higher. The "Expenses Paid per \$1,000" line of the tables is useful in comparing ongoing expenses only and will not help you determine the relative total expenses of owning different funds.

#### Expenses and Value for a \$1,000 Investment for the six month period ended December 31, 2008

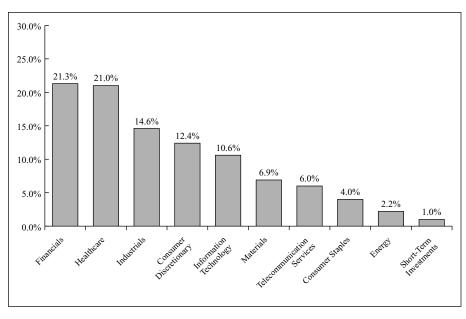

Actual Portfolio Return Beginning Account Value 7/1/08 Ending Account Value 12/31/08 Expenses Paid per \$1,000*	\$1,000.00 \$572.80 \$3.95
<b>Hypothetical 5% Portfolio Return</b> Beginning Account Value 7/1/08 Ending Account Value 12/31/08 Expenses Paid per \$1,000*	\$1,000.00 \$1,020.11 \$5.08
Annualized Expense Ratios*	1.00%

\* Expenses are equal to the Portfolio's annualized expense ratio multiplied by the average account value over the period, multiplied by the number of days in the most recent fiscal half year period, then divided by 366.

The "Expenses Paid per \$1,000" and the "Annualized Expense Ratios" in the tables are based on actual expenses paid by the Portfolio during the period, net of fee waivers and/or expense reimbursements. If those fee waivers and/or expense reimbursements had not been in effect, the Portfolio's actual expenses would have been higher. Expenses do not reflect additional charges and expenses that are, or may be, imposed under the variable contracts or plans. Such charges and expenses are described in the prospectus of the insurance company separate account or in the plan documents or other informational materials supplied by plan sponsors. The Portfolio's expenses should be considered with these charges and expenses in evaluating the overall cost of investing in the separate account.

For more information, please refer to the Portfolio's prospectus.

This amount represents less than \$(0.01) per share.

<sup>2</sup> Total returns are historical and assume changes in share price and reinvestment of all dividends and distributions. Had certain expenses not been reduced during the years shown, total returns would have been lower. Total returns do not reflect charges and expenses attributable to any particular variable contract or plan.

#### Note 1. Organization

Credit Suisse Trust (the "Trust") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"), and currently offers eight managed investment portfolios of which one, the Global Small Cap Portfolio (the "Portfolio"), is included in this report. The Portfolio is a diversified investment fund that seeks long-term growth of capital. Shares of the Portfolio are not available directly to individual investors but may be offered only through (a) variable annuity contracts and variable life insurance contracts offered by separate accounts of certain insurance companies and (b) tax-qualified pension and retirement plans. The Portfolio may not be available in connection with a particular contract or plan. The Trust was organized under the laws of the Commonwealth of Massachusetts as a business trust on March 15, 1995.

#### Note 2. Significant Accounting Policies

A) SECURITY VALUATION - The net asset value of the Portfolio is determined daily as of the close of regular trading on the New York Stock Exchange, Inc. (the "Exchange") on each day the Exchange is open for business. Equity investments are valued at market value, which is generally determined using the closing price on the exchange or market on which the security is primarily traded at the time of valuation (the "Valuation Time"). If no sales are reported, equity investments are generally valued at the most recent bid quotation as of the Valuation Time or at the lowest asked quotation in the case of a short sale of securities. Debt securities with a remaining maturity greater than 60 days are valued in accordance with the price supplied by a pricing service, which may use a matrix, formula or other objective method that takes into consideration market indices, yield curves and other specific adjustments. Debt obligations that will mature in 60 days or less are valued on the basis of amortized cost, which approximates market value, unless it is determined that using this method would not represent fair value. Investments in mutual funds are valued at the mutual fund's closing net asset value per share on the day of valuation. Securities and other assets for which market quotations are not readily available, or whose values have been materially affected by events occurring before the Portfolio's Valuation Time but after the close of the securities' primary markets, are valued at fair value as determined in good faith by, or under the direction of, the Board of Trustees under procedures established by the Board of Trustees. The Portfolio may utilize a service provided by an independent third party which has been approved by the Board of Trustees to fair value certain securities. When fair-value pricing is employed, the prices of securities used by a portfolio to calculate its net asset value may differ from quoted or published prices for the same securities.

Credit Suisse Trust — Global Small Cap Portfolio Notes to Financial Statements (continued) December 31, 2008

#### **Note 2. Significant Accounting Policies**

The Portfolio adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements ("FAS 157"), effective January 1, 2008. In accordance with FAS 157, fair value is defined as the price that the Portfolio would receive upon selling an investment in a timely transaction to an independent buyer in the principal or most advantageous market of the investment. FAS 157 established a three-tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk, for example, the risk inherent in a particular valuation technique used to measure fair value including such a pricing model and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad Levels listed below.

- Level 1 quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Portfolio's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used as of December 31, 2008 in valuing the Portfolio's investments carried at value:

Valuation Inputs	Investments in Securities	Other Financial Instruments*
Level 1 – Quoted Prices	\$19,901,656	\$ —
Level 2 – Other Significant Observable Inputs	14,292,299	_
Level 3 – Significant Unobservable Inputs		
Total	\$34,193,955	<u>\$                                    </u>

\*Other financial instruments include futures, forwards and swap contracts.

**Credit Suisse Trust — Global Small Cap Portfolio Notes to Financial Statements (continued)** December 31, 2008

#### Note 2. Significant Accounting Policies

B) FOREIGN CURRENCY TRANSACTIONS — The books and records of the Portfolio are maintained in U.S. dollars. Transactions denominated in foreign currencies are recorded at the current prevailing exchange rates. All assets and liabilities denominated in foreign currencies are translated into U.S. dollar amounts at the current exchange rate at the end of the period. Translation gains or losses resulting from changes in the exchange rate during the reporting period and realized gains and losses on the settlement of foreign currency transactions are reported in the results of operations for the current period. The Portfolio does not isolate that portion of realized gains and losses on investments in *equity* securities which is due to changes in the foreign exchange rate from that which is due to changes in market prices of equity securities. The Portfolio isolates that portion of realized gains and losses on investments in *debt* securities which is due to changes in the foreign exchange rate from that which is due to changes in the foreign exchange rate from that which is due to changes in the foreign exchange rate from that which is due to changes in the foreign exchange rate from that which is due to changes in the foreign exchange rate from that which is due to changes in the foreign exchange rate from that which is due to changes in the foreign exchange rate from that which is due to changes in market prices of debt securities.

C) SECURITY TRANSACTIONS AND INVESTMENT INCOME — Security transactions are accounted for on a trade date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. The cost of investments sold is determined by use of the specific identification method for both financial reporting and income tax purposes.

D) DIVIDENDS AND DISTRIBUTIONS TO SHAREHOLDERS — Dividends from net investment income and distributions of net realized capital gains, if any, are declared and paid at least annually. However, to the extent that a net realized capital gain can be reduced by a capital loss carryforward, such gain will not be distributed. Income and capital gain distributions are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States of America ("GAAP").

E) FEDERAL INCOME TAXES — No provision is made for federal taxes as it is the Portfolio's intention to continue to qualify for and elect the tax treatment applicable to regulated investment companies under the Internal Revenue Code of 1986, as amended, and to make the requisite distributions to its shareholders, which will be sufficient to relieve it from federal income and excise taxes.

During June 2006, the Financial Accounting Standards Board ("FASB") issued FASB Interpretation 48 ("FIN 48" or the "Interpretation"), *Accounting for Uncertainty in Income Taxes – an interpretation of FASB statement 109*. The Portfolio has reviewed its current tax positions and has determined that no provision for income tax is required in the Portfolio's financial statements. The Portfolio's

#### **Note 2. Significant Accounting Policies**

federal tax returns for the prior three fiscal years remain subject to examination by the Internal Revenue Service.

F) USE OF ESTIMATES — The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from these estimates.

G) SHORT-TERM INVESTMENTS — The Portfolio, together with other funds/portfolios advised by Credit Suisse Asset Management, LLC ("Credit Suisse"), an indirect, wholly-owned subsidiary of Credit Suisse Group AG, pools available cash into either a short-term variable rate time deposit issued by State Street Bank and Trust Company ("SSB"), the Portfolio's custodian, or a money market fund advised by Credit Suisse. The short-term time deposit issued by SSB is a variable rate account classified as a short-term investment.

H) FORWARD FOREIGN CURRENCY CONTRACTS — The Portfolio may enter into forward foreign currency contracts for the purchase or sale of a specific foreign currency at a fixed price on a future date. Risks may arise upon entering into these contracts from the potential inability of counterparties to meet the terms of their contracts and from unanticipated movements in the value of a foreign currency. The Portfolio will enter into forward foreign currency contracts primarily for hedging purposes. Forward foreign currency contracts are adjusted by the daily forward exchange rate of the underlying currency and any gains or losses are recorded for financial statement purposes as unrealized until the contract settlement date or an offsetting position is entered into. At December 31, 2008, the Portfolio had no open forward foreign currency contracts.

I) FUTURES — The Portfolio may enter into futures contracts to the extent permitted by its investment policies and objectives. Upon entering into a futures contract, the Portfolio is required to deposit cash and/or pledge U.S. Government securities as initial margin. Subsequent payments, which are dependent on the daily fluctuations in the value of the underlying instrument, are made or received by the Portfolio each day (daily variation margin) and are recorded as unrealized gains or losses until the contracts are closed. When the contracts are closed, the Portfolio records a realized gain or loss equal to the difference between the proceeds from (or cost of) the closing transactions and the Portfolio's basis in the contract. Risks of entering into futures contracts for hedging purposes include the possibility that a change in the value of the

**Credit Suisse Trust — Global Small Cap Portfolio Notes to Financial Statements (continued)** December 31, 2008

#### Note 2. Significant Accounting Policies

contract may not correlate with the changes in the value of the underlying instruments. In addition, the purchase of a futures contract involves the risk that the Portfolio could lose more than the original margin deposit and subsequent payments may be required for a futures transaction. At December 31, 2008, the Portfolio had no open futures contracts.

J) SECURITIES LENDING — Loans of securities are required at all times to be secured by collateral at least equal to 102% of the market value of domestic securities on loan (including any accrued interest thereon) and 105% of the market value of foreign securities on loan (including any accrued interest thereon). Cash collateral received by the Portfolio in connection with securities lending activity may be pooled together with cash collateral for other funds/portfolios advised by Credit Suisse and may be invested in a variety of investments, including certain Credit Suisse-advised funds, funds advised by SSB, the Portfolio's securities lending agent, or money market instruments. However, in the event of default or bankruptcy by the other party to the agreement, realization and/or retention of the collateral may be subject to legal proceedings.

SSB has been engaged by the Portfolio to act as the Portfolio's securities lending agent. The Portfolio's securities lending arrangement provides that the Portfolio and SSB will share the net income earned from securities lending activities. During the year ended December 31, 2008, total earnings from the Portfolio's investment in cash collateral received in connection with securities lending arrangements was \$550,737, of which \$326,509 was rebated to borrowers (brokers). The Portfolio retained \$179,855 in income from the cash collateral investment, and SSB, as lending agent, was paid \$44,373. The Portfolio may also be entitled to certain minimum amounts of income from its securities lending activities. Securities lending income is accrued as earned.

K) OTHER — The Portfolio may invest in securities of foreign countries and governments which involve certain risks in addition to those inherent in domestic investments. Such risks generally include, among others, currency risk (fluctuations in currency exchange rates), information risk (key information may be inaccurate or unavailable) and political risk (expropriation, nationalization or the imposition of capital or currency controls or punitive taxes). Other risks of investing in foreign securities include liquidity and valuation risks.

The Portfolio may be subject to taxes imposed by countries in which it invests with respect to its investments in issuers existing or operating in such countries. Such taxes are generally based on income earned or repatriated and capital

#### **Note 2. Significant Accounting Policies**

gains realized on the sale of such investments. The Portfolio accrues such taxes when the related income is earned or gains are realized.

#### Note 3. Transactions with Affiliates and Related Parties

Credit Suisse serves as investment adviser for the Portfolio. For its investment advisory services, Credit Suisse is entitled to receive a fee from the Portfolio at an annual rate of 1.25% of the Portfolio's average daily net assets. For the year ended December 31, 2008, investment advisory fees earned and voluntarily waived were \$765,229 and \$535,807, respectively. Credit Suisse will not recapture from the Portfolio any fees it waived during the year ended December 31, 2008. Fee waivers and reimbursements are voluntary and may be discontinued by Credit Suisse at any time.

Credit Suisse Asset Management Limited ("Credit Suisse U.K.") and Credit Suisse Asset Management Limited ("Credit Suisse Australia"), each an affiliate of Credit Suisse, are sub-investment advisers to the Portfolio (the "Sub-Advisers"). Credit Suisse U.K.'s and Credit Suisse Australia's sub-investment advisory fees are paid by Credit Suisse out of Credit Suisse's net investment advisory fee and are not paid by the Portfolio. As of October 1, 2008, Credit Suisse Australia no longer serves as sub-investment advisor to the Portfolio.

Credit Suisse Asset Management Securities, Inc. ("CSAMSI"), an affiliate of Credit Suisse, and SSB serve as co-administrators to the Portfolio. For its co-administrative services, CSAMSI currently receives a fee calculated at an annual rate of 0.09% of the Portfolio's average daily net assets. For the year ended December 31, 2008, co-administrative services fees earned by CSAMSI were \$55,096.

For its co-administrative services, SSB receives a fee, exclusive of out-ofpocket expenses, calculated in total for all the Credit Suisse funds/portfolios co-administered by SSB and allocated based upon the relative average net assets of each fund/portfolio, subject to an annual minimum fee. For the year ended December 31, 2008, co-administrative services fees earned by SSB (including out-of-pocket expenses) were \$84,954.

In addition to serving as the Portfolio's co-administrator, CSAMSI currently serves as distributor of the Portfolio's shares without compensation.

Merrill Corporation ("Merrill"), an affiliate of Credit Suisse, has been engaged by the Portfolio to provide certain financial printing and fulfillment services. For the year ended December 31, 2008, Merrill was paid \$30,174 for its services to the Portfolio.

#### Note 4. Line of Credit

The Portfolio, together with other funds/portfolios advised by Credit Suisse (collectively, the "Participating Funds"), participates in a \$50 million committed, unsecured line of credit facility ("Credit Facility") for temporary or emergency purposes with SSB. Under the terms of the Credit Facility, the Participating Funds pay an aggregate commitment fee at a rate of 0.10% per annum on the average unused amount of the Credit Facility, which is allocated among the Participating Funds in such manner as is determined by the governing Boards of the Participating Funds. In addition, the Participating Funds pay interest on borrowings at the Federal Funds rate plus 0.50%. At December 31, 2008, the Portfolio had no loans outstanding under the Credit Facility. During the year ended December 31, 2008, the Portfolio had borrowings under the Credit Facility as follows:

Average Daily	Weighted Average	Maximum Daily
Loan Balance	Interest Rate %	Loan Outstanding
\$1,156,484	3.958%	\$1,693,000

#### Note 5. Purchases and Sales of Securities

For the year ended December 31, 2008, purchases and sales of investment securities (excluding short-term investments) were \$102,730,165 and \$120,608,798, respectively.

#### Note 6. Capital Share Transactions

The Trust is authorized to issue an unlimited number of full and fractional shares of beneficial interest, \$.001 par value per share. Transactions in capital shares of the Portfolio were as follows:

	For the Year Ended December 31, 2008	For the Year Ended December 31, 2007
Shares sold	419,195	576,327
Shares issued in reinvestment of dividends	94,708	_
Shares redeemed	(1,985,343)	(2,523,446)
Net decrease	(1,471,440)	(1,947,119)

On December 31, 2008, the number of shareholders that held 5% or more of the outstanding shares of the Portfolio was as follows:

Number of	Approximate Percentage
Shareholders	of Outstanding Shares
5	73%

#### **Note 6. Capital Share Transactions**

Some of the shareholders are omnibus accounts, which hold shares on behalf of individual shareholders.

#### Note 7. Federal Income Taxes

Income and capital gain distributions are determined in accordance with federal income tax regulations, which may differ from GAAP.

The tax characteristics of dividends paid during the years ended December 31, 2008 and 2007, respectively, by the Portfolio were as follows:

 Ordinary Income

 2008
 2007

 \$1,052,206
 \$—

The tax basis components of distributable earnings differ from the amounts reflected in the Statement of Assets and Liabilities by temporary book/tax differences. These differences are primarily due to losses deferred on wash sales and deferral of post-October losses. At December 31, 2008, the components of distributable earnings on a tax basis for the Portfolio were as follows:

Undistributed net investment income	\$ 419,403
Accumulated net realized loss	(23,923,701)
Unrealized depreciation	(8,382,854)
Deferral of post-October capital losses	(16,909,566)
Deferral of post-October currency losses	(142,021)
	\$(48,938,739)

At December 31, 2008, the Portfolio had capital loss carryforwards available to offset possible future capital gains as follows:

Expires December 31,			
2010	2011	2016	
\$14,618,807	\$4,878,198	\$4,426,696	

During the tax year ended December 31, 2008, the Portfolio did not utilize any of the capital loss carryforward.

It is uncertain whether the Portfolio will be able to realize the benefits of the capital loss carryforward before they expire.

At December 31, 2008, the identified cost for federal income tax purposes, as well as the gross unrealized appreciation from investments for those securities

**Credit Suisse Trust — Global Small Cap Portfolio Notes to Financial Statements (continued)** December 31, 2008

#### Note 7. Federal Income Taxes

having an excess of value over cost, gross unrealized depreciation from investments for those securities having an excess of cost over value and the net unrealized depreciation from investments were \$42,605,964, \$1,092,058, \$(9,504,067) and \$(8,412,009), respectively.

At December 31, 2008, the Portfolio reclassified \$305,076 from undistributed net investment income and \$31,570 from paid-in capital to accumulated realized loss, to adjust for the current period permanent book/tax differences which arose principally from differing book/tax treatments of capital gain distributions received from Real Estate Investment Trusts, foreign currency gain (loss), reversal of prior year return of capital adjustments on Real Estate Investment Trusts sold and prior year adjustments on Partnerships. Net assets were not affected by these reclassifications.

#### Note 8. Contingencies

In the normal course of business, the Portfolio may provide general indemnifications pursuant to certain contracts and organizational documents. The Portfolio's maximum exposure under these arrangements is dependent on future claims that may be made against the Portfolio and, therefore, cannot be estimated; however, based on experience, the risk of loss from such claims is considered remote.

#### Note 9. Recent Accounting Pronouncements

In March 2008, FASB issued Statement of Financial Accounting Standards No. 161, *Disclosures about Derivative Instruments and Hedging Activities* ("FAS 161"), an amendment of FASB Statement No. 133. FAS 161 requires enhanced disclosures about (a) how and why an entity uses derivative instruments, (b) how derivative instruments and hedging activities are accounted for, and (c) how derivative instruments and related hedging activities affect a fund's financial position, financial performance, and cash flows. Management of the Portfolio does not believe the adoption of FAS 161 will materially impact the financial statement amounts, but will require additional disclosures. This will include qualitative and quantitative disclosures on derivative positions existing at period end and the effect of using derivatives during the reporting period. FAS 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008.

#### Credit Suisse Trust — Global Small Cap Portfolio Report of Independent Registered Public Accounting Firm

To the Board of Trustees of Credit Suisse Trust and Shareholders of Credit Suisse Trust — Global Small Cap Portfolio:

In our opinion, the accompanying statement of assets and liabilities, including the schedule of investments, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of Global Small Cap Portfolio (the "Portfolio"), a portfolio of the Credit Suisse Trust, at December 31, 2008, the results of its operations for the year then ended and the changes in its net assets and financial highlights the periods presented, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Portfolio's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit, which included confirmation of securities at December 31, 2008 by correspondence with the custodian and brokers, provides a reasonable basis for our opinion.

PricewaterhouseCoopers LLP

Baltimore, Maryland February 24, 2009

#### Credit Suisse Trust — Global Small Cap Portfolio Board Approval of Advisory Agreement (unaudited)

In approving the renewal of the current Advisory and Sub-Advisory Agreements, the Board of Trustees, including the Independent Trustees, at a meeting held on November 18 and 19, 2008, considered the following factors with respect to the Global Small Cap Portfolio (the "Portfolio"):

#### Investment Advisory Fee Rates

The Board reviewed and considered the contractual advisory fee rate of 1.25% for the Portfolio ("Contractual Advisory Fee") in light of the extent and quality of the advisory services provided by Credit Suisse Asset Management, LLC ("Credit Suisse") or Credit Suisse Asset Management Limited ("Credit Suisse U.K.") The Board also reviewed and considered the fee waivers and/or expense reimbursement arrangements currently in place for the Portfolio and considered the actual fee rate of 0.60% paid by the Portfolio after taking waivers and expense reimbursements into account ("Net Advisory Fee"). The Board acknowledged that voluntary fee waivers and reimbursements could be discontinued at any time. In addition, the Board noted that the compensation paid to Credit Suisse U.K. (the "Sub-Adviser") does not increase the fees or expenses otherwise incurred by the Portfolio's shareholders.

Additionally, the Board received and considered information comparing the Portfolio's Contractual Advisory Fee, Net Advisory Fee and the Portfolio's overall expenses with those of funds in both the relevant expense group ("Expense Group") and universe of funds ("Expense Universe") provided by Lipper Inc., an independent provider of investment company data.

## Nature, Extent and Quality of the Services under the Advisory and Sub-Advisory Agreements

The Board received and considered information regarding the nature, extent and quality of services provided to the Portfolio by Credit Suisse under the Advisory Agreement and by the Sub-Adviser under the Sub-Advisory Agreement. The Board also noted information received at regular meetings throughout the year related to the services rendered by Credit Suisse and the Sub-Adviser. The Board reviewed background information about Credit Suisse and the Sub-Adviser, including their respective Forms ADV. The Board considered the background and experience of both Credit Suisse's and the Sub-Adviser's senior management and the expertise of, and the amount of attention given to the Portfolio by, senior personnel of Credit Suisse and the Sub-Adviser. With respect to the Sub-Adviser, the Board also considered their expertise in managing the types of global investments that the Portfolio utilizes in its

#### Credit Suisse Trust — Global Small Cap Portfolio Board Approval of Advisory Agreement (unaudited) (continued)

investment strategy. In addition, the Board reviewed the qualifications, backgrounds and responsibilities of the portfolio management team primarily responsible for the day-to-day portfolio management of the Portfolio and the extent of the resources devoted to research and analysis of actual and potential investments. The Board also received and considered information about the nature, extent and quality of services and fee rates offered to other Credit Suisse clients for comparable services.

In approving the Sub-Advisory Agreement, the Board also considered the benefits of retaining Credit Suisse's United Kingdom affiliate given the increased complexity of the domestic and international securities markets, specifically that retention of Credit Suisse U.K. expands the universe of companies and countries from which investment opportunities could be sought.

#### Portfolio Performance

The Board received and considered the performance results of the Portfolio over time, along with comparisons, both to the relevant performance group ("Performance Group") and universe of funds ("Performance Universe") for the Portfolio. The Board was provided with a description of the methodology used to arrive at the funds included in the Performance Group and the Performance Universe.

#### Credit Suisse Profitability

The Board received and considered a profitability analysis of Credit Suisse based on the fees payable under the Advisory Agreement for the Portfolio, including any fee waivers or fee caps, as well as other relationships between the Portfolio on the one hand and Credit Suisse affiliates on the other. The Board received profitability information for the other funds in the Credit Suisse family of funds.

#### Economies of Scale

The Board considered whether economies of scale in the provision of services to the Portfolio were being passed along to the shareholders. Accordingly, the Board considered whether alternative fee structures (such as breakpoint fee structures) would be more appropriate or reasonable taking into consideration economies of scale or other efficiencies that might accrue from increases in the Portfolio's asset levels.

#### Other Benefits to Credit Suisse

The Board considered other benefits received by Credit Suisse, the Sub-Adviser and their affiliates as a result of their relationships with the Portfolio. Such benefits include, among others, research arrangements with brokers who execute transactions on behalf of the Portfolio, administrative and brokerage relationships with affiliates of Credit Suisse and the Sub-Adviser and benefits potentially derived from an increase in Credit Suisse's and the Sub-Adviser's businesses as a result of their relationship with the Portfolio (such as the ability to market to shareholders other financial products offered by Credit Suisse, the Sub-Adviser and their affiliates).

The Board considered the standards applied in seeking best execution, whether and to what extent soft dollar credits are sought and how any such credits are utilized, any benefits that may be achieved by using an affiliated broker and the existence of quality controls applicable to brokerage allocation procedures. The Board also reviewed Credit Suisse's and the Sub-Adviser's method for allocating portfolio investment opportunities among their advisory clients.

#### Conclusions

In selecting Credit Suisse and the Sub-Adviser, and approving the Advisory Agreement and the investment advisory fee under such agreement and the Sub-Advisory Agreement, the Board concluded that:

- The Contractual Advisory Fee was the highest in the Expense Group, but the Net Advisory Fee was lower than the median in the Expense Group. The Board noted the recent increase in the fee waiver and considered the fee to be reasonable.
- The Portfolio's performance was the lowest in the Performance Group, and was among the lowest in its Performance Universe, for all periods reviewed. The Board noted that changes to investment strategy and portfolio management of the Fund had gone into effect on October 31, 2008, including a change from a quantitative/fundamental mix to a pure fundamental approach. The Board determined it would continue to monitor steps undertaken by Credit Suisse to improve performance.
- Aside from performance (as described above), the Board was satisfied with the nature and extent of the investment advisory services provided to the Portfolio by Credit Suisse and the Sub-Adviser and that, based on dialogue with management and counsel, the services provided by Credit Suisse

under the Advisory Agreement and by the Sub-Adviser under the Sub-Advisory Agreement are typical of, and consistent with, those provided to similar mutual funds by other investment advisers.

- In light of the costs of providing investment management and other services to the Portfolio and Credit Suisse's ongoing commitment to the Portfolio and willingness to waive fees and expenses, the profits and other ancillary benefits that Credit Suisse and its affiliates received were considered reasonable.
- Credit Suisse's profitability based on fees payable under the Advisory Agreement was reasonable in light of the nature, extent and quality of the services provided to the Portfolio thereunder.
- In light of the fee waiver and the relatively small size of the Portfolio, the Portfolio's current fee structure (without breakpoints) was considered reasonable.

No single factor reviewed by the Board was identified by the Board as the principal factor in determining whether to approve the Advisory Agreement and the Sub-Advisory Agreement. The Independent Trustees were advised by separate independent legal counsel throughout the process.

## Dreyfus Investment Portfolios, MidCap Stock Portfolio The Portfolio

## A LETTER FROM THE CEO

Dear Shareholder:

We present to you this annual report for Dreyfus Investment Portfolios, MidCap Stock Portfolio, covering the 12-month period from January 1, 2008, through December 31, 2008.

2008 was the most difficult year in decades for the economy and stock market. A credit crunch that originated in 2007 in the U.S. sub-prime mortgage market exploded in mid-2008 into a global financial crisis, resulting in the failures of major financial institutions, a deep and prolonged recession and lower investment values across a broad range of asset classes. Governments and regulators throughout the world moved aggressively to curtail the damage, implementing unprecedented reductions of short-term interest rates, massive injections of liquidity into the banking system, government bailouts of struggling companies and plans for massive economic stimulus programs.

Although we expect the U.S. and global economies to remain weak until longstanding imbalances have worked their way out of the system, the financial markets currently appear to have priced in investors' generally low expectations. In previous recessions, however, the markets have tended to anticipate economic improvement before it occurs, potentially leading to major rallies when few expected them. That's why it makes sense to remain disciplined, maintain a long-term perspective and adopt a consistent asset allocation strategy that reflects one's future goals and attitudes toward risk. As always, we urge you to consult with your financial advisor, who can recommend the course of action that is right for you.

For information about how the portfolio performed during the reporting period, as well as market perspectives, we have provided a Discussion of Performance given by the Portfolio Managers.

Thank you for your continued confidence and support.

Sincerely,

Jonathan R. Baum Chief Executive Officer The Dreyfus Corporation January 15, 2009

## DISCUSSION OF PERFORMANCE

For the period of January 1, 2008, through December 31, 2008, as provided by Michael Dunn, Oliver Buckley, Langton C. Garvin and Patrick Slattery, Portfolio Managers

#### Portfolio and Market Performance Overview

For the 12-month period ended December 31, 2008, Dreyfus Investment Portfolios, MidCap Stock Portfolio's Initial shares produced a total return of -40.42%, and its Service shares produced a total return of -40.44%.<sup>1</sup> In comparison, the portfolio's benchmark, the Standard & Poor's MidCap 400 Index ("S&P 400 Index"), produced a total return of -36.23% for the same period.<sup>2</sup>

Stocks plunged from September through November 2008 under pressure from slowing economic growth and a sharply tightening credit market. These factors took a heavy toll on stocks in all market capitalization ranges, with midcap stocks roughly equaling the declines in their large-cap counterparts. Disappointing individual stock selections caused the portfolio's relative performance to lag its benchmark.

#### The Portfolio's Investment Approach

The portfolio seeks investment results that are greater than the total return performance of publicly traded common stocks of medium-size domestic companies in the aggregate, as represented by the S&P 400 Index. To pursue this goal, the portfolio normally invests at least 80% of its assets in stocks of midsize companies. The portfolio invests in growth and value stocks, which are chosen through a disciplined investment process that combines computer modeling techniques, fundamental analysis and risk management. Consistency of returns compared to the S&P 400 Index is a primary goal of the investment process.

#### Volatile Conditions Drove Unpredictable Market Shifts

Markets behaved unpredictably during 2008, rising and falling steeply in response to changing economic winds. Demand from emerging industrial giants such as China and India pushed prices of petroleum and many basic materials to unprecedented heights during the first half of the year, only for those prices to collapse over the second half of the

#### DISCUSSION OF PERFORMANCE (continued)

year as economic growth slowed and demand receded. Housing prices deflated throughout the year, leading to a crisis in securitized mortgage instruments that drove several major financial institutions out of business or to the brink of insolvency over the summer. The ensuing credit squeeze sharply limited access to capital for businesses, consumers and investors. As housing values dropped and unemployment surged, consumers curtailed discretionary spending. By the end of 2008, every market sector in the S&P 400 Index showed substantial declines, with the hard-hit financials sector losing more than half of its value.

The effectiveness of the portfolio's momentum and value stock selection factors fluctuated in this challenging environment. Each set of factors considered by our models contributed positively to the portfolio's results at times, but on balance neither bolstered returns on a consistent basis. The impact of market volatility was most apparent in the financials sector, which included some of the portfolio's best and worst performers. On the positive side, insurer Philadelphia Consolidated Holding, which was sold during the reporting period, was acquired at an attractive premium, and stock exchange The NASDAQ OMX Group benefited from rising trading volumes, an expanding overseas presence and effective cost cutting measures. On the negative side, two real estate investment trusts, ProLogis, which was sold during the reporting period, and Hospitality Properties Trust were hurt by the weakening economy and slumping real estate markets, as was property management firm Jones Lang LaSalle.

#### Mixed Returns in Other Sectors

During the reporting period every sector represented in the portfolio moved lower in absolute terms, on average, however, a number of individual investments contributed positively to its relative performance. These included consumer-related holdings, such as toy maker Hasbro and discount retailers Dollar Tree and Family Dollar Stores, which bucked otherwise negative sector trends. Edwards Lifesciences gained ground on takeover speculation and the success of its minimally invasive heart valve products in Europe. ITT Educational Services rose due to greater demand for career training in the weak economy. Several other holdings, such as beverage container maker Crown Holdings, independent energy company Southwestern Energy and natural gas utility WGL Holdings, maintained more of their value during the downturn than most stocks in their sectors. Unfortunately, the relatively strong investments cited above were outweighed by disappointments among other individual holdings. Most notably, these included beverage distributor Central European Distribution, which was sold during the reporting period; electronic game retailer GameStop; steel fabricator AK Steel Holding; agricultural chemical producer Terra Industries; and industrial machinery makers Dycom Industries, Oshkosh and The Manitowoc Company, which was also sold during the reporting period. In each case, deteriorating business conditions drove the stock price steeply lower over the second half of the reporting period.

## Reducing the Portfolio's Risk Profile

As of year-end, the U.S. economy has continued to weaken and the financial crisis has persisted. In light of these pressures, we have taken steps to reduce the portfolio's exposure to risk. Specifically, as of the end of the reporting period we have emphasized investments in companies with strong balance sheets and relatively little leverage. We also have trimmed some of the portfolio's larger holdings, thereby reducing exposure to a dip in any individual stock. At the same time, we remain fully committed to the portfolio's sector- and industry-neutral approach, relying on our time-tested, quantitative stock selection process to add value for investors.

January 15, 2009

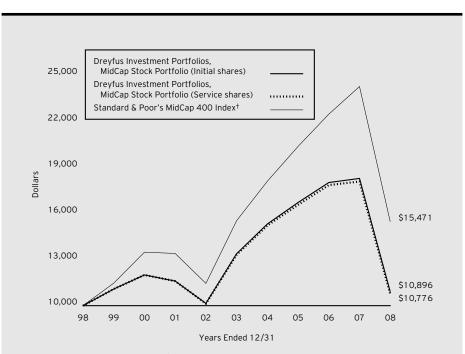

The portfolio is only available as a funding vehicle under variable life insurance policies or variable annuity contracts issued by insurance companies. Individuals may not purchase shares of the portfolio directly. A variable annuity is an insurance contract issued by an insurance company that enables investors to accumulate assets on a tax-deferred basis for retirement or other long-term goals. The investment objective and policies of Dreyfus Investment Portfolios, MidCap Stock Portfolio made available through insurance products may be similar to other funds/portfolios managed or advised by Dreyfus. However, the investment results of the portfolio may be higher or lower than, and may not be comparable to, those of any other Dreyfus fund/portfolio.

- <sup>1</sup> Total return includes reinvestment of dividends and any capital gains paid. Past performance is no guarantee of future results. Share price and investment return fluctuate such that upon redemption, portfolio shares may be worth more or less than their original cost. The portfolio's performance does not reflect the deduction of additional charges and expenses imposed in connection with investing in variable insurance contracts, which will reduce returns. Return figures provided reflect the absorption of certain portfolio expenses by The Dreyfus Corporation pursuant to an agreement in effect through May 1, 2009, at which time it may be extended, terminated or modified. Had these expenses not been absorbed, the portfolio's returns would have been lower.
- <sup>2</sup> SOURCE: LIPPER INC. Reflects reinvestment of dividends and, where applicable, capital gain distributions. The Standard & Poor's MidCap 400 Index is a widely accepted, unmanaged total return index measuring the performance of the midsize-company segment of the U.S. market.

The Portfolio

5

## PORTFOLIO PERFORMANCE

Comparison of change in value of \$10,000 investment in Dreyfus Investment Portfolios, MidCap Stock Portfolio Initial shares and Service shares and the Standard & Poor's MidCap 400 Index

Average Annual Total Returns as of 12/31/08

	1 Year	5 Years	10 Years
Initial shares	(40.42)%	(4.03)%	0.86%
Service shares	(40.44)%	(4.15)%	0.75%

The data for Service shares includes the results of Initial shares for the period prior to December 31, 2000 (inception date of Service shares). Actual Service shares' average annual total return and hypothetical growth results would have been lower. See notes below.

† Source: Lipper Inc.

Past performance is not predictive of future performance. The portfolio's performance shown in the graph and table does not reflect the deduction of taxes that a shareholder would pay on portfolio distributions or the redemption of portfolio shares. The portfolio's performance does not reflect the deduction of additional charges and expenses imposed in connection with investing in variable insurance contracts which will reduce returns.

The above graph compares a \$10,000 investment made in Initial and Service shares of Dreyfus Investment Portfolios, MidCap Stock Portfolio on 12/31/98 to a \$10,000 investment made in the Standard & Poor's MidCap 400 Index (the "Index") on that date. The portfolio's Initial shares are not subject to a Rule 12b-1 fee. The portfolio's Service shares are subject to a 0.25% annual Rule 12b-1 fee. The performance figures for Service shares reflect the performance of the portfolio's Initial shares from their inception date through December 30, 2000, and the performance of the portfolio's Service shares from December 31, 2000 (inception date of Service shares) to December 31, 2008 (blended performance figures). The performance figures for each share class reflect certain expense reimbursements, without which the performance of each share class would have been lower. In addition, the blended performance figures have not been adjusted to reflect the higher operating expenses of the Service shares. If these expenses had been reflected, the blended performance figures would have been lower. All dividends and capital gain distributions are reinvested.

The portfolio's performance shown in the line graph takes into account all applicable portfolio fees and expenses (after any expense reimbursements). The Index is a widely accepted, unmanaged total return index measuring the performance of the midsize company segment of the U.S. stock market. Unlike a mutual fund, the Index is not subject to charges, fees and other expenses. Investors cannot invest directly in any index. Further information relating to portfolio performance, including expense reimbursements, if applicable, is contained in the Financial Highlights section of the prospectus and elsewhere in this report.

## UNDERSTANDING YOUR PORTFOLIO'S EXPENSES (Unaudited)

As a mutual fund investor, you pay ongoing expenses, such as management fees and other expenses. Using the information below, you can estimate how these expenses affect your investment and compare them with the expenses of other funds. You also may pay one-time transaction expenses, including sales charges (loads) and redemption fees, which are not shown in this section and would have resulted in higher total expenses. For more information, see your portfolio's prospectus or talk to your financial adviser.

### Review your portfolio's expenses

The table below shows the expenses you would have paid on a \$1,000 investment in Dreyfus Investment Portfolios, MidCap Stock Portfolio from July 1, 2008 to December 31, 2008. It also shows how much a \$1,000 investment would be worth at the close of the period, assuming actual returns and expenses.

Expenses and Value of a \$1,000 Investment assuming actual returns for the six months ended December 31, 2008				
	Initial Shares	Service Shares		
Expenses paid per \$1,000+	\$ 3.39	\$ 3.72		
Ending value (after expenses)	\$624.50	\$624.60		

## COMPARING YOUR PORTFOLIO'S EXPENSES WITH THOSE OF OTHER FUNDS (Unaudited)

#### Using the SEC's method to compare expenses

The Securities and Exchange Commission (SEC) has established guidelines to help investors assess fund expenses. Per these guidelines, the table below shows your portfolio's expenses based on a \$1,000 investment, assuming a hypothetical 5% annualized return. You can use this information to compare the ongoing expenses (but not transaction expenses or total cost) of investing in the portfolio with those of other funds. All mutual fund shareholder reports will provide this information to estimate your actual ending account balance and expenses paid during the period.

### Expenses and Value of a \$1,000 Investment

assuming a hypothetical 5% annualized return for the six months ended December 31, 2008

	Initial Shares	Service Shares
Expenses paid per \$1,000+	\$ 4.22	\$ 4.62
Ending value (after expenses)	\$1,020.96	\$1,020.56

† Expenses are equal to the portfolio's annualized expense ratio of .83% for Initial shares and .91% for Service shares, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period).

## STATEMENT OF INVESTMENTS

## FINANCIAL HIGHLIGHTS

The following tables describe the performance for each share class for the fiscal periods indicated. All information (except portfolio turnover rate) reflects financial results for a single portfolio share. Total return shows how much your investment in the portfolio would have increased (or decreased) during each period, assuming you had reinvested all dividends and distributions. These figures have been derived from the portfolio's financial statements.

## NOTES TO FINANCIAL STATEMENTS

## NOTE 1-Significant Accounting Policies:

Dreyfus Investment Portfolios (the "fund") is registered under the Investment Company Act of 1940, as amended (the "Act"), as an openend management investment company, operating as a series company currently offering four series, including the MidCap Stock Portfolio (the "portfolio"). The portfolio is only offered to separate accounts established by insurance companies to fund variable annuity contracts and variable life insurance policies. The portfolio is a diversified series. The portfolio's investment objective is to provide investment results that are greater than the total return performance of publicly-traded common stocks of medium-size domestic companies in the aggregate, as represented by the Standard & Poor's MidCap 400 Index. The Dreyfus Corporation (the "Manager" or "Dreyfus"), a wholly-owned subsidiary of The Bank of New York Mellon Corporation ("BNY Mellon"), serves as the portfolio's investment adviser.

Effective July 1, 2008, BNY Mellon reorganized and consolidated a number of its banking and trust company subsidiaries. As a result of the reorganization, any services previously provided to the portfolio by Mellon Bank, N.A. or Mellon Trust of New England, N.A. are now provided by The Bank of New York Mellon (formerly, The Bank of New York).

MBSC Securities Corporation (the "Distributor"), a wholly-owned subsidiary of the Manager, is the distributor of the portfolio's shares, which are sold without a sales charge. The portfolio is authorized to issue an unlimited number of \$.001 par value shares of Beneficial Interest in each of the following classes of shares: Initial and Service. Each class of shares has identical rights and privileges, except with respect to the distribution plan and the expenses borne by each class, the allocation of certain transfer agency costs and certain voting rights. Income, expenses (other than expenses attributable to a specific class), and realized and unrealized gains or losses on investments are allocated to each class of shares based on its relative net assets. The fund accounts separately for the assets, liabilities and operations of each series. Expenses directly attributable to each series are charged to that series' operations; expenses which are applicable to all series are allocated among them on a pro rata basis.

The portfolio's financial statements are prepared in accordance with U.S. generally accepted accounting principles, which may require the use of management estimates and assumptions. Actual results could differ from those estimates.

The fund enters into contracts that contain a variety of indemnifications. The portfolio's maximum exposure under these arrangements is unknown. The portfolio does not anticipate recognizing any loss related to these arrangements.

(a) Portfolio valuation: Investments in securities are valued at the last sales price on the securities exchange or national securities market on which such securities are primarily traded. Securities listed on the National Market System for which market quotations are available are valued at the official closing price or, if there is no official closing price that day, at the last sales price. Securities not listed on an exchange or the national securities market, or securities for which there were no transactions, are valued at the average of the most recent bid and asked prices, except for open short positions, where the asked price is used for valuation purposes. Bid price is used when no asked price is available. Registered investment companies that are not traded on an exchange are valued at their net asset value. When market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market), but before the portfolio calculates its net asset value, the portfolio may value these investments at fair value as determined in accordance with the procedures approved by the Board of Trustees. Fair valuing of securities may be determined with the assistance of a pricing service using calculations based on indices of domestic securities and other appropriate indicators, such as prices of relevant ADRs and futures contracts. For other securities that are fair valued by the Board of Trustees, certain factors may be considered such as: fundamental analytical data, the nature and duration of restrictions on disposition, an evaluation of the forces that influence the market in which the securities are purchased and sold and public trading in similar securities of the issuer or comparable issuers. Financial futures are valued at the last sales price.

The portfolio adopted Statement of Financial Accounting Standards No. 157 "Fair Value Measurements" ("FAS 157"). FAS 157 establishes an authoritative definition of fair value, sets out a framework for measuring fair value, and requires additional disclosures about fair value measurements.

Various inputs are used in determining the value of the portfolio's investments relating to FAS 157. These inputs are summarized in the three broad levels listed below.

Level 1—quoted prices in active markets for identical securities. Level 2—other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3—significant unobservable inputs (including the portfolio's own assumptions in determining the fair value of investments).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The following is a summary of the inputs used as of December 31, 2008 in valuing the portfolio's investments carried at fair value:

Valuation Inputs	Investments in Securities (\$)	Other Financial Instruments (\$)†
Level 1–Quoted Prices	160,346,076	0
Level 2–Other Significant Observable Inputs	0	0
Level 3–Significant Unobservable Inputs	0	0
Total	160,346,076	0

† Other financial instruments include derivative instruments such as futures, forward currency exchange contracts and swap contracts, which are valued at the unrealized appreciation (depreciation) on the instrument and written options contracts which are shown at value.

(b) Securities transactions and investment income: Securities transactions are recorded on a trade date basis. Realized gains and losses from securities transactions are recorded on the identified cost basis. Dividend income is recognized on the ex-dividend date and interest income, including, where applicable, accretion of discount and amortization of premium on investments, is recognized on the accrual basis.

The portfolio has arrangements with the custodian and cash management banks whereby the portfolio may receive earnings credits when positive cash balances are maintained, which are used to offset custody and cash management fees. For financial reporting purposes, the portfolio includes net earnings credits as an expense offset in the Statement of Operations.

Pursuant to a securities lending agreement with The Bank of New York Mellon, a subsidiary of BNY Mellon and an affiliate of Dreyfus, the portfolio may lend securities to qualified institutions. It is the portfolio's policy, that at origination, all loans are secured by collateral of at least 102% of the value of U.S. securities loaned and 105% of the value of foreign securities loaned. Collateral equivalent to at least 100% of the market value of securities on loan is maintained at all times. Collateral is either in the form of cash, which can be invested in certain money market mutual funds managed by the Manager, U.S.

Government and Agency securities or letters of credit. The portfolio is entitled to receive all income on securities loaned, in addition to income earned as a result of the lending transaction. Although each security loaned is fully collateralized, the portfolio bears the risk of delay in recovery of, or loss of rights in, the securities loaned should a borrower fail to return the securities in a timely manner. During the period ended December 31, 2008, The Bank of New York Mellon earned \$138,693 from lending portfolio securities, pursuant to the securities lending agreement.

(c) Affiliated issuers: Investments in other investment companies advised by the Manager are defined as "affiliated" in the Act.

(d) Dividends to shareholders: Dividends are recorded on the ex-dividend date. Dividends from investment income-net and dividends from net realized capital gains, if any, are normally declared and paid annually, but the portfolio may make distributions on a more frequent basis to comply with the distribution requirements of the Internal Revenue Code of 1986, as amended (the "Code"). To the extent that net realized capital gains can be offset by capital loss carryovers, it is the policy of the portfolio not to distribute such gains. Income and capital gain distributions are determined in accordance with income tax regulations, which may differ from U.S. generally accepted accounting principles.

(e) Federal income taxes: It is the policy of the portfolio to continue to qualify as a regulated investment company, if such qualification is in the best interests of its shareholders, by complying with the applicable provisions of the Code, and to make distributions of taxable income sufficient to relieve it from substantially all federal income and excise taxes.

As of and during the period ended December 31, 2008, the portfolio did not have any liabilities for any unrecognized tax positions. The portfolio recognizes interest and penalties, if any, related to unrecognized tax positions as income tax expense in the Statement of Operations. During the period, the portfolio did not incur any interest or penalties. Each of the tax years in the four-year period ended December 31, 2008 remains subject to examination by the Internal Revenue Service and state taxing authorities.

At December 31, 2008, the components of accumulated earnings on a tax basis were as follows: undistributed ordinary income \$1,936,718, accumulated capital losses \$30,029,499 and unrealized depreciation \$60,275,428. In addition, the portfolio had \$18,214,044 of capital losses realized after October 31, 2008, which were deferred for tax purposes to the first day of the following fiscal year.

The accumulated capital loss carryover is available for federal income tax purposes to be applied against future net securities profits, if any, realized subsequent to December 31, 2008. If not applied, the carryover expires in fiscal 2016.

The tax character of distributions paid to shareholders during the fiscal periods ended December 31, 2008 and December 31, 2007 were as follows: ordinary income \$18,327,589 and \$10,308,755 and long-term capital gains \$22,424,637 and \$40,308,903, respectively.

During the period ended December 31, 2008, as a result of permanent book to tax differences, primarily due to the tax treatment for dividend reclassification, the portfolio increased accumulated undistributed investment income-net by \$7,617 and decreased accumulated net realized gain (loss) on investments by the same amount. Net assets and net asset value per share were not affected by this reclassification.

## NOTE 2–Bank Lines of Credit:

Prior to May 1, 2008, the portfolio participated with other Dreyfusmanaged funds in a \$100 million unsecured line of credit. Effective May 1, 2008, the portfolio participates with other Dreyfus-managed funds in a \$300 million unsecured line of credit primarily to be utilized for temporary or emergency purposes, including the financing of redemptions. The terms of the line of credit agreement limit the amount of individual fund borrowings. Interest is charged to the portfolio based on prevailing market rates in effect at the time of borrowing. Effective October 15, 2008, in connection therewith, the portfolio has agreed to pay commitment fees on its pro rata portion of the unsecured line of credit.

The average daily amount of borrowings outstanding under the line of credit during the period ended December 31, 2008, was approximately \$27,800, with a related weighted average annualized interest rate of 3.01%.

## NOTE 3–Investment Advisory Fee and Other Transactions With Affiliates:

(a) Pursuant to an Investment Advisory Agreement with the Manager, the investment advisory fee is computed at the annual rate of .75% of the value of the portfolio's average daily net assets and is payable monthly.

The Manager has agreed, from January 1, 2008 to May 1, 2009, to waive receipt of its fees and/or assume the expenses of the portfolio so that the expenses of neither class, exclusive of taxes, brokerage fees, interest on borrowings and extraordinary expenses, exceed .90% of the value of the average daily net assets of such class. During the period ended December 31, 2008, the Manager waived receipt of fees of \$54,681, pursuant to the undertaking.

(b) Under the Distribution Plan (the "Plan") adopted pursuant to Rule 12b-1 under the Act, Service shares pay the Distributor for distributing their shares, for servicing and/or maintaining Service shares shareholder accounts and for advertising and marketing for Service shares. The Plan provides for payments to be made at an annual rate of .25% of the value of the Service shares' average daily net assets. The Distributor may make payments to participating insurance companies and to brokers and dealers acting as principal underwriter for their variable insurance products. The fees payable under the Plan are payable without regard to actual expenses incurred. During the period ended December 31, 2008, Service shares were charged \$63,185 pursuant to the Plan. The portfolio compensates Dreyfus Transfer, Inc., a wholly-owned subsidiary of the Manager, under a transfer agency agreement for providing personnel and facilities to perform transfer agency services for the portfolio. During the period ended December 31, 2008, the portfolio was charged \$848 pursuant to the transfer agency agreement.

The portfolio compensates The Bank of New York Mellon under a cash management agreement for performing cash management services related to portfolio subscriptions and redemptions. During the period ended December 31, 2008, the portfolio was charged \$91 pursuant to the cash management agreement.

The portfolio compensates The Bank of New York Mellon under a custody agreement for providing custodial services for the portfolio. During the period ended December 31, 2008, the portfolio was charged \$26,997 pursuant to the custody agreement.

During the period ended December 31, 2008, the portfolio was charged \$5,403 for services performed by the Chief Compliance Officer.

The components of "Due to The Dreyfus Corporation and affiliates" in the Statement of Assets and Liabilities consist of: investment advisory fees \$85,680, Rule 12b-1 distribution plan fees \$2,820, custodian fees \$8,500, chief compliance officer fees \$1,197 and transfer agency per account fees \$155, which are offset against an expense reimbursement currently in effect in the amount of \$13,834.

(c) Each Board member also serves as a Board member of other funds within the Dreyfus complex. Annual retainer fees and attendance fees are allocated to each fund based on net assets.

## NOTE 4-Securities Transactions:

The aggregate amount of purchases and sales of investment securities, excluding short-term securities, during the period ended December 31, 2008, amounted to \$207,374,292 and \$270,909,175, respectively.

At December 31, 2008, the cost of investments for federal income tax purposes was \$220,621,504; accordingly, accumulated net unrealized depreciation on investments was \$60,275,428, consisting of \$2,712,656 gross unrealized appreciation and \$62,988,084 gross unrealized depreciation.

In March 2008, the Financial Accounting Standards Board released Statement of Financial Accounting Standards No. 161, "Disclosures about Derivative Instruments and Hedging Activities" ("FAS 161"). FAS 161 requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. The application of FAS 161 is required for fiscal years and interim periods beginning after November 15, 2008. At this time, management is evaluating the implications of FAS 161 and its impact on the financial statements and the accompanying notes has not yet been determined.

## REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

## Shareholders and Board of Trustees Dreyfus Investment Portfolios, MidCap Stock Portfolio

We have audited the accompanying statement of assets and liabilities, including the statement of investments, of Dreyfus Investment Portfolios, MidCap Stock Portfolio (one of the series comprising Dreyfus Investment Portfolios) as of December 31, 2008, and the related statement of operations for the year then ended, the statement of changes in net assets for each of the two years in the period then ended, and financial highlights for each of the years indicated therein. These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Fund's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of December 31, 2008 by correspondence with the custodian and others. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of Dreyfus Investment Portfolios, MidCap Stock Portfolio at December 31, 2008, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the financial highlights for each of the indicated years, in conformity with U. S. generally accepted accounting principles.

Ernet + Young LLP

New York, New York February 10, 2009

## IMPORTANT TAX INFORMATION (Unaudited)

For federal tax purposes, the portfolio hereby designates \$1.1720 per share as a long-term capital gain distribution and \$.8360 per share as a short-term capital gain distribution paid on March 28, 2008 and also the portfolio hereby designates 30.17% of the ordinary dividends paid during the fiscal year ended December 31, 2008 as qualifying for the corporate dividends received deduction. Shareholders will receive notification in January 2009 of the percentage applicable to the preparation of their 2008 income tax returns.

## INFORMATION ABOUT THE REVIEW AND APPROVAL OF THE PORTFOLIO'S INVESTMENT ADVISORY AGREEMENT (Unaudited)

At a meeting of the Board of Trustees of Dreyfus Investment Portfolios (the "Company") held on July 16-17, 2008, the Board considered the reapproval of the portfolio's Investment Advisory Agreement for another one year term, pursuant to which the Manager provides the portfolio with investment advisory and administrative services. The Board members, none of whom are "interested persons" (as defined in the Investment Company Act of 1940, as amended) of the Company, were assisted in their review by independent legal counsel and met with counsel in executive session separate from representatives of the Manager.

Analysis of Nature, Extent and Quality of Services Provided to the Portfolio. The Board members received a presentation from representatives of the Manager regarding services provided to the portfolio and other funds in the Dreyfus fund complex, and discussed the nature, extent and quality of the services provided to the portfolio pursuant to its Investment Advisory Agreement. The Manager's representatives reviewed the portfolio's distribution of accounts and the relationships the Manager has with various intermediaries and the different needs of each. The Board members noted that the portfolio's shares are offered only to separate accounts established by insurance companies to fund variable annuity contracts and variable life insurance policies. The Manager's representatives noted the diversity of distribution of the funds in the Dreyfus fund complex, and the Manager's corresponding need for broad, deep and diverse resources to be able to provide ongoing shareholder services to each distribution channel, including that of the portfolio. The Manager also provided the number of separate accounts investing in the portfolio, as well as the portfolio's asset size.

The Board members also considered the Manager's research and portfolio management capabilities and that the Manager also provides oversight of day-to-day portfolio operations, including portfolio accounting and administration and assistance in meeting legal and regulatory requirements, and the Manager's extensive administrative, accounting and compliance infrastructure. The Board also considered the Manager's brokerage policies and practices, the standards applied in seeking best execution and the Manager's policies and practices regarding soft dollars.

Comparative Analysis of the Portfolio's Performance, Investment Advisory Fee and Expense Ratio. The Board members reviewed the portfolio's performance for the one-, three-, five- and ten-year periods ended May 31, 2008, and compared the portfolio's performance to the performance of a group of comparable mid-cap core funds underlying variable insurance products (the "Performance Group") and to a larger universe of funds consisting of all mid-cap core funds underlying variable insurance products (the "Performance Universe") selected and provided by Lipper, Inc., an independent provider of investment company data. The Board was provided with a description of the methodology Lipper used to select the Performance Group and Performance Universe, as well as the Expense Group and Expense Universe (discussed below). The Board members noted that they also had received and discussed with management information at periodic intervals comparing the portfolio's performance to that of its benchmark index. The Board members discussed the results of the comparisons and noted that the portfolio's total return performance for its Initial shares was above the median in the second quartile of the Performance Group for the oneyear period, but below the median in the fourth quartile of the Performance Group for the three-, five- and ten-year periods ended May 31, 2008, and slightly below the median in the third quartile of the Performance Universe for the one-year period and below the median in the fourth quartile of the Performance Universe for the three-, five- and ten-year periods ended May 31, 2008. The Board members noted that a new portfolio management team assumed responsibility for managing the portfolio in September 2007.

The Board members also discussed the portfolio's investment advisory fee and expense ratio and reviewed the range of advisory fees and expense ratios as compared to a group of comparable mid-cap core funds underlying variable insurance products (the "Expense Group") and a broader group of funds consisting of all mid-cap core funds underlying variable insurance products (the "Expense Universe"), each selected and provided by Lipper. The Board noted that the expense

#### INFORMATION ABOUT THE REVIEW AND APPROVAL OF THE PORTFOLIO'S INVESTMENT ADVISORY AGREEMENT (Unaudited) (continued)

ratio of the portfolio's Initial shares (which are not subject to a Rule 12b-1 plan) ranked in the first quartile (was among the lowest) of the Expense Group and the Expense Universe, and that the expense ratio of the portfolio's Service shares (which are subject to a Rule 12b-1 plan) was above the Expense Group median and below the Expense Universe median. The Board also considered the current fee waiver and expense reimbursement arrangement undertaken by the Manager.

Representatives of the Manager reviewed with the Board members the fees paid to the Manager or its affiliates by other accounts managed or sub-advised by the Manager or its affiliates with similar investment objectives, policies and strategies as the portfolio (the "Similar Accounts"). The Manager's representatives explained the nature of the Similar Accounts and the differences, from the Manager's perspective, in management of the Similar Accounts as compared to managing and providing services to the portfolio. Representatives of the Manager noted that the Manager or its affiliates do not manage other mutual funds underlying variable insurance products with similar investment objectives, policies and strategies as the portfolio. The Manager's representatives also reviewed the costs associated with distribution through intermediaries. The Board analyzed the differences in fees paid to the Manager and discussed the relationship of the advisory fees paid in light of the services provided. The Board members considered the relevance of the fee information provided for the Similar Accounts to evaluate the appropriateness and reasonableness of the portfolio's advisory fees.

Analysis of Profitability and Economies of Scale. The Manager's representatives reviewed the dollar amount of expenses allocated and profit received by the Manager and the method used to determine such expenses and profit. The Board previously had been provided with information prepared by an independent consulting firm regarding the Manager's approach to allocating costs to, and determining the profitability of, individual funds and the entire Dreyfus mutual fund complex. The Board members also had been informed that the methodology had been reviewed by an independent registered public accounting firm which, like the consultant, found the methodology to be reasonable. The consulting firm also analyzed where any economies of scale might emerge in connection with the management of the portfolio. The Board members evaluated the profitability analysis in light of the relevant circumstances for the portfolio, including any decline in assets, and the extent to which economies of scale would be realized if the portfolio grows and whether fee levels reflect these economies of scale for the benefit of portfolio shareholders. The Board members also considered potential benefits to the Manager from acting as investment adviser to the portfolio, including any soft dollar arrangements with respect to trading the portfolio's portfolio.

It was noted that the Board members should consider the Manager's profitability with respect to the portfolio as part of their evaluation of whether the fee under the Investment Advisory Agreement bears a reasonable relationship to the mix of services provided by the Manager, including the nature, extent and quality of such services. It was noted that the profitability percentage for managing the portfolio was within ranges determined by appropriate court cases to be reasonable given the services rendered and that the profitability percentage for managing the portfolio was reasonable given the services provided. The Board also noted the current fee waiver and expense reimbursement arrangement and its effect on the profitability of the Manager.

At the conclusion of these discussions, the Board agreed that it had been furnished with sufficient information to make an informed business decision with respect to continuation of the Investment Advisory Agreement. Based on the discussions and considerations as described above, the Board made the following conclusions and determinations with respect to the portfolio:

- The Board concluded that the nature, extent and quality of the services provided by the Manager are adequate and appropriate.
- The Board was generally satisfied with the portfolio's recent performance mance and the Manager's efforts to continue to improve performance going forward.

### INFORMATION ABOUT THE REVIEW AND APPROVAL OF THE PORTFOLIO'S INVESTMENT ADVISORY AGREEMENT (Unaudited) (continued)

- The Board concluded that the fee paid by the portfolio to the Manager was reasonable in light of the services provided, comparative performance and expense and advisory fee information, costs of the services provided and profits to be realized and benefits derived or to be derived by the Manager from its relationship with the portfolio.
- The Board determined that the economies of scale which may accrue to the Manager and its affiliates in connection with the management of the portfolio had been adequately considered by the Manager in connection with the advisory fee rate charged to the portfolio, and that, to the extent in the future it were determined that material economies of scale had not been shared with the portfolio, the Board would seek to have those economies of scale shared with the portfolio.

The Board members considered these conclusions and determinations, along with information received on a routine and regular basis throughout the year, and, without any one factor being dispositive, the Board determined that re-approval of the Investment Advisory Agreement was in the best interests of the portfolio and its shareholders.

## BOARD MEMBERS INFORMATION (Unaudited)

## Joseph S. DiMartino (65) Chairman of the Board (1998)

Principal Occupation During Past 5 Years:

Corporate Director and Trustee

Other Board Memberships and Affiliations:

- The Muscular Dystrophy Association, Director
- Century Business Services, Inc., a provider of outsourcing functions for small and medium size companies, Director
- The Newark Group, a provider of a national market of paper recovery facilities, paperboard mills and paperboard converting plants, Director
- Sunair Services Corporation, a provider of certain outdoor-related services to homes and businesses, Director

No. of Portfolios for which Board Member Serves: 191

## Clifford L. Alexander, Jr. (75) Board Member (1998)

Principal Occupation During Past 5 Years:

- President of Alexander & Associates, Inc., a management consulting firm (January 1981-present)
- Chairman of the Board of Moody's Corporation (October 2000-October 2003)

Other Board Memberships and Affiliations:

## Whitney I. Gerard (74) Board Member (2003)

Principal Occupation During Past 5 Years: • Partner of Chadbourne & Parke LLP

No. of Portfolios for which Board Member Serves: 31

## George L. Perry (74) Board Member (2003)

*Principal Occupation During Past 5 Years:*Economist and Senior Fellow at Brookings Institution

No. of Portfolios for which Board Member Serves: 31

Once elected all Board Members serve for an indefinite term, but achieve Emeritus status upon reaching age 80. The address of the Board Members and Officers is in c/o The Dreyfus Corporation, 200 Park Avenue, New York, New York 10166. Additional information about the Board Members is available in the fund's Statement of Additional Information which can be obtained from Dreyfus free of charge by calling this toll free number: 1-800-554-4611.

Lucy Wilson Benson, Emeritus Board Member Arthur A. Hartman, Emeritus Board Member

## OFFICERS OF THE FUND (Unaudited)

### J. DAVID OFFICER, President since December 2006.

Chief Operating Officer, Vice Chairman and a Director of the Manager, and an officer of 77 investment companies (comprised of 180 portfolios) managed by the Manager. He is 60 years old and has been an employee of the Manager since April 1998.

# PHILLIP N. MAISANO, Executive Vice President since July 2007.

Chief Investment Officer, Vice Chair and a director of the Manager, and an officer of 77 investment companies (comprised of 180 portfolios) managed by the Manager. Mr. Maisano also is an officer and/or Board member of certain other investment management subsidiaries of The Bank of New York Mellon Corporation, each of which is an affiliate of the Manager. He is 61 years old and has been an employee of the Manager since November 2006. Prior to joining the Manager, Mr. Maisano served as Chairman and Chief Executive Officer of EACM Advisors, an affiliate of the Manager, since August 2004, and served as Chief Executive Officer of Evaluation Associates, a leading institutional investment consulting firm, from 1988 until 2004.

#### MICHAEL A. ROSENBERG, Vice President and Secretary since August 2005.

Assistant General Counsel of BNY Mellon, and an officer of 78 investment companies (comprised of 201 portfolios) managed by the Manager. He is 48 years old and has been an employee of the Manager since October 1991.

### JAMES BITETTO, Vice President and Assistant Secretary since August 2005.

Senior Counsel of BNY Mellon and Secretary of the Manager, and an officer of 78 investment companies (comprised of 201 portfolios) managed by the Manager. He is 42 years old and has been an employee of the Manager since December 1996.

#### JONI LACKS CHARATAN, Vice President and Assistant Secretary since August 2005.

Senior Counsel of BNY Mellon, and an officer of 78 investment companies (comprised of 201 portfolios) managed by the Manager. She is 53 years old and has been an employee of the Manager since October 1988.

# JOSEPH M. CHIOFFI, Vice President and Assistant Secretary since August 2005.

Senior Counsel of BNY Mellon, and an officer of 78 investment companies (comprised of 201 portfolios) managed by the Manager. He is 47 years old and has been an employee of the Manager since June 2000.

#### JANETTE E. FARRAGHER, Vice President and Assistant Secretary since August 2005.

Assistant General Counsel of BNY Mellon, and an officer of 78 investment companies (comprised of 201 portfolios) managed by the Manager. She is 46 years old and has been an employee of the Manager since February 1984.

# JOHN B. HAMMALIAN, Vice President and Assistant Secretary since August 2005.

Managing Counsel of BNY Mellon, and an officer of 78 investment companies (comprised of 201 portfolios) managed by the Manager. He is 45 years old and has been an employee of the Manager since February 1991.

#### ROBERT R. MULLERY, Vice President and Assistant Secretary since August 2005.

Managing Counsel of BNY Mellon, and an officer of 78 investment companies (comprised of 201 portfolios) managed by the Manager. He is 56 years old and has been an employee of the Manager since May 1986.

# JEFF PRUSNOFSKY, Vice President and Assistant Secretary since August 2005.

Managing Counsel of BNY Mellon, and an officer of 78 investment companies (comprised of 201 portfolios) managed by the Manager. He is 43 years old and has been an employee of the Manager since October 1990.

### JAMES WINDELS, Treasurer since November 2001.

Director – Mutual Fund Accounting of the Manager, and an officer of 78 investment companies (comprised of 201 portfolios) managed by the Manager. He is 49 years old and has been an employee of the Manager since April 1985.

# RICHARD CASSARO, Assistant Treasurer since January 2008.

Senior Accounting Manager – Money Market and Municipal Bond Funds of the Manager, and an officer of 78 investment companies (comprised of 201 portfolios) managed by the Manager. He is 49 years old and has been an employee of the Manager since September 1982.

# GAVIN C. REILLY, Assistant Treasurer since December 2005.

Tax Manager of the Investment Accounting and Support Department of the Manager, and an officer of 78 investment companies (comprised of 201 portfolios) managed by the Manager. He is 40 years old and has been an employee of the Manager since April 1991.

# ROBERT ROBOL, Assistant Treasurer since August 2003.

Senior Accounting Manager – Fixed Income Funds of the Manager, and an officer of 78 investment companies (comprised of 201 portfolios) managed by the Manager. He is 44 years old and has been an employee of the Manager since October 1988.

### ROBERT SALVIOLO, Assistant Treasurer since July 2007.

Senior Accounting Manager – Equity Funds of the Manager, and an officer of 78 investment companies (comprised of 201 portfolios) managed by the Manager. He is 41 years old and has been an employee of the Manager since June 1989.

# ROBERT SVAGNA, Assistant Treasurer since August 2005.

Senior Accounting Manager – Equity Funds of the Manager, and an officer of 78 investment companies (comprised of 201 portfolios) managed by the Manager. He is 41 years old and has been an employee of the Manager since November 1990.

#### JOSEPH W. CONNOLLY, Chief Compliance Officer since October 2004.

Chief Compliance Officer of the Manager and The Dreyfus Family of Funds (78 investment companies, comprised of 201 portfolios). From November 2001 through March 2004, Mr. Connolly was first Vice-President, Mutual Fund Servicing for Mellon Global Securities Services. In that capacity, Mr. Connolly was responsible for managing Mellon's Custody, Fund Accounting and Fund Administration services to third-party mutual fund clients. He is 51 years old and has served in various capacities with the Manager since 1980, including manager of the firm's Fund Accounting Department from 1997 through October 2001.

#### WILLIAM GERMENIS, Anti-Money Laundering Compliance Officer since October 2002.

Vice President and Anti-Money Laundering Compliance Officer of the Distributor, and the Anti-Money Laundering Compliance Officer of 74 investment companies (comprised of 197 portfolios) managed by the Manager. He is 38 years old and has been an employee of the Distributor since October 1998.

## The Dreyfus Socially Responsible Growth Fund, Inc. The Fund

## A LETTER FROM THE CEO

Dear Shareholder:

We present to you this annual report for The Dreyfus Socially Responsible Growth Fund, Inc., covering the 12-month period from January 1, 2008, through December 31, 2008.

2008 was the most difficult year in decades for the economy and stock market. A credit crunch that originated in 2007 in the U.S. sub-prime mortgage market exploded in mid-2008 into a global financial crisis, resulting in the failures of major financial institutions, a deep and prolonged recession and lower investment values across a broad range of asset classes. Governments and regulators throughout the world moved aggressively to curtail the damage, implementing unprecedented reductions of short-term interest rates, massive injections of liquidity into the banking system, government bailouts of struggling companies and plans for massive economic stimulus programs.

Although we expect the U.S. and global economies to remain weak until longstanding imbalances have worked their way out of the system, the financial markets currently appear to have priced in investors' generally low expectations. In previous recessions, however, the markets have tended to anticipate economic improvement before it occurs, potentially leading to major rallies when few expected them. That's why it makes sense to remain disciplined, maintain a long-term perspective and adopt a consistent asset allocation strategy that reflects one's future goals and attitudes toward risk. As always, we urge you to consult with your financial advisor, who can recommend the course of action that is right for you.

For information about how the fund performed during the reporting period, as well as market perspectives, we have provided a Discussion of Fund Performance given by the fund's Portfolio Managers.

Thank you for your continued confidence and support.

Sincerely,

Jonathan R. Baum Chief Executive Officer The Dreyfus Corporation January 15, 2009

## DISCUSSION OF FUND PERFORMANCE

For the period of January 1, 2008, through December 31, 2008, as provided by John O'Toole and Jocelin Reed, Portfolio Managers

#### Fund and Market Performance Overview

For the 12-month period ended December 31, 2008, The Dreyfus Socially Responsible Growth Fund's Initial shares produced a total return of -34.42%, and the fund's Service shares produced a total return of -34.58%.<sup>1</sup> In comparison, the fund's benchmark, the Standard & Poor's 500 Composite Stock Price Index ("S&P 500 Index"), produced a total return of -36.99% for the same period.<sup>2</sup>

A deepening recession and an expanding financial crisis produced the steepest one-year percentage drop in the S&P 500 Index since the 1930s. Declining equity prices took a substantial toll on the fund's performance as well. However, relatively good returns in the hard-hit financial sector enabled the fund to produce higher returns than its benchmark.

#### The Fund's Investment Approach

The fund seeks capital growth, with current income as a secondary objective. To pursue these goals, the fund invests primarily in the common stocks of companies that, in our opinion, meet traditional investment standards while simultaneously conducting their businesses in a manner that contributes to the enhancement of the quality of life in America. In selecting stocks, we begin by using quantitative research to identify and rank stocks within an industry or sector. Next, based on fundamental analysis, we designate the most attractive of the higher ranked securities as potential purchase candidates. We then evaluate potential purchase candidates by industry or sector, to determine whether the company meets the fund's socially responsible investment criteria.

We next select investments from those companies that we consider to be the most attractive based on financial considerations. If there is more than one company to choose from, we can select stocks of companies that we consider to have records that exhibit positive accomplishments in the fund's areas of social concern.

The fund normally focuses on large-cap growth stocks; however, we may emphasize different types of growth-oriented stocks and different market capitalizations within the large-capitalization range as market

The Fund **3** 

conditions warrant. The fund also may invest in value-oriented stocks, midcap stocks and small-cap stocks.

#### Limited Exposure to Hard-Hit Financial Stocks

During the reporting period, every market sector in the S&P 500 Index experienced double-digit declines amid a slowing U.S. economy and intensifying global financial crisis. The S&P 500 Index's financial sector was amongst the hardest hit, with its market capitalization shrinking by more than half. Several major investment banks and lending institutions were driven out of business or to the brink of bankruptcy by their exposure to troubled securitized mortgage instruments.

The fund held underweighted exposure to the troubled financial sector overall and held relatively few positions among the individual banks, insurers and mortgage agencies that were at the epicenter of the credit crisis. Among insurers, for example, the fund steered away from life insurance companies burdened by long-term annuity-related liabilities. Instead, we emphasized property and casualty insurers with more modest exposure to securitized mortgage instruments, such as The Travelers Companies, Inc. and The Chubb Corporation.

The fund also outperformed its benchmark in the industrials sector. Relatively strong stock selections, such as United Technologies and Emerson Electric, experienced milder declines than the benchmark's industrials component. The fund's relatively strong performers in other sectors included beverage producer Hansen Natural Corporation, management consulting firm Accenture, and biotechnology giants Amgen and Genzyme.

#### **Disappointing Returns Among Energy Stocks**

The fund lost ground relative to its benchmark in the energy sector, where oil services providers, such as ENSCO International and Noble, and natural gas oriented producers, such as EnCana and Nexen, suffered when commodity prices declined over the second half of 2008. Weak holdings in other areas included Internet services provider Google and media giant News Corporation, which were hurt by declining advertising revenue. News Corporation was sold during the reporting period.

#### Positioned for a Rebound in Growth Stocks

We believe that our growth-oriented investment approach positions the fund to benefit from an eventual economic recovery. Historically, such recoveries often have been led by growth-oriented equities. At the same time, in light of current economic pressures, we have focused on companies with earnings prospects in which we have a high level of confidence. As of year-end, we have found a number of such investment opportunities in the information technology and, to a lesser extent, consumer discretionary sectors. We currently see fewer opportunities among financial and energy-related stocks.

#### A Wide Range of Socially Responsible Investment Opportunities

Two recently established positions in the energy sector illustrate the breadth of companies that meet the fund's socially responsible investment criteria. One, electrical system and component manufacturer Woodward Governor, produces power generation equipment, including systems designed to capitalize on alternative energy sources and enhance efficiency. The other, utility WGL Holdings, is distinguished by its reliance on relatively clean-burning natural gas, its efforts to improve energy efficiency and its willingness to explore alternative energy sources, such as wind. While these two companies are very different entities, both exhibit strongly positive environmental profiles, and both have produced sustainable earnings growth through many cycles, making them attractive investments in today's economic climate.

For further information regarding the fund's approach to socially responsible investing, please consult the fund's prospectus.

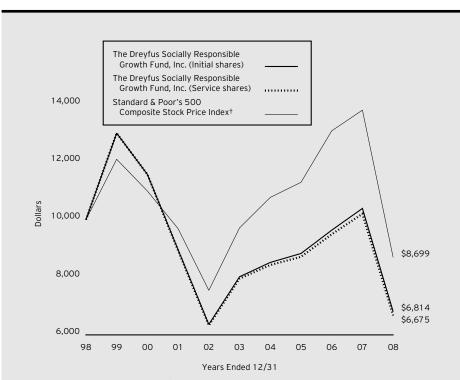

January 15, 2009

The fund is only available as a funding vehicle under variable life insurance policies or variable annuity contracts issued by insurance companies. Individuals may not purchase shares of the fund directly. A variable annuity is an insurance contract issued by an insurance company that enables investors to accumulate assets on a tax-deferred basis for retirement or other long-term goals. The investment objective and policies of The Dreyfus Socially Responsible Growth Fund, Inc. made available through insurance products may be similar to other funds/portfolios managed or advised by Dreyfus. However, the investment results of the fund may be higher or lower than, and may not be comparable to, those of any other Dreyfus fund/portfolio.

<sup>1</sup> Total return includes reinvestment of dividends and any capital gains paid. Past performance is no guarantee of future results. Share price and investment return fluctuate such that upon redemption, fund shares may be worth more or less than their original cost. The fund's performance does not reflect the deduction of additional charges and expenses imposed in connection with investing in variable insurance contracts, which will reduce returns.

<sup>2</sup> SOURCE: LIPPER INC. — Reflects reinvestment of dividends and, where applicable, capital gain distributions. The Standard & Poor's 500 Composite Stock Price Index is a widely accepted, unmanaged index of U.S. stock market performance.

## FUND PERFORMANCE

Comparison of change in value of \$10,000 investment in The Dreyfus Socially Responsible Growth Fund, Inc. Initial shares and Service shares and the Standard & Poor's 500 Composite Stock Price Index

Average Annual Total Returns as of 12/31/08

	1 Year	5 Years	10 Years
Initial shares	(34.42)%	(3.21)%	(3.76)%
Service shares	(34.58)%	(3.45)%	(3.96)%

The data for Service shares includes the results of Initial shares for the period prior to December 31, 2000 (inception date of Service shares). Actual Service shares' average annual total return and hypothetical growth results would have been lower. See notes below.

† Source: Lipper Inc.

Past performance is not predictive of future performance. The fund's performance shown in the graph and table does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. The fund's performance does not reflect the deduction of additional charges and expenses imposed in connection with investing in variable insurance contracts which will reduce returns.

The above graph compares a \$10,000 investment made in Initial and Service shares of The Dreyfus Socially Responsible Growth Fund, Inc. on 12/31/98 to a \$10,000 investment made in the Standard & Poor's 500 Composite Stock Price Index (the "Index") on that date.

The fund's Initial shares are not subject to a Rule 12b-1 fee. The fund's Service shares are subject to a 0.25% annual Rule 12b-1 fee. The performance figures for Service shares reflect the performance of the fund's Initial shares from their inception date through December 30, 2000, and the performance of the fund's Service shares from December 31, 2000 (inception date of Service shares) to December 31, 2008 (blended performance figures). The blended performance figures have not been adjusted to reflect the higher operating expenses of the Service shares. If these expenses had been reflected, the blended performance figures would have been lower. All dividends and capital gain distributions are reinvested. The fund's performance shown in the line graph takes into account all applicable fund fees and expenses. The Index is a widely accepted, unmanaged index of U.S. stock market performance. Unlike a mutual fund, the Index is not subject to charges, fees and other expenses. Investors cannot invest directly in any index. Further information relating to fund performance, including expense reimbursements, if applicable, is contained in the Financial Highlights section of the prospectus and elsewhere in this report.

## UNDERSTANDING YOUR FUND'S EXPENSES (Unaudited)

As a mutual fund investor, you pay ongoing expenses, such as management fees and other expenses. Using the information below, you can estimate how these expenses affect your investment and compare them with the expenses of other funds. You also may pay one-time transaction expenses, including sales charges (loads) and redemption fees, which are not shown in this section and would have resulted in higher total expenses. For more information, see your fund's prospectus or talk to your financial adviser.

#### Review your fund's expenses

The table below shows the expenses you would have paid on a \$1,000 investment in The Dreyfus Socially Responsible Growth Fund, Inc. from July 1, 2008 to December 31, 2008. It also shows how much a \$1,000 investment would be worth at the close of the period, assuming actual returns and expenses.

Expenses and Value of a \$1,000 Investment assuming actual returns for the six months ended December 31, 2008				
	Initial Shares	Service Shares		
Expenses paid per \$1,000 <sup>+</sup>	\$ 3.79	\$ 4.86		
Ending value (after expenses)	\$713.60	\$712.60		

## COMPARING YOUR FUND'S EXPENSES WITH THOSE OF OTHER FUNDS (Unaudited)

#### Using the SEC's method to compare expenses

The Securities and Exchange Commission (SEC) has established guidelines to help investors assess fund expenses. Per these guidelines, the table below shows your fund's expenses based on a \$1,000 investment, assuming a hypothetical 5% annualized return. You can use this information to compare the ongoing expenses (but not transaction expenses or total cost) of investing in the fund with those of other funds. All mutual fund shareholder reports will provide this information to help you make this comparison. Please note that you cannot use this information to estimate your actual ending account balance and expenses paid during the period.

#### Expenses and Value of a \$1,000 Investment

assuming a hypothetical 5% annualized return for the six months ended December 31, 2008

	Initial Shares	Service Shares
Expenses paid per \$1,000+	\$ 4.47	\$ 5.74
Ending value (after expenses)	\$1,020.71	\$1,019.46

† Expenses are equal to the fund's annualized expense ratio of .88% for Initial shares and 1.13% for Service shares, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period).

## FINANCIAL HIGHLIGHTS

The following tables describe the performance for each share class for the fiscal periods indicated. All information (except portfolio turnover rate) reflects financial results for a single fund share. Total return shows how much your investment in the fund would have increased (or decreased) during each period, assuming you had reinvested all dividends and distributions. These figures have been derived from the fund's financial statements.

## NOTES TO FINANCIAL STATEMENTS

#### NOTE 1-Significant Accounting Policies:

The Dreyfus Socially Responsible Growth Fund, Inc. (the "fund") is registered under the Investment Company Act of 1940, as amended (the "Act"), as a diversified open-end management investment company. The fund's investment objective is to provide capital growth, with current income as a secondary goal, through equity investments in companies that not only meet traditional investment standards, but which also show evidence that they conduct their business in a manner that contributes to the enhancement of the quality of life in America. The fund is only offered to separate accounts established by insurance companies to fund variable annuity contracts and variable life insurance policies. The Dreyfus Corporation (the "Manager" or "Dreyfus"), a wholly-owned subsidiary of The Bank of New York Mellon Corporation ("BNY Mellon"), serves as the fund's investment adviser.

Effective July 1, 2008, BNY Mellon reorganized and consolidated a number of its banking and trust company subsidiaries. As a result of the reorganization, any services previously provided to the fund by Mellon Bank, N.A. or Mellon Trust of New England, N.A. are now provided by The Bank of New York Mellon (formerly, The Bank of New York).

MBSC Securities Corporation (the "Distributor"), a wholly-owned subsidiary of the Manager, is the distributor of the funds's shares, which are sold without a sales charge. The fund is authorized to issue 300 million shares of \$.001 par value Common Stock in each of the following classes of shares: Initial shares (150 million shares authorized) and Service shares (150 million shares authorized). Initial shares are subject to a shareholder services fee and Service shares are subject to a distribution fee. Each class of shares has identical rights and privileges, except with respect to the shareholder services plan, the distribution plan, and the expenses borne by each class, the allocation of certain transfer agency costs and certain voting rights. Income, expenses (other than expenses attributable to a specific class), and realized and unrealized gains or losses on investments are allocated to each class of shares based on its relative net assets. The fund's financial statements are prepared in accordance with U.S. generally accepted accounting principles, which may require the use of management estimates and assumptions. Actual results could differ from those estimates.

The fund enters into contracts that contain a variety of indemnifications. The fund's maximum exposure under these arrangements is unknown. The fund does not anticipate recognizing any loss related to these arrangements.

(a) Portfolio valuation: Investments in securities are valued at the last sales price on the securities exchange or national securities market on which such securities are primarily traded. Securities listed on the National Market System for which market quotations are available, are valued at the official closing price or, if there is no official closing price that day, at the last sales price. Securities not listed on an exchange or the national securities market, or securities for which there were no transactions, are valued at the average of the most recent bid and asked prices, except for open short positions, where the asked price is used for valuation purposes. Bid price is used when no asked price is available. Registered investment companies that are not traded on an exchange are valued at their net asset value. When market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market), but before the fund calculates its net asset value, the fund may value these investments at fair value as determined in accordance with the procedures approved by the Board of Directors. Fair valuing of securities may be determined with the assistance of a pricing service using calculations based on indices of domestic securities and other appropriate indicators, such as prices of relevant ADRs and futures contracts. For other securities that are fair valued by the Board of Directors, certain factors may be considered such as: fundamental analytical data, the nature and duration of restrictions on disposition, an evaluation of the forces that influence the market in

which the securities are purchased and sold and public trading in similar securities of the issuer or comparable issuers.

The fund adopted Statement of Financial Accounting Standards No. 157 "Fair Value Measurements" ("FAS 157"). FAS 157 establishes an authoritative definition of fair value, sets out a framework for measuring fair value, and requires additional disclosures about fair value measurements.

Various inputs are used in determining the value of the fund's investments relating to FAS 157. These inputs are summarized in the three broad levels listed below.

Level 1-quoted prices in active markets for identical securities.

Level 2—other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3—significant unobservable inputs (including the fund's own assumptions in determining the fair value of investments).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used as of December 31, 2008 in valuing the fund's investments carried at fair value:

Valuation Inputs	Investments in Securities (\$)	Other Financial Instruments (\$)†
Level 1–Quoted Prices	199,857,012	0
Level 2–Other Significant Observable Inputs	0	0
Level 3–Significant Unobservable Inputs	0	0
Total	199,857,012	0

† Other financial instruments include derivative instruments such as futures, forward currency exchange contracts and swap contracts, which are valued at the unrealized appreciation (depreciation) on the instrument and written options contracts which are shown at value.

(b) Securities transactions and investment income: Securities transactions are recorded on a trade date basis. Realized gains and losses from securities transactions are recorded on the identified cost basis.

#### NOTES TO FINANCIAL STATEMENTS (continued)

Dividend income is recognized on the ex-dividend date and interest income, including, where applicable, accretion of discount and amortization of premium on investments, is recognized on the accrual basis.

The fund has arrangements with the custodian and cash management banks whereby the fund may receive earnings credits when positive cash balances are maintained, which are used to offset custody and cash management fees. For financial reporting purposes, the fund includes net earnings credits as an expense offset in the Statement of Operations.

Pursuant to a securities lending agreement with The Bank of New York Mellon, a subsidiary of BNY Mellon and an affiliate of Dreyfus, the fund may lend securities to qualified institutions. It is the fund's policy that, at origination, all loans are secured by collateral of at least 102% of the value of U.S. securities loaned and 105% of the value of foreign securities loaned. Collateral equivalent to at least 100% of the market value of securities on loan will be maintained at all times. Collateral is either in the form of cash, which can be invested in certain money market mutual funds managed by the Manager, U.S. Government and Agency securities or letters of credit. The fund is entitled to receive all income on securities loaned, in addition to income earned as a result of the lending transaction. Although each security loaned is fully collateralized, the fund bears the risk of delay in recovery of, or loss of rights in, the securities loaned should a borrower fail to return the securities in a timely manner. During the period ended December 31, 2008, The Bank of New York Mellon earned \$35,528 from lending fund portfolio securities, pursuant to the securities lending agreement.

(c) Affiliated issuers: Investments in other investment companies advised by the Manager are defined as "affiliated" in the Act.

(d) Dividends to shareholders: Dividends are recorded on the ex-dividend date. Dividends from investment income-net and dividends from net realized capital gains, if any, are normally declared and paid annually, but the fund may make distributions on a more frequent basis to comply with the distribution requirements of the Internal Revenue Code of 1986, as amended (the "Code"). To the extent that net realized capital gains can be offset by capital loss carryovers, it is the policy of the fund not to distribute such gains. Income and capital gain distributions are determined in accordance with income tax regulations, which may differ from U.S. generally accepted accounting principles.

(e) Federal income taxes: It is the policy of the fund to continue to qualify as a regulated investment company, if such qualification is in the best interests of its shareholders, by complying with the applicable provisions of the Code, and to make distributions of taxable income sufficient to relieve it from substantially all federal income and excise taxes.

As of and during the period ended December 31, 2008, the fund did not have any liabilities for any unrecognized tax positions. The fund recognizes interest and penalties, if any, related to unrecognized tax positions as income tax expense in the Statement of Operations. During the period, the fund did not incur any interest or penalties.

Each of the tax years in the four-year period ended December 31, 2008 remains subject to examination by the Internal Revenue Service and state taxing authorities.

At December 31, 2008, the components of accumulated earnings on a tax basis were as follows: undistributed ordinary income \$1,921,172, accumulated capital losses \$173,924,909 and unrealized depreciation \$45,672,254. In addition, the fund had \$10,708,456 of capital losses realized after October 31, 2008 which were deferred for tax purposes to the first day of the following fiscal year.

The accumulated capital loss carryover is available for federal income tax purposes to be applied against future net securities profits, if any, realized subsequent to December 31, 2008. If not applied, \$50,319,693 of the carryover expires in fiscal 2009, \$103,833,733 expires in fiscal 2010 and \$19,771,483 expires in fiscal 2011.

The tax character of distributions paid to shareholders during the fiscal periods ended December 31, 2008 and December 31, 2007 were as follows: ordinary income \$2,053,150 and \$1,975,136, respectively. During the period ended December 31, 2008, as a result of permanent book to tax differences, primarily due to the tax treatment for real estate investment trusts, the fund decreased accumulated undistributed investment income-net by \$10,356 and increased accumulated net realized gain (loss) on investments by the same amount. Net assets and net asset value per share were not affected by this reclassification.

### NOTE 2-Bank Lines of Credit:

Prior to October 15, 2008, the fund participated with other Dreyfusmanaged funds in a \$350 million redemption credit facility. Effective October 15, 2008, the fund participates with other Dreyfus-managed funds in a \$145 million redemption credit facility (the "Facility") to be utilized for temporary or emergency purposes, including the financing of redemptions. In connection therewith, the fund has agreed to pay commitment fees on its pro rata portion of the Facility. Interest is charged to the fund based on prevailing market rates in effect at the time of borrowing.

The average daily amount of borrowings outstanding under the Facilities during the period ended December 31, 2008 was approximately \$15,500, with a related weighted average annualized interest rate of 2.44%.

## NOTE 3–Investment Advisory Fee and Other Transactions with Affiliates:

(a) Pursuant to an Investment Advisory Agreement with the Manager, the investment advisory fee is computed at the annual rate of .75% of the value of the fund's average daily net assets and is payable monthly.

(b) Under the Distribution Plan (the "Plan") adopted pursuant to Rule 12b-1 under the Act, Service shares pay the Distributor for distributing their shares, for servicing and/or maintaining Service shares shareholder accounts and for advertising and marketing for Service shares. The Plan provides for payments to be made at an annual rate of .25% of the value of the Service shares' average daily net assets. The Distributor may make payments to Participating Insurance Companies and to brokers and dealers acting as principal underwriter for their variable insurance products. The fees payable under the Plan are payable without regard to actual expenses incurred. During the period ended December 31, 2008, Service shares were charged \$17,789 pursuant to the Plan.

(c) Under the Shareholder Services Plan, Initial shares reimburse the Distributor an amount not to exceed an annual rate of .25% of the value of the Initial shares' average daily net assets for certain allocated expenses with respect to servicing and/or maintaining Initial shares shareholder accounts. During the period ended December 31, 2008, Initial shares were charged \$15,416 pursuant to the Shareholder Services Plan.

The fund compensates Dreyfus Transfer, Inc., a wholly-owned subsidiary of the Manager, under a transfer agency agreement for providing personnel and facilities to perform transfer agency services for the fund. During the period ended December 31, 2008, the fund was charged \$1,173 pursuant to the transfer agency agreement.

The fund compensates The Bank of New York Mellon under a cash management agreement for performing cash management services related to fund subscriptions and redemptions. During the period ended December 31, 2008, the fund was charged \$150 pursuant to the cash management agreement.

The fund compensates The Bank of New York Mellon under a custody agreement for providing custodial services for the fund. During the period ended December 31, 2008, the fund was charged \$31,887 pursuant to the custody agreement.

During the period ended December 31, 2008, the fund was charged \$5,403 for services performed by the Chief Compliance Officer.

The components of "Due to The Dreyfus Corporation and affiliates" in the Statement of Assets and Liabilities consist of: investment advisory fees \$116,918, Rule 12b-1 distribution plan fees \$1,028, shareholder services plan fees \$8,041, custodian fees \$9,911, chief compliance officer fees \$1,197 and transfer agency per account fees \$190.

(d) Each Board member also serves as a Board member of other funds within the Dreyfus complex. Annual retainer fees and attendance fees are allocated to each fund based on net assets.

#### NOTE 4-Securities Transactions:

The aggregate amount of purchases and sales of investment securities, excluding short-term securities, during the period ended December 31, 2008, amounted to \$85,865,146 and \$127,234,886, respectively.

At December 31, 2008, the cost of investments for federal income tax purposes was \$245,529,266; accordingly, accumulated net unrealized depreciation on investments was \$45,672,254, consisting of \$5,860,469 gross unrealized appreciation and \$51,532,723 gross unrealized depreciation.

In March 2008, the Financial Accounting Standards Board released Statement of Financial Accounting Standards No. 161, "Disclosures about Derivative Instruments and Hedging Activities" ("FAS 161"). FAS 161 requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. The application of FAS 161 is required for fiscal years and interim periods beginning after November 15, 2008. At this time, management is evaluating the implications of FAS 161 and its impact on the financial statements and the accompanying notes has not yet been determined.

## REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

## Shareholders and Board of Directors The Dreyfus Socially Responsible Growth Fund, Inc.

We have audited the accompanying statement of assets and liabilities of The Dreyfus Socially Responsible Growth Fund, Inc., including the statement of investments, as of December 31, 2008, and the related statement of operations for the year then ended, the statement of changes in net assets for each of the two years in the period then ended, and financial highlights for each of the years indicated therein. These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Fund's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of December 31, 2008 by correspondence with the custodian and others. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of The Dreyfus Socially Responsible Growth Fund, Inc., at December 31, 2008, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the financial highlights for each of the indicated years, in conformity with U.S. generally accepted accounting principles.

Ernet + Young LLP

New York, New York February 10, 2009

The Fund 27

## IMPORTANT TAX INFORMATION (Unaudited)

For federal tax purposes, the fund hereby designates 100% of the ordinary dividends paid during the fiscal year ended December 31, 2008 as qualifying for the corporate dividends received deduction. Shareholders will receive notification in January 2009 of the percentage applicable to the preparation of their 2008 income tax returns.

## INFORMATION ABOUT THE REVIEW AND APPROVAL OF THE FUND'S INVESTMENT ADVISORY AGREEMENT (Unaudited)

At a meeting of the Board of Directors of the fund held on July 16-17, 2008, the Board considered the re-approval of the fund's Management Agreement for another one year term, pursuant to which the Manager provides the fund with investment advisory and administrative services. The Board members, none of whom are "interested persons" (as defined in the Investment Company Act of 1940, as amended) of the fund, were assisted in their review by independent legal counsel and met with counsel in executive session separate from representatives of the Manager.

Analysis of Nature, Extent and Quality of Services Provided to the Fund. The Board members received a presentation from representatives of the Manager regarding services provided to the fund and other funds in the Dreyfus fund complex, and discussed the nature, extent and quality of the services provided to the fund pursuant to its Management Agreement. The Manager's representatives reviewed the fund's distribution of accounts and the relationships the Manager has with various intermediaries and the different needs of each. The Board members noted that the fund's shares are offered only to separate accounts established by insurance companies to fund variable annuity contracts and variable life insurance policies. The Manager's representatives noted the diversity of distribution of the funds in the Drevfus fund complex, and the Manager's corresponding need for broad, deep and diverse resources to be able to provide ongoing shareholder services to each distribution channel, including those of the fund. The Manager also provided the number of shareholder accounts in the fund, as well as the fund's asset size.

The Board members also considered the Manager's research and portfolio management capabilities and that the Manager also provides oversight of day-to-day fund operations, including fund accounting and administration and assistance in meeting legal and regulatory requirements, and the Manager's extensive administrative, accounting and compliance infrastructure.

## INFORMATION ABOUT THE REVIEW AND APPROVAL OF THE FUND'S INVESTMENT ADVISORY AGREEMENT (Unaudited) (continued)

Comparative Analysis of the Fund's Management Fee, Expense Ratio and Performance. The Board members reviewed reports prepared by Lipper, Inc., an independent provider of investment company data, which included information comparing the fund's management fee and expense ratio with a group of comparable funds and a broader group of funds that were selected by Lipper and are not required to use one or more social screens when choosing securities for the funds' portfolios ("Expense Group I" and "Expense Universe I," respectively) and with a group of funds and a broader group of funds that were selected by Lipper and use one or more social screens when choosing securities for the funds' portfolios ("Expense Group II" and "Expense Universe II," respectively). The fund's portfolio managers use social screens when choosing securities for the fund's portfolio, as described in the fund's prospectus. Included in these reports were comparisons of contractual and actual management fee rates, total operating expenses and performance.

The Board reviewed the results of the comparisons for each Expense Group and Expense Universe. The Board reviewed the range of management fees and expense ratios of the funds in each Expense Group and Expense Universe, and noted that the expense ratio of the fund's Initial shares (which are not subject to a Rule 12b-1 plan) ranked in the third quartile of Expense Group I, in the second quartile of Expense Group II and Expense Universe I and in the first quartile of Expense Universe II.

The Board members also reviewed the reports prepared by Lipper that presented the fund's performance and comparisons of performance to two groups of funds composed of the same funds included in Expense Group I and Expense Group II ("Performance Group I" and "Performance Group II," respectively) and to two corresponding broader groups of funds ("Performance Universe I" and "Performance Universe II," respectively). The Manager also provided a comparison of the fund's calendar year total returns to the returns of its benchmark index. The Board noted that the performance of the fund's Initial shares was below the medians of Performance Group I and Performance Universe I for the reported periods ended May 31, 2008. The Board also noted that the performance of the fund's Initial shares was at or below the medians of Performance Group II and Performance Universe II for each reported period.

Representatives of the Manager noted that the Manager or its affiliates do not manage other mutual funds or accounts with substantially similar investment objectives, policies and strategies as the fund.

Analysis of Profitability and Economies of Scale. The Manager's representatives reviewed the dollar amount of expenses allocated and profit received by the Manager and the method used to determine such expenses and profit. The Board previously had been provided with information prepared by an independent consulting firm regarding the Manager's approach to allocating costs to, and determining the profitability of, individual funds and the entire Dreyfus mutual fund complex. The Board members also had been informed that the methodology had been reviewed by an independent registered public accounting firm which, like the consultant, found the methodology to be reasonable. The consulting firm also analyzed where any economies of scale might emerge in connection with the management of the fund. The Board members evaluated the profitability analysis in light of the relevant circumstances for the fund, including any decline in assets, and the extent to which economies of scale would be realized if the fund grows and whether fee levels reflect these economies of scale for the benefit of fund shareholders. The Board members also considered potential benefits to the Manager from acting as investment adviser to the fund, including any soft dollar arrangements with respect to trading the fund's portfolio.

## INFORMATION ABOUT THE REVIEW AND APPROVAL OF THE FUND'S INVESTMENT ADVISORY AGREEMENT (Unaudited) (continued)

It was noted that the Board members should consider the Manager's profitability with respect to the fund as part of their evaluation of whether the fee under the Management Agreement bears a reasonable relationship to the mix of services provided by the Manager, including the nature, extent and quality of such services. It was noted that the profitability percentage for managing the fund was within ranges determined by appropriate court cases to be reasonable given the services rendered and that the profitability percentage for managing the fund was reasonable given the services provided.

At the conclusion of these discussions, the Board agreed that it had been furnished with sufficient information to make an informed business decision with respect to continuation of the Management Agreement. Based on the discussions and considerations as described above, the Board made the following conclusions and determinations:

- The Board concluded that the nature, extent and quality of the services provided by the Manager were adequate and appropriate.
- The Board was satisfied with the fund's overall performance.
- The Board concluded that the fee paid by the fund to the Manager was reasonable in light of the services provided, comparative performance and expense and management fee information, costs of the services provided and profits to be realized and benefits derived or to be derived by the Manager from its relationship with the fund.
- The Board determined that the economies of scale which may accrue to the Manager and its affiliates in connection with the management of the fund had been adequately considered by the Manager in connection with the management fee rate charged to the fund, and that, to the extent in the future it were determined that material economies of scale had not been shared with the fund, the Board would seek to have those economies of scale shared with the fund.

The Board members considered these conclusions and determinations, along with the information received on a routine and regular basis throughout the year, and, without any one factor being dispositive, the Board determined that re-approval of the Management Agreement was in the best interests of the fund and its shareholders.

### BOARD MEMBERS INFORMATION (Unaudited)

#### Joseph S. DiMartino (65) Chairman of the Board (1998)

Principal Occupation During Past 5 Years:

Corporate Director and Trustee

Other Board Memberships and Affiliations:

- The Muscular Dystrophy Association, Director
- Century Business Services, Inc., a provider of outsourcing functions for small and medium size companies, Director
- The Newark Group, a provider of a national market of paper recovery facilities, paperboard mills and paperboard converting plants, Director
- Sunair Services Corporation, a provider of certain outdoor-related services to homes and businesses, Director

No. of Portfolios for which Board Member Serves: 191

#### Clifford L. Alexander, Jr. (75) Board Member (1998)

Principal Occupation During Past 5 Years:

- President of Alexander & Associates, Inc., a management consulting firm (January 1981-present)
- Chairman of the Board of Moody's Corporation (October 2000-October 2003)

Other Board Memberships and Affiliations:

• Mutual of America Life Insurance Company, Director

No. of Portfolios for which Board Member Serves: 55

#### David W. Burke (72) Board Member (2003)

*Principal Occupation During Past 5 Years:* Corporate Director and Trustee

Other Board Memberships and Affiliations: • John F. Kennedy Library Foundation, Director

No. of Portfolios for which Board Member Serves: 92

### Whitney I. Gerard (74) Board Member (2003)

Principal Occupation During Past 5 Years: • Partner of Chadbourne & Parke LLP

No. of Portfolios for which Board Member Serves: 31

#### George L. Perry (74) Board Member (2003)

*Principal Occupation During Past 5 Years:*Economist and Senior Fellow at Brookings Institution

No. of Portfolios for which Board Member Serves: 31

Once elected all Board Members serve for an indefinite term, but achieve Emeritus status upon reaching age 80. Additional information about the Board Members is available in the fund's Statement of Additional Information which can be obtained from Dreyfus free of charge by calling this toll free number: 1-800-554-4611.

Lucy Wilson Benson, Emeritus Board Member Arthur A. Hartman, Emeritus Board Member

### OFFICERS OF THE FUND (Unaudited)

#### J. DAVID OFFICER, President since December 2006.

Chief Operating Officer, Vice Chairman and a Director of the Manager, and an officer of 77 investment companies (comprised of 180 portfolios) managed by the Manager. He is 60 years old and has been an employee of the Manager since April 1998.

### PHILLIP N. MAISANO, Executive Vice President since July 2007.

Chief Investment Officer, Vice Chair and a director of the Manager, and an officer of 77 investment companies (comprised of 180 portfolios) managed by the Manager. Mr. Maisano also is an officer and/or Board member of certain other investment management subsidiaries of The Bank of New York Mellon Corporation, each of which is an affiliate of the Manager. He is 61 years old and has been an employee of the Manager since November 2006. Prior to joining the Manager, Mr. Maisano served as Chairman and Chief Executive Officer of EACM Advisors, an affiliate of the Manager, since August 2004, and served as Chief Executive Officer of Evaluation Associates, a leading institutional investment consulting firm, from 1988 until 2004.

#### MICHAEL A. ROSENBERG, Vice President and Secretary since August 2005.

Assistant General Counsel of BNY Mellon, and an officer of 78 investment companies (comprised of 201 portfolios) managed by the Manager. He is 48 years old and has been an employee of the Manager since October 1991.

#### JAMES BITETTO, Vice President and Assistant Secretary since August 2005.

Senior Counsel of BNY Mellon and Secretary of the Manager, and an officer of 78 investment companies (comprised of 201 portfolios) managed by the Manager. He is 42 years old and has been an employee of the Manager since December 1996.

#### JONI LACKS CHARATAN, Vice President and Assistant Secretary since August 2005.

Senior Counsel of BNY Mellon, and an officer of 78 investment companies (comprised of 201 portfolios) managed by the Manager. She is 53 years old and has been an employee of the Manager since October 1988.

### JOSEPH M. CHIOFFI, Vice President and Assistant Secretary since August 2005.

Senior Counsel of BNY Mellon, and an officer of 78 investment companies (comprised of 201 portfolios) managed by the Manager. He is 47 years old and has been an employee of the Manager since June 2000.

#### JANETTE E. FARRAGHER, Vice President and Assistant Secretary since August 2005.

Assistant General Counsel of BNY Mellon, and an officer of 78 investment companies (comprised of 201 portfolios) managed by the Manager. She is 46 years old and has been an employee of the Manager since February 1984.

#### JOHN B. HAMMALIAN, Vice President and Assistant Secretary since August 2005.

Managing Counsel of BNY Mellon, and an officer of 78 investment companies (comprised of 201 portfolios) managed by the Manager. He is 45 years old and has been an employee of the Manager since February 1991.

#### ROBERT R. MULLERY, Vice President and Assistant Secretary since August 2005.

Managing Counsel of BNY Mellon, and an officer of 78 investment companies (comprised of 201 portfolios) managed by the Manager. He is 56 years old and has been an employee of the Manager since May 1986.

### JEFF PRUSNOFSKY, Vice President and Assistant Secretary since August 2005.

Managing Counsel of BNY Mellon, and an officer of 78 investment companies (comprised of 201 portfolios) managed by the Manager. He is 43 years old and has been an employee of the Manager since October 1990.

#### JAMES WINDELS, Treasurer since November 2001.

Director – Mutual Fund Accounting of the Manager, and an officer of 78 investment companies (comprised of 201 portfolios) managed by the Manager. He is 49 years old and has been an employee of the Manager since April 1985.

### RICHARD CASSARO, Assistant Treasurer since January 2008.

Senior Accounting Manager – Money Market and Municipal Bond Funds of the Manager, and an officer of 78 investment companies (comprised of 201 portfolios) managed by the Manager. He is 49 years old and has been an employee of the Manager since September 1982.

### GAVIN C. REILLY, Assistant Treasurer since December 2005.

Tax Manager of the Investment Accounting and Support Department of the Manager, and an officer of 78 investment companies (comprised of 201 portfolios) managed by the Manager. He is 40 years old and has been an employee of the Manager since April 1991.

### ROBERT ROBOL, Assistant Treasurer since August 2005.

Senior Accounting Manager – Fixed Income Funds of the Manager, and an officer of 78 investment companies (comprised of 201 portfolios) managed by the Manager. He is 44 years old and has been an employee of the Manager since October 1988.

#### ROBERT SALVIOLO, Assistant Treasurer since May 2007.

Senior Accounting Manager – Equity Funds of the Manager, and an officer of 78 investment companies (comprised of 201 portfolios) managed by the Manager. He is 41 years old and has been an employee of the Manager since June 1989.

### ROBERT SVAGNA, Assistant Treasurer since December 2002.

Senior Accounting Manager – Equity Funds of the Manager, and an officer of 78 investment companies (comprised of 201 portfolios) managed by the Manager. He is 41 years old and has been an employee of the Manager since November 1990.

#### JOSEPH W. CONNOLLY, Chief Compliance Officer since October 2004.

Chief Compliance Officer of the Manager and The Dreyfus Family of Funds (78 investment companies, comprised of 201 portfolios). From November 2001 through March 2004, Mr. Connolly was first Vice-President, Mutual Fund Servicing for Mellon Global Securities Services. In that capacity, Mr. Connolly was responsible for managing Mellon's Custody, Fund Accounting and Fund Administration services to third-party mutual fund clients. He is 51 years old and has served in various capacities with the Manager since 1980, including manager of the firm's Fund Accounting Department from 1997 through October 2001.

#### WILLIAM GERMENIS, Anti-Money Laundering Compliance Officer since October 2002.

Vice President and Anti-Money Laundering Compliance Officer of the Distributor, and the Anti-Money Laundering Compliance Officer of 74 investment companies (comprised of 197 portfolios) managed by the Manager. He is 38 years old and has been an employee of the Distributor since October 1998.

This report must be preceded or accompanied by a prospectus. To obtain an additional prospectus, call (800) 778-1482 or your financial representative. We advise you to consider the portfolio's objectives, risks, charges and expenses carefully before investing. The prospectus contains this and other important information about the portfolio. Please read the prospectus carefully before you invest.

The Portfolio may not be able to mirror the S&P 500<sup>®</sup> closely enough to track its performance for several reasons, including the Portfolio's cost to buy and sell securities, the flow of money into and out of the Portfolio, and the potential underperformance of stocks selected. This Portfolio is subject to stock market risk, meaning stocks in the Portfolio may decline in value for extended periods due to the activities and financial prospects of individual companies, or due to general market and economic conditions. Additionally, derivatives may be more volatile and less liquid than traditional securities, and the Portfolio could suffer losses on its derivatives positions. All of these factors may result in greater share price volatility. Please read the prospectus for specific details regarding the Portfolio's risk profile.

"Standard & Poor's," "S&P," "S&P 500," "Standard & Poor's 500" and "500" are trademarks of The McGraw-Hill Companies, Inc., and have been licensed for use by the Portfolio's advisor. DWS Equity 500 Index VIP is not sponsored, endorsed, sold, nor promoted by Standard & Poor's, and Standard & Poor's makes no representation regarding the advisability of investing in the Portfolio. There is no guarantee that the Portfolio will be able to mirror the S&P 500 index closely enough to track its performance.

DWS Investments is part of Deutsche Bank's Asset Management division and, within the US, represents the retail asset management activities of Deutsche Bank AG, Deutsche Bank Trust Company Americas, Deutsche Investment Management Americas Inc. and DWS Trust Company.

### Performance Summary

All performance shown is historical, assumes reinvestment of all dividend and capital gain distributions, and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so that, when sold, shares may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please contact your participating insurance company for the Portfolio's most recent month-end performance. Performance figures for Classes A, B and B2 differ because each class maintains a distinct expense structure. Performance doesn't reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option. These charges and fees will reduce returns.

The total annual portfolio operating expense ratios, gross of any fee waivers or expense reimbursements, as stated in the fee table of the prospectus dated May 1, 2008 are 0.31%, 0.56% and 0.71% for Class A, Class B and Class B2 shares, respectively. Please see the Information About Your Portfolio's Expenses, the Financial Highlights and Notes to the Financial Statements (Note C, Related Parties) sections of this report for gross and net expense related disclosure for the period ended December 31, 2008.

Portfolio returns during all periods shown reflect a fee waiver/and or reimbursement. Without this waiver/reimbursement, returns would have been lower.

#### Growth of an Assumed \$10,000 Investment

The Standard & Poor's (S&P) 500<sup>®</sup> Index is an unmanaged, capitalization-weighted index of 500 stocks. The index is designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.

Index returns assume reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

#### **Comparative Results (as of December 31, 2008)**

DWS Equity 500 Index VIP		1-Year	3-Year	5-Year	10-Year
Class A	Growth of \$10,000	\$6,285	\$7,645	\$8,850	\$8,455
	Average annual total return	-37.15%	-8.56%	-2.41%	-1.66%
S&P 500 Index	Growth of \$10,000	\$6,300	\$7,696	\$8,953	\$8,700
	Average annual total return	-37.00%	-8.36%	-2.19%	-1.38%
DWS Equity 500 Index VIP		1-Year	3-Year	5-Year	Life of Class <sup>*</sup>
Class B	Growth of \$10,000	\$6,266	\$7,585	\$8,737	\$9,207
	Average annual total return	-37.34%	-8.80%	-2.66%	-1.23%
S&P 500 Index	Growth of \$10,000	\$6,300	\$7,696	\$8,953	\$9,528
	Average annual total return	-37.00%	-8.36%	-2.19%	72%
DWS Equity 500 Index VIP		1-Year	3-Year	5-Year	Life of Class**
Class B2	Growth of \$10,000	\$6,264	\$7,566	N/A	\$7,654
	Average annual total return	-37.36%	-8.88%	N/A	-7.80%
S&P 500 Index	Growth of \$10,000	\$6,300	\$7,696	N/A	\$7,857
	Average annual total return	-37.00%	-8.36%	N/A	-7.15%

The growth of \$10,000 is cumulative.

\* The Portfolio commenced offering Class B shares on April 30, 2002. Index returns began on April 30, 2002.

\*\* The Portfolio commenced offering Class B2 shares on September 16, 2005. Index returns began on September 30, 2005.

### **Information About Your Portfolio's Expenses**

As an investor of the Portfolio, you incur two types of costs: ongoing expenses and transaction costs. Ongoing expenses include management fees, distribution and service (12b-1) fees and other Portfolio expenses. Examples of transaction costs include contract charges, redemption fees and account maintenance fees, which are not shown in this section. The following tables are intended to help you understand your ongoing expenses (in dollars) of investing in the Portfolio and to help you compare these expenses with the ongoing expenses of investing in other mutual funds. In the most recent period, the Portfolio limited these expenses; had it not done so, expenses would have been higher. The example in the table is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire period (July 1, 2008 to December 31, 2008).

The tables illustrate your Portfolio's expenses in two ways:

 Actual Portfolio Return. This helps you estimate the actual dollar amount of ongoing expenses (but not transaction costs) paid on a \$1,000 investment in the Portfolio using the Portfolio's actual return during the period. To estimate the expenses you paid over the period, simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the "Expenses Paid per \$1,000" line under the share class you hold.

Hypothetical 5% Portfolio Return. This helps you to compare your Portfolio's ongoing expenses (but not transaction costs) with those of other mutual funds using the Portfolio's actual expense ratio and a hypothetical rate of return of 5% per year before expenses. Examples using a 5% hypothetical Portfolio return may be found in the shareholder reports of other mutual funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in these tables are meant to highlight your ongoing expenses only and do not reflect any transaction costs. The "Expenses Paid per \$1,000" line of the tables is useful in comparing ongoing expenses only and will not help you determine the relative total expense of owning different funds. If these transaction costs had been included, your costs would have been higher.

Actual Portfolio Return	Class A	Class B	Class B2
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$ 714.80	\$ 713.50	\$ 713.00
Expenses Paid per \$1,000*	\$ 1.21	\$ 2.28	\$ 2.71

### Expenses and Value of a \$1,000 Investment for the six months ended December 31, 2008

Hypothetical 5% Portfolio Return	Class A	Class B	Class B2
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$1,023.73	\$1,022.47	\$1,021.97
Expenses Paid per \$1,000 <sup>*</sup>	\$ 1.42	\$ 2.69	\$ 3.20

\* Expenses are equal to the Portfolio's annualized expense ratio for each share class, multiplied by the average account value over the period, multiplied by the number of days in the most recent six-month period, then divided by 366.

Annualized Expense Ratios	Class A	Class B	Class B2	
DWS Equity 500 Index VIP	.28%	.53%	.63%	

For more information, please refer to the Portfolio's prospectus.

These tables do not reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option.

### **Management Summary**

The year just ended was the worst in many decades for the US equity markets. Essentially all equity indices posted negative returns for this period, as markets reflected economic problems including a housing slump, rising unemployment, a crisis of confidence and an extreme credit crunch. The Standard & Poor's<sup>®</sup> 500 (S&P 500) Index returned –37.00% for the 12-month period ended December 31, 2008. All 10 of the industry sectors within the S&P 500 posted negative returns. The weakest sector was financials, down more than 50%; the strongest was consumer staples with a negative return of –14%.

The Portfolio returned –37.15% (Class A shares, unadjusted for contract charges) for the 12-month period ended December 31, 2008. Since the Portfolio's investment strategy is to replicate as closely as possible, before the deduction of expenses, the performance of the S&P 500, the Portfolio's return is normally quite close to the return of the index.

The top contributor to the return of the index and the Portfolio was Wal-Mart Stores, Inc., which rose more than 20% during the period. Other positives were Amgen Inc., a biotechnology company; biopharmaceutical Gilead Sciences, Inc.; pharmaceutical leader Bristol-Myers Squibb Co.; and McDonald's Corp. Many of the other stocks that made positive contributions to the return appreciated when they reached agreements to be acquired; these include Anheuser-Busch\* and William Wrigley Jr. Company.\*

Many of the greatest detractors from performance were in the financials sector; these include Bank of America Corp., Citigroup, Inc. and American International Group, Inc. Also strongly negative was General Electric Co., which was down more than 50%.

Brent Reeder Senior Vice President Northern Trust Investments, N.A. (NTI), Subadvisor to the Portfolio

All performance shown is historical, assumes reinvestment of all dividend and capital gain distributions, and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so that, when sold, shares may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please contact your participating insurance company for the Portfolio's most recent month-end performance. Performance figures for Classes A, B and B2 differ because each class maintains a distinct expense structure. Performance doesn't reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option. These charges and fees will reduce returns.

### **Risk Considerations**

The Portfolio may not be able to mirror the S&P 500 closely enough to track its performance for several reasons, including the Portfolio's cost to buy and sell securities, the flow of money into and out of the Portfolio, and the potential underperformance of stocks selected. This Portfolio is subject to stock market risk, meaning stocks in the Portfolio may decline in value for extended periods due to the activities and financial prospects of individual companies, or due to general market and economic conditions. Additionally, derivatives may be more volatile and less liquid than traditional securities, and the Portfolio could suffer losses on its derivatives positions. All of these factors may result in greater share price volatility. Please read the prospectus for specific details regarding the Portfolio's risk profile.

The Standard & Poor's 500 (S&P 500) Index is an unmanaged, capitalization-weighted index of 500 stocks. The index is designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries. "Standard & Poor's," "S&P," "S&P 500," "Standard & Poor's 500" and "500" are trademarks of The McGraw-Hill Companies, Inc., and have been licensed for use by the Portfolio's advisor. DWS Equity 500 Index VIP is not sponsored, endorsed, sold, nor promoted by Standard & Poor's, and Standard & Poor's makes no representation regarding the advisability of investing in the Portfolio. There is no guarantee that the Portfolio will be able to mirror the S&P 500 index closely enough to track its performance.

Index returns assume reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

\* These stocks are no longer part of the S&P 500 Index or held in the Portfolio.

Portfolio management market commentary is as of December 31, 2008, and may not come to pass. This information is subject to change at any time based on market and other conditions and should not be construed as a recommendation. Past performance does not guarantee future results. Current and future portfolio holdings are subject to risk.

\* Non-income producing security.

\*\* Annualized yield at time of purchase; not a coupon rate.

<sup>†</sup> The cost for federal income tax purposes was \$842,134,517. At December 31, 2008, net unrealized depreciation for all securities based on tax cost was \$181,017,799. This consisted of aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost of \$77,359,877 and aggregate gross unrealized depreciation for all securities in which there was an excess of tax cost over value of \$258,377,676.

(a) All or a portion of these securities were on loan (see Notes to Financial Statements). The value of all securities loaned at December 31, 2008 amounted to \$17,904,013, which is 2.8% of net assets.

(b) At December 31, 2008, this security has been pledged, in whole or in part, to cover initial margin requirements for open futures contracts.

(c) Affiliated fund managed by Deutsche Investment Management Americas Inc. The rate shown is the annualized seven-day yield at period end.

(d) Represents collateral held in connection with securities lending. Income earned by the Portfolio is net of borrower rebates.

REIT: Real Estate Investment Trust

At December 31, 2008, open futures contracts purchased were as follows:

Futures	Expiration Date	Contracts	Aggregate Face Value (\$)	Value (\$)	Unrealized Appreciation (\$)
S&P 500 Index	3/19/2009	10	2,193,492	2,250,250	56,758

### Fair Value Measurements

The following is a summary of the inputs used as of December 31, 2008 in valuing the Portfolio's investments. For information on the Portfolio's policy regarding the valuation of investments and of the valuation inputs, and the aggregate levels used in the table below, please refer to the Security Valuation section of Note A in the accompanying Notes to the Financial Statements.

Valuation Inputs	Investments in Other Finan Securities Instruments	
Level 1	\$ 659,110,580 \$ 56,7	758
Level 2	2,006,138	_
Level 3	_	_
Total	\$ 661,116,718 \$ 56,3	758

Other financial instruments are derivative instruments not reflected in the Investment Portfolio, such as future contracts, which are valued at the unrealized appreciation (depreciation) on the instrument.

\*\* Not annualized

### **Notes to Financial Statements**

### A. Significant Accounting Policies

DWS Investments VIT Funds (the "Trust") is registered under the Investment Company Act of 1940 as amended, (the "1940 Act"), as a diversified, open-end management investment company. The Trust is organized as a Massachusetts business trust. The Trust is comprised of two portfolios. DWS Equity 500 Index VIP (the "Portfolio") is one of the series the Trust offers to investors. The Portfolio is an underlying investment vehicle for variable annuity contracts and variable life insurance policies to be offered by the separate accounts of certain life insurance companies ("Participating Insurance Companies").

**Multiple Classes of Shares of Beneficial Interest.** The Portfolio offers three classes of shares to investors: Class A shares, Class B shares and Class B2 shares. Class B and Class B2 shares are subject to Rule 12b-1 distribution fees under the 1940 Act equal to an annual rate up to 0.25% of Class B and Class B2 shares average daily net assets. In addition, Class B2 shares are subject to record keeping fees equal to an annual rate of up to 0.15% of average daily net assets. Class A shares are not subject to such fees.

Investment income, realized and unrealized gains and losses, and certain Portfolio-level expenses and expense reductions, if any, are borne pro rata on the basis of relative net assets by the holders of all classes of shares, except that each class bears certain expenses unique to that class (including the applicable 12b-1 distribution fees and record keeping fees). Differences in class-level expenses may result in payment of different per share dividends by class. All shares have equal rights with respect to voting subject to class-specific arrangements.

The Portfolio's financial statements are prepared in accordance with accounting principles generally accepted in the United States of America which require the use of management estimates. Actual results could differ from those estimates. The policies described below are followed consistently by the Portfolio in the preparation of its financial statements.

**Security Valuation.** Investments are stated at value determined as of the close of regular trading on the New York Stock Exchange on each day the exchange is open for trading. Equity securities are valued at the most recent sale price or official closing price reported on the exchange (US or foreign) or over-the-counter market on which the security is traded most extensively. Securities for which no sales are reported are valued at the calculated mean between the most recent bid and asked quotations on the relevant market or, if a mean cannot be determined, at the most recent bid quotation.

Money market instruments purchased with an original or remaining maturity of sixty days or less, maturing at par, are valued at amortized cost. Investments in open-end investment companies and Cash Management QP Trust are valued at their net asset value each business day.

Securities and other assets for which market quotations are not readily available or for which the above valuation procedures are deemed not to reflect fair value are valued in a manner that is intended to reflect their fair value as determined in accordance with procedures approved by the Trustees.

The Portfolio adopted Financial Accounting Standards Board ("FASB") Statement of Financial Accounting Standards No. 157, "Fair Value Measurements" ("FAS 157"), effective at the beginning of the Portfolio's fiscal year. FAS 157 establishes a three-tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and requires additional disclosure about the classification of fair value measurements.

Various inputs are used in determining the value of the Portfolio's investments. These inputs are summarized in three broad levels. Level 1 includes quoted prices in active markets for identical securities. Level 2 includes other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds and credit risk). Level 3 includes significant unobservable inputs (including the Portfolio's own assumptions in determining the fair value of investments). The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The aggregate value by input level, as of December 31, 2008, for the Portfolio's investments, is included at the end of the Portfolio's Investment Portfolio.

**New Accounting Pronouncement.** In March 2008, the FASB issued Statement of Financial Accounting Standards No. 161 ("FAS 161"), "Disclosures about Derivative Instruments and Hedging Activities". FAS 161 requires enhanced disclosure about an entity's derivative and hedging activities including qualitative disclosures about the objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. FAS 161 is effective for fiscal years and interim periods beginning after November 15, 2008. Management is currently reviewing the enhanced disclosure requirements for the adoption of FAS 161.

**Securities Lending.** The Portfolio may lend securities to financial institutions. The Portfolio retains beneficial ownership of the securities it has loaned and continues to receive interest and dividends paid by the issuer of

securities and to participate in any changes in their market value. The Portfolio requires the borrowers of the securities to maintain collateral with the Portfolio consisting of liquid, unencumbered assets having a value at least equal to the value of the securities loaned. When the collateral falls below specified amounts, the lending agents will use their best efforts to obtain additional collateral on the next business day to meet required amounts under the security lending agreement. The Portfolio may invest the cash collateral into a joint trading account in an affiliated money market fund pursuant to Exemptive Orders issued by the SEC. The Portfolio receives compensation for lending its securities either in the form of fees or by earning interest on invested cash collateral net of borrower rebates and fees paid to a lending agent. Either the Portfolio or the borrower may terminate the loan. There may be risks of delay and costs in recovery of securities or even loss of rights in the collateral should the borrower of the securities fail financially. The Portfolio is also subject to all investment risks associated with the reinvestment of any cash collateral received, including, but not limited to, interest rate, credit and liquidity risk associated with such investments.

**Futures Contracts.** A futures contract is an agreement between a buyer or seller and an established futures exchange or its clearinghouse in which the buyer or seller agrees to take or make a delivery of a specific amount of a financial instrument at a specified price on a specific date (settlement date). The Portfolio invests in futures to keep cash on hand to meet shareholder redemptions or other needs while maintaining exposure to the stock market.

Upon entering into a futures contract, the Portfolio is required to deposit with a financial intermediary an amount ("initial margin") equal to a certain percentage of the face value indicated in the futures contract. Subsequent payments ("variation margin") are made or received by the Portfolio depending upon the daily fluctuations in the value of the underlying security and are recorded for financial reporting purposes as unrealized gains or losses by the Portfolio. When entering into a closing transaction, the Portfolio will realize a gain or loss equal to the difference between the value of the futures contract to sell and the futures contract to buy. Futures contracts are valued at the most recent settlement price.

Certain risks may arise upon entering into futures contracts, including the risk that an illiquid secondary market will limit the Portfolio's ability to close out a futures contract prior to the settlement date and that a change in the value of a futures contract may not correlate exactly with the changes in the value of the securities hedged. When utilizing futures contracts to hedge, the Portfolio gives up the opportunity to profit from favorable price movements in the hedged positions during the term of the contract. Risk of loss may exceed amounts recognized on the Statement of Assets and Liabilities.

**Federal Income Taxes.** The Portfolio's policy is to comply with the requirements of the Internal Revenue Code, as amended, which are applicable to regulated investment companies, and to distribute all of its taxable and tax-exempt income to its shareholders.

At December 31, 2008, DWS Equity 500 Index VIP had a net tax basis capital loss carryforward of approximately \$16,672,000, which may be applied against any realized net taxable capital gains of each succeeding year until fully utilized or until December 31, 2012, whichever occurs first. During the year ended December 31, 2008, the Portfolio utilized \$633,000 of its prior year capital loss carryforward.

From November 1, 2008 through December 31, 2008, the Portfolio incurred approximately \$4,747,000 of net realized capital losses. As permitted by tax regulations, the Portfolio intends to elect to defer these losses and treat them as arising in the fiscal year ending December 31, 2009.

The Portfolio has reviewed the tax positions for the open tax years as of December 31, 2008 and has determined that no provision for income tax is required in the Portfolio's financial statements. The Portfolio's federal tax returns for the prior three fiscal years remain subject to examination by the Internal Revenue Service.

**Distribution of Income and Gains.** Net investment income of the Portfolio, if any, is declared and distributed to shareholders annually. Net realized gains from investment transactions, in excess of available capital loss carryforwards, would be taxable to the Portfolio if not distributed, and, therefore, will be distributed to shareholders at least annually.

The timing and characterization of certain income and capital gains distributions are determined annually in accordance with federal tax regulations, which may differ from accounting principles generally accepted in the United States of America. These differences primarily relate to investments in futures contracts and certain securities sold at a loss. As a result, net investment income (loss) and net realized gain (loss) on investment transactions for a reporting period may differ significantly from distributions during such period. Accordingly, the Portfolio may periodically make reclassifications among certain of its capital accounts without impacting the net asset value of the Portfolio.

At December 31, 2008, the Portfolio's components of distributable earnings (accumulated gains) on a tax basis were as follows:

Undistributed ordinary income	\$ 18,610,390
Capital loss carryforwards	\$ (16,672,000)
Unrealized appreciation (depreciation) on investments	\$ (181,017,799)

In addition, the tax character of distributions paid to shareholders by the Portfolio is summarized as follows:

	Years Ende	d December 31,
	2008	2007
Distributions from ordinary income	\$ 22,632,109	\$ 22,902,453

**Contingencies.** In the normal course of business, the Portfolio may enter into contracts with service providers that contain general indemnification clauses. The Portfolio's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Portfolio that have not yet been made. However, based on experience, the Portfolio expects the risk of loss to be remote.

**Expenses.** Expenses of the Trust arising in connection with a specific portfolio are allocated to that portfolio. Other Trust expenses which cannot be directly attributed to a portfolio are apportioned among the portfolios in the Trust.

**Other.** Investment transactions are accounted for on a trade date plus one basis for daily net asset valuation calculations. However, for financial reporting purposes, investment security transactions are reported on trade date. Interest income is recorded on the accrual basis. Dividend income is recorded on the ex-dividend date. Certain dividends from foreign securities may be recorded subsequent to the ex-dividend as soon as the Portfolio is informed of such dividends. Realized gains and losses from investment transactions are recorded on an identified cost basis.

### **B.** Purchases and Sales of Securities

During the year ended December 31, 2008, purchases and sales of investment securities (excluding short-term investments) aggregated \$50,822,206 and \$141,530,509, respectively.

### **C. Related Parties**

**Management Agreement.** Under the Investment Management Agreement with Deutsche Investment Management Americas Inc. ("DIMA" or the "Advisor"), an indirect, wholly owned subsidiary of Deutsche Bank AG, the Advisor directs the investments of the Portfolio in accordance with its investment objectives, policies and restrictions. The Advisor determines the securities, instruments and other contracts relating to investments to be purchased, sold, or entered into by the Portfolio or delegates such responsibility to the Portfolio's subadvisor. Pursuant to the Investment Management Agreement with the Advisor, the Portfolio pays an annual management fee based on the Portfolio's average daily net assets, accrued daily and payable monthly, at the following annual rates:

First \$1 billion of the Portfolio's average daily net assets	.200%
Next \$1 billion of such net assets	.175%
Over \$2 billion of such net assets	.150%

Northern Trust Investments, N.A. ("NTI") acts as investment sub-advisor for the Portfolio. As the Portfolio's investment sub-advisor, NTI makes the Portfolio's investment decisions. It buys and sells securities for the Portfolio and conducts the research that leads to these purchase and sale decisions. NTI is paid by the Advisor for its services.

For the period from January 1, 2008 through April 30, 2009, the Advisor contractually agreed to waive all or a portion of its management fee and reimburse or pay certain operating expenses of the Portfolio to the extent necessary to maintain operating expenses of each class (excluding certain expenses such as extraordinary expenses, taxes, brokerage and interest) as follows:

Class A	.28%
Class B	.53%
Class B2	.63%

Accordingly, for the year ended December 31, 2008, the Advisor waived a portion of its management fee aggregating \$417,317 and the amount charged aggregated \$1,415,847, which was equivalent to an annual effective rate of 0.15% of the Portfolio's average daily net assets.

In addition, the Advisor reimbursed the Portfolio \$13,263 of record keeping fees for Class B2 shares for the year ended December 31, 2008.

Administration Fee. Pursuant to the Administrative Services Agreement, DIMA provides most administrative services to the Portfolio. For all services provided under the Administrative Services Agreement, the Portfolio pays DIMA an annual fee ("Administration fee") of 0.10% of the Portfolio's average daily net assets, computed and accrued daily and payable monthly. For the year ended December 31, 2008, DIMA received an Administration fee of \$919,349, of which \$53,153 is unpaid.

**Distribution Service Agreement.** DWS Investments Distributors, Inc. ("DIDI"), an affiliate of the Advisor, is the Portfolio's distributor. In accordance with the Distribution Plan, DIDI receives 12b-1 fees of 0.25% of average daily net assets of Class B and B2 shares. For the year ended December 31, 2008, the Distribution Service Fees were as follows:

Distribution Service Fees	Total Aggregated	Unpaid at December 31, 2008		
Class B	\$ 130,769	\$ 8,409		
Class B2	76,938	3,854		
	\$ 207,707	\$ 12,263		

**Service Provider Fees.** DWS Investments Service Company ("DISC"), an affiliate of the Advisor, is the transfer agent, dividend-paying agent and shareholder service agent of the Portfolio. Pursuant to a sub-transfer agency agreement among DISC and DST Systems, Inc. ("DST"), DISC has delegated certain transfer agent, dividend-paying agent and shareholder service agent functions to DST. DISC compensates DST out of the shareholder servicing fee they receive from the Portfolio. For the year ended December 31, 2008, the amounts charged to the Portfolio by DISC were as follows:

Services to Shareholders	Ag	Total Aggregated Wa				Unpaid at December 31, 2008	
Class A	\$	777	\$	777	\$	_	
Class B		106		98		8	
Class B2		74		74		_	
	\$	957	\$	949	\$	8	

**Typesetting and Filing Service Fees.** Under an agreement with DIMA, DIMA is compensated for providing typesetting and certain regulatory filing services to the Portfolio. For the year ended December 31, 2008, the amount charged to the Portfolio by DIMA included in the Statement of Operations under "reports to shareholders" aggregated \$10,570, of which \$3,801 is unpaid.

**Trustees' Fees and Expenses.** The Portfolio paid each Trustee not affiliated with the Advisor retainer fees plus specified amounts for various committee services and for the Board Chairperson and Vice Chairperson.

In connection with the board consolidation on April 1, 2008, of the two DWS Portfolio Boards of Directors, certain Independent Board Members retired prior to their normal retirement date, and received a one-time retirement benefit. DIMA has agreed to reimburse the Portfolios for the cost of this benefit. For the year ended December 31, 2008, the Portfolio paid its allocated portion of the retirement benefit of \$5,450 to the non-continuing Independent Board Members, and the Portfolio was reimbursed by DIMA for this payment.

**Cash Management QP Trust.** Pursuant to an Exemptive Order issued by the SEC, the Portfolio may invest in the Cash Management QP Trust (the "QP Trust") and other affiliated funds managed by the Manager or Advisor. The QP Trust seeks to provide as high a level of current income as is consistent with the preservation of capital and the maintenance of liquidity. The QP Trust does not pay the Manager or Advisor a management fee for the affiliated funds' investments in the QP Trust.

### **D. Fee Reductions**

The Portfolio has entered into an arrangement with its custodian whereby credits realized as a result of uninvested cash balances are used to reduce a portion of the Portfolio's custodian expenses. During the year ended December 31, 2008, the Portfolio's custodian fee was reduced by \$459 for custody credits earned.

### E. Line of Credit

The Portfolio and other affiliated funds (the "Participants") share in a \$490 million revolving credit facility provided by a syndication of banks. The Portfolio may borrow for temporary or emergency purposes, including the meeting of redemption requests that otherwise might require the untimely disposition of securities. The Participants are charged an annual commitment fee which is allocated based on net assets, among each of the Participants. Interest is calculated at the Federal Funds Rate plus 0.35 percent. The Portfolio may borrow up to a maximum of 33 percent of its net assets under the agreement.

### F. Ownership of the Portfolio

At December 31, 2008, two participating insurance companies were beneficial owners of record of 10% or more of the total outstanding Class A shares of the Portfolio, each owning 56% and 14%, respectively. At December 31, 2008, one participating insurance company was a beneficial owner of record of 10% or more of the total outstanding Class B shares of the Portfolio, owning 85%. At December 31, 2008, one participating insurance company was a beneficial outstanding Class B shares of the Portfolio, owning 85%. At December 31, 2008, one participating insurance company was a beneficial outstanding Class B shares of the Portfolio, owning 85%. At December 31, 2008, one participating insurance company was a beneficial owner of record of 10% or more of the total outstanding Class B2 shares of the Portfolio, owning 100%.

### **Report of Independent Registered Public Accounting Firm**

### To the Trustees of DWS Investments VIT Funds and the Shareholders of DWS Equity 500 Index VIP:

In our opinion, the accompanying statement of assets and liabilities, including the investment portfolio, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of DWS Equity 500 Index VIP (the "Portfolio") at December 31, 2008, and the results of its operations for the year ended, the changes in its net assets for each of the two years in the period then ended, and the financial highlights for each of the four years ended December 31, 2008, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Portfolio's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities at December 31, 2008 by correspondence with the custodian and brokers, provide a reasonable basis for our opinion. The financial highlights of the Portfolio for the period ended on December 31, 2004 were audited by another Independent Registered Public Accounting Firm whose report dated February 8, 2005 expressed an ungualified opinion on those statements.

Boston, Massachusetts February 13, 2009 PricewaterhouseCoopers LLP

### **Tax Information**

For corporate shareholders, 90% of the income dividends paid during the Portfolio's fiscal year ended December 31, 2008 qualified as a dividends received deduction.

Please consult a tax advisor if you have questions about federal or state income tax laws, or on how to prepare your tax returns. If you have specific questions about your account, please call (800) 778-1482.

### **Proxy Voting**

The Portfolio's policies and procedures for voting proxies for portfolio securities and information about how the Portfolio voted proxies related to its portfolio securities during the 12-month period ended June 30 are available on our Web site — www.dws-investments.com (click on "proxy voting" at the bottom of the page) — or on the SEC's Web site — www.sec.gov. To obtain a written copy of the Portfolio's policies and procedures without charge, upon request, call us toll free at (800) 778-1482.

### **Investment Management Agreement Approval**

The Board of Trustees, including the Independent Trustees, approved the renewal of your Fund's investment management agreement (the "Agreement") with Deutsche Investment Management Americas Inc. ("DIMA") and sub-advisory agreement (the "Sub-Advisory Agreement," and together with the Agreement, the "Agreements") between DIMA and Northern Trust Investments, N.A. ("NTI") in September 2008.

In terms of the process that the Board followed prior to approving the Agreements, shareholders should know that:

- At the present time, all but one of your Fund's Trustees are independent of DIMA and its affiliates.
- The Trustees meet frequently to discuss fund matters. Each year, the Trustees dedicate part or all of several meetings to contract review matters. Over the course of several months, the Board's Contract Committee, in coordination with the Board's Equity Oversight Committee, reviewed comprehensive materials received from DIMA, independent third parties and independent counsel. These materials included an analysis of the Fund's performance, fees and expenses, and profitability compiled by the Fund's independent fee consultant. The Board also received extensive information throughout the year regarding performance of the Fund.
- The Trustees regularly meet privately with their independent counsel (and, as needed, other advisors) to
  discuss contract review and other matters. In addition, the Trustees were also advised by the Fund's
  independent fee consultant in the course of their review of the Fund's contractual arrangements and
  considered a comprehensive report prepared by the independent fee consultant in connection with their
  deliberations (the "IFC Report").
- In connection with reviewing the Agreements, the Board also reviewed the terms of the administrative services agreement, transfer agency agreement and other material service agreements.
- Based on its evaluation of the information provided, the Contract Committee presented its findings and recommendations to the Independent Trustees as a group. The Independent Trustees reviewed the Contract Committee's findings and recommendations and presented their recommendations to the full Board.

In connection with the contract review process, the Contract Committee and the Board considered the factors discussed below, among others. The Board also considered that DIMA and its predecessors have managed the Fund since its inception, and the Board believes that a long-term relationship with a capable, conscientious advisor is in the best interests of the Fund. The Board considered, generally, that shareholders chose to invest or remain invested in the Fund knowing that DIMA managed the Fund, and that the Agreements were approved by the Fund's shareholders at a special meeting held in 2006. DIMA is part of Deutsche Bank, a major global banking institution that is engaged in a wide range of financial services. The Board believes that there are significant advantages to being part of a global asset management business that offers a wide range of investing expertise and resources, including hundreds of portfolio managers and analysts with research capabilities in many countries throughout the world.

While shareholders may focus primarily on fund performance and fees, the Fund's Board considers these and many other factors, including the quality and integrity of DIMA's and NTI's personnel and such other issues as back-office operations, fund valuations, and compliance policies and procedures.

**Nature, Quality and Extent of Services.** The Board considered the terms of the Agreements, including the scope of advisory services provided under the Agreements. The Board noted that, under the Agreements, DIMA and NTI provide portfolio management services to the Fund and that, pursuant to a separate administrative services agreement, DIMA provides administrative services to the Fund. The Board considered the experience and skills of senior management and investment personnel, the resources made available to such personnel, the ability of DIMA and NTI to attract and retain high-quality personnel, and the organizational depth and stability of DIMA and NTI. The Board reviewed the Fund's performance over short-term and long-term periods and compared those returns to various agreed-upon performance measures, including market indices and a peer universe compiled by the independent fee consultant using information supplied by Lipper Inc. ("Lipper"). The Board also noted that it has put a process into place of identifying "Focus Funds" (e.g., funds performing poorly relative to their benchmark or a peer group compiled by Lipper), and receives more frequent reporting and information from DIMA regarding such funds, along with DIMA's remedial plans to address underperformance. The Board believes

this process is an effective manner of identifying and addressing underperforming funds. Based on the information provided, the Board noted that for each of the one-, three- and five-year periods ended December 31, 2007, the Fund's performance (Class A shares) was in the 1st quartile of the applicable Lipper universe (the 1st quartile being the best performers and the 4th quartile being the worst performers). The Board also observed that the Fund has underperformed its benchmark in each of the one-, three- and five-year periods ended December 31, 2007. The Board recognized that DIMA has made significant changes in its investment personnel and processes in recent years in an effort to improve long-term performance.

On the basis of this evaluation and the ongoing review of investment results by the Board, the Board concluded that the nature, quality and extent of services provided by DIMA and NTI historically have been and continue to be satisfactory.

Fees and Expenses. The Board considered the Fund's investment management fee schedule, sub-advisory fee schedule, operating expenses, and total expense ratios, and comparative information provided by Lipper and the independent fee consultant regarding investment management fee rates paid to other investment advisors by similar funds (1st quartile being the most favorable and 4th quartile being the least favorable). With respect to management fees paid to other investment advisors by similar funds, the Board noted that the contractual fee rates paid by the Fund, which include the 0.10% fee paid to DIMA under the Fund's administrative services agreement, were lower than the median (2nd quartile) of the applicable Lipper peer group (based on Lipper data provided as of December 31, 2007). With respect to the sub-advisory fee paid to NTI, the Board noted that the fee is paid by DIMA out of its fee and not directly by the Fund. The Board noted that the Fund's Class A shares' total (net) operating expenses were expected to be higher than the median (3rd quartile) of the applicable Lipper expense universe (based on Lipper data provided as of December 31, 2007) ("Lipper Universe Expenses"). The Board also reviewed each other share class's total (net) operating expenses relative to the Lipper Universe Expenses. The Board considered the Fund's management fee rate as compared to fees charged by DIMA and certain of its affiliates for comparable mutual funds and considered differences in fund and fee structures between the DWS Funds. The Board also considered how the Fund's total (net) operating expenses compared to the total (net) operating expenses of a more customized peer group selected by Lipper (based on such factors as asset size). The Board also noted that the expense limitations agreed to by DIMA helped to ensure that the Fund's total (net) operating expenses would be competitive relative to the applicable Lipper universe.

On the basis of the information provided, the Board concluded that management fees were reasonable and appropriate in light of the nature, quality and extent of services provided by DIMA and NTI.

**Profitability.** The Board reviewed detailed information regarding revenues received by DIMA under the Agreement. The Board considered the estimated costs and pre-tax profits realized by DIMA from advising the DWS Funds, as well as estimates of the pre-tax profits attributable to managing the Fund in particular. The Board also received information regarding the estimated enterprise-wide profitability of the DWS Investments organization with respect to all fund services in totality and by fund. The Board reviewed DIMA's methodology in allocating its costs to the management of the Fund. Based on the information provided, the Board concluded that the pre-tax profits realized by DIMA in connection with the management of the Fund were not unreasonable. The Board also reviewed information regarding the profitability of certain similar investment management firms. The Board noted that while information regarding the profitability of such firms is limited (and in some cases is not necessarily prepared on a comparable basis), DIMA and its affiliates' overall profitability with respect to the DWS Investments fund complex (after taking into account distribution and other services provided to the funds by DIMA and its affiliates) was lower than the overall profitability levels of many comparable firms for which such data was available.

**Economies of Scale.** The Board considered whether there are economies of scale with respect to the management of the Fund and whether the Fund benefits from any economies of scale. The Board noted that the Fund's management fee schedule includes fee breakpoints. The Board concluded that the Fund's fee schedule represents an appropriate sharing between the Fund and DIMA of such economies of scale as may exist in the management of the Fund at current asset levels.

**Other Benefits to DIMA and Its Affiliates.** The Board also considered the character and amount of other incidental benefits received by DIMA and its affiliates, including any fees received by DIMA for administrative services provided to the Fund and any fees received by an affiliate of DIMA for distribution services. The Board also

considered benefits to DIMA related to brokerage and soft-dollar allocations, including allocating brokerage to pay for research generated by parties other than the executing broker dealers, which pertain primarily to funds investing in equity securities, along with the incidental public relations benefits to DIMA related to DWS Funds advertising and cross-selling opportunities among DWS Investments products and services. The Board concluded that management fees were reasonable in light of these fallout benefits.

**Compliance.** The Board considered the significant attention and resources dedicated by DIMA to documenting and enhancing its compliance processes in recent years. The Board noted in particular (i) the experience and seniority of DIMA's chief compliance officer; (ii) the large number of compliance personnel who report to DIMA's chief compliance officer; and (iii) the substantial commitment of resources by DIMA and its affiliates to compliance matters.

Based on all of the information considered and the conclusions reached, the Board (including a majority of the Independent Trustees) determined that the continuation of the Agreements is in the best interests of the Fund. In making this determination the Board did not give particular weight to any single factor identified above. The Board considered these factors over the course of numerous meetings, certain of which were in executive session with only the Independent Trustees and their counsel present. It is possible that individual Trustees may have weighed these factors differently in reaching their individual decisions to approve the continuation of the Agreements.

# Summary of Management Fee Evaluation by Independent Fee Consultant

### October 24, 2008

Pursuant to an Order entered into by Deutsche Investment Management Americas and affiliates (collectively, "DeAM") with the Attorney General of New York, I, Thomas H. Mack, have been appointed the Independent Fee Consultant for the DWS Funds (formerly the DWS Scudder Funds). My duties include preparing an annual written evaluation of the management fees DeAM charges the Funds, considering among other factors the management fees charged by other mutual fund companies for like services, management fees DeAM charges other clients for like services, DeAM's costs of supplying services under the management agreements and related profit margins, possible economies of scale if a Fund grows larger, and the nature and quality of DeAM's services, including fund performance. This report summarizes my evaluation for 2008, including my qualifications, the evaluation process for each of the DWS Funds, consideration of certain complex-level factors, and my conclusions. I served in substantially the same capacity in 2007.

### Qualifications

For more than 35 years I have served in various professional capacities within the investment management business. I have held investment analysis and advisory positions, including securities analyst, portfolio strategist and director of investment policy with a large investment firm. I have also performed business management functions, including business development, financial management and marketing research and analysis.

Since 1991, I have been an independent consultant within the asset management industry. I have provided services to over 125 client organizations, including investment managers, mutual fund boards, product distributors and related organizations. Over the past ten years I have completed a number of assignments for mutual fund boards, specifically including assisting boards with management contract renewal.

I hold a Master of Business Administration degree, with highest honors, from Harvard University and Master of Science and Bachelor of Science (highest honors) degrees from the University of California at Berkeley. I am an independent director and audit committee financial expert for two closed-end mutual funds, serve on the board of directors of a private market research company, and have served in various leadership and financial oversight capacities with non-profit organizations.

### **Evaluation of Fees for each DWS Fund**

My work focused primarily on evaluating, fund-by-fund, the fees charged to each of the 129 Fund portfolios in the DWS Fund family. For each Fund, I considered each of the key factors mentioned above, as well as any other relevant information. In doing so I worked closely with the Funds' Independent Directors in their annual contract renewal process, as well as in their approval of contracts for several new funds (documented separately).

In evaluating each Fund's fees, I reviewed comprehensive materials provided by or on behalf of DeAM, including expense information prepared by Lipper Analytical, comparative performance information, profitability data, manager histories, and other materials. I also accessed certain additional information from the Lipper, Strategic Insight, and Morningstar databases and drew on my industry knowledge and experience.

To facilitate evaluating this considerable body of information, I prepared for each Fund a document summarizing the key data elements in each area as well as additional analytics discussed below. This made it possible to consider each key data element in the context of the others.

In the course of contract renewal, DeAM agreed to implement a number of fee and expense adjustments requested by the Independent Directors which will favorably impact future fees and expenses, and my evaluation includes the effects of these changes.

### Fees and Expenses Compared with Other Funds

The competitive fee and expense evaluation for each fund focused on two primary comparisons:

The Fund's contractual management fee (the advisory fee plus the administration fee where applicable) compared with those of a group of typically 12–15 funds in the same Lipper investment category (e.g. Large Capitalization Growth) having similar distribution arrangements and being of similar size.

The Fund's total expenses compared with a broader universe of funds from the same Lipper investment category and having similar distribution arrangements.

These two comparisons provide a view of not only the level of the fee compared with funds of similar scale but also the total expense the Fund bears for all the services it receives, in comparison with the investment choices available in the Fund's investment category and distribution channel. The principal figure-of-merit used in these comparisons was the subject Fund's percentile ranking against peers.

### **DeAM's Fees for Similar Services to Others**

DeAM provided management fee schedules for all of its US domiciled fund and non-fund investment management accounts in any of the investment categories where there is a DWS Fund. These similar products included the other DWS Funds, non-fund pooled accounts, institutional accounts and sub-advisory accounts. Using this information, I calculated for each Fund the fee that would be charged to each similar product, at the subject Fund's asset level.

Evaluating information regarding non-fund products is difficult because there are varying levels of services required for different types of accounts, with mutual funds generally requiring considerably more regulatory and administrative types of service as well as having more frequent cash flows than other types of accounts. Also, while mutual fund fees for similar fund products can be expected to be similar, there will be some differences due to different pricing conditions in different distribution channels (e.g. retail funds versus those used in variable insurance products), differences in underlying investment processes and other factors.

### **Costs and Profit Margins**

DeAM provided a detailed profitability analysis for each Fund. After making some adjustments so that the presentation would be more comparable to the available industry figures, I reviewed profit margins from investment management alone, from investment management plus other fund services (excluding distribution) provided to the Funds by DeAM (principally shareholder services), and DeAM profits from all sources, including distribution. A later section comments on overall profitability.

### **Economies of Scale**

Economies of scale — an expected decline in management cost per dollar of fund assets as fund assets grow — are very rarely quantified and documented because of inherent difficulties in collecting and analyzing relevant data. However, in virtually every investment category that I reviewed, larger funds tend to have lower fees and lower total expenses than smaller funds. To see how each DWS Fund compares with this industry observation, I reviewed:

The trend in Fund assets over the last five years and the accompanying trend in total expenses. This shows if the Fund has grown and, if so, whether total expense (management fees as well as other expenses) have declined as a percent of assets.

Whether the Fund has break-points in its management fee schedule, the extent of the fee reduction built into the schedule and the asset levels where the breaks take effect, and in the case of a sub-advised Fund how the Fund's break-points compare with those of the sub-advisory fee schedule.

How the Fund's contractual fee schedule compares with trends in the industry data. To accomplish this, I constructed a chart showing how actual latest-fiscal-year contractual fees of the Fund and of other similar funds relate to average fund assets, with the subject Fund's contractual fee schedule superimposed.

### **Quality of Service – Performance**

The quality-of-service evaluation focused on investment performance, which is the principal result of the investment management service. Each Fund's performance was reviewed over the past 1, 3, 5 and 10 years, as

applicable, and compared with that of other funds in the same investment category and with a suitable market index.

In addition, I calculated and reviewed risk-adjusted returns relative to an index of similar mutual funds' returns and a suitable market index. The risk-adjusted returns analysis provides a way of determining the extent to which the Fund's return comparisons are mainly the product of investment value-added (or lack thereof) or alternatively taking considerably more or less risk than is typical in its investment category.

I also received and considered the history of portfolio manager changes for each Fund, as this provided an important context for evaluating the performance results.

### **Complex-Level Considerations**

While this evaluation was conducted mainly at the individual fund level, there are some issues relating to the reasonableness of fees that can alternatively be considered across the whole fund complex:

I reviewed DeAM's profitability analysis for all DWS Funds, with a view toward determining if the allocation procedures used were reasonable and how profit levels compared with public data for other investment managers.

I considered whether DeAM and affiliates receive any significant ancillary or "fall-out" benefits that should be considered in interpreting the direct profitability results. These would be situations where serving as the investment manager of the Funds is beneficial to another part of the Deutsche Bank organization.

I considered how aggregated DWS Fund expenses had varied over the years, by asset class and in the context of trends in asset levels.

I reviewed the structure of the DeAM organization, trends in staffing levels, and information on compensation of investment management and other professionals compared with industry data.

### Findings

Based on the process and analysis discussed above, which included reviewing a wide range of information from management and external data sources and considering among other factors the fees DeAM charges other clients, the fees charged by other fund managers, DeAM's costs and profits associated with managing the Funds, economies of scale, possible fall-out benefits, and the nature and quality of services provided, in my opinion the management fees charged the DWS Funds are reasonable.

# Summary of Administrative Fee Evaluation by Independent Fee Consultant

### September 29, 2008

Pursuant to an Order entered into by Deutsche Asset Management (DeAM) with the Attorney General of New York, I, Thomas H. Mack, have been appointed the Independent Fee Consultant for the DWS Funds and have as part of my duties evaluated the reasonableness of the proposed management fees to be charged by DeAM to the DWS Funds, taking onto account a proposal to pass through to the funds certain fund accounting-related charges in connection with new regulatory requirements. My evaluation considered the following:

- While the proposal would alter the services to be provided under the Administration Agreement, which I consider to be part of fund management under the Order, it is my opinion that the change in services is slight and that the scope of prospective services under the combination of the Advisory and Administration Agreements continues to be comparable with those typically provided to competitive funds under their management agreements.
- While the proposal would increase fund expenses, according to a pro forma analysis performed by management, the prospective effect is less than .01% for all but seven of the DeAM Funds' 438 active share classes, and in all cases the effect is less than .03% and overall expenses would remain reasonable in my opinion.

Based on the foregoing considerations, in my opinion the fees and expenses for all of the DWS Funds will remain reasonable if the Directors adopt this proposal.

Thomas H. Mack

# **Board Members and Officers**

The following table presents certain information regarding the Board Members and Officers of the Trust as of December 31, 2008. Each Board Member's year of birth is set forth in parentheses after his or her name. Unless otherwise noted, (i) each Board Member has engaged in the principal occupation(s) noted in the table for at least the most recent five years, although not necessarily in the same capacity; and (ii) the address of each Independent Board Member is c/o Dawn-Marie Driscoll, PO Box 100176, Cape Coral, FL 33904. Except as otherwise noted below, the term of office for each Board Member is until the election and qualification of a successor, or until such Board Member sooner dies, resigns, is removed or as otherwise provided in the governing documents of the fund. Because the fund does not hold an annual meeting of shareholders, each Board Member will hold office for an indeterminate period. The Board Members may also serve in similar capacities with other funds in the fund complex. The Length of Time Served represents the year in which the Board Member joined the board of one or more DWS funds now overseen by the Board.

#### Name, Year of Birth, Number of Funds in DWS Position with the Fund and Length of Time Fund Complex Overseen Served<sup>1</sup> **Business Experience and Directorships During the Past Five Years** Paul K. Investments in variable portfolios involve risk. Some portfolios have more risk than others. These include portfolios that allow exposure to or otherwise concentrate investments in certain sectors, geographic regions, security types, market capitalization or foreign securities (e.g., political or economic instability, which can be accentuated in Emerging Market countries). Please read the prospectus for specific details regarding its investments and risk profile.

DWS Investments is part of Deutsche Bank's Asset Management division and, within the US, represents the retail asset management activities of Deutsche Bank AG, Deutsche Bank Trust Company Americas, Deutsche Investment Management Americas Inc. and DWS Trust Company.

# **Performance Summary**

### **DWS Bond VIP**

All performance shown is historical, assumes reinvestment of all dividend and capital gain distributions, and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so that, when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please contact your participating insurance company for the Portfolio's most recent month-end performance. Performance doesn't reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option. These charges and fees will reduce returns. While all share classes have the same underlying portfolio, their performance will differ.

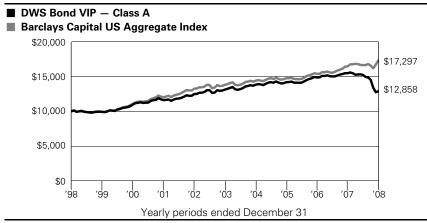

The total annual portfolio operating expense ratio, gross of any fee waivers or expense reimbursements, as stated in the fee table of the prospectus dated May 1, 2008 is 0.57% for Class A shares. Please see the Information About Your Portfolio's Expenses, the Financial Highlights and Notes to the Financial Statements (Note C, Related Parties) sections of this report for gross and net expense related disclosure for the period ended December 31, 2008.

Portfolio returns during 3-year, 5-year and 10-year periods shown reflect a fee waiver and/or expense reimbursement. Without this waiver/reimbursement, returns would have been lower.

#### **Risk Considerations**

Investments by the Portfolio in lower-rated bonds present greater risk to principal and income than investments in higher-quality securities. This Portfolio invests in individual bonds whose yields and market values fluctuate so that your investment may be worth more or less than its original cost. Bond investments are subject to interest-rate risk such that when interest rates rise, the prices of the bonds, and thus the value of the investment, can decline and the investor can lose principal value. Additionally, investing in foreign securities presents certain risks, such as currency fluctuation and changes in political/economic conditions and market risks. All of these factors may result in greater share price volatility. In the current market environment, mortgage-backed securities are experiencing increased volatility. Please see this Portfolio's prospectus for specific details regarding its investments and risk profile.

#### Growth of an Assumed \$10,000 Investment

The Barclays Capital US Aggregate Index (name changed from Lehman Brothers US Aggregate Index, effective November 3, 2008) is an unmanaged, market value-weighted measure of Treasury issues, agency issues, corporate bond issues and mortgage securities.

Index returns, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

#### **Comparative Results**

DWS Bond VIP		1-Year	3-Year	5-Year	10-Year
Class A	Growth of \$10,000	\$8,323	\$9,080	\$9,817	\$12,858
	Average annual total return	-16.77%	-3.17%	37%	2.55%
Barclays Capital US Aggregate Index	Growth of \$10,000	\$10,524	\$11,745	\$12,552	\$17,297
	Average annual total return	5.24%	5.51%	4.65%	5.63%

The growth of \$10,000 is cumulative.

# **Information About Your Portfolio's Expenses**

### **DWS Bond VIP**

As an investor of the Portfolio, you incur two types of costs: ongoing expenses and transaction costs. Ongoing expenses include management fees, distribution and service (12b-1) fees and other Portfolio expenses. Examples of transaction costs include contract charges, redemption fees and account maintenance fees, which are not shown in this section. The following tables are intended to help you understand your ongoing expenses (in dollars) of investing in the Portfolio and to help you compare these expenses with the ongoing expenses of investing in other mutual funds. The example in the table is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire period (July 1, 2008 to December 31, 2008).

The tables illustrate your Portfolio's expenses in two ways:

• Actual Portfolio Return. This helps you estimate the actual dollar amount of ongoing expenses (but not transaction costs) paid on a \$1,000 investment in the Portfolio using the Portfolio's actual return during the period. To estimate the expenses you paid over the period, simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the "Expenses Paid per \$1,000" line under the share class you hold.

Hypothetical 5% Portfolio Return. This helps you to compare your Portfolio's ongoing expenses (but not transaction costs) with those of other mutual funds using the Portfolio's actual expense ratio and a hypothetical rate of return of 5% per year before expenses. Examples using a 5% hypothetical Portfolio return may be found in the shareholder reports of other mutual funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in these tables are meant to highlight your ongoing expenses only and do not reflect any transaction costs. The "Expenses Paid per \$1,000" line of the tables is useful in comparing ongoing expenses only and will not help you determine the relative total expense of owning different funds. If these transaction costs had been included, your costs would have been higher.

### Expenses and Value of a \$1,000 Investment for the six months ended December 31, 2008

Actual Portfolio Return	Class A
Beginning Account Value 7/1/08	\$1,000.00
Ending Account Value 12/31/08	\$ 846.20
Expenses Paid per \$1,000*	\$ 2.78
I have a she at i and E 10/ Downton line Doctoring	Class A
Hypothetical 5% Portfolio Return	Class A
	\$1,000.00
Beginning Account Value 7/1/08 Ending Account Value 12/31/08	

\* Expenses are equal to the Portfolio's annualized expense ratio for each share class, multiplied by the average account value over the period, multiplied by the number of days in the most recent six-month period, then divided by 366.

Annualized Expense Ratios	Class A
DWS Variable Series I — DWS Bond VIP	.60%

For more information, please refer to the Portfolio's prospectus.

These tables do not reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option.

# **Management Summary**

### **DWS Bond VIP**

Entering the year, banks were pulling back financing from the markets as they were forced to come to terms with losses related to the subprime mortgage crisis that had emerged in the summer of 2007. As 2008 progressed, ongoing fallout from the collapse in housing and mortgages led to the failure, forced merger or government bailout of a number of leading global financial institutions in both the US and Europe. The result was a further tightening of credit that caused global economic growth to pull back sharply during the fourth quarter. Given this backdrop, investors' risk tolerance approached zero and liquidity all but evaporated. What ensued was a frantic "flight to quality" into the safe haven of US Treasuries and underperformance for all other segments of the bond market. Emerging-market and high-yield corporate bonds underperformed the broader bond market by a wide margin for the year. As investor risk aversion peaked in October and November, even AAA-rated mortgage-backed issues experienced a collapse in demand.<sup>1</sup>

During the 12-month period ended December 31, 2008, the Portfolio provided a total return of –16.77% (Class A shares, unadjusted for contract charges) compared with the 5.24% return of its benchmark, the Barclays Capital US Aggregate Index.

The Portfolio's focus on fixed-income sectors that trade at a yield spread to Treasuries detracted from performance for the period, driven by the unprecedented flight to quality that boosted Treasuries.<sup>2</sup> The Portfolio's high-yield corporate and emerging-market holdings fell significantly, although its relatively defensive positioning helped to limit the downside impact to some degree. Within the domestic portion of the Portfolio, commercial mortgage-backed securities and non-agency residential mortgage-backed securities suffered historically poor performance, especially late in the year. Late in the period, the Portfolio's exposure to high-yield corporate bonds was trimmed as we upgraded the Portfolio's quality profile.

Effective December 1, 2008, Deutsche Investment Management Americas Inc. (the "Advisor") assumed all advisory responsibilities for the portfolio that were previously delegated to the Portfolio's subadvisor and sub-subadvisor. The following portfolio managers handle the day-to-day management of the fund's investment portfolio.

Kenneth R. Bowling, CFA	John Brennan	J. Richard Robben, CFA	J. Kevin Horsley, CFA, CPA
Jamie Guenther, CFA	Bruce Harley, CFA, CEBS	David Vignolo, CFA	Stephen Willer, CFA

The Barclays Capital US Aggregate Index (name changed from Lehman Brothers US Aggregate Index, effective November 3, 2008) is an unmanaged, market-value-weighted measure of Treasury issues, agency issues, corporate bond issues and mortgage securities. Index returns, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

Credit quality (credit rating) is a measure of a bond issuer's ability to repay interest and principal in a timely manner. Rating agencies

assign letter designations such as AAA, AA and so forth. The lower the rating, the higher the probability of default.

<sup>2</sup> The yield spread is the difference between the yield of a security and the yield of a comparable-duration Treasury. A large spread indicates that investors require yields substantially above those of Treasuries in order to invest in lower-quality bonds. This is generally indicative of a higher-risk environment. A smaller spread generally indicates a more positive environment, since investors are less concerned about risk and therefore willing to accept lower yields. A drop in the yield spread is a positive.

Portfolio management market commentary is as of December 31, 2008, and may not come to pass. This information is subject to change at any time based on market and other conditions. Past performance does not guarantee future results. Current and future portfolio holdings are subject to risk.

	100%	100%

\* Category includes cash equivalents

Weighted average effective maturity: 7.43 and 6.99 years, respectively.

Asset allocation, quality and effective maturity are subject to change.

The quality ratings represent the lower of Moody's Investors Service, Inc. ("Moody's") or Standard & Poor's Corporation ("S&P") credit ratings. The ratings of Moody's and S&P represent their opinions as to the quality of the securities they rate. Ratings are relative and subjective and are not absolute standards of quality. The Portfolio's credit quality does not remove market risk.

For more complete details about the Portfolio's investment portfolio, see page 7. A complete list of portfolio holdings of the Portfolio is posted as of the month end on www.dws-investments.com on or about the 15th day of the following month. More frequent posting of portfolio holdings information may be made from time to time on www.dws-investments.com.

Following the Portfolio's fiscal first and third quarter-end, a complete portfolio holdings listing is filed with the SEC on Form N-Q. The form will be available on the SEC's Web site at www.sec.gov, and it also may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. Information on the operation of the SEC's Public Reference Room may be obtained by calling (800) SEC-0330.

Daily Assets Fund Institutional, 1.69% (e) (f) (Cost \$12,381,645) 12,381,645

\* Floating rate notes are securities whose yields vary with a designated market index or market rate, such as the coupon-equivalent of the US Treasury bill rate. These securities are shown at their current rate as of December 31, 2008.

12,381,645

\*\* Annualized yield at time of purchase; not a coupon rate.

<sup>†</sup> The cost for federal income tax purposes was \$194,554,381. At December 31, 2008, net unrealized depreciation for all securities based on tax cost was \$28,504,179. This consisted of aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost of \$3,482,477 and aggregate gross unrealized depreciation for all securities in which there was an excess of over value of \$31,986,656.

(a) Principal amount stated in US dollars unless otherwise noted.

(b) All or a portion of these securities were on loan (see Notes to Financial Statements). The value of all securities loaned at December 31, 2008 amounted to \$11,972,348, which is 7.7% of net assets.

(c) Bond is insured by one of these companies:

Insurance Coverage	As a % of Total Investment Portfolio
Assured Guaranty Corp.	0.5
Financial Guaranty Insurance Co.	1.4
MBIA Corp.	0.3
Radian	0.1

(d) Date shown is call date; not a maturity date for the perpetual preferred securities.

(e) Affiliated fund managed by Deutsche Investment Management Americas Inc. The rate shown is the annualized seven-day yield at period end.

(f) Represents collateral held in connection with securities lending. Income earned by the Portfolio is net of borrower rebates.

144A: Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers.

PIK: Denotes that all or a portion of the income is paid in kind.

REG S: Securities sold under Regulation S may not be offered, sold or delivered within the United States or to, or for the account or benefit of, US persons, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act of 1933.

REIT: Real Estate Investment Trust

Included in the portfolio are investments in mortgage or asset-backed securities which are interests in separate pools of mortgages or assets. Effective maturities of these investments may be shorter than stated maturities due to prepayments. Some separate investments in the Federal National Mortgage Association and Federal Home Loan Mortgage Corp. issues have similar coupon rates and have been aggregated for presentation purposes in the investment portfolio.

#### Fair Value Measurements

The following is a summary of the inputs used as of December 31, 2008 in valuing the Portfolio's investments. For information on the Portfolio's policy regarding the valuation of investments and of the valuation inputs, and the aggregate levels used in the tables below, please refer to the Security Valuation section of Note A in the accompanying Notes to the Financial Statements.

Valuation Inputs	Investments in Other Financia Securities Instruments <sup>††</sup>
Level 1	\$    12,394,389  \$
Level 2	153,306,176 4,196
Level 3	349,637 —
Total	\$ 166,050,202 \$ 4,196

<sup>††</sup> Other financial instruments are derivative instruments not reflected in the Investment Portfolio, such as forward foreign currency exchange contracts, which are valued at the unrealized appreciation (depreciation) on the instrument.

The following is a reconciliation of the Portfolio's Level 3 investments for which significant unobservable inputs were used in determining value at December 31, 2008:

Total realized gain (loss)	Investments in Securities
Balance as of January 1, 2008	\$ 1,298,669
Total realized gain (loss)	(131,401)
Change in unrealized appreciation (depreciation)	(481,826)
Amortization Premium/Discount	(930)
Net purchases (sales)	(334,875)
Net transfers in (out) of Level 3	_
Balance as of December 31, 2008	\$ 349,637

# **Financial Highlights**

### Class A

Years Ended December 31,	2008	2007	2006	2005	2004
Selected Per Share Data					
Net asset value, beginning of period	\$ 6.98	\$ 7.03	\$ 6.99	\$ 7.13	\$ 7.04
Income (loss) from investment operations:					
Net investment income <sup>a</sup>	.37	.35	.33	.29	.29
Net realized and unrealized gain (loss)	(1.48)	(.06)	(.01)	(.10)	.08
Total from investment operations	(1.11)	.29	.32	.19	.37
Less distributions from:					
Net investment income	(.37)	(.34)	(.27)	(.26)	(.28
Net realized gains	—	—	(.01)	(.07)	
Total distributions	(.37)	(.34)	(.28)	(.33)	(.28
Net asset value, end of period	\$ 5.50	\$ 6.98	\$ 7.03	\$ 6.99	\$ 7.13
Total Return (%)	(16.77)	4.18	4.72 <sup>b</sup>	2.60	5.38
Ratios to Average Net Assets and Supplemental Data					
Net assets, end of period (\$ millions)	155	229	218	209	177
Ratio of expenses before expense reductions (%)	.59	.61	.66	.68	.60
Ratio of expenses after expense reductions (%)	.59	.61	.62	.68	.60
Ratio of net investment income (%)	5.76	5.03	4.82	4.11	4.18
Portfolio turnover rate (%)	196	185	186	197	245

а

Based on average shares outstanding during the period. Total return would have been lower had certain expenses not been reduced. b

# **Performance Summary**

### **DWS Growth & Income VIP**

All performance shown is historical, assumes reinvestment of all dividend and capital gain distributions, and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so that, when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please contact your participating insurance company for the Portfolio's most recent month-end performance. Performance doesn't reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option. These charges and fees will reduce returns. While all share classes have the same underlying portfolio, their performance will differ.

The total annual portfolio operating expense ratios, gross of any fee waivers or expense reimbursements, as stated in the fee table of the prospectus dated May 1, 2008 are 0.54% and 0.79% for Class A and Class B shares, respectively. Please see the Information About Your Portfolio's Expenses, the Financial Highlights and Notes to the Financial Statements (Note C, Related Parties) sections of this report for gross and net expense related disclosure for the period ended December 31, 2008.

Portfolio returns during all periods shown reflect a fee waiver and/or expense reimbursement. Without this waiver/reimbursement, returns would have been lower.

#### **Risk Considerations**

The Portfolio is subject to stock market risk, meaning stocks in the Portfolio may decline in value for extended periods of time due to the activities and financial prospects of individual companies, or due to general market and economic conditions. Please read this Portfolio's prospectus for specific information regarding its investments and risk profile.

#### DWS Growth & Income VIP – Class A Russell 1000 <sup>®</sup> Index \$20,000 \$15.000 \$10,000 \$8,963 \$7,431 \$5.000 \$0 'd9 'do '01 102 '03 'd4 05 106 ′d7 ′ດ່ຂ 'q'a Yearly periods ended December 31

#### Growth of an Assumed \$10,000 Investment

The Russell 1000<sup>®</sup> Index is an unmanaged index that measures the performance of the 1,000 largest companies in the Russell 3000 Index, which represents approximately 92% of the total market capitalization of the Russell 3000 Index.

Index returns assume the reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

The growth of \$10,000 is cumulative.

# **Information About Your Portfolio's Expenses**

### **DWS Growth & Income VIP**

As an investor of the Portfolio, you incur two types of costs: ongoing expenses and transaction costs. Ongoing expenses include management fees, distribution and service (12b-1) fees and other Portfolio expenses. Examples of transaction costs include contract charges, redemption fees and account maintenance fees, which are not shown in this section. The following tables are intended to help you understand your ongoing expenses (in dollars) of investing in the Portfolio and to help you compare these expenses with the ongoing expenses of investing in other mutual funds. In the most recent six-month period, the Portfolio limited these expenses; had it not done so, expenses would have been higher. The example in the table is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire period (July 1, 2008 to December 31, 2008).

The tables illustrate your Portfolio's expenses in two ways:

 Actual Portfolio Return. This helps you estimate the actual dollar amount of ongoing expenses (but not transaction costs) paid on a \$1,000 investment in the Portfolio using the Portfolio's actual return during the period. To estimate the expenses you paid over the period, simply divide your account value by 1,000 (for example, an 8,600 account value divided by 1,000 = 8.6), then multiply the result by the number in the "Expenses Paid per 1,000" line under the share class you hold.

Hypothetical 5% Portfolio Return. This helps you to compare your Portfolio's ongoing expenses (but not transaction costs) with those of other mutual funds using the Portfolio's actual expense ratio and a hypothetical rate of return of 5% per year before expenses. Examples using a 5% hypothetical Portfolio return may be found in the shareholder reports of other mutual funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in these tables are meant to highlight your ongoing expenses only and do not reflect any transaction costs. The "Expenses Paid per \$1,000" line of the tables is useful in comparing ongoing expenses only and will not help you determine the relative total expense of owning different funds. If these transaction costs had been included, your costs would have been higher.

### Expenses and Value of a \$1,000 Investment for the six months ended December 31, 2008

Actual Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$ 691.90	\$ 693.80
Expenses Paid per \$1,000*	\$ 2.30	\$ 2.90
Hypothetical 5% Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$1,022.42	\$1,021.72

\* Expenses are equal to the Portfolio's annualized expense ratio for each share class, multiplied by the average account value over the period, multiplied by the number of days in the most recent six-month period, then divided by 366.

Annualized Expense Ratios	Class A	Class B	
DWS Variable Series I — DWS Growth & Income VIP	.54%	.68%	

For more information, please refer to the Portfolio's prospectus.

These tables do not reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option.

# **Management Summary**

### **DWS Growth & Income VIP**

The year just ended was the worst in many decades for the US equity markets. Essentially all equity indices posted negative returns for this period, as markets reflected economic problems including a housing slump, rising unemployment, a crisis of confidence and an extreme credit crunch. The Russell 3000<sup>®</sup> Index, which is generally regarded as a good indicator of the broad stock market, had a negative return of –37.31% for the 12 months ended December 31, 2008. With a return of –38.31% during the period ended December 31, 2008 (Class A shares, unadjusted for contract charges), the Portfolio's return was in line with that of the Russell 1000<sup>®</sup> Index, which posted a return of –37.60%.

Contributors to the Portfolio's relative performance were underweights and stock selection in the financials and consumer discretionary sectors.<sup>1</sup> In the financials sector, the Portfolio's performance benefited from not owning many of the worst-performing stocks. In the consumer discretionary sector, performance benefited from overweight positions in The DIRECTV Group, Inc., AutoZone, Inc. and McDonald's Corp.

A detractor from the Portfolio's relative performance was stock selection in the energy and materials sectors. In the energy sector, performance was hurt by an underweight position in ExxonMobil Corp., which was down less than the sector, and by overweights in coal producers Walter Industries, Inc. and Massey Energy Co. In the materials sector, overweight positions in Terra Industries Inc. and CF Industries Holdings Inc., both of which produce fertilizer and other agricultural products, detracted from performance.

Robert Wang James B. Francis, CFA Julie Abbett *Portfolio Managers* 

The Russell 3000 Index is an unmanaged index that measures the performance of the 3,000 largest US companies based on total market capitalization, which represents approximately 98% of the investable US equity market.

The Russell 1000 Index is an unmanaged index that measures the performance of the 1,000 largest companies in the Russell 3000 Index, which represents approximately 92% of the total market capitalization of the Russell 3000 Index.

Index returns assume the reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

<sup>1</sup> "Overweight" means the portfolio holds a higher weighting in a given sector or security than the benchmark. "Underweight" means the portfolio holds a lower weighting.

Portfolio management market commentary is as of December 31, 2008, and may not come to pass. This information is subject to change at any time based on market and other conditions. Past performance does not guarantee future results. Current and future portfolio holdings are subject to risk.

For more complete details about the Portfolio's investment portfolio, see page 21. A complete list of portfolio holdings of the Portfolio is posted as of the month end on www.dws-investments.com on or about the 15th day of the following month. More frequent posting of portfolio holdings information may be made from time to time on www.dws-investments.com.

Following the Portfolio's fiscal first and third quarter-end, a complete portfolio holdings listing is filed with the SEC on Form N-Q. The form will be available on the SEC's Web site at www.sec.gov, and it also may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. Information on the operation of the SEC's Public Reference Room may be obtained by calling (800) SEC-0330.

\* Non-income producing security.

\*\* Annualized yield at time of purchase; not a coupon rate.

The cost for federal income tax purposes was \$130,913,694. At December 31, 2008, net unrealized depreciation for all securities based on tax cost was \$32,890,694. This consisted of aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost of \$2,992,031 and aggregate gross unrealized depreciation for all securities in which there was an excess of over value of \$35,882,725.

(a) All or a portion of these securities were on loan (see Notes to Financial Statements). The value of all securities loaned at December 31, 2008 amounted to \$1,842,633, which is 1.9% of net assets.

(b) At December 31, 2008, this security has been pledged, in whole or in part, to cover initial margin requirements for open futures contracts.

(c) Affiliated fund managed by Deutsche Investment Management Americas Inc. The rate shown is the annualized seven-day yield at period end.

(d) Represents collateral held in connection with securities lending. Income earned by the Portfolio is net of borrower rebates.

ADR: American Depositary Receipt

REIT: Real Estate Investment Trust

At December 31, 2008, open futures contracts purchased were as follows:

	Expiration		Aggregated Face		Unrealized
Futures	Date	Contracts	Value (\$)	Value (\$)	Appreciation (\$)
S&P 500 Index	3/20/2009	57	2,523,416	2,565,285	41,869

#### Fair Value Measurements

The following is a summary of the inputs used as of December 31, 2008 in valuing the Portfolio's investments. For information on the Portfolio's policy regarding the valuation of investments and of the valuation inputs, and the aggregate levels used in the table below, please refer to the Security Valuation section of Note A in the accompanying Notes to the Financial Statements.

Valuation Inputs	Investments in Securities	Other Financial Instruments
Level 1	\$ 95,344,997	\$ 41,869
Level 2	2,678,003	—
Level 3	_	—
Total	\$ 98,023,000	\$ 41,869

<sup>††</sup> Other financial instruments are derivative instruments not reflected in the Investment Portfolio, such as futures contracts, which are valued at the unrealized appreciation (depreciation) on the instrument.

Excluding this non-recurring income, total return would have been 0.06% lower.

# **Performance Summary**

### **DWS Capital Growth VIP**

All performance shown is historical, assumes reinvestment of all dividend and capital gain distributions, and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so that, when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please contact your participating insurance company for the Portfolio's most recent month-end performance. Performance doesn't reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option. These charges and fees will reduce returns. While all share classes have the same underlying portfolio, their performance will differ.

The total annual portfolio operating expense ratios, gross of any fee waivers or expense reimbursements, as stated in the fee table of the prospectus dated May 1, 2008 are 0.50% and 0.88% for Class A and Class B shares, respectively. Please see the Information About Your Portfolio's Expenses, the Financial Highlights and Notes to the Financial Statements (Note C, Related Parties) sections of this report for gross and net expense related disclosure for the period ended December 31, 2008.

Portfolio returns during all periods shown reflect a fee waiver and/or expense reimbursement. Without this waiver/reimbursement, returns would have been lower.

#### **Risk Considerations**

The Portfolio is subject to stock market risk, meaning stocks in the Portfolio may decline in value for extended periods of time due to the activities and financial prospects of individual companies, or due to general market and economic conditions. Please read this Portfolio's prospectus for specific information regarding its investments and risk profile.

#### Growth of an Assumed \$10,000 Investment

The Russell 1000<sup>®</sup> Growth Index is an unmanaged, capitalization- weighted index containing those securities in the Russell 1000 Index with higher price-to-book ratios and higher forecasted growth values. The Standard & Poor's 500<sup>®</sup> (S&P 500) Index is an unmanaged capitalization-weighted index of 500 stocks. The index is designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.

Index returns assume the reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

#### **Comparative Results**

The growth of \$10,000 is cumulative.

# **Information About Your Portfolio's Expenses**

### **DWS Capital Growth VIP**

As an investor of the Portfolio, you incur two types of costs: ongoing expenses and transaction costs. Ongoing expenses include management fees, distribution and service (12b-1) fees and other Portfolio expenses. Examples of transaction costs include contract charges, redemption fees and account maintenance fees, which are not shown in this section. The following tables are intended to help you understand your ongoing expenses (in dollars) of investing in the Portfolio and to help you compare these expenses with the ongoing expenses of investing in other mutual funds. In the most recent six-month period, the Portfolio limited these expenses; had it not done so, expenses would have been higher. The example in the table is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire period (July 1, 2008 to December 31, 2008).

The tables illustrate your Portfolio's expenses in two ways:

 Actual Portfolio Return. This helps you estimate the actual dollar amount of ongoing expenses (but not transaction costs) paid on a \$1,000 investment in the Portfolio using the Portfolio's actual return during the period. To estimate the expenses you paid over the period, simply divide your account value by 1,000 (for example, an 8,600 account value divided by 1,000 = 8.6), then multiply the result by the number in the "Expenses Paid per 1,000" line under the share class you hold.

Hypothetical 5% Portfolio Return. This helps you to compare your Portfolio's ongoing expenses (but not transaction costs) with those of other mutual funds using the Portfolio's actual expense ratio and a hypothetical rate of return of 5% per year before expenses. Examples using a 5% hypothetical Portfolio return may be found in the shareholder reports of other mutual funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in these tables are meant to highlight your ongoing expenses only and do not reflect any transaction costs. The "Expenses Paid per \$1,000" line of the tables is useful in comparing ongoing expenses only and will not help you determine the relative total expense of owning different funds. If these transaction costs had been included, your costs would have been higher.

### Expenses and Value of a \$1,000 Investment for the six months ended December 31, 2008

Actual Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$ 712.40	\$ 711.10
Expenses Paid per \$1,000*	\$ 2.11	\$ 3.53
Hypothetical 5% Portfolio Return	Class A	Class B
	\$1,000.00	\$1,000.00
Beginning Account Value 7/1/08 Ending Account Value 12/31/08		\$1,000.00 \$1,021.01

\* Expenses are equal to the Portfolio's annualized expense ratio for each share class, multiplied by the average account value over the period, multiplied by the number of days in the most recent six-month period, then divided by 366.

Annualized Expense Ratios	Class A	Class B	
DWS Variable Series I — DWS Capital Growth VIP	.49%	.82%	

For more information, please refer to the Portfolio's prospectus.

These tables do not reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option.

# **Management Summary**

### **DWS Capital Growth VIP**

The year just ended was the worst in many decades for the US equity markets. Essentially all equity indices posted negative returns for this period, as markets reflected economic problems including a housing slump, rising unemployment, a crisis of confidence and an extreme credit crunch. The Russell 3000<sup>®</sup> Index, which is generally regarded as a good indicator of the broad stock market, had a negative return of –37.31% for the 12 months ended December 31, 2008. Value stocks, as measured by the Russell 1000<sup>®</sup> Value Index, performed somewhat better than growth stocks, as measured by the Russell 1000<sup>®</sup> Growth Index over the same period. With a return of –32.98% during the 12-month period ended December 31, 2008 (Class A shares, unadjusted for contract charges), the Portfolio performed better than its benchmark, the Russell 1000 Growth Index, which had a negative return of –38.44%.

The greatest contributor to performance was an overweight and stock selection in the health care sector.<sup>1</sup> Holdings that performed especially well were biopharmaceutical companies Gilead Sciences, Inc. and Genentech, Inc., which soared on news that Roche Holding Ltd. had offered to acquire the 44% of Genentech it does not already own. Also, Johnson & Johnson performed much better than the market, although the stock was down modestly.

The major detractor from performance was stock selection in the consumer discretionary sector. Positions in this sector that hurt performance were GameStop Corp., Harley-Davidson, Inc.\* and Dick's Sporting Goods.\* However, an overweight position in McDonald's Corp., also in the consumer discretionary sector, was one of the top contributors to performance.

Owen Fitzpatrick, CFA (as of February 15, 2009) and Richard Shepley *Co-Lead Portfolio Managers* 

Brendan O'Neill, CFA Portfolio Manager

The Russell 3000 Index is an unmanaged index that measures the performance of the 3,000 largest US companies based on total market capitalization, which represents approximately 98% of the investable US equity market.

The Russell 1000 Value Index measures the performance of those Russell 1000 companies with lower price-to-book ratios and lower forecasted growth values.

The Russell 1000 Growth Index is an unmanaged, capitalization-weighted index containing those securities in the Russell 1000 Index with higher price-to-book ratios and higher forecasted growth values.

Index returns assume the reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly in an index.

- <sup>1</sup> "Overweight" means the portfolio holds a higher weighting in a given sector or security than the benchmark. "Underweight" means the portfolio holds a lower weighting.
- \* Not held in the Portfolio as of December 31, 2008.

Portfolio management market commentary is as of December 31, 2008, and may not come to pass. This information is subject to change at any time based on market and other conditions. Past performance does not guarantee future results. Current and future portfolio holdings are subject to risk.

\* Non-income producing security.

<sup>†</sup> The cost for federal income tax purposes was \$731,887,395. At December 31, 2008, net unrealized appreciation for all securities based on tax cost was \$10,574,440. This consisted of aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost of \$110,906,577 and aggregate gross unrealized depreciation for all securities in which there was an excess of tax cost over value of \$100,332,137.

(a) All or a portion of these securities were on loan (see Notes to Financial Statements). The value of all securities loaned at December 31, 2008 amounted to \$135,983,737, which is 22.5% of net assets.

(b) Affiliated fund managed by Deutsche Investment Management Americas Inc. The rate shown is the annualized seven-day yield at period end.

(c) Represents collateral held in connection with securities lending. Income earned by the Portfolio is net of borrower rebates.

#### Fair Value Measurements

The following is a summary of the inputs used as of December 31, 2008 in valuing the Portfolio's investments. For information on the Portfolio's policy regarding the valuation of investments and of the valuation inputs, and the aggregate levels used in the table below, please refer to the Security Valuation section of Note A in the accompanying Notes to the Financial Statements.

# **Financial Highlights**

### **Class A**

Years Ended December 31,	2008	2007	2006	2005	2004
Selected Per Share Data					
Net asset value, beginning of period	\$20.41	\$18.24	\$16.90	\$15.67	\$14.59
Income (loss) from investment operations:					
Net investment income (loss) <sup>a</sup>	.16	.17 <sup>d</sup>	.13 <sup>c</sup>	.10	.14
Net realized and unrealized gain (loss)	(6.83)	2.12	1.31	1.29	1.02
Total from investment operations	(6.67)	2.29	1.44	1.39	1.16
Less distributions from:					
Net investment income	(.19)	(.12)	(.10)	(.16)	(.08)
Net asset value, end of period	\$13.55	\$20.41	\$18.24	\$16.90	\$15.67
Total Return (%)	(32.98) <sup>b</sup>	12.59 <sup>b</sup>	8.53 <sup>b,c</sup>	8.96 <sup>b</sup>	7.99
Ratios to Average Net Assets and Supplemental Data					
Net assets, end of period (\$ millions)	594	1,058	1,131	1,031	698

	004	1,000	1,101	1,001	000
Ratio of expenses before expense reductions (%)	.50	.53	.52	.50	.50
Ratio of expenses after expense reductions (%)	.49	.52	.49	.49	.50
Ratio of net investment income (loss) (%)	.89	.86 <sup>d</sup>	.73 <sup>c</sup>	.61	.98
Portfolio turnover rate (%)	21	30	16	17	15

<sup>a</sup> Based on average shares outstanding during the period.

<sup>b</sup> Total return would have been lower had certain expenses not been reduced.

<sup>c</sup> Includes non-recurring income from the Advisor recorded as a result of an administrative proceeding regarding disclosure of brokerage allocation practices in connection with sales of DWS Funds. The non-recurring income resulted in an increase in net investment income of \$0.007 per share and an increase in the ratio of net investment income of 0.04%. Excluding this non-recurring income, total return would have been 0.03% lower.

<sup>d</sup> Net investment income per share and ratio of net investment income include non-recurring dividend income amounting to \$0.03 per share and 0.17% of average daily net assets, respectively.

### **Class B**

Years Ended December 31,	2008	2007	2006	2005	2004
Selected Per Share Data					
Net asset value, beginning of period	\$20.31	\$18.15	\$16.81	\$15.59	\$14.52
Income (loss) from investment operations:					
Net investment income (loss) <sup>a</sup>	.10	.09 <sup>d</sup>	.06 <sup>c</sup>	.04	.09
Net realized and unrealized gain (loss)	(6.81)	2.12	1.31	1.28	1.01
Total from investment operations	(6.71)	2.21	1.37	1.32	1.10
Less distributions from:					
Net investment income	(.11)	(.05)	(.03)	(.10)	(.03)
Net asset value, end of period	\$13.49	\$20.31	\$18.15	\$16.81	\$15.59
Total Return (%)	(33.20) <sup>b</sup>	12.18 <sup>b</sup>	8.17 <sup>b,c</sup>	8.51 <sup>b</sup>	7.56
Ratios to Average Net Assets and Supplemental Data					
Net assets, end of period (\$ millions)	10	19	107	73	23
Ratio of expenses before expense reductions (%)	.85	.94	.91	.89	.88
Ratio of expenses after expense reductions (%)	.82	.90	.86	.86	.88
Ratio of net investment income (loss) (%)	.56	.48 <sup>d</sup>	.36 <sup>c</sup>	.24	.60
Portfolio turnover rate (%)	21	30	16	17	15

<sup>a</sup> Based on average shares outstanding during the period.

<sup>b</sup> Total return would have been lower had certain expenses not been reduced.

<sup>c</sup> Includes non-recurring income from the Advisor recorded as a result of an administrative proceeding regarding disclosure of brokerage allocation practices in connection with sales of DWS Funds. The non-recurring income resulted in an increase in net investment income of \$0.007 per share and an increase in the ratio of net investment income of 0.04%. Excluding this non-recurring income, total return would have been 0.03% lower.

<sup>d</sup> Net investment income per share and ratio of net investment income include non-recurring dividend income amounting to \$0.03 per share and 0.17% of average daily net assets, respectively.

## **Performance Summary**

## **DWS Global Opportunities VIP**

All performance shown is historical, assumes reinvestment of all dividend and capital gain distributions, and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so that, when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please contact your participating insurance company for the Portfolio's most recent month-end performance. Performance doesn't reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option. These charges and fees will reduce returns. While all share classes have the same underlying portfolio, their performance will differ.

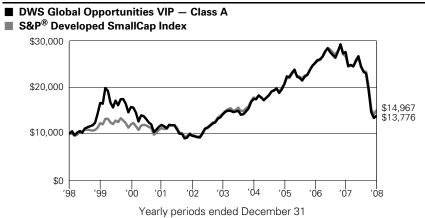

The total annual portfolio operating expense ratios, gross of any fee waivers or expense reimbursements, as stated in the fee table of the prospectus dated May 1, 2008 are 1.10% and 1.46% for Class A and Class B shares, respectively. Please see the Information About Your Portfolio's Expenses, the Financial Highlights and Notes to the Financial Statements (Note C, Related Parties) sections of this report for gross and net expense related disclosure for the period ended December 31, 2008.

Portfolio returns during all periods shown reflect a fee waiver and/or reimbursement. Without this waiver/reimbursement, returns would have been lower.

### **Risk Considerations**

This Portfolio is subject to stock market risk. Investing in foreign securities presents certain risks, such as currency fluctuations, political and economic changes and market risks. Additionally, stocks of small-sized companies involve greater risk as they often have limited product lines, markets, or financial resources and may be sensitive to erratic and abrupt market movements more so than securities of larger, more-established companies. All of these factors may result in greater share price volatility. Please read this Portfolio's prospectus for specific details regarding its investments and risk profile.

### Growth of an Assumed \$10,000 Investment

The S&P<sup>®</sup> Developed SmallCap Index (formerly the S&P/Citigroup Extended Market Index-World), is an unmanaged index of small-capitalization stocks within 26 countries around the globe.

Index returns assume the reinvestment of dividends net of withholding tax and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

### **Comparative Results**

DWS Global Opportunities VIP		1-Year	3-Year	5-Year	10-Year
Class A	Growth of \$10,000	\$5,004	\$6,678	\$9,735	\$13,776
	Average annual total return	-49.96%	-12.59%	54%	3.26%
S&P Developed SmallCap Index	Growth of \$10,000	\$5,625	\$7,301	\$10,410	\$14,967
	Average annual total return	-43.75%	-9.96%	.81%	4.12%
DWS Global Opportunities VIP		1-Year	3-Year	5-Year	10-Year
Class B	Growth of \$10,000	\$4,984	\$6,616	\$9,617	\$13,444
	Average annual total return	-50.16%	-12.86%	78%	3.00%

		-43.75%	-9.96%	.81%	4.12%

The growth of \$10,000 is cumulative.

# **Information About Your Portfolio's Expenses**

## **DWS Global Opportunities VIP**

As an investor of the Portfolio, you incur two types of costs: ongoing expenses and transaction costs. Ongoing expenses include management fees, distribution and service (12b-1) fees and other Portfolio expenses. Examples of transaction costs include contract charges, redemption fees and account maintenance fees, which are not shown in this section. The following tables are intended to help you understand your ongoing expenses (in dollars) of investing in the Portfolio and to help you compare these expenses with the ongoing expenses of investing in other mutual funds. In the most recent six-month period, the Portfolio limited these expenses; had it not done so, expenses would have been higher. The example in the table is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire period (July 1, 2008 to December 31, 2008).

The tables illustrate your Portfolio's expenses in two ways:

 Actual Portfolio Return. This helps you estimate the actual dollar amount of ongoing expenses (but not transaction costs) paid on a \$1,000 investment in the Portfolio using the Portfolio's actual return during the period. To estimate the expenses you paid over the period, simply divide your account value by 1,000 (for example, an 8,600 account value divided by 1,000 = 8.6), then multiply the result by the number in the "Expenses Paid per 1,000" line under the share class you hold.

Hypothetical 5% Portfolio Return. This helps you to compare your Portfolio's ongoing expenses (but not transaction costs) with those of other mutual funds using the Portfolio's actual expense ratio and a hypothetical rate of return of 5% per year before expenses. Examples using a 5% hypothetical Portfolio return may be found in the shareholder reports of other mutual funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in these tables are meant to highlight your ongoing expenses only and do not reflect any transaction costs. The "Expenses Paid per \$1,000" line of the tables is useful in comparing ongoing expenses only and will not help you determine the relative total expense of owning different funds. If these transaction costs had been included, your costs would have been higher.

### Expenses and Value of a \$1,000 Investment for the six months ended December 31, 2008

Actual Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$ 563.30	\$ 561.70
Expenses Paid per \$1,000*	\$ 3.85	\$ 5.10
Hypothetical 5% Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Beginning Account Value 7/1/08 Ending Account Value 12/31/08	\$1,000.00 \$1,020.21	\$1,000.00 \$1,018.60

\* Expenses are equal to the Portfolio's annualized expense ratio for each share class, multiplied by the average account value over the period, multiplied by the number of days in the most recent six-month period, then divided by 366.

Annualized Expense Ratios	Class A	Class B	
DWS Variable Series I — DWS Global Opportunities VIP	.98%	1.30%	

For more information, please refer to the Portfolio's prospectus.

These tables do not reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option.

# **Management Summary**

## **DWS Global Opportunities VIP**

Amid the extremely negative investment environment of the 12-month period ended December 31, 2008, DWS Global Opportunities VIP Class A shares (unadjusted for contract charges) declined –49.96% and lagged the –43.75% return of the S&P<sup>®</sup> Developed SmallCap Index (formerly the S&P/Citigroup Extended Market Index-World).

We are disappointed to report that stock selection was the primary cause of the Portfolio's underperformance. Our emphasis on using fundamental research to find high-quality growth companies was not rewarded during the past year, reflecting the fact that investor fear caused higher-quality companies to decline in tandem with other, less attractive companies. In these unusual market conditions, our focus on fundamentals did not translate into outperformance.

Stock selections in the financial, information technology and consumer staples sectors were notable sources of underperformance in 2008. On the plus side, we generated the best relative performance in the health care and consumer discretionary sectors. The top individual contributors were Thoratec Corp. and Fresenius Medical Care AG & Co., while the leading detractors were SunOpta, Inc., Piraeus Bank S.A.<sup>\*</sup> and Anglo Irish Bank Corp. PLC.

While the past year has been a difficult time to be invested in small-cap stocks, the extreme market volatility has provided an opportunity to establish long-term positions in fast-growing companies at very attractive valuation levels. Overall, we believe the portfolio is defensively positioned due to our preference for the highest-quality fundamentally sound growth companies. We believe this is the most effective way to approach a market characterized by both high risks and increasingly compelling opportunities.

Joseph Axtell, CFA Jeffrey Saeger, CFA *Portfolio Managers* 

The S&P Developed SmallCap Index (formerly the S&P/Citigroup Extended Market Index-World), is an unmanaged index of small-capitalization stocks within 26 countries around the globe.

Index returns assume the reinvestment of dividends net of withholding tax and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

\* Non-income producing security.

<sup>†</sup> The cost for federal income tax purposes was \$158,829,287. At December 31, 2008, net unrealized depreciation for all securities based on tax cost was \$20,090,640. This consisted of aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost of \$24,728,164 and aggregate gross unrealized depreciation for all securities in which there was an excess of over value of \$44,818,804.

(a) All or a portion of these securities were on loan (see Notes to Financial Statements). The value of all securities loaned at December 31, 2008 amounted to \$16,526,028, which is 13.5% of net assets.

(b) Security is listed in country of domicile. Significant business activities of the company are in Norway.

(c) Security is listed in country of domicile. Significant business activities of the company are in China.

(d) Affiliated fund managed by Deutsche Investment Management Americas Inc. The rate shown is the annualized seven-day yield at period end.

(e) Represents collateral held in connection with securities lending. Income earned by the Portfolio is net of borrower rebates.

144A: Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers.

ADR: American Depositary Receipt

GDR: Global Depositary Receipt

#### Fair Value Measurements

The following is a summary of the inputs used as of December 31, 2008 in valuing the Portfolio's investments. For information on the Portfolio's policy regarding the valuation of investments and of the valuation inputs, and the aggregate levels used in the table below, please refer to the Security Valuation section of Note A in the accompanying Notes to the Financial Statements.

# **Financial Highlights**

Class A Years Ended December 31,	2008	2007	2006	2005	2004
	2000	2007	2000	2000	2004
Selected Per Share Data					
Net asset value, beginning of period	\$18.28	\$18.15	\$15.00	\$12.77	\$10.38
Income (loss) from investment operations:					
Net investment income (loss) <sup>a</sup>	.20 <sup>e</sup>	.08 <sup>d</sup>	.03 <sup>c</sup>	.04	.01
Net realized and unrealized gain (loss)	(8.18)	1.61	3.28	2.27	2.41
Total from investment operations	(7.98)	1.69	3.31	2.31	2.42
Less distributions from:					
Net investment income	(.04)	(.23)	(.16)	(.08)	(.03)
Net realized gains	(2.47)	(1.33)	_		
Total distributions	(2.51)	(1.56)	(.16)	(.08)	(.03)
Net asset value, end of period	\$ 7.79	\$18.28	\$18.15	\$15.00	\$12.77
Total Return (%)	(49.96) <sup>b</sup>	9.33 <sup>b</sup>	22.08 <sup>c</sup>	18.19	23.35
Ratios to Average Net Assets and Supplemental Data					
Net assets, end of period (\$ millions)	117	310	331	285	232
Ratio of expenses before expense reductions (%)	1.11	1.14	1.12	1.17	1.18
Ratio of expenses after expense reductions (%)	.99	1.12	1.12	1.17	1.18
Ratio of net investment income (loss) (%)	1.53 <sup>e</sup>	.45 <sup>d</sup>	.16 <sup>c</sup>	.32	.09
Portfolio turnover rate (%)	21	19	28	30	24

<sup>a</sup> Based on average shares outstanding during the period.

<sup>b</sup> Total return would have been lower had certain expenses not been reduced.

<sup>c</sup> Includes non-recurring income from the Advisor recorded as a result of an administrative proceeding regarding disclosure of brokerage allocation practices in connection with sales of DWS Funds. The non-recurring income resulted in an increase in net investment income of \$0.002 per share and an increase in the ratio of net investment income of 0.01%. Excluding this non-recurring income, total return would have been 0.01% lower.

<sup>d</sup> Net investment income per share and the ratio of net investment income include non-recurring dividend income amounting to \$0.02 per share and 0.09% of average daily net assets, respectively.

e Net investment income per share and the ratio of net investment income include non-recurring dividend income amounting to \$0.05 per share and 0.37% of average daily net assets, respectively.

Class B					
Years Ended December 31,	2008	2007	2006	2005	2004
Selected Per Share Data					
Net asset value, beginning of period	\$18.03	\$17.93	\$14.84	\$12.62	\$10.25
Income (loss) from investment operations:					
Net investment income (loss) <sup>a</sup>	.16 <sup>f</sup>	.01 <sup>e</sup>	(.00) <sup>b,d</sup>	6 .03	(.01)
Net realized and unrealized gain (loss)	(8.07)	1.61	3.24	2.24	2.38
Total from investment operations	(7.91)	1.62	3.24	2.27	2.37
Less distributions from:					
Net investment income	—	(.19)	(.15)	(.05)	—
Net realized gains	(2.47)	(1.33)	_		_
Total distributions	(2.47)	(1.52)	(.15)	(.05)	_
Net asset value, end of period	\$ 7.65	\$18.03	\$17.93	\$14.84	\$12.62
Total Return (%)	(50.16) <sup>c</sup>	8.92 <sup>c</sup>	21.88 <sup>c,d</sup>	18.06 <sup>c</sup>	23.12 <sup>c</sup>
Ratios to Average Net Assets and Supplemental Data					
Net assets, end of period (\$ millions)	5	12	37	33	24
Ratio of expenses before expense reductions (%)	1.42	1.53	1.51	1.54	1.52
Ratio of expenses after expense reductions (%)	1.30	1.50	1.31	1.24	1.39
Ratio of net investment income (loss) (%)	1.21 <sup>f</sup>	.07e	(.03) <sup>d</sup>	.25	(.12)
Portfolio turnover rate (%)	21	19	28	30	24

<sup>a</sup> Based on average shares outstanding during the period.

b Amount is less than \$.005.

<sup>c</sup> Total return would have been lower had certain expenses not been reduced.

<sup>d</sup> Includes non-recurring income from the Advisor recorded as a result of an administrative proceeding regarding disclosure of brokerage allocation practices in connection with sales of DWS Funds. The non-recurring income resulted in an increase in net investment income of \$0.002 per share and an increase in the ratio of net investment income of 0.01%. Excluding this non-recurring income, total return would have been 0.01% lower.

• Net investment income per share and the ratio of net investment income include non-recurring dividend income amounting to \$0.02 per share and 0.09% of average daily net assets, respectively.

<sup>f</sup> Net investment income per share and the ratio of net investment income include non-recurring dividend income amounting to \$0.05 per share and 0.37% of average daily net assets, respectively.

# **Performance Summary**

### **DWS International VIP**

All performance shown is historical, assumes reinvestment of all dividend and capital gain distributions, and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so that, when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please contact your participating insurance company for the Portfolio's most recent month-end performance. Performance doesn't reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option. These charges and fees will reduce returns. While all share classes have the same underlying portfolio, their performance will differ.

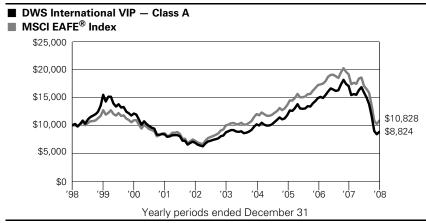

The total annual portfolio operating expense ratios, gross of any fee waivers or expense reimbursements, as stated in the fee table of the prospectus dated May 1, 2008 are 0.94% and 1.19% for Class A and Class B shares, respectively. Please see the Information About Your Portfolio's Expenses, the Financial Highlights and Notes to the Financial Statements (Note C, Related Parties) sections of this report for gross and net expense related disclosure for the period ended December 31, 2008.

Portfolio returns during all periods shown reflect a fee waiver and/or reimbursement. Without this waiver/reimbursement, returns would have been lower.

#### **Risk Considerations**

This Portfolio is subject to stock market risk. Investing in foreign securities presents certain risks, such as currency fluctuation, political and economic changes and market risks. This may result in greater share price volatility. Derivatives may be more volatile and less liquid than traditional securities, and the Portfolio could suffer losses on an underlying Portfolio's derivative position. Investing in securities of emerging markets presents certain risks, such as currency fluctuation, political and economic changes and market risks. Please read this Portfolio's prospectus for specific details regarding its investments and risk profile.

#### Growth of an Assumed \$10,000 Investment

The Morgan Stanley Capital International (MSCI) Europe, Australasia and Far East (EAFE<sup>®</sup>) Index is an unmanaged index that tracks international stock performance in the 21 developed markets in Europe, Australasia and the Far East. The index is calculated using closing local market prices and translates into US dollars using the London close foreign exchange rates.

Index returns assume the reinvestment of dividends net of withholding tax and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

### **Comparative Results**

DWS International VIP		1-Year	3-Year	5-Year	10-Year
Class A	Growth of \$10,000	\$5,179	\$7,472	\$10,115	\$8,824
	Average annual total return	-48.21%	-9.26%	.23%	-1.24%
MSCI EAFE <sup>®</sup> Index	Growth of \$10,000	\$5,662	\$7,953	\$10,857	\$10,828
	Average annual total return	-43.38%	-7.35%	1.66%	.80%
DWS International VIP		1-Year	3-Year	5-Year	10-Year
Class B	Growth of \$10,000	\$5,175	\$7,417	\$9,976	\$8,623
	Average annual total return	-48.25%	-9.48%	05%	-1.47%
MSCI EAFE <sup>®</sup> Index	Growth of \$10,000	\$5,662	\$7,953	\$10,857	\$10,828

The growth of \$10,000 is cumulative.

# **Information About Your Portfolio's Expenses**

## **DWS International VIP**

As an investor of the Portfolio, you incur two types of costs: ongoing expenses and transaction costs. Ongoing expenses include management fees, distribution and service (12b-1) fees and other Portfolio expenses. Examples of transaction costs include contract charges, redemption fees and account maintenance fees, which are not shown in this section. The following tables are intended to help you understand your ongoing expenses (in dollars) of investing in the Portfolio and to help you compare these expenses with the ongoing expenses of investing in other mutual funds. In the most recent six-month period, the Portfolio limited these expenses; had it not done so, expenses would have been higher. The example in the table is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire period (July 1, 2008 to December 31, 2008).

The tables illustrate your Portfolio's expenses in two ways:

 Actual Portfolio Return. This helps you estimate the actual dollar amount of ongoing expenses (but not transaction costs) paid on a \$1,000 investment in the Portfolio using the Portfolio's actual return during the period. To estimate the expenses you paid over the period, simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the "Expenses Paid per \$1,000" line under the share class you hold.

Hypothetical 5% Portfolio Return. This helps you to compare your Portfolio's ongoing expenses (but not transaction costs) with those of other mutual funds using the Portfolio's actual expense ratio and a hypothetical rate of return of 5% per year before expenses. Examples using a 5% hypothetical Portfolio return may be found in the shareholder reports of other mutual funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in these tables are meant to highlight your ongoing expenses only and do not reflect any transaction costs. The "Expenses Paid per \$1,000" line of the tables is useful in comparing ongoing expenses only and will not help you determine the relative total expense of owning different funds. If these transaction costs had been included, your costs would have been higher.

### Expenses and Value of a \$1,000 Investment for the six months ended December 31, 2008

Actual Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$ 556.30	\$ 557.20
Expenses Paid per \$1,000*	\$ 3.79	\$ 4.78
Hypothetical 5% Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Beginning Account Value 7/1/08 Ending Account Value 12/31/08	\$1,000.00	\$1,000.00 \$1,019.00

\* Expenses are equal to the Portfolio's annualized expense ratio for each share class, multiplied by the average account value over the period, multiplied by the number of days in the most recent six-month period, then divided by 366.

Annualized Expense Ratios	Class A	Class B	
DWS Variable Series I — DWS International VIP	.97%	1.22%	

For more information, please refer to the Portfolio's prospectus.

These tables do not reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option.

# **Management Summary**

### **DWS International VIP**

The MSCI EAFE<sup>®</sup> Index (the Portfolio's benchmark) returned –43.38% during the 12-month period ended December 31, 2008, a year that was characterized by the rapid expansion of the global financial crisis, slowing economic growth and sharply elevated investor risk aversion. During the same period, Class A shares of the Portfolio returned –48.21% (unadjusted for contract charges), underperforming the index. The primary reason for underperformance was the Portfolio's level of risk exposure coming into the autumn downturn. Starting in mid-August, we sought to reduce risk by decreasing the Portfolio's weightings in higher-risk areas such as mid-and small-caps, emerging-market stocks and cyclicals. Unfortunately, we did not make these changes quickly enough to prevent underperformance.

For the full year, the Portfolio's return was helped by an underweight in financials and favorable stock selection in the information technology and health care sectors, but this was offset by weaker stock selection in the consumer staples and consumer discretionary sectors.<sup>1</sup> The leading contributors to performance included iShares MSCI Japan Index Fund, BASF SE and China Mobile Ltd. The most significant detractors were the Russian gas company Gazprom and the brewer Carlsberg AS.

Believing that recovery in the global economy will likely occur slowly, we are maintaining a defensive positioning in the Portfolio. We believe sectors with high cash flows, stable earnings and a low sensitivity to economic trends, such as health care and telecommunications are well positioned in this market. At the same time, the Portfolio is underweight in areas that are more dependent on economic growth, such as industrials, financials and the consumer discretionary sector. Although defensive for now, we are also keeping a close eye on stock-specific opportunities given that dividend yields are attractive and price-to-book values are at their lowest level of the past 10–15 years.

### Joseph Axtell, CFA Portfolio Manager

The Morgan Stanley Capital International (MSCI) Europe, Australasia and Far East (EAFE<sup>®</sup>) Index is an unmanaged index that tracks international stock performance in the 21 developed markets in Europe, Australasia and the Far East. The index is calculated using closing local market prices and translates into US dollars using the London close foreign exchange rates. Index returns assume the reinvestment of dividends net of withholding tax and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

<sup>1</sup> "Overweight" means the portfolio holds a higher weighting in a given sector or security than the benchmark. "Underweight" means the portfolio holds a lower weighting.

Portfolio management market commentary is as of December 31, 2008, and may not come to pass. This information is subject to change at any time based on market and other conditions. Past performance does not guarantee future results. Current and future portfolio holdings are subject to risk.

\* Non-income producing security.

<sup>†</sup> The cost for federal income tax purposes was \$375,669,028. At December 31, 2008, net unrealized depreciation for all securities based on tax cost was \$75,728,578. This consisted of aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost of \$21,641,676 and aggregate gross unrealized depreciation for all securities in which there was an excess of over value of \$97,370,254.

(a) All or a portion of these securities were on loan (see Notes to Financial Statements). The value of all securities loaned at December 31, 2008 amounted to \$3,462,631, which is 1.2% of net assets.

(b) Affiliated fund managed by Deutsche Investment Management Americas Inc. The rate shown is the annualized seven-day yield at period end.

(c) Represents collateral held in connection with securities lending. Income earned by the Portfolio is net of borrower rebates.

ADR: American Depositary Receipt

MSCI: Morgan Stanley Capital International

#### Fair Value Measurements

The following is a summary of the inputs used as of December 31, 2008 in valuing the Portfolio's investments. For information on the Portfolio's policy regarding the valuation of investments and of the valuation inputs, and the aggregate levels used in the table below, please refer to the Security Valuation section of Note A in the accompanying Notes to the Financial Statements.

Valuation Inputs	
Level 1	\$ 28,271,34
Level 2	271,669,10
Level 3	-
Total	\$ 299,940,45

# **Performance Summary**

### **DWS Health Care VIP**

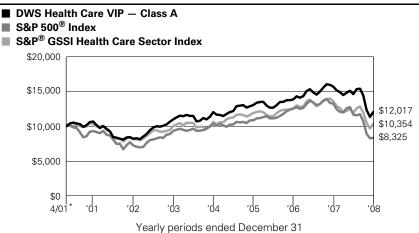

All performance shown is historical, assumes reinvestment of all dividend and capital gain distributions, and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so that, when redeemed, shares may be worth more or less then their original cost. Current performance may be lower or higher than the performance data quoted. Please contact your participating insurance company for the Portfolio's most recent month-end performance. Performance doesn't reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option. These charges and fees will reduce returns. While all share classes have the same underlying portfolio, their performance will differ.

The total annual portfolio operating expense ratios, gross of any fee waivers or expense reimbursements, as stated in the fee table of the prospectus dated May 1, 2008 are 0.90% and 1.28% for Class A and Class B shares, respectively. Please see the Information About Your Portfolio's Expenses, the Financial Highlights and Notes to the Financial Statements (Note C, Related Parties) sections of this report for gross and net expense related disclosure for the period ended December 31, 2008.

#### **Risk Considerations**

This Portfolio is subject to stock market risk. The Portfolio may focus its investments on certain industry sectors, thereby increasing its vulnerability to any single industry or regulatory development. All of these factors may result in greater share price volatility. Please read this Portfolio's prospectus for specific details regarding its investments and risk profile.

### Growth of an Assumed \$10,000 Investment

The Standard & Poor's<sup>®</sup> 500 (S&P 500) Index is an unmanaged, capitalization-weighted index of 500 stocks. The index is designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries. The S&P<sup>®</sup> GSSI Health Care Sector Index is an unmanaged, market capitalization-weighted index of 133 stocks designed to measure the performance of companies in the health care sector.

Index returns assume the reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

### **Comparative Results**

DWS Health Care VIP		1-Year	3-Year	5-Year	Life of Portfolio <sup>*</sup>

<sup>\*</sup> The Portfolio commenced operations on May 1, 2001. Index returns began on April 30, 2001.

\*\* The Portfolio commenced offering Class B shares on July 1, 2002. Index returns began on June 30, 2002.

## **Information About Your Portfolio's Expenses**

### **DWS Health Care VIP**

As an investor of the Portfolio, you incur two types of costs: ongoing expenses and transaction costs. Ongoing expenses include management fees, distribution and service (12b-1) fees and other Portfolio expenses. Examples of transaction costs include contract charges, redemption fees and account maintenance fees, which are not shown in this section. The following tables are intended to help you understand your ongoing expenses (in dollars) of investing in the Portfolio and to help you compare these expenses with the ongoing expenses of investing in other mutual funds. The example in the table is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire period (July 1, 2008 to December 31, 2008).

The tables illustrate your Portfolio's expenses in two ways:

• Actual Portfolio Return. This helps you estimate the actual dollar amount of ongoing expenses (but not transaction costs) paid on a \$1,000 investment in the Portfolio using the Portfolio's actual return during the period. To estimate the expenses you paid over the period, simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the "Expenses Paid per \$1,000" line under the share class you hold.

Hypothetical 5% Portfolio Return. This helps you to compare your Portfolio's ongoing expenses (but not transaction costs) with those of other mutual funds using the Portfolio's actual expense ratio and a hypothetical rate of return of 5% per year before expenses. Examples using a 5% hypothetical Portfolio return may be found in the shareholder reports of other mutual funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in these tables are meant to highlight your ongoing expenses only and do not reflect any transaction costs. The "Expenses Paid per \$1,000" line of the tables is useful in comparing ongoing expenses only and will not help you determine the relative total expense of owning different funds. If these transaction costs had been included, your costs would have been higher.

Actual Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$ 824.60	\$ 822.60
Expenses Paid per \$1,000*	\$ 4.17	\$ 5.77
Hypothetical 5% Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$1,020.56	\$1,018.80
		\$ 6.39

### Expenses and Value of a \$1,000 Investment for the six months ended December 31, 2008

\* Expenses are equal to the Portfolio's annualized expense ratio for each share class, multiplied by the average account value over the period, multiplied by the number of days in the most recent six-month period, then divided by 366.

Annualized Expense Ratios	Class A	Class B	
DWS Variable Series I — DWS Health Care VIP	.91%	1.26%	

For more information, please refer to the Portfolio's prospectus.

These tables do not reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option.

## **Management Summary**

### **DWS Health Care VIP**

During a period of economic weakness and instability in the financial system, which led investors to favor more defensive sectors such as health care, DWS Health Care VIP posted a negative return but strongly outperformed the general market with a –23.20% total return for its most recent fiscal year ended December 31, 2008 (Class A shares, unadjusted for contract charges). In comparison, the Standard & Poor's<sup>®</sup> 500 (S&P 500) Index returned –37.00% and the S&P GSSI Healthcare Sector Index returned –23.59% over the same period.

The portfolio's underweight positions in Medtronic, Inc., Merck & Co., Inc. and UnitedHealth Group, Inc., relative to the benchmark, helped performance during the annual period.<sup>1</sup> Medtronic shares declined due to deteriorating trends in four of its five major businesses, while Merck shares were negatively impacted by concerns over its cholesterol drug franchise following disappointing data from clinical studies. In addition, sales trends for the company's key drugs were weaker than expected. UnitedHealth shares also declined significantly, as the company lowered its earnings forecast to reflect pressure on profit margins from higher medical costs and weaker than expected enrollment trends. The largest detractors from the Portfolio's relative performance came from underweight positions in Pfizer, Inc. and Johnson & Johnson. These companies' shares, representing meaningful weightings within the portfolio's benchmarks, held up better than industry averages during the period as investors favored more defensive, large-cap issues during the financial and economic crisis.

We believe that health care stocks should continue to outperform the general market as worries about the global economy and the credit crisis overshadow concerns over the potential impact of health care reform on sector financials. Despite the potential for declines in health care consumption due to higher drug co-payments, rising unemployment and the deferral of medical procedures, we think this sector is well positioned in the current environment. We expect health care reform to eventually lower overall health care spending. However, we are not convinced that major changes to the industry will be enacted and implemented before 2010.

The following person is responsible for the day-to-day management of the Portfolio. Leefin Lai, CFA, CPA Portfolio Manager

The following person serves as a consultant to the Advisor of the Portfolio. Thomas E. Bucher, CFA Consultant

The Standard & Poor's 500 (S&P 500) Index is an unmanaged, capitalization-weighted index of 500 stocks. The index is designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries. The S&P GSSI Health Care Sector Index is an unmanaged, market-capitalization-weighted index of 133 stocks designed to measure the performance of companies in the health care sector.

Index returns assume the reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

<sup>1</sup> "Overweight" means the portfolio holds a higher weighting in a given sector or security than the benchmark. "Underweight" means the portfolio holds a lower weighting.

Portfolio management market commentary is as of December 31, 2008, and may not come to pass. This information is subject to change at any time based on market and other conditions. Past performance does not guarantee future results. Current and future portfolio holdings are subject to risk.

value over tax cost of \$14,546,491 and aggregate gross unrealized depreciation for all securities in which there was an excess of tax cost over value of \$8,604,506.

- (a) All or a portion of these securities were on loan (see Notes to Financial Statements). The value of all securities loaned at December 31, 2008 amounted to \$3,875,282, which is 6.1% of net assets.
- (b) Affiliated fund managed by Deutsche Investment Management Americas Inc. The rate shown is the annualized seven-day yield at period end.
- (c) Represents collateral held in connection with securities lending. Income earned by the Portfolio is net of borrower rebates.

ADR: American Depositary Receipt

#### Fair Value Measurements

The following is a summary of the inputs used as of December 31, 2008 in valuing the Portfolio's investments. For information on the Portfolio's policy regarding the valuation of investments and of the valuation inputs, and the aggregate levels used in the table below, please refer to the Security Valuation section of Note A in the accompanying Notes to the Financial Statements.

Valuation Inputs		Investments in Securities		
Level 1	\$	59,818,585		
Level 2		7,857,291		
Level 3		_		
Total	\$	67,675,876

Ratio of net investment income (loss) (%)	.43 <sup>d</sup>	(.22) <sup>c</sup>	(.42) <sup>b</sup>	(.57)	(.68)
Portfolio turnover rate (%)	24	37	47	43	77

<sup>a</sup> Based on average shares outstanding during the period.

<sup>b</sup> Includes non-recurring income from the Advisor recorded as a result of an administrative proceeding regarding disclosure of brokerage allocation practices in connection with sales of DWS Funds. The non-recurring income resulted in an increase in net investment income of \$0.003 per share and an increase in the ratio of net investment income of 0.02%. Excluding this non-recurring income, total return would have been 0.02% lower.

<sup>c</sup> Net investment income per share and ratio of net investment income include non-recurring dividend income amounting to \$0.02 per share and 0.13% of average daily net assets, respectively.

<sup>d</sup> Net investment income per share and ratio of net investment income include non-recurring dividend income amounting to \$0.03 per share and 0.28% of average daily net assets, respectively.

## Notes to Financial Statements

### **A. Significant Accounting Policies**

DWS Variable Series I (the "Series") is registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as an open-end, registered management investment company organized as a Massachusetts business trust. The Series consists of six diversified portfolios: DWS Bond VIP, DWS Growth & Income VIP, DWS Capital Growth VIP, DWS Global Opportunities VIP, DWS International VIP and DWS Health Care VIP (individually or collectively hereinafter referred to as a "Portfolio" or the "Portfolios"). The Series is intended to be the underlying investment vehicle for variable annuity contracts and variable life insurance policies to be offered by the separate accounts of certain life insurance companies ("Participating Insurance Companies").

**Multiple Classes of Shares of Beneficial Interest.** DWS Bond VIP offers only one class of shares (Class A shares). DWS Growth & Income VIP, DWS Capital Growth VIP, DWS Global Opportunities VIP, DWS International VIP and DWS Health Care VIP each offer two classes of shares (Class A shares and Class B shares). Class B shares are subject to Rule 12b-1 distribution fees under the 1940 Act and record keeping fees equal to an annual rate of 0.25% and up to 0.15%, respectively, of the average daily net assets of the Class B shares of the applicable Portfolio. Class A shares are not subject to such fees. On May 22, 2008, Class B shares of DWS Bond VIP were liquidated.

Investment income, realized and unrealized gains and losses, and certain portfolio-level expenses and expense reductions, if any, are borne pro rata on the basis of relative net assets by the holders of all classes of shares, except that each class bears certain expenses unique to that class (including the applicable 12b-1 distribution fees and record keeping fees). Differences in class-level expenses may result in payment of different per share dividends by class. All shares have equal rights with respect to voting subject to class-specific arrangements.

The Series' financial statements are prepared in accordance with accounting principles generally accepted in the United States of America, which require the use of management estimates. Actual results could differ from those estimates. The policies described below are followed consistently by the Series in the preparation of the financial statements for its Portfolios.

**Security Valuation.** Investments are stated at value determined as of the close of regular trading on the New York Stock Exchange on each day the exchange is open for trading. Equity securities are valued at the most recent sale price or official closing price reported on the exchange (US or foreign) or over-the-counter market on which the security is traded most extensively. Securities for which no sales are reported are valued at the calculated mean between the most recent bid and asked quotations on the relevant market or, if a mean cannot be determined, at the most recent bid quotation.

Debt securities are valued by independent pricing services approved by the Trustees of the Series. If the pricing services are unable to provide valuations, securities are valued at the most recent bid quotation or evaluated price, as applicable, obtained from one or more broker-dealers. Such services may use various pricing techniques which take into account appropriate factors such as yield, quality, coupon rate, maturity, type of issue, trading characteristics and other data, as well as broker quotes.

Money market instruments purchased with an original or remaining maturity of sixty days or less, maturing at par, are valued at amortized cost. Investments in open-end investment companies and Cash Management QP Trust are valued at their net asset value each business day.

Securities and other assets for which market quotations are not readily available or for which the above valuation procedures are deemed not to reflect fair value are valued in a manner that is intended to reflect their fair value as determined in accordance with procedures approved by the Trustees. The Series may use a fair valuation model to value international equity securities in order to adjust for events which may occur between the close of the foreign exchanges and the close of the New York Stock Exchange.

The Portfolio adopted Financial Accounting Standards Board ("FASB") Statement of Financial Accounting Standards No. 157, "Fair Value Measurements" ("FAS 157"), effective at the beginning of the Portfolio's fiscal year. FAS 157 establishes a three-tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and requires additional disclosure about the classification of fair value measurements.

Various inputs are used in determining the value of the Portfolio's investments. These inputs are summarized in three broad levels. Level 1 includes quoted prices in active markets for identical securities. Level 2 includes other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds and credit risk). Level 3 includes significant unobservable inputs (including the Portfolio's own assumptions in determining the fair value of investments). The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The aggregate value by input level, as of December 31, 2008, for the Portfolio's investments, as well as a reconciliation of Level 3 assets for which significant unobservable inputs were used in determining value, is included at the end of the Portfolio's Investment Portfolio.

**New Accounting Pronouncement.** In March 2008, the FASB issued Statement of Financial Accounting Standards No. 161 ("FAS 161"), "Disclosures about Derivative Instruments and Hedging Activities". FAS 161 requires enhanced disclosure about an entity's derivative and hedging activities including qualitative disclosures about the objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. FAS 161 is effective for fiscal years and interim periods beginning after November 15, 2008. Management is currently reviewing the enhanced disclosure requirements for the adoption of FAS 161.

**Securities Lending.** The Portfolio may lend securities to financial institutions. The Portfolio retains beneficial ownership of the securities it has loaned and continues to receive interest and dividends paid by the issuer of securities and to participate in any changes in their market value. The Portfolio requires the borrowers of the securities to maintain collateral with the Portfolio consisting of liquid, unencumbered assets having a value at least equal to the value of the securities loaned. When the collateral falls below specified amounts, the lending agents will use their best efforts to obtain additional collateral on the next business day to meet required amounts under the security lending agreement. The Portfolio may invest the cash collateral into a joint trading account in an affiliated money market fund pursuant to Exemptive Orders issued by the SEC. The Portfolio receives compensation for lending its securities either in the form of fees or by earning interest on invested cash collateral net of borrower rebates and fees paid to a lending agent. Either the Portfolio or the borrower may terminate the loan. There may be risks of delay and costs in recovery of securities or even loss of rights in the collateral should the borrower of the securities fail financially. The Portfolio is also subject to all investment risks associated with the reinvestment of any cash collateral received, including, but not limited to, interest rate, credit and liquidity risk associated with such investments.

**Futures Contracts.** A futures contract is an agreement between a buyer or seller and an established futures exchange or its clearinghouse in which the buyer or seller agrees to take or make a delivery of a specific amount of a financial instrument at a specified price on a specific date (settlement date). Each Portfolio may use futures in circumstances where portfolio management believes they offer an economic means of gaining exposure to a particular asset class or to keep cash on hand to meet shareholder redemptions or other needs while maintaining exposure to the market. In addition, the DWS Bond VIP, DWS Capital Growth VIP, DWS Global Opportunities VIP and DWS Health Care VIP Portfolios may use futures for hedging and for risk management or for non-hedging purposes to seek to enhance potential gains.

Upon entering into a futures contract, the Portfolio is required to deposit with a financial intermediary an amount ("initial margin") equal to a certain percentage of the face value indicated in the futures contract. Subsequent payments ("variation margin") are made or received by the Portfolio dependent upon the daily fluctuations in the value of the underlying security and are recorded for financial reporting purposes as unrealized gains or losses by the Portfolio. When entering into a closing transaction, the Portfolio will realize a gain or loss equal to the difference between the value of the futures contract to sell and the futures contract to buy. Futures contracts are valued at the most recent settlement price.

Certain risks may arise upon entering into futures contracts, including the risk that an illiquid secondary market will limit the Portfolio's ability to close out a futures contract prior to the settlement date and that a change in the value of a futures contract may not correlate exactly with the changes in the value of the securities or currencies hedged. When utilizing futures contracts to hedge, the Portfolio gives up the opportunity to profit from favorable price movements in the hedged positions during the term of the contract. Risk of loss may exceed amounts recognized on the Statement of Assets and Liabilities.

**Foreign Currency Translations.** The books and records of the Portfolios are maintained in US dollars. Investment securities and other assets and liabilities denominated in a foreign currency are translated into US dollars at the prevailing exchange rates at period end. Purchases and sales of investment securities, income and expenses are translated into US dollars at the prevailing exchange rates on the respective dates of the transactions.

Net realized and unrealized gains and losses on foreign currency transactions represent net gains and losses between trade and settlement dates on securities transactions, the disposition of forward foreign currency exchange contracts and foreign currencies, and the difference between the amount of net investment income accrued and the US dollar amount actually received. That portion of both realized and unrealized gains and losses on investments that results from fluctuations in foreign currency exchange rates is not separately disclosed but is included with net realized and unrealized gain/appreciation and loss/depreciation on investments.

**Forward Foreign Currency Exchange Contracts.** A forward foreign currency exchange contract ("forward currency contract") is a commitment to purchase or sell a foreign currency at the settlement date at a negotiated rate. The Portfolios may enter into forward currency contracts in order to hedge their exposure to changes in foreign

currency exchange rates on their foreign currency denominated portfolio holdings and to facilitate transactions in foreign currency denominated securities. The Portfolio may also engage in forward currency contracts for non-hedging purposes.

Forward currency contracts are valued at the prevailing forward exchange rate of the underlying currencies and unrealized gain (loss) is recorded daily. Sales and purchases of forward currency contracts having the same settlement date and broker are offset and any gain (loss) is realized on the date of offset; otherwise, gain (loss) is realized on settlement date. Realized and unrealized gains and losses which represent the difference between the value of a forward currency contract to buy and a forward currency contract to sell are included in net realized and unrealized gain (loss) from foreign currency related transactions.

Certain risks may arise upon entering into forward currency contracts from the potential inability of counterparties to meet the terms of their contracts. Additionally, when utilizing forward currency contracts to hedge, the Portfolio gives up the opportunity to profit from favorable exchange rate movements during the term of the contract.

**Mortgage Dollar Rolls.** DWS Bond VIP may enter into mortgage dollar rolls in which the Portfolio sells to a bank or broker/dealer (the "counterparty") mortgage-backed securities for delivery in the current month and simultaneously contracts to repurchase similar, but not identical, securities on a fixed date. The counterparty receives all principal and interest payments, including prepayments, made on the security while it is the holder. The Portfolio receives compensation as consideration for entering into the commitment to repurchase. The compensation is paid in the form of a lower price for the security upon its repurchase, or alternatively, a fee. Mortgage dollar rolls may be renewed with a new sale and repurchase price and a cash settlement made at each renewal without physical delivery of the securities subject to the contract.

Certain risks may arise upon entering into mortgage dollar rolls from the potential inability of counterparties to meet the terms of their commitments. Additionally, the value of such securities may change adversely before the Portfolio is able to repurchase them. There can be no assurance that the Portfolio's use of the cash that it receives from a mortgage dollar roll will provide a return that exceeds its costs.

Senior Loans. DWS Bond VIP may invest in Senior Loans. Senior Loans are portions of loans originated by banks and sold in pieces to investors. These US dollar-denominated fixed and floating rate loans ("Loans") in which the Portfolio invests, are arranged between the borrower and one or more financial institutions ("Lenders"). These loans are corporate obligations often issued in connection with recapitalizations, acquisitions, leveraged buy-outs and refinancings. The Portfolio invests in such Loans in the form of participations in Loans ("Participations") or assignments of all or a portion of Loans from third parties ("Assignments"). Participations typically result in the Portfolio having a contractual relationship only with the Lender, not with the borrower. The Portfolio has the right to receive payments of principal, interest and any fees to which it is entitled from the Lender selling the Participation and only upon receipt by the Lender of the payments from the borrower. In connection with purchasing Participations, the Portfolio generally has no right to enforce compliance by the borrower with the terms of the loan agreement relating to the Loan, or any rights of set-off against the borrower, and the Portfolio will not benefit directly from any collateral supporting the Loan in which it has purchased the Participation. As a result, the Portfolio assumes the credit risk of both the borrower and the Lender that is selling the Participation. Assignments typically result in the Portfolio having a direct contractual relationship with the borrower, and the Portfolio may enforce compliance by the borrower with the terms of the loan agreement. All Senior Loans involve interest rate risk, liquidity risk and credit risk, including the potential default or insolvency of the borrower.

**Taxes.** Each Portfolio is treated as a separate taxpayer as provided for in the Internal Revenue Code, as amended. It is each Portfolio's policy to comply with the requirements of the Internal Revenue Code, as amended, which are applicable to regulated investment companies, and to distribute all of its taxable income to the separate accounts of the Participating Insurance Companies which hold its shares.

Additionally, based on the Series' understanding of the tax rules and rates related to income, gains and transactions for the foreign jurisdictions in which each Portfolio invests, the Series will provide for foreign taxes, and where appropriate, deferred foreign taxes.

At December 31, 2008, the following Portfolios had an approximate net tax basis capital loss carryforward which may be applied against any realized net taxable capital gains of each succeeding year until fully utilized or until the following expiration dates, whichever occurs first:

Portfolio	Capital Loss Carryforwards (\$)	Expiration Date	Capital Loss Carryforwards Utilized (\$)	Capital Loss Carryforwards Expired (\$)
DWS Bond VIP	4,957,000	12/31/2014–12/31/2016	_	_
DWS Growth & Income VIP	27,889,000	12/31/2010–12/31/2016	_	—

. . .

Portfolio	Capital Loss Carryforwards (\$)	Expiration Date	Capital Loss Carryforwards Utilized (\$)	Capital Loss Carryforwards Expired (\$)
DWS Global Opportunities VIP	3,019,000	12/31/2016	—	_
DWS International VIP	77,707,000	12/31/2016	—	—

In addition, from November 1, 2008 through December 31, 2008, DWS Bond VIP, DWS Growth & Income VIP, DWS Capital Growth VIP, DWS Global Opportunities VIP, DWS International VIP and DWS Health Care VIP incurred approximately \$16,439,000, \$10,255,000, 8,359,000, 10,758,000, 39,288,000 and \$736,000, respectively, of net realized capital losses. As permitted by tax regulations, the Portfolios intend to elect to defer these losses and treat them as arising in the fiscal year ended December 31, 2009.

At December 31, 2008, DWS Capital Growth VIP had a net tax basis capital loss carryforward of approximately \$227,747,000, of which a portion was inherited from its mergers with the SVS Eagle Focused Large Cap Growth Portfolio, Scudder Growth Portfolio, DWS Oak Strategic Equity VIP and DWS Janus Growth Opportunities VIP, and which is included in the table above and may be applied against any realized net taxable capital gains of each succeeding year until fully utilized or until the expiration dates, range from December 31, 2009, to December 31, 2012, whichever occurs first, and which may be subject to certain limitations under Section 382-384 of the Internal Revenue Code. DWS Capital Growth VIP utilized approximately \$8,084,000 of non-merger related losses. In addition, the Portfolio utilized approximately \$21,744,000 of the inherited amounts, which is included in the table above. Due to certain limitations under Sections 382–384 of the Internal Revenue Code, approximately \$19,244,000 of the losses from SVS Eagle Focused Large Cap Growth Portfolio and Scudder Growth Portfolio expired and approximately \$332,000 of the losses from DWS Janus Growth Opportunities VIP cannot be used. These losses are excluded from the capital loss carryforward amount of \$227,747,000 disclosed above.

Each Portfolio has reviewed the tax positions for the open tax years as of December 31, 2008 and has determined that no provision for income tax is required in each Portfolio's financial statements. Each of the Portfolio's federal tax returns for the prior three fiscal years remains subject to examination by the Internal Revenue Service.

Distribution of Income and Gains. Each Portfolio will declare and distribute dividends from their net investment income, if any, annually, although additional distributions may be made if necessary. Net realized gains from investment transactions, in excess of available capital loss carryforwards, would be taxable to each Portfolio if not distributed, and, therefore, will be distributed to shareholders at least annually.

The timing and characterization of certain income and capital gains distributions are determined annually in accordance with federal tax regulations which may differ from accounting principles generally accepted in the United States of America. These differences primarily relate to investments in foreign denominated investments. investments in forward foreign currency exchange contracts, passive foreign investment companies, post October loss deferrals and certain securities sold at a loss. As a result, net investment income (loss) and net realized gain (loss) on investment transactions for a reporting period may differ significantly from distributions during such period. Accordingly, each Portfolio may periodically make reclassifications among certain of its capital accounts without impacting the net asset value of the Portfolio.

At December 31, 2008, the Portfolios' components of distributable earnings (accumulated losses) on a tax-basis are as follows:

Portfolio	Undistributed Ordinary Income (\$)*	Undistributed Net Long-Term Capital Gains (\$)	Capital Loss Carryforwards (\$)	Net Unrealized Gain (Loss) on Investments (\$)
DWS Bond VIP	11,876,139	—	(4,957,000)	(28,504,179)
DWS Growth & Income VIP	1,938,429	—	(27,889,000)	(32,890,694)
DWS Capital Growth VIP	7,945,917	_	(227,747,000)	10,574,440
DWS Global Opportunities VIP	2,083,686		(3,019,000)	(20,090,640)
DWS International VIP	13,320,593		(77,707,000)	(75,728,578)
DWS Health Care VIP	724,957	718,209	_	5,941,985

In addition, the tax character of distributions paid to shareholders by the Portfolios is summarized as follows:

	Inco	Distributions from Ordinary Income (\$)* Years Ended December 31,		Distributions from Long-Term Capital Gains (\$) Years Ended December 31,	
Portfolio	2008	2007	2008	2007	
DWS Bond VIP	10,914,208	10,397,091	_	_	
DWS Growth & Income VIP	15,760,111	3,685,275	26,232,152	4,265,414	
DWS Capital Growth VIP	9,451,337	7,146,340	—	—	
DWS Global Opportunities VIP	979,171	5,220,901	40,011,833	25,733,820	
DWS International VIP	7,386,477	18,696,240	95,745,428	_	
DWS Health Care VIP	3,006,032	_	12,571,710	7,351,195	

\* For tax purposes short-term capital gains distributions are considered ordinary income distributions.

**Expenses.** Expenses of the Series arising in connection with a specific Portfolio are allocated to that Portfolio. Other Series expenses which cannot be directly attributed to a Portfolio are apportioned among the Portfolios in the Series.

**Contingencies.** In the normal course of business, each Portfolio may enter into contracts with service providers that contain general indemnification clauses. Each Portfolio's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against each Portfolio that have not yet been made. However, based on experience, each Portfolio expects the risk of loss to be remote.

**Other.** For each Portfolio, investment transactions are accounted for on a trade date plus one basis for daily net asset value calculations. However, for financial reporting purposes, investment transactions are reported on trade date. Interest income is recorded on the accrual basis net of foreign withholding taxes. Dividend income is recorded on the ex-dividend date net of foreign withholding taxes. Certain dividends from foreign securities may be recorded subsequent to the ex-dividend date as soon as the Portfolio is informed of such dividends. Realized gains and losses from investment transactions are recorded on an identified cost basis. All discounts and premiums are accreted/amortized for both tax and financial reporting purposes.

#### **B.** Purchases and Sales of Securities

During the year ended December 31, 2008, purchases and sales of investment securities (excluding short-term investments) were as follows:

Portfolio	Purchases (\$)	Sales (\$)
DWS Bond VIP		
excluding US Treasury Obligations	116,593,956	126,836,594
US Treasury Obligations	264,754,396	288,981,537
DWS Growth & Income VIP	192,386,286	234,069,964
DWS Capital Growth VIP	182,722,249	315,927,818
DWS Global Opportunities VIP	47,740,750	96,017,563
DWS International VIP	630,020,593	730,062,614
DWS Health Care VIP	20,839,055	35,904,837

#### **C. Related Parties**

Under the Investment Management Agreement with Deutsche Investment Management Americas Inc. ("DIMA" or the "Advisor"), an indirect, wholly owned subsidiary of Deutsche Bank AG, the Advisor directs the investments of the Portfolios in accordance with their investment objectives, policies and restrictions. The Advisor determines the securities, instruments and other contracts relating to investments to be purchased, sold or entered into by the Portfolios.

Under the Investment Management Agreement with the Advisor, the Portfolios pay a monthly management fee, based on the average daily net assets of each Portfolio, computed and accrued daily and payable monthly, at the annual rates shown below:

Portfolio	Annual Management Fee Rate
DWS Bond VIP	
first \$250 million of average daily net assets	.390%
next \$750 million of average daily net assets	.365%
over \$1 billion of average daily net assets	.340%
DWS Growth & Income VIP

over \$500 million of average daily net assets	.640%
DWS Health Care VIP	
first \$250 million of average daily net assets	.665%
next \$750 million of average daily net assets	.640%
next \$1.5 billion of average daily net assets	.615%
next \$2.5 billion of average daily net assets	.595%
next \$2.5 billion of average daily net assets	.565%
next \$2.5 billion of average daily net assets	.555%
next \$2.5 billion of average daily net assets	.545%
over \$12.5 billion of average daily net assets	.535%

Prior to December 1, 2008, Aberdeen Asset Management, Inc. ("AAMI") and Aberdeen Asset Management Investment Services Limited ("AAMISL") served as DWS Bond VIP's subadvisor and sub-subadvisor, respectively. AAMI was responsible for the day to day operation of the high-yield and core bond, active fixed-income and high-yield portions of DWS Bond VIP. AAMISL was responsible for the day-to-day management of the foreign securities, foreign currencies and related investments for DWS Bond VIP. The Portfolio's board has approved the termination of AAMI and AAMISL as the Portfolio's subadvisor and sub-subadvisor, respectively. Effective December 1, 2008, the Advisor assumed all day-to-day advisory responsibilities that were previously delegated to AAMI and AAMISL.

For the period from January 1, 2008 through April 30, 2008, the Advisor, the underwriter and accounting agent contractually agreed to waive a portion of their fee to the extent necessary to maintain the operating expenses (excluding certain expenses such as extraordinary expenses, taxes, brokerage and interest) as follows:

Portfolio	Annual Rate
DWS Bond VIP Class B	1.03%

In addition, for the period from January 1, 2008 through September 30, 2008, the Advisor, the underwriter and accounting agent contractually agreed to waive a portion of their fee to the extent necessary to maintain the

operating expenses of each class (excluding certain expenses such as extraordinary expenses, taxes, brokerage and interest) as follows:

Portfolio	Annual Rate
DWS Bond VIP Class A	.63%
DWS Global Opportunities VIP Class A	.99%
DWS Global Opportunities VIP Class B	1.39%

In addition, for the period from October 1, 2008 through September 30, 2009, the Advisor, the underwriter and accounting agent contractually agreed to waive a portion of their fee to the extent necessary to maintain the operating expenses of each class (excluding certain expenses such as extraordinary expenses, taxes, brokerage and interest) as follows:

#### Portfolio

	Annual hate
DWS Global Opportunities VIP Class A	.95%
DWS Global Opportunities VIP Class B	1.35%
DWS Health Care VIP Class B	1.49%

In addition, for the period from January 1, 2008 through April 30, 2010, the Advisor, the underwriter and accounting agent contractually agreed to waive a portion of their fee to the extent necessary to maintain the operating expenses of each class (excluding certain expenses such as extraordinary expenses, taxes, brokerage and interest) as follows:

Portfolio	Annual Rate
DWS Capital Growth VIP Class A	.49%
DWS Capital Growth VIP Class B	.82%
DWS Growth & Income VIP Class A	.54%
DWS Growth & Income VIP Class B	.87%
DWS International VIP Class A	.96%
DWS International VIP Class B	1.29%

In addition, for the period from January 1, 2008 through April 27, 2010, the Advisor has contractually agreed to waive 0.01% of the management fee for DWS Growth & Income VIP.

Accordingly, for the year ended December 31, 2008, the total management fee, management fee waived, and effective management fee rate are as follows:

Portfolio	Total Aggregated (\$)	Waived (\$)	Annual Effective Rate
DWS Bond VIP	782,296	—	.39%
DWS Growth & Income VIP	592,051	83,657	.33%
DWS Capital Growth VIP	3,273,016	111,183	.36%
DWS Global Opportunities VIP	2,040,460	281,092	.77%
DWS International VIP	3,994,718	211,855	.73%
DWS Health Care VIP	600,311	_	.67%

In addition, for the year ended December 31, 2008, the Advisor waived record keeping expenses of Class B shares of each Portfolio as follows:

Portfolio	Waived (\$)
DWS Capital Growth VIP	2,532
DWS International VIP	585

Administration Fee. Pursuant to an Administrative Services Agreement, DIMA provides most administrative services to the Series. For all services provided under the Administrative Services Agreement, each Portfolio pays the Advisor an annual fee ("Administration Fee") of 0.10% of each Portfolio's average daily net assets, computed

Annual Rate

and accrued daily and payable monthly. For the year ended December 31, 2008, the Advisor received an Administration Fee as follows:

Portfolio	Total Aggregated (\$)	Unpaid at December 31, 2008 (\$)
DWS Bond VIP	200,589	13,039
DWS Growth & Income VIP	151,808	7,812
DWS Capital Growth VIP	879,862	50,075
DWS Global Opportunities VIP	229,265	10,114
DWS International VIP	519,230	24,304
DWS Health Care VIP	90,272	5,275

.. ..

**Service Provider Fees.** DWS Investments Service Company ("DISC"), an affiliate of the Advisor, is the transfer agent, dividend-paying agent and shareholder service agent for the Series. Pursuant to a sub-transfer agency agreement between DISC and DST Systems, Inc. ("DST"), DISC has delegated certain transfer agent, dividend-paying agent and shareholder service agent functions to DST. DISC compensates DST out of the shareholder servicing fee it receives from each Portfolio. For the year ended December 31, 2008, the amounts charged to the Portfolios by DISC were as follows:

Portfolio	Total Aggregated (\$)	Waived (\$)	Unpaid at December 31, 2008 (\$)
DWS Bond VIP Class A	741	_	189
DWS Bond VIP Class B	19	—	—
DWS Growth & Income VIP Class A	622	241	381
DWS Growth & Income VIP Class B	121	_	23
DWS Capital Growth VIP Class A	886	886	_
DWS Capital Growth VIP Class B	94	94	_
DWS Global Opportunities VIP Class A	501	501	_
DWS Global Opportunities VIP Class B	159	_	63
DWS International VIP Class A	805	805	_
DWS International VIP Class B	45	_	_
DWS Health Care VIP Class A	254		57
DWS Health Care VIP Class B	99	_	33

DWS Investments Distributors, Inc. ("DIDI"), also an affiliate of the Advisor, is the Series' Distributor. In accordance with the Master Distribution Plan, DIDI receives 12b-1 fees of 0.25% of average daily net assets of Class B shares. Pursuant to the Master Distribution Plan, DIDI remits these fees to the Participating Insurance Companies for various costs incurred or paid by these companies in connection with marketing and distribution of Class B shares. These fees are detailed in each Portfolio's Statement of Operations.

**Typesetting and Filing Service Fees.** Under an agreement with DIMA, DIMA is compensated for providing typesetting and certain regulatory filing services to the Portfolios. For the year ended December 31, 2008, the amount charged to the Portfolios by DIMA included in the Statement of Operations under "reports to shareholders" was as follows:

Portfolio	Total Aggregated (\$)	Unpaid at December 31, 2008 (\$)
DWS Bond VIP	4,623	2,567
DWS Growth & Income VIP	8,322	2,495
DWS Capital Growth VIP	7,133	2,193
DWS Global Opportunities VIP	9,453	2,367
DWS International VIP	9,460	3,345
DWS Health Care VIP	8,427	3,447

**Trustees' Fees and Expenses.** Each Portfolio paid each Trustee not affiliated with the Advisor retainer fees plus specified amounts for various committee services and for the Board Chairperson and Vice Chairperson.

In connection with the board consolidation on April 1, 2008, of the two DWS Funds Boards of Trustees, certain Independent Board Members retired prior to their normal retirement date, and received a one-time retirement benefit. DIMA has agreed to reimburse the Portfolios for the cost of this benefit. During the period ended

December 31, 2008, each Portfolio paid its allocated portion, as follows, of the retirement benefit to the non-continuing Independent Board Members, and each Portfolio was reimbursed by DIMA for this payment:

Portfolio	Amount (\$)
DWS Bond VIP	1,213
DWS Growth & Income VIP	988
DWS Capital Growth VIP	5,091
DWS Global Opportunities VIP	1,446
DWS International VIP	3,251
DWS Health Care VIP	535

**Cash Management QP Trust.** Pursuant to an Exemptive Order issued by the SEC, the Series may invest in the Cash Management QP Trust (the "QP Trust"), and other affiliated funds managed by the Advisor. The QP Trust seeks to provide as high a level of current income as is consistent with the preservation of capital and the maintenance of liquidity. The QP Trust does not pay the Advisor a management fee for the affiliated funds' investments in the QP Trust.

#### D. Investing in Emerging Markets

The DWS Bond VIP, DWS Global Opportunities VIP and DWS International VIP may invest in emerging markets. Investing in emerging markets may involve special risks and considerations not typically associated with investing in the United States of America. These risks include revaluation of currencies, high rates of inflation, repatriation restrictions on income and capital, and future adverse political, social and economic developments. Moreover, securities issued in these markets may be less liquid, subject to government ownership controls or delayed settlements and may have prices more volatile than those of comparable securities of issuers in the United States of America.

#### E. Fee Reductions

DWS Bond VIP, DWS Growth & Income VIP, DWS Capital Growth VIP and DWS Health Care VIP have entered into an arrangement with their custodian whereby credits realized as a result of uninvested cash balances are used to reduce a portion of the custodian expenses. During the year ended December 31, 2008, the custodian fees were reduced as follows:

Portfolio	Custody Credits (\$)
DWS Bond VIP	556
DWS Growth & Income VIP	40
DWS Capital Growth VIP	132
DWS Health Care VIP	71

#### F. Ownership of the Portfolios

At the end of the period, the beneficial ownership in the Portfolios was as follows:

**DWS Bond VIP:** One participating insurance company was an owner of record of 10% or more of the total outstanding Class A shares of the Portfolio, owning 63%.

**DWS Growth & Income VIP:** Three participating insurance companies were owners of record of 10% or more of the total outstanding Class A shares of the Portfolio, each owning 32%, 28% and 15%. One participating insurance company was an owner of record, owning 89% of the total outstanding Class B shares of the Portfolio.

**DWS Capital Growth VIP:** Four participating insurance companies were owners of record of 10% or more of the total outstanding Class A shares of the Portfolio, each owning 40%, 23%, 11% and 10%. One participating insurance company was an owner of record, owning 92% of the total outstanding Class B shares of the Portfolio.

**DWS Global Opportunities VIP:** Three participating insurance companies were owners of record of 10% or more of the total outstanding Class A shares of the Portfolio, each owning 53%, 18% and 11%. Two participating insurance companies were owners of record, each owning 63% and 35% of the total outstanding Class B shares of the Portfolio.

**DWS International VIP:** Two participating insurance companies were owners of record of 10% or more of the total outstanding Class A shares of the Portfolio, each owning 37% and 16%. Three participating insurance companies were owners of record, each owning 65%, 20% and 15% of the total outstanding Class B shares of the Portfolio.

**DWS Health Care VIP:** Two participating insurance companies were owners of record of 10% or more of the total outstanding Class A shares of the Portfolio, each owning 70% and 20%. One participating insurance company was an owner of record, owning 100% of the total outstanding Class B shares of the Portfolio.

#### G. Line of Credit

The Series and other affiliated funds (the "Participants") share in a \$490 million revolving credit facility provided by a syndication of banks. The Portfolio may borrow for temporary or emergency purposes, including the meeting of redemption requests that otherwise might require the untimely disposition of securities. The Participants are charged an annual commitment fee which is allocated based on net assets, among each of the Participants. Interest is calculated at the Federal Funds Rate plus 0.35 percent. Each Portfolio may borrow up to a maximum of 33 percent of its net assets under the agreement.

#### H. Payments Made by Affiliates

During the year ended December 31, 2008, the Advisor fully reimbursed DWS Bond VIP \$221 for losses incurred on trades executed incorrectly. The amount of the losses was less than 0.01% of the Portfolio's average net asset, thus having no impact on the Portfolio's total return.

In addition, during the year ended December 31, 2008, the Advisor fully reimbursed DWS International VIP \$304,364 for losses incurred on trades executed incorrectly.

## **Report of Independent Registered Public Accounting Firm**

#### To the Trustees and Shareholders of DWS Variable Series I:

In our opinion, the accompanying statements of assets and liabilities, including the investment portfolios, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of the six Portfolios (identified in Note A) of DWS Variable Series I (the "Series") at December 31, 2008 and the results of each of their operations, the changes in each of their net assets, and the financial highlights for each of the periods indicated therein, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Series' management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities at December 31, 2008 by correspondence with the custodians and brokers, provide a reasonable basis for our opinion.

Boston, Massachusetts February 13, 2009 PricewaterhouseCoopers LLP

## **Tax Information**

DWS Growth & Income VIP, DWS Global Opportunities VIP, DWS International VIP and DWS Health Care VIP paid distributions of \$1.46, \$2.45, \$2.15 and \$1.81 per share, respectively, from net long-term capital gains during their year ended December 31, 2008, of which 100% represents 15% rate gains.

Pursuant to Section 852 of the Internal Revenue Code, DWS Health Care VIP designates approximately \$804,000 as capital gain dividends for its year ended December 31, 2008, of which 100% represents 15% rate gains.

For corporate shareholders of DWS Growth & Income VIP, DWS Capital Growth VIP, DWS Global Opportunities VIP and DWS Health Care VIP, 74%, 100%, 42% and 100%, respectively, of their respective income dividends paid during the Portfolios' fiscal year ended December 31, 2008 qualified for the dividends received deduction.

DWS Global Opportunities VIP and DWS International VIP paid foreign taxes of \$236,000 and \$1,140,104, respectively, and earned \$1,947,000 and \$14,248,491, respectively, of foreign source income during the year ended December 31, 2008. Pursuant to Section 853 of the Internal Revenue Code, DWS Global Opportunities VIP and DWS International VIP designate \$0.01 and \$0.02 per share, respectively, as foreign taxes paid and \$0.06 and \$0.31 per share, respectively, as income earned from foreign sources for the year ended December 31, 2008.

Please consult a tax advisor if you have questions about federal or state income tax laws, or on how to prepare your tax returns. If you have specific questions about your account, please call (800) 728-3337.

## **Proxy Voting**

The Series' policies and procedures for voting proxies for portfolio securities and information about how the Series voted proxies related to its portfolio securities during the 12-month period ended June 30 are available on our Web site — www.dws-investments.com (click on "proxy voting" at the bottom of the page) — or on the SEC's Web site — www.sec.gov. To obtain a written copy of the Series' policies and procedures without charge, upon request, call us toll free at (800) 621-1048.

## **Investment Management Agreement Approval**

#### **DWS Bond VIP**

The Board of Trustees, including the Independent Trustees, approved the renewal of your Fund's investment management agreement (the "Agreement") with Deutsche Investment Management Americas Inc. ("DIMA"), the sub-advisory agreement (the "Sub-Advisory Agreement") between DIMA and Aberdeen Asset Management, Inc. ("AAMI"), and the sub-sub-advisory agreement (the "Sub-Sub-Advisory Agreement," and together with the Agreement and Sub-Advisory Agreement, the "Agreements") between AAMI and Aberdeen Asset Management Investment Services Limited ("Aberdeen IS") in September 2008. As noted below, in the case of AAMI and Aberdeen IS, the Board also determined to terminate the Sub-Advisory Agreement and Sub-Sub-Advisory Agreement as of December 1, 2008.

In terms of the process that the Board followed prior to approving the Agreements, shareholders should know that:

- At the present time, all but one of your Fund's Trustees are independent of DIMA and its affiliates.
- The Trustees meet frequently to discuss fund matters. Each year, the Trustees dedicate part or all of several meetings to contract review matters. Over the course of several months, the Board's Contract Committee, in coordination with the Board's Fixed Income and Quant Oversight Committee, reviewed comprehensive materials received from DIMA, independent third parties and independent counsel. These materials included an analysis of the Fund's performance, fees and expenses, and profitability compiled by the Fund's independent fee consultant. The Board also received extensive information throughout the year regarding performance of the Fund.
- The Trustees regularly meet privately with their independent counsel (and, as needed, other advisors) to
  discuss contract review and other matters. In addition, the Trustees were also advised by the Fund's
  independent fee consultant in the course of their review of the Fund's contractual arrangements and
  considered a comprehensive report prepared by the independent fee consultant in connection with their
  deliberations (the "IFC Report").
- In connection with reviewing the Agreements, the Board also reviewed the terms of the administrative services agreement, transfer agency agreement and other material service agreements.
- Based on its evaluation of the information provided, the Contract Committee presented its findings and recommendations to the Independent Trustees as a group. The Independent Trustees reviewed the Contract Committee's findings and recommendations and presented their recommendations to the full Board.

In connection with the contract review process, the Contract Committee and the Board considered the factors discussed below, among others. The Board also considered that DIMA and its predecessors have managed the Fund since its inception, and the Board believes that a long-term relationship with a capable, conscientious advisor is in the best interests of the Fund. The Board considered, generally, that shareholders chose to invest or remain invested in the Fund knowing that DIMA managed the Fund, and that the Agreement was approved by the Fund's shareholders at a special meeting held in 2006. DIMA is part of Deutsche Bank, a major global banking institution that is engaged in a wide range of financial services. The Board believes that there are significant advantages to being part of a global asset management business that offers a wide range of investing expertise and resources, including hundreds of portfolio managers and analysts with research capabilities in many countries throughout the world.

While shareholders may focus primarily on fund performance and fees, the Fund's Board considers these and many other factors, including the quality and integrity of DIMA's, AAMI's and Aberdeen IS's personnel and such other issues as back-office operations, fund valuations, and compliance policies and procedures.

**Nature, Quality and Extent of Services.** The Board considered the terms of the Agreements, including the scope of advisory services provided under the Agreements. The Board noted that, under the Agreements, DIMA, AAMI and Aberdeen IS provide portfolio management services to the Fund and that, pursuant to a separate administrative services agreement, DIMA provides administrative services to the Fund. The Board considered the experience and skills of senior management and investment personnel, the resources made available to such

personnel, the ability of DIMA, AAMI and Aberdeen IS to attract and retain high-quality personnel, and the organizational depth and stability of DIMA, AAMI and Aberdeen IS. The Board reviewed the Fund's performance over short-term and long-term periods and compared those returns to various agreed-upon performance measures, including market indices and a peer universe compiled by the independent fee consultant using information supplied by Lipper Inc. ("Lipper"). The Board also noted that it has put a process into place of identifying "Focus Funds" (e.g., funds performing poorly relative to their benchmark or a peer group compiled by Lipper), and receives more frequent reporting and information from DIMA regarding such funds, along with DIMA's remedial plans to address underperformance. The Board believes this process is an effective manner of identifying and addressing underperforming funds. Based on the information provided, the Board noted that for the one-, three- and five-year periods ended December 31, 2007, the Fund's performance (Class A shares) was in the 3rd quartile, 3rd quartile and 2nd quartile, respectively, of the applicable Lipper universe (the 1st quartile being the best performers and the 4th quartile being the worst performers). The Board also observed that the Fund has underperformed its benchmark in each of the one-, three- and five-year periods ended December 31, 2007. The Board recognized that there have been significant changes in the Fund's management structure, including the termination of AAMI and Aberdeen IS as the Fund's sub-advisor and sub-sub-advisor, respectively, and the introduction of a new portfolio management team effective December 1, 2008.

On the basis of this evaluation and the ongoing review of investment results by the Board, the Board concluded that the nature, quality and extent of services provided by DIMA, AAMI and Aberdeen IS historically have been and continue to be satisfactory.

Fees and Expenses. The Board considered the Fund's investment management fee schedule, sub-advisory and sub-sub-advisory fee schedules, operating expenses, and total expense ratios, and comparative information provided by Lipper and the independent fee consultant regarding investment management fee rates paid to other investment advisors by similar funds (1st quartile being the most favorable and 4th quartile being the least favorable). With respect to management fees paid to other investment advisors by similar funds, the Board noted that the contractual fee rates paid by the Fund, which include the 0.10% fee paid to DIMA under the Fund's administrative services agreement, were equal to the median (2nd quartile) of the applicable Lipper peer group (based on Lipper data provided as of December 31, 2007). With respect to the sub-advisory and sub-sub-advisory fees paid to AAMI and Aberdeen IS, the Board noted that the fees are paid by DIMA and AAMI, respectively, out of their fees and not directly by the Fund. The Board noted that the Fund's Class A shares' total (net) operating expenses were expected to be higher than the median (3rd quartile) of the applicable Lipper expense universe (based on Lipper data provided as of December 31, 2007). The Board considered the Fund's management fee rate as compared to fees charged by DIMA and certain of its affiliates for comparable mutual funds and considered differences in fund and fee structures between the DWS Funds. The Board also considered how the Fund's total (net) operating expenses compared to the total (net) operating expenses of a more customized peer group selected by Lipper (based on such factors as asset size).

On the basis of the information provided, the Board concluded that management fees were reasonable and appropriate in light of the nature, quality and extent of services provided by DIMA, AAMI and Aberdeen IS.

**Profitability.** The Board reviewed detailed information regarding revenues received by DIMA under the Agreement. The Board considered the estimated costs and pre-tax profits realized by DIMA from advising the DWS Funds, as well as estimates of the pre-tax profits attributable to managing the Fund in particular. The Board also received information regarding the estimated enterprise-wide profitability of the DWS Investments organization with respect to all fund services in totality and by fund. The Board reviewed DIMA's methodology in allocating its costs to the management of the Fund. Based on the information provided, the Board concluded that the pre-tax profits realized by DIMA in connection with the management of the Fund were not unreasonable. The Board also reviewed information regarding the profitability of such firms is limited (and in some cases is not necessarily prepared on a comparable basis), DIMA and its affiliates' overall profitability with respect to the DWS Investments fund complex (after taking into account distribution and other services provided to the funds by DIMA and its affiliates) was lower than the overall profitability levels of many comparable firms for which such data was available.

**Economies of Scale.** The Board considered whether there are economies of scale with respect to the management of the Fund and whether the Fund benefits from any economies of scale. The Board noted that the Fund's management fee schedule includes fee breakpoints. The Board concluded that the Fund's fee schedule represents an appropriate sharing between the Fund and DIMA of such economies of scale as may exist in the management of the Fund at current asset levels.

**Other Benefits to DIMA and Its Affiliates.** The Board also considered the character and amount of other incidental benefits received by DIMA and its affiliates, including any fees received by DIMA for administrative services provided to the Fund and any fees received by an affiliate of DIMA for distribution services. The Board also considered benefits to DIMA related to brokerage and soft-dollar allocations, including allocating brokerage to pay for research generated by parties other than the executing broker dealers, which pertain primarily to funds investing in equity securities, along with the incidental public relations benefits to DIMA related to DWS Funds advertising and cross-selling opportunities among DWS Investments products and services. The Board concluded that management fees were reasonable in light of these fallout benefits.

**Compliance.** The Board considered the significant attention and resources dedicated by DIMA to documenting and enhancing its compliance processes in recent years. The Board noted in particular (i) the experience and seniority of DIMA's chief compliance officer; (ii) the large number of compliance personnel who report to DIMA's chief compliance officer; and (iii) the substantial commitment of resources by DIMA and its affiliates to compliance matters.

Based on all of the information considered and the conclusions reached, the Board (including a majority of the Independent Trustees) determined that the continuation of the Agreements is in the best interests of the Fund. In making this determination the Board did not give particular weight to any single factor identified above. The Board considered these factors over the course of numerous meetings, certain of which were in executive session with only the Independent Trustees and their counsel present. It is possible that individual Trustees may have weighed these factors differently in reaching their individual decisions to approve the continuation of the Agreements.

#### **DWS Growth & Income VIP**

The Board of Trustees, including the Independent Trustees, approved the renewal of your Fund's investment management agreement (the "Agreement") with Deutsche Investment Management Americas Inc. ("DIMA") in September 2008.

In terms of the process that the Board followed prior to approving the Agreement, shareholders should know that:

- At the present time, all but one of your Fund's Trustees are independent of DIMA and its affiliates.
- The Trustees meet frequently to discuss fund matters. Each year, the Trustees dedicate part or all of several meetings to contract review matters. Over the course of several months, the Board's Contract Committee, in coordination with the Board's Fixed Income and Quant Oversight Committee, reviewed comprehensive materials received from DIMA, independent third parties and independent counsel. These materials included an analysis of the Fund's performance, fees and expenses, and profitability compiled by the Fund's independent fee consultant. The Board also received extensive information throughout the year regarding performance of the Fund.
- The Trustees regularly meet privately with their independent counsel (and, as needed, other advisors) to discuss contract review and other matters. In addition, the Trustees were also advised by the Fund's independent fee consultant in the course of their review of the Fund's contractual arrangements and considered a comprehensive report prepared by the independent fee consultant in connection with their deliberations (the "IFC Report").
- In connection with reviewing the Agreement, the Board also reviewed the terms of the Fund's Rule 12b-1 plan, distribution agreement, administrative services agreement, transfer agency agreement and other material service agreements.

 Based on its evaluation of the information provided, the Contract Committee presented its findings and recommendations to the Independent Trustees as a group. The Independent Trustees reviewed the Contract Committee's findings and recommendations and presented their recommendations to the full Board.

In connection with the contract review process, the Contract Committee and the Board considered the factors discussed below, among others. The Board also considered that DIMA and its predecessors have managed the Fund since its inception, and the Board believes that a long-term relationship with a capable, conscientious advisor is in the best interests of the Fund. The Board considered, generally, that shareholders chose to invest or remain invested in the Fund knowing that DIMA managed the Fund, and that the Agreement was approved by the Fund's shareholders at a special meeting held in 2006. DIMA is part of Deutsche Bank, a major global banking institution that is engaged in a wide range of financial services. The Board believes that there are significant advantages to being part of a global asset management business that offers a wide range of investing expertise and resources, including hundreds of portfolio managers and analysts with research capabilities in many countries throughout the world.

While shareholders may focus primarily on fund performance and fees, the Fund's Board considers these and many other factors, including the quality and integrity of DIMA's personnel and such other issues as back-office operations, fund valuations, and compliance policies and procedures.

Nature, Quality and Extent of Services. The Board considered the terms of the Agreement, including the scope of advisory services provided under the Agreement. The Board noted that, under the Agreement, DIMA provides portfolio management services to the Fund and that, pursuant to a separate administrative services agreement, DIMA provides administrative services to the Fund. The Board considered the experience and skills of senior management and investment personnel, the resources made available to such personnel, the ability of DIMA to attract and retain high-quality personnel, and the organizational depth and stability of DIMA. The Board reviewed the Fund's performance over short-term and long-term periods and compared those returns to various agreed-upon performance measures, including market indices and a peer universe compiled by the independent fee consultant using information supplied by Lipper Inc. ("Lipper"). The Board also noted that it has put a process into place of identifying "Focus Funds" (e.g., funds performing poorly relative to their benchmark or a peer group compiled by Lipper), and receives more frequent reporting and information from DIMA regarding such funds, along with DIMA's remedial plans to address underperformance. The Board believes this process is an effective manner of identifying and addressing underperforming funds. Based on the information provided, the Board noted that for the one-, three- and five-year periods ended December 31, 2007, the Fund's performance (Class A shares) was in the 4th guartile, 4th guartile and 3rd guartile, respectively, of the applicable Lipper universe (the 1st quartile being the best performers and the 4th quartile being the worst performers). The Board also observed that the Fund has underperformed its benchmark in each of the one-, three- and five-year periods ended December 31, 2007. The Board noted the disappointing investment performance of the Fund in recent periods and continued to discuss with senior management of DIMA the factors contributing to such underperformance and actions being taken to improve performance. The Board also observed that the Fund had experienced improved relative performance during the first six months of 2008. The Board recognized that DIMA has made significant changes in its investment personnel and processes in recent years in an effort to improve long-term performance.

On the basis of this evaluation and the ongoing review of investment results by the Board, the Board concluded that the nature, quality and extent of services provided by DIMA historically have been and continue to be satisfactory.

**Fees and Expenses.** The Board considered the Fund's investment management fee schedule, operating expenses, and total expense ratios, and comparative information provided by Lipper and the independent fee consultant regarding investment management fee rates paid to other investment advisors by similar funds (1st quartile being the most favorable and 4th quartile being the least favorable). With respect to management fees paid to other investment advisors by similar funds (1st quartile being the least favorable). With respect to management fees paid to other investment advisors by similar funds, the Board noted that the contractual fee rates paid by the Fund, which include the 0.10% fee paid to DIMA under the Fund's administrative services agreement, were lower than the median (1st quartile) of the applicable Lipper peer group (based on Lipper data provided as of December 31, 2007). The Board noted that the Fund's Class A shares' total (net) operating expenses (excluding 12b-1 fees) were expected to be lower than the median (1st quartile) of the applicable of the applicable Lipper expense universe (based on Lipper expense universe (based on Lipper expense universe)

data provided as of December 31, 2007, and analyzing Lipper expense universe Class A expenses less any applicable 12b-1 fees) ("Lipper Universe Expenses"). The Board also reviewed each other share class's total (net) operating expenses relative to the Lipper Universe Expenses. The Board considered the Fund's management fee rate as compared to fees charged by DIMA and certain of its affiliates for comparable mutual funds and considered differences in fund and fee structures between the DWS Funds. The Board also considered how the Fund's total (net) operating expenses compared to the total (net) operating expenses of a more customized peer group selected by Lipper (based on such factors as asset size). The Board also noted that the expense limitations agreed to by DIMA helped to ensure that the Fund's total (net) operating expenses would be competitive relative to the applicable Lipper universe.

On the basis of the information provided, the Board concluded that management fees were reasonable and appropriate in light of the nature, quality and extent of services provided by DIMA.

**Profitability.** The Board reviewed detailed information regarding revenues received by DIMA under the Agreement. The Board considered the estimated costs and pre-tax profits realized by DIMA from advising the DWS Funds, as well as estimates of the pre-tax profits attributable to managing the Fund in particular. The Board also received information regarding the estimated enterprise-wide profitability of the DWS Investments organization with respect to all fund services in totality and by fund. The Board reviewed DIMA's methodology in allocating its costs to the management of the Fund. Based on the information provided, the Board concluded that the pre-tax profits realized by DIMA in connection with the management of the Fund were not unreasonable. The Board also reviewed information regarding the profitability of certain similar investment management firms. The Board noted that while information regarding the profitability of such firms is limited (and in some cases is not necessarily prepared on a comparable basis), DIMA and its affiliates' overall profitability with respect to the DWS Investments fund complex (after taking into account distribution and other services provided to the funds by DIMA and its affiliates) was lower than the overall profitability levels of many comparable firms for which such data was available.

**Economies of Scale.** The Board considered whether there are economies of scale with respect to the management of the Fund and whether the Fund benefits from any economies of scale. The Board noted that the Fund's management fee schedule includes fee breakpoints. The Board concluded that the Fund's fee schedule represents an appropriate sharing between the Fund and DIMA of such economies of scale as may exist in the management of the Fund at current asset levels.

**Other Benefits to DIMA and Its Affiliates.** The Board also considered the character and amount of other incidental benefits received by DIMA and its affiliates, including any fees received by DIMA for administrative services provided to the Fund and any fees received by an affiliate of DIMA for distribution services. The Board also considered benefits to DIMA related to brokerage and soft-dollar allocations, including allocating brokerage to pay for research generated by parties other than the executing broker dealers, which pertain primarily to funds investing in equity securities, along with the incidental public relations benefits to DIMA related to DWS Funds advertising and cross-selling opportunities among DWS Investments products and services. The Board concluded that management fees were reasonable in light of these fallout benefits.

**Compliance.** The Board considered the significant attention and resources dedicated by DIMA to documenting and enhancing its compliance processes in recent years. The Board noted in particular (i) the experience and seniority of DIMA's chief compliance officer; (ii) the large number of compliance personnel who report to DIMA's chief compliance officer; and (iii) the substantial commitment of resources by DIMA and its affiliates to compliance matters.

Based on all of the information considered and the conclusions reached, the Board (including a majority of the Independent Trustees) determined that the continuation of the Agreement is in the best interests of the Fund. In making this determination the Board did not give particular weight to any single factor identified above. The Board considered these factors over the course of numerous meetings, certain of which were in executive session with only the Independent Trustees and their counsel present. It is possible that individual Trustees may have weighed these factors differently in reaching their individual decisions to approve the continuation of the Agreement.

#### **DWS Capital Growth VIP**

The Board of Trustees, including the Independent Trustees, approved the renewal of your Fund's investment management agreement (the "Agreement") with Deutsche Investment Management Americas Inc. ("DIMA") in September 2008.

In terms of the process that the Board followed prior to approving the Agreement, shareholders should know that:

- At the present time, all but one of your Fund's Trustees are independent of DIMA and its affiliates.
- The Trustees meet frequently to discuss fund matters. Each year, the Trustees dedicate part or all of several meetings to contract review matters. Over the course of several months, the Board's Contract Committee, in coordination with the Board's Equity Oversight Committee, reviewed comprehensive materials received from DIMA, independent third parties and independent counsel. These materials included an analysis of the Fund's performance, fees and expenses, and profitability compiled by the Fund's independent fee consultant. The Board also received extensive information throughout the year regarding performance of the Fund.
- The Trustees regularly meet privately with their independent counsel (and, as needed, other advisors) to
  discuss contract review and other matters. In addition, the Trustees were also advised by the Fund's
  independent fee consultant in the course of their review of the Fund's contractual arrangements and
  considered a comprehensive report prepared by the independent fee consultant in connection with their
  deliberations (the "IFC Report").
- In connection with reviewing the Agreement, the Board also reviewed the terms of the Fund's Rule 12b-1 plan, distribution agreement, administrative services agreement, transfer agency agreement and other material service agreements.
- Based on its evaluation of the information provided, the Contract Committee presented its findings and
  recommendations to the Independent Trustees as a group. The Independent Trustees reviewed the Contract
  Committee's findings and recommendations and presented their recommendations to the full Board.

In connection with the contract review process, the Contract Committee and the Board considered the factors discussed below, among others. The Board also considered that DIMA and its predecessors have managed the Fund since its inception, and the Board believes that a long-term relationship with a capable, conscientious advisor is in the best interests of the Fund. The Board considered, generally, that shareholders chose to invest or remain invested in the Fund knowing that DIMA managed the Fund, and that the Agreement was approved by the Fund's shareholders at a special meeting held in 2006. DIMA is part of Deutsche Bank, a major global banking institution that is engaged in a wide range of financial services. The Board believes that there are significant advantages to being part of a global asset management business that offers a wide range of investing expertise and resources, including hundreds of portfolio managers and analysts with research capabilities in many countries throughout the world.

While shareholders may focus primarily on fund performance and fees, the Fund's Board considers these and many other factors, including the quality and integrity of DIMA's personnel and such other issues as back-office operations, fund valuations, and compliance policies and procedures.

**Nature, Quality and Extent of Services.** The Board considered the terms of the Agreements, including the scope of advisory services provided under the Agreement. The Board noted that, under the Agreement, DIMA provides portfolio management services to the Fund and that, pursuant to a separate administrative services agreement, DIMA provides administrative services to the Fund. The Board considered the experience and skills of senior management and investment personnel, the resources made available to such personnel, the ability of DIMA to attract and retain high-quality personnel, and the organizational depth and stability of DIMA. The Board reviewed the Fund's performance over short-term and long-term periods and compared those returns to various agreed-upon performance measures, including market indices and a peer universe compiled by the independent fee consultant using information supplied by Lipper Inc. ("Lipper"). The Board also noted that it has put a process into place of identifying "Focus Funds" (e.g., funds performing poorly relative to their benchmark or a peer group compiled by Lipper), and receives more frequent reporting and information from DIMA regarding such funds, along with DIMA's remedial plans to address underperformance. The Board believes this process is an effective

manner of identifying and addressing underperforming funds. Based on the information provided, the Board noted that for the one-, three- and five-year periods ended December 31, 2007, the Fund's performance (Class A shares) was in the 3rd quartile, 2nd quartile and 2nd quartile, respectively, of the applicable Lipper universe (the 1st quartile being the best performers and the 4th quartile being the worst performers). The Board also observed that the Fund has outperformed its benchmark in each of the one-, three- and five-year periods ended December 31, 2007. The Board recognized that DIMA has made significant changes in its investment personnel and processes in recent years in an effort to improve long-term performance.

On the basis of this evaluation and the ongoing review of investment results by the Board, the Board concluded that the nature, quality and extent of services provided by DIMA historically have been and continue to be satisfactory.

Fees and Expenses. The Board considered the Fund's investment management fee schedule, operating expenses, and total expense ratios, and comparative information provided by Lipper and the independent fee consultant regarding investment management fee rates paid to other investment advisors by similar funds (1st guartile being the most favorable and 4th quartile being the least favorable). With respect to management fees paid to other investment advisors by similar funds, the Board noted that the contractual fee rates paid by the Fund, which include the 0.10% fee paid to DIMA under the Fund's administrative services agreement, were lower than the median (1st quartile) of the applicable Lipper peer group (based on Lipper data provided as of December 31, 2007). The Board noted that the Fund's Class A shares' total (net) operating expenses (excluding 12b-1 fees) were expected to be lower than the median (1st quartile) of the applicable Lipper expense universe (based on Lipper data provided as of December 31, 2007, and analyzing Lipper expense universe Class A expenses less any applicable 12b-1 fees) ("Lipper Universe Expenses"). The Board also reviewed each other share class's total (net) operating expenses relative to the Lipper Universe Expenses. The Board considered the Fund's management fee rate as compared to fees charged by DIMA and certain of its affiliates for comparable mutual funds and considered differences in fund and fee structures between the DWS Funds. The Board also considered how the Fund's total (net) operating expenses compared to the total (net) operating expenses of a more customized peer group selected by Lipper (based on such factors as asset size). The Board also noted that the expense limitations agreed to by DIMA helped to ensure that the Fund's total (net) operating expenses would be competitive relative to the applicable Lipper universe.

On the basis of the information provided, the Board concluded that management fees were reasonable and appropriate in light of the nature, quality and extent of services provided by DIMA.

**Profitability**. The Board reviewed detailed information regarding revenues received by DIMA under the Agreement. The Board considered the estimated costs and pre-tax profits realized by DIMA from advising the DWS Funds, as well as estimates of the pre-tax profits attributable to managing the Fund in particular. The Board also received information regarding the estimated enterprise-wide profitability of the DWS Investments organization with respect to all fund services in totality and by fund. The Board reviewed DIMA's methodology in allocating its costs to the management of the Fund. Based on the information provided, the Board concluded that the pre-tax profits realized by DIMA in connection with the management of the Fund were not unreasonable. The Board also reviewed information regarding the profitability of such firms is limited (and in some cases is not necessarily prepared on a comparable basis), DIMA and its affiliates' overall profitability with respect to the DWS Investments fund complex (after taking into account distribution and other services provided to the funds by DIMA and its affiliates) was lower than the overall profitability levels of many comparable firms for which such data was available.

**Economies of Scale.** The Board considered whether there are economies of scale with respect to the management of the Fund and whether the Fund benefits from any economies of scale. The Board noted that the Fund's management fee schedule includes fee breakpoints. The Board concluded that the Fund's fee schedule represents an appropriate sharing between the Fund and DIMA of such economies of scale as may exist in the management of the Fund at current asset levels.

**Other Benefits to DIMA and Its Affiliates.** The Board also considered the character and amount of other incidental benefits received by DIMA and its affiliates, including any fees received by DIMA for administrative services provided to the Fund and any fees received by an affiliate of DIMA for distribution services. The Board also

considered benefits to DIMA related to brokerage and soft-dollar allocations, including allocating brokerage to pay for research generated by parties other than the executing broker dealers, which pertain primarily to funds investing in equity securities, along with the incidental public relations benefits to DIMA related to DWS Funds advertising and cross-selling opportunities among DWS Investments products and services. The Board concluded that management fees were reasonable in light of these fallout benefits.

**Compliance.** The Board considered the significant attention and resources dedicated by DIMA to documenting and enhancing its compliance processes in recent years. The Board noted in particular (i) the experience and seniority of DIMA's chief compliance officer; (ii) the large number of compliance personnel who report to DIMA's chief compliance officer; and (iii) the substantial commitment of resources by DIMA and its affiliates to compliance matters.

Based on all of the information considered and the conclusions reached, the Board (including a majority of the Independent Trustees) determined that the continuation of the Agreement is in the best interests of the Fund. In making this determination the Board did not give particular weight to any single factor identified above. The Board considered these factors over the course of numerous meetings, certain of which were in executive session with only the Independent Trustees and their counsel present. It is possible that individual Trustees may have weighed these factors differently in reaching their individual decisions to approve the continuation of the Agreement.

#### **DWS Global Opportunities VIP**

The Board of Trustees, including the Independent Trustees, approved the renewal of your Fund's investment management agreement (the "Agreement") with Deutsche Investment Management Americas Inc. ("DIMA") in September 2008.

In terms of the process that the Board followed prior to approving the Agreement, shareholders should know that:

- At the present time, all but one of your Fund's Trustees are independent of DIMA and its affiliates.
- The Trustees meet frequently to discuss fund matters. Each year, the Trustees dedicate part or all of several meetings to contract review matters. Over the course of several months, the Board's Contract Committee, in coordination with the Board's Equity Oversight Committee, reviewed comprehensive materials received from DIMA, independent third parties and independent counsel. These materials included an analysis of the Fund's performance, fees and expenses, and profitability compiled by the Fund's independent fee consultant. The Board also received extensive information throughout the year regarding performance of the Fund.
- The Trustees regularly meet privately with their independent counsel (and, as needed, other advisors) to
  discuss contract review and other matters. In addition, the Trustees were also advised by the Fund's
  independent fee consultant in the course of their review of the Fund's contractual arrangements and
  considered a comprehensive report prepared by the independent fee consultant in connection with their
  deliberations (the "IFC Report").
- In connection with reviewing the Agreement, the Board also reviewed the terms of the Fund's Rule 12b-1 plan, distribution agreement, administrative services agreement, transfer agency agreement and other material service agreements.
- Based on its evaluation of the information provided, the Contract Committee presented its findings and recommendations to the Independent Trustees as a group. The Independent Trustees reviewed the Contract Committee's findings and recommendations and presented their recommendations to the full Board.

In connection with the contract review process, the Contract Committee and the Board considered the factors discussed below, among others. The Board also considered that DIMA and its predecessors have managed the Fund since its inception, and the Board believes that a long-term relationship with a capable, conscientious advisor is in the best interests of the Fund. The Board considered, generally, that shareholders chose to invest or remain invested in the Fund knowing that DIMA managed the Fund, and that the Agreement was approved by the Fund's shareholders at a special meeting held in 2006. DIMA is part of Deutsche Bank, a major global banking institution that is engaged in a wide range of financial services. The Board believes that there are significant advantages to being part of a global asset management business that offers a wide range of investing expertise

and resources, including hundreds of portfolio managers and analysts with research capabilities in many countries throughout the world.

While shareholders may focus primarily on fund performance and fees, the Fund's Board considers these and many other factors, including the quality and integrity of DIMA's personnel and such other issues as back-office operations, fund valuations, and compliance policies and procedures.

Nature, Quality and Extent of Services. The Board considered the terms of the Agreement, including the scope of advisory services provided under the Agreement. The Board noted that, under the Agreement, DIMA provides portfolio management services to the Fund and that, pursuant to a separate administrative services agreement, DIMA provides administrative services to the Fund. The Board considered the experience and skills of senior management and investment personnel, the resources made available to such personnel, the ability of DIMA to attract and retain high-quality personnel, and the organizational depth and stability of DIMA. The Board reviewed the Fund's performance over short-term and long-term periods and compared those returns to various agreed-upon performance measures, including market indices and a peer universe compiled by the independent fee consultant using information supplied by Lipper Inc. ("Lipper"). The Board also noted that it has put a process into place of identifying "Focus Funds" (e.g., funds performing poorly relative to their benchmark or a peer group compiled by Lipper), and receives more frequent reporting and information from DIMA regarding such funds, along with DIMA's remedial plans to address underperformance. The Board believes this process is an effective manner of identifying and addressing underperforming funds. Based on the information provided, the Board noted that for the one-, three- and five-year periods ended December 31, 2007, the Fund's performance (Class A shares) was in the 3rd quartile, 1st quartile and 1st quartile, respectively, of the applicable Lipper universe (the 1st quartile being the best performers and the 4th quartile being the worst performers). The Board also observed that the Fund has outperformed its benchmark in each of the one-, three- and five-year periods ended December 31, 2007. The Board recognized that DIMA has made significant changes in its investment personnel and processes in recent years in an effort to improve long-term performance.

On the basis of this evaluation and the ongoing review of investment results by the Board, the Board concluded that the nature, quality and extent of services provided by DIMA historically have been and continue to be satisfactory.

Fees and Expenses. The Board considered the Fund's investment management fee schedule, operating expenses, and total expense ratios, and comparative information provided by Lipper and the independent fee consultant regarding investment management fee rates paid to other investment advisors by similar funds (1st guartile being the most favorable and 4th guartile being the least favorable). With respect to management fees paid to other investment advisors by similar funds, the Board noted that the contractual fee rates paid by the Fund, which include the 0.10% fee paid to DIMA under the Fund's administrative services agreement, were higher than the median (4th quartile) of the applicable Lipper peer group (based on Lipper data provided as of December 31, 2007). The Board noted that the Fund's Class A shares' total (net) operating expenses (excluding 12b-1 fees) were expected to be higher than the median (3rd quartile) of the applicable Lipper expense universe (based on Lipper data provided as of December 31, 2007, and analyzing Lipper expense universe Class A expenses less any applicable 12b-1 fees) ("Lipper Universe Expenses"). The Board also reviewed each other share class's total (net) operating expenses relative to the Lipper Universe Expenses. The Board considered the Fund's management fee rate as compared to fees charged by DIMA and certain of its affiliates for comparable mutual funds and considered differences in fund and fee structures between the DWS Funds. The Board also considered how the Fund's total (net) operating expenses compared to the total (net) operating expenses of a more customized peer group selected by Lipper (based on such factors as asset size). The Board also noted that the expense limitations agreed to by DIMA helped to ensure that the Fund's total (net) operating expenses would be competitive relative to the applicable Lipper universe.

On the basis of the information provided, the Board concluded that management fees were reasonable and appropriate in light of the nature, quality and extent of services provided by DIMA.

**Profitability.** The Board reviewed detailed information regarding revenues received by DIMA under the Agreement. The Board considered the estimated costs and pre-tax profits realized by DIMA from advising the DWS Funds, as well as estimates of the pre-tax profits attributable to managing the Fund in particular. The Board also received information regarding the estimated enterprise-wide profitability of the DWS Investments

organization with respect to all fund services in totality and by fund. The Board reviewed DIMA's methodology in allocating its costs to the management of the Fund. Based on the information provided, the Board concluded that the pre-tax profits realized by DIMA in connection with the management of the Fund were not unreasonable. The Board also reviewed information regarding the profitability of certain similar investment management firms. The Board noted that while information regarding the profitability of such firms is limited (and in some cases is not necessarily prepared on a comparable basis), DIMA and its affiliates' overall profitability with respect to the DWS Investments fund complex (after taking into account distribution and other services provided to the funds by DIMA and its affiliates) was lower than the overall profitability levels of many comparable firms for which such data was available.

**Economies of Scale.** The Board considered whether there are economies of scale with respect to the management of the Fund and whether the Fund benefits from any economies of scale. The Board noted that the Fund's management fee schedule includes fee breakpoints. The Board concluded that the Fund's fee schedule represents an appropriate sharing between the Fund and DIMA of such economies of scale as may exist in the management of the Fund at current asset levels.

**Other Benefits to DIMA and Its Affiliates.** The Board also considered the character and amount of other incidental benefits received by DIMA and its affiliates, including any fees received by DIMA for administrative services provided to the Fund and any fees received by an affiliate of DIMA for distribution services. The Board also considered benefits to DIMA related to brokerage and soft-dollar allocations, including allocating brokerage to pay for research generated by parties other than the executing broker dealers, which pertain primarily to funds investing in equity securities, along with the incidental public relations benefits to DIMA related to DWS Funds advertising and cross-selling opportunities among DWS Investments products and services. The Board concluded that management fees were reasonable in light of these fallout benefits.

**Compliance.** The Board considered the significant attention and resources dedicated by DIMA to documenting and enhancing its compliance processes in recent years. The Board noted in particular (i) the experience and seniority of DIMA's chief compliance officer; (ii) the large number of compliance personnel who report to DIMA's chief compliance officer; and (iii) the substantial commitment of resources by DIMA and its affiliates to compliance matters.

Based on all of the information considered and the conclusions reached, the Board (including a majority of the Independent Trustees) determined that the continuation of the Agreement is in the best interests of the Fund. In making this determination the Board did not give particular weight to any single factor identified above. The Board considered these factors over the course of numerous meetings, certain of which were in executive session with only the Independent Trustees and their counsel present. It is possible that individual Trustees may have weighed these factors differently in reaching their individual decisions to approve the continuation of the Agreement.

#### **DWS International VIP**

The Board of Trustees, including the Independent Trustees, approved the renewal of your Fund's investment management agreement (the "Agreement") with Deutsche Investment Management Americas Inc. ("DIMA") in September 2008.

In terms of the process that the Board followed prior to approving the Agreement, shareholders should know that:

- At the present time, all but one of your Fund's Trustees are independent of DIMA and its affiliates.
- The Trustees meet frequently to discuss fund matters. Each year, the Trustees dedicate part or all of several meetings to contract review matters. Over the course of several months, the Board's Contract Committee, in coordination with the Board's Equity Oversight Committee, reviewed comprehensive materials received from DIMA, independent third parties and independent counsel. These materials included an analysis of the Fund's performance, fees and expenses, and profitability compiled by the Fund's independent fee consultant. The Board also received extensive information throughout the year regarding performance of the Fund.
- The Trustees regularly meet privately with their independent counsel (and, as needed, other advisors) to discuss contract review and other matters. In addition, the Trustees were also advised by the Fund's independent fee consultant in the course of their review of the Fund's contractual arrangements and

considered a comprehensive report prepared by the independent fee consultant in connection with their deliberations (the "IFC Report").

- In connection with reviewing the Agreement, the Board also reviewed the terms of the Fund's Rule 12b-1 plan, distribution agreement, administrative services agreement, transfer agency agreement and other material service agreements.
- Based on its evaluation of the information provided, the Contract Committee presented its findings and recommendations to the Independent Trustees as a group. The Independent Trustees reviewed the Contract Committee's findings and recommendations and presented their recommendations to the full Board.

In connection with the contract review process, the Contract Committee and the Board considered the factors discussed below, among others. The Board also considered that DIMA and its predecessors have managed the Fund since its inception, and the Board believes that a long-term relationship with a capable, conscientious advisor is in the best interests of the Fund. The Board considered, generally, that shareholders chose to invest or remain invested in the Fund knowing that DIMA managed the Fund, and that the Agreement was approved by the Fund's shareholders at a special meeting held in 2006. DIMA is part of Deutsche Bank, a major global banking institution that is engaged in a wide range of financial services. The Board believes that there are significant advantages to being part of a global asset management business that offers a wide range of investing expertise and resources, including hundreds of portfolio managers and analysts with research capabilities in many countries throughout the world.

While shareholders may focus primarily on fund performance and fees, the Fund's Board considers these and many other factors, including the quality and integrity of DIMA's personnel and such other issues as back-office operations, fund valuations, and compliance policies and procedures.

Nature, Quality and Extent of Services. The Board considered the terms of the Agreement, including the scope of advisory services provided under the Agreement. The Board noted that, under the Agreement, DIMA provides portfolio management services to the Fund and that, pursuant to a separate administrative services agreement, DIMA provides administrative services to the Fund. The Board considered the experience and skills of senior management and investment personnel, the resources made available to such personnel, the ability of DIMA to attract and retain high-guality personnel, and the organizational depth and stability of DIMA. The Board reviewed the Fund's performance over short-term and long-term periods and compared those returns to various agreed-upon performance measures, including market indices and a peer universe compiled by the independent fee consultant using information supplied by Lipper Inc. ("Lipper"). The Board also noted that it has put a process into place of identifying "Focus Funds" (e.g., funds performing poorly relative to their benchmark or a peer group compiled by Lipper), and receives more frequent reporting and information from DIMA regarding such funds, along with DIMA's remedial plans to address underperformance. The Board believes this process is an effective manner of identifying and addressing underperforming funds. Based on the information provided, the Board noted that for the one-, three- and five-year periods ended December 31, 2007, the Fund's performance (Class A shares) was in the 2nd quartile, 1st quartile and 3rd quartile, respectively, of the applicable Lipper universe (the 1st quartile being the best performers and the 4th quartile being the worst performers). The Board also observed that the Fund has outperformed its benchmark in the one- and three-year periods ended December 31, 2007 and has underperformed its benchmark in the five-year period ended December 31, 2007. The Board recognized that DIMA has made significant changes in its investment personnel and processes in recent years in an effort to improve long-term performance.

On the basis of this evaluation and the ongoing review of investment results by the Board, the Board concluded that the nature, quality and extent of services provided by DIMA historically have been and continue to be satisfactory.

**Fees and Expenses.** The Board considered the Fund's investment management fee schedule, operating expenses, and total expense ratios, and comparative information provided by Lipper and the independent fee consultant regarding investment management fee rates paid to other investment advisors by similar funds (1st quartile being the most favorable and 4th quartile being the least favorable). With respect to management fees paid to other investment advisors by similar funds, the Board noted that the contractual fee rates paid by the Fund, which include the 0.10% fee paid to DIMA under the Fund's administrative services agreement, were higher than the

median (4th quartile) of the applicable Lipper peer group (based on Lipper data provided as of December 31, 2007). The Board noted that the Fund's Class A shares' total (net) operating expenses (excluding 12b-1 fees) were expected to be higher than the median (3rd quartile) of the applicable Lipper expense universe (based on Lipper data provided as of December 31, 2007, and analyzing Lipper expense universe Class A expenses less any applicable 12b-1 fees) ("Lipper Universe Expenses"). The Board also reviewed each other share class's total (net) operating expenses relative to the Lipper Universe Expenses. The Board considered the Fund's management fee rate as compared to fees charged by DIMA and certain of its affiliates for comparable mutual funds and considered differences in fund and fee structures between the DWS Funds. The Board also considered how the Fund's total (net) operating expenses compared to the total (net) operating expenses of a more customized peer group selected by Lipper (based on such factors as asset size). The Board also noted that the expense limitations agreed to by DIMA helped to ensure that the Fund's total (net) operating expenses would be competitive relative to the applicable Lipper universe.

On the basis of the information provided, the Board concluded that management fees were reasonable and appropriate in light of the nature, quality and extent of services provided by DIMA.

**Profitability.** The Board reviewed detailed information regarding revenues received by DIMA under the Agreement. The Board considered the estimated costs and pre-tax profits realized by DIMA from advising the DWS Funds, as well as estimates of the pre-tax profits attributable to managing the Fund in particular. The Board also received information regarding the estimated enterprise-wide profitability of the DWS Investments organization with respect to all fund services in totality and by fund. The Board reviewed DIMA's methodology in allocating its costs to the management of the Fund. Based on the information provided, the Board concluded that the pre-tax profits realized by DIMA in connection with the management of the Fund were not unreasonable. The Board also reviewed information regarding the profitability of such firms is limited (and in some cases is not necessarily prepared on a comparable basis), DIMA and its affiliates' overall profitability with respect to the DWS Investments fund complex (after taking into account distribution and other services provided to the funds by DIMA and its affiliates) was lower than the overall profitability levels of many comparable firms for which such data was available.

**Economies of Scale.** The Board considered whether there are economies of scale with respect to the management of the Fund and whether the Fund benefits from any economies of scale. The Board noted that the Fund's management fee schedule includes fee breakpoints. The Board concluded that the Fund's fee schedule represents an appropriate sharing between the Fund and DIMA of such economies of scale as may exist in the management of the Fund at current asset levels.

**Other Benefits to DIMA and Its Affiliates**. The Board also considered the character and amount of other incidental benefits received by DIMA and its affiliates, including any fees received by DIMA for administrative services provided to the Fund and any fees received by an affiliate of DIMA for distribution services. The Board also considered benefits to DIMA related to brokerage and soft-dollar allocations, including allocating brokerage to pay for research generated by parties other than the executing broker dealers, which pertain primarily to funds investing in equity securities, along with the incidental public relations benefits to DIMA related to DWS Funds advertising and cross-selling opportunities among DWS Investments products and services. The Board concluded that management fees were reasonable in light of these fallout benefits.

**Compliance.** The Board considered the significant attention and resources dedicated by DIMA to documenting and enhancing its compliance processes in recent years. The Board noted in particular (i) the experience and seniority of DIMA's chief compliance officer; (ii) the large number of compliance personnel who report to DIMA's chief compliance officer; and (iii) the substantial commitment of resources by DIMA and its affiliates to compliance matters.

Based on all of the information considered and the conclusions reached, the Board (including a majority of the Independent Trustees) determined that the continuation of the Agreement is in the best interests of the Fund. In making this determination the Board did not give particular weight to any single factor identified above. The Board considered these factors over the course of numerous meetings, certain of which were in executive session with only the Independent Trustees and their counsel present. It is possible that individual Trustees may have weighed these factors differently in reaching their individual decisions to approve the continuation of the Agreement.

#### **DWS Health Care VIP**

The Board of Trustees, including the Independent Trustees, approved the renewal of your Fund's investment management agreement (the "Agreement") with Deutsche Investment Management Americas Inc. ("DIMA") in September 2008.

In terms of the process that the Board followed prior to approving the Agreement, shareholders should know that:

- At the present time, all but one of your Fund's Trustees are independent of DIMA and its affiliates.
- The Trustees meet frequently to discuss fund matters. Each year, the Trustees dedicate part or all of several meetings to contract review matters. Over the course of several months, the Board's Contract Committee, in coordination with the Board's Equity, reviewed comprehensive materials received from DIMA, independent third parties and independent counsel. These materials included an analysis of the Fund's performance, fees and expenses, and profitability compiled by the Fund's independent fee consultant. The Board also received extensive information throughout the year regarding performance of the Fund.
- The Trustees regularly meet privately with their independent counsel (and, as needed, other advisors) to
  discuss contract review and other matters. In addition, the Trustees were also advised by the Fund's
  independent fee consultant in the course of their review of the Fund's contractual arrangements and
  considered a comprehensive report prepared by the independent fee consultant in connection with their
  deliberations (the "IFC Report").
- In connection with reviewing the Agreement, the Board also reviewed the terms of the Fund's Rule 12b-1 plan, distribution agreement, administrative services agreement, transfer agency agreement and other material service agreements.
- Based on its evaluation of the information provided, the Contract Committee presented its findings and
  recommendations to the Independent Trustees as a group. The Independent Trustees reviewed the Contract
  Committee's findings and recommendations and presented their recommendations to the full Board.

In connection with the contract review process, the Contract Committee and the Board considered the factors discussed below, among others. The Board also considered that DIMA and its predecessors have managed the Fund since its inception, and the Board believes that a long-term relationship with a capable, conscientious advisor is in the best interests of the Fund. The Board considered, generally, that shareholders chose to invest or remain invested in the Fund knowing that DIMA managed the Fund, and that the Agreement was approved by the Fund's shareholders at a special meeting held in 2006. DIMA is part of Deutsche Bank, a major global banking institution that is engaged in a wide range of financial services. The Board believes that there are significant advantages to being part of a global asset management business that offers a wide range of investing expertise and resources, including hundreds of portfolio managers and analysts with research capabilities in many countries throughout the world.

While shareholders may focus primarily on fund performance and fees, the Fund's Board considers these and many other factors, including the quality and integrity of DIMA's personnel and such other issues as back-office operations, fund valuations, and compliance policies and procedures.

**Nature, Quality and Extent of Services.** The Board considered the terms of the Agreement, including the scope of advisory services provided under the Agreement. The Board noted that, under the Agreement, DIMA provides portfolio management services to the Fund and that, pursuant to a separate administrative services agreement, DIMA provides administrative services to the Fund. The Board considered the experience and skills of senior management and investment personnel, the resources made available to such personnel, the ability of DIMA to attract and retain high-quality personnel, and the organizational depth and stability of DIMA. The Board reviewed the Fund's performance over short-term and long-term periods and compared those returns to various agreed-upon performance measures, including market indices and a peer universe compiled by the independent fee consultant using information supplied by Lipper Inc. ("Lipper"). The Board also noted that it has put a process into place of identifying "Focus Funds" (e.g., funds performing poorly relative to their benchmark or a peer group compiled by Lipper), and receives more frequent reporting and information from DIMA regarding such funds, along with DIMA's remedial plans to address underperformance. The Board believes this process is an effective

manner of identifying and addressing underperforming funds. Based on the information provided, the Board noted that for the one-, three- and five-year periods ended December 31, 2007, the Fund's performance (Class A shares) was in the 2nd quartile, 3rd quartile and 3rd quartile, respectively, of the applicable Lipper universe (the 1st quartile being the best performers and the 4th quartile being the worst performers). The Board also observed that the Fund has outperformed its benchmark in the one-, three- and five-year periods ended December 31, 2007. The Board recognized that DIMA has made significant changes in its investment personnel and processes in recent years in an effort to improve long-term performance.

On the basis of this evaluation and the ongoing review of investment results by the Board, the Board concluded that the nature, quality and extent of services provided by DIMA historically have been and continue to be satisfactory.

Fees and Expenses. The Board considered the Fund's investment management fee schedule, operating expenses, and total expense ratios, and comparative information provided by Lipper and the independent fee consultant regarding investment management fee rates paid to other investment advisors by similar funds (1st quartile being the most favorable and 4th quartile being the least favorable). With respect to management fees paid to other investment advisors by similar funds, the Board noted that the contractual fee rates paid by the Fund, which include the 0.10% fee paid to DIMA under the Fund's administrative services agreement, were lower than the median (2nd quartile) of the applicable Lipper peer group (based on Lipper data provided as of December 31, 2007). The Board noted that the Fund's Class A shares' total (net) operating expenses (excluding 12b-1 fees) were expected to be lower than the median (2nd quartile) of the applicable Lipper expense universe (based on Lipper data provided as of December 31, 2007, and analyzing Lipper expense universe Class A expenses less any applicable 12b-1 fees) ("Lipper Universe Expenses"). The Board also reviewed each other share class's total (net) operating expenses relative to the Lipper Universe Expenses. The Board considered the Fund's management fee rate as compared to fees charged by DIMA and certain of its affiliates for comparable mutual funds and considered differences in fund and fee structures between the DWS Funds. The Board also considered how the Fund's total (net) operating expenses compared to the total (net) operating expenses of a more customized peer group selected by Lipper (based on such factors as asset size). The Board also noted that the expense limitation agreed to by DIMA helped to ensure that the Fund's total (net) operating expenses would be competitive relative to the applicable Lipper universe.

On the basis of the information provided, the Board concluded that management fees were reasonable and appropriate in light of the nature, quality and extent of services provided by DIMA.

**Profitability.** The Board reviewed detailed information regarding revenues received by DIMA under the Agreement. The Board considered the estimated costs and pre-tax profits realized by DIMA from advising the DWS Funds, as well as estimates of the pre-tax profits attributable to managing the Fund in particular. The Board also received information regarding the estimated enterprise-wide profitability of the DWS Investments organization with respect to all fund services in totality and by fund. The Board reviewed DIMA's methodology in allocating its costs to the management of the Fund. Based on the information provided, the Board concluded that the pre-tax profits realized by DIMA in connection with the management of the Fund were not unreasonable. The Board also reviewed information regarding the profitability of such firms is limited (and in some cases is not necessarily prepared on a comparable basis), DIMA and its affiliates' overall profitability with respect to the DWS Investments fund complex (after taking into account distribution and other services provided to the funds by DIMA and its affiliates) was lower than the overall profitability levels of many comparable firms for which such data was available.

**Economies of Scale.** The Board considered whether there are economies of scale with respect to the management of the Fund and whether the Fund benefits from any economies of scale. The Board noted that the Fund's management fee schedule includes fee breakpoints. The Board concluded that the Fund's fee schedule represents an appropriate sharing between the Fund and DIMA of such economies of scale as may exist in the management of the Fund at current asset levels.

**Other Benefits to DIMA and Its Affiliates.** The Board also considered the character and amount of other incidental benefits received by DIMA and its affiliates, including any fees received by DIMA for administrative services provided to the Fund and any fees received by an affiliate of DIMA for distribution services. The Board also

considered benefits to DIMA related to brokerage and soft-dollar allocations, including allocating brokerage to pay for research generated by parties other than the executing broker dealers, which pertain primarily to funds investing in equity securities, along with the incidental public relations benefits to DIMA related to DWS Funds advertising and cross-selling opportunities among DWS Investments products and services. The Board concluded that management fees were reasonable in light of these fallout benefits.

**Compliance.** The Board considered the significant attention and resources dedicated by DIMA to documenting and enhancing its compliance processes in recent years. The Board noted in particular (i) the experience and seniority of DIMA's chief compliance officer; (ii) the large number of compliance personnel who report to DIMA's chief compliance officer; and (iii) the substantial commitment of resources by DIMA and its affiliates to compliance matters.

Based on all of the information considered and the conclusions reached, the Board (including a majority of the Independent Trustees) determined that the continuation of the Agreement is in the best interests of the Fund. In making this determination the Board did not give particular weight to any single factor identified above. The Board considered these factors over the course of numerous meetings, certain of which were in executive session with only the Independent Trustees and their counsel present. It is possible that individual Trustees may have weighed these factors differently in reaching their individual decisions to approve the continuation of the Agreement.

# Summary of Management Fee Evaluation by Independent Fee Consultant

#### October 24, 2008

Pursuant to an Order entered into by Deutsche Investment Management Americas and affiliates (collectively, "DeAM") with the Attorney General of New York, I, Thomas H. Mack, have been appointed the Independent Fee Consultant for the DWS Funds (formerly the DWS Scudder Funds). My duties include preparing an annual written evaluation of the management fees DeAM charges the Funds, considering among other factors the management fees charged by other mutual fund companies for like services, management fees DeAM charges other clients for like services, DeAM's costs of supplying services under the management agreements and related profit margins, possible economies of scale if a Fund grows larger, and the nature and quality of DeAM's services, including fund performance. This report summarizes my evaluation for 2008, including my qualifications, the evaluation process for each of the DWS Funds, consideration of certain complex-level factors, and my conclusions. I served in substantially the same capacity in 2007.

#### Qualifications

For more than 35 years I have served in various professional capacities within the investment management business. I have held investment analysis and advisory positions, including securities analyst, portfolio strategist and director of investment policy with a large investment firm. I have also performed business management functions, including business development, financial management and marketing research and analysis.

Since 1991, I have been an independent consultant within the asset management industry. I have provided services to over 125 client organizations, including investment managers, mutual fund boards, product distributors and related organizations. Over the past ten years I have completed a number of assignments for mutual fund boards, specifically including assisting boards with management contract renewal.

I hold a Master of Business Administration degree, with highest honors, from Harvard University and Master of Science and Bachelor of Science (highest honors) degrees from the University of California at Berkeley. I am an independent director and audit committee financial expert for two closed-end mutual funds, serve on the board of directors of a private market research company, and have served in various leadership and financial oversight capacities with non-profit organizations.

#### **Evaluation of Fees for each DWS Fund**

My work focused primarily on evaluating, fund-by-fund, the fees charged to each of the 129 Fund portfolios in the DWS Fund family. For each Fund, I considered each of the key factors mentioned above, as well as any other relevant information. In doing so I worked closely with the Funds' Independent Directors in their annual contract renewal process, as well as in their approval of contracts for several new funds (documented separately).

In evaluating each Fund's fees, I reviewed comprehensive materials provided by or on behalf of DeAM, including expense information prepared by Lipper Analytical, comparative performance information, profitability data, manager histories, and other materials. I also accessed certain additional information from the Lipper, Strategic Insight, and Morningstar databases and drew on my industry knowledge and experience.

To facilitate evaluating this considerable body of information, I prepared for each Fund a document summarizing the key data elements in each area as well as additional analytics discussed below. This made it possible to consider each key data element in the context of the others.

In the course of contract renewal, DeAM agreed to implement a number of fee and expense adjustments requested by the Independent Directors which will favorably impact future fees and expenses, and my evaluation includes the effects of these changes.

#### Fees and Expenses Compared with Other Funds

The competitive fee and expense evaluation for each fund focused on two primary comparisons:

The Fund's contractual management fee (the advisory fee plus the administration fee where applicable) compared with those of a group of typically 12–15 funds in the same Lipper investment category (e.g. Large Capitalization Growth) having similar distribution arrangements and being of similar size.

The Fund's total expenses compared with a broader universe of funds from the same Lipper investment category and having similar distribution arrangements.

These two comparisons provide a view of not only the level of the fee compared with funds of similar scale but also the total expense the Fund bears for all the services it receives, in comparison with the investment choices available in the Fund's investment category and distribution channel. The principal figure-of-merit used in these comparisons was the subject Fund's percentile ranking against peers.

#### **DeAM's Fees for Similar Services to Others**

DeAM provided management fee schedules for all of its US domiciled fund and non-fund investment management accounts in any of the investment categories where there is a DWS Fund. These similar products included the other DWS Funds, non-fund pooled accounts, institutional accounts and sub-advisory accounts. Using this information, I calculated for each Fund the fee that would be charged to each similar product, at the subject Fund's asset level.

Evaluating information regarding non-fund products is difficult because there are varying levels of services required for different types of accounts, with mutual funds generally requiring considerably more regulatory and administrative types of service as well as having more frequent cash flows than other types of accounts. Also, while mutual fund fees for similar fund products can be expected to be similar, there will be some differences due to different pricing conditions in different distribution channels (e.g. retail funds versus those used in variable insurance products), differences in underlying investment processes and other factors.

#### **Costs and Profit Margins**

DeAM provided a detailed profitability analysis for each Fund. After making some adjustments so that the presentation would be more comparable to the available industry figures, I reviewed profit margins from investment management alone, from investment management plus other fund services (excluding distribution) provided to the Funds by DeAM (principally shareholder services), and DeAM profits from all sources, including distribution. A later section comments on overall profitability.

#### **Economies of Scale**

Economies of scale — an expected decline in management cost per dollar of fund assets as fund assets grow — are very rarely quantified and documented because of inherent difficulties in collecting and analyzing relevant data. However, in virtually every investment category that I reviewed, larger funds tend to have lower fees and lower total expenses than smaller funds. To see how each DWS Fund compares with this industry observation, I reviewed:

The trend in Fund assets over the last five years and the accompanying trend in total expenses. This shows if the Fund has grown and, if so, whether total expense (management fees as well as other expenses) have declined as a percent of assets.

Whether the Fund has break-points in its management fee schedule, the extent of the fee reduction built into the schedule and the asset levels where the breaks take effect, and in the case of a sub-advised Fund how the Fund's break-points compare with those of the sub-advisory fee schedule.

How the Fund's contractual fee schedule compares with trends in the industry data. To accomplish this, I constructed a chart showing how actual latest-fiscal-year contractual fees of the Fund and of other similar funds relate to average fund assets, with the subject Fund's contractual fee schedule superimposed.

#### **Quality of Service – Performance**

The quality-of-service evaluation focused on investment performance, which is the principal result of the investment management service. Each Fund's performance was reviewed over the past 1, 3, 5 and 10 years, as

applicable, and compared with that of other funds in the same investment category and with a suitable market index.

In addition, I calculated and reviewed risk-adjusted returns relative to an index of similar mutual funds' returns and a suitable market index. The risk-adjusted returns analysis provides a way of determining the extent to which the Fund's return comparisons are mainly the product of investment value-added (or lack thereof) or alternatively taking considerably more or less risk than is typical in its investment category.

I also received and considered the history of portfolio manager changes for each Fund, as this provided an important context for evaluating the performance results.

#### **Complex-Level Considerations**

While this evaluation was conducted mainly at the individual fund level, there are some issues relating to the reasonableness of fees that can alternatively be considered across the whole fund complex:

I reviewed DeAM's profitability analysis for all DWS Funds, with a view toward determining if the allocation procedures used were reasonable and how profit levels compared with public data for other investment managers.

I considered whether DeAM and affiliates receive any significant ancillary or "fall-out" benefits that should be considered in interpreting the direct profitability results. These would be situations where serving as the investment manager of the Funds is beneficial to another part of the Deutsche Bank organization.

I considered how aggregated DWS Fund expenses had varied over the years, by asset class and in the context of trends in asset levels.

I reviewed the structure of the DeAM organization, trends in staffing levels, and information on compensation of investment management and other professionals compared with industry data.

#### Findings

Based on the process and analysis discussed above, which included reviewing a wide range of information from management and external data sources and considering among other factors the fees DeAM charges other clients, the fees charged by other fund managers, DeAM's costs and profits associated with managing the Funds, economies of scale, possible fall-out benefits, and the nature and quality of services provided, in my opinion the management fees charged the DWS Funds are reasonable.

Thomas H. Mark

Thomas H. Mack

# Summary of Administrative Fee Evaluation by Independent Fee Consultant

#### September 29, 2008

Pursuant to an Order entered into by Deutsche Asset Management (DeAM) with the Attorney General of New York, I, Thomas H. Mack, have been appointed the Independent Fee Consultant for the DWS Funds and have as part of my duties evaluated the reasonableness of the proposed management fees to be charged by DeAM to the DWS Funds, taking onto account a proposal to pass through to the funds certain fund accounting-related charges in connection with new regulatory requirements. My evaluation considered the following:

- While the proposal would alter the services to be provided under the Administration Agreement, which I consider to be part of fund management under the Order, it is my opinion that the change in services is slight and that the scope of prospective services under the combination of the Advisory and Administration Agreements continues to be comparable with those typically provided to competitive funds under their management agreements.
- While the proposal would increase fund expenses, according to a pro forma analysis performed by management, the prospective effect is less than .01% for all but seven of the DeAM Funds' 438 active share classes, and in all cases the effect is less than .03% and overall expenses would remain reasonable in my opinion.

Based on the foregoing considerations, in my opinion the fees and expenses for all of the DWS Funds will remain reasonable if the Directors adopt this proposal.

Thomas H. Mack

Thomas H. Mack

## **Board Members and Officers**

The following table presents certain information regarding the Board Members and Officers of the Trust as of December 31, 2008. Each Board Member's year of birth is set forth in parentheses after his or her name. Unless otherwise noted, (i) each Board Member has engaged in the principal occupation(s) noted in the table for at least the most recent five years, although not necessarily in the same capacity; and (ii) the address of each Independent Board Member is c/o Dawn-Marie Driscoll, PO Box 100176, Cape Coral, FL 33904. Except as otherwise noted below, the term of office for each Board Member is until the election and qualification of a successor, or until such Board Member sooner dies, resigns, is removed or as otherwise provided in the governing documents of the fund. Because the fund does not hold an annual meeting of shareholders, each Board Member will hold office for an indeterminate period. The Board Members may also serve in similar capacities with other funds in the fund complex. The Length of Time Served represents the year in which the Board Member joined the board of one or more DWS funds now overseen by the Board.

Name, Year of Birth, Position with the Fund and Length of Time Served <sup>1</sup>	Business Experience and Directorships During the Past Five Years	Number of Funds in DWS Fund Complex Overseen
Paul K. Freeman (1950) Chairperson since 2009 <sup>2</sup> Board Member since 1993	Consultant, World Bank/Inter-American Development Bank; Governing Council of the Independent Directors Council (governance, executive committees); formerly, Project Leader, International Institute for Applied Systems Analysis (1998–2001); Chief Executive Officer, The Eric Group, Inc. (environmental insurance) (1986–1998)	134
Dawn-Marie Driscoll (1946) Board Member since 1987	President, Driscoll Associates (consulting firm); Executive Fellow, Center for Business Ethics, Bentley University; formerly, Partner, Palmer & Dodge (1988–1990); Vice President of Corporate Affairs and General Counsel, Filene's (1978–1988). Directorships: Trustee of 20 open-end mutual funds managed by Sun Capital Advisers, Inc. (since 2007); Director of ICI Mutual Insurance Company (since 2007); Advisory Board, Center for Business Ethics, Bentley University; Trustee, Southwest Florida Community Foundation (charitable organization). Former Directorships: Investment Company Institute (audit, executive, nominating committees) and Independent Directors Council (governance, executive committees)	134
John W. Ballantine (1946) Board Member since 1999	Retired; formerly, Executive Vice President and Chief Risk Management Officer, First Chicago NBD Corporation/The First National Bank of Chicago (1996–1998); Executive Vice President and Head of International Banking (1995–1996). Directorships: Healthways, Inc. (provider of disease and care management services); Portland General Electric (utility company); Stockwell Capital Investments PLC (private equity). Former Directorships: First Oak Brook Bancshares, Inc. and Oak Brook Bank	134
Henry P. Becton, Jr. (1943) Board Member since 1990	Vice Chair, WGBH Educational Foundation. Directorships: Association of Public Television Stations; Becton Dickinson and Company <sup>3</sup> (medical technology company); Belo Corporation <sup>3</sup> (media company); Boston Museum of Science; Public Radio International; PRX, The Public Radio Exchange; The PBS Foundation. This report must be preceded or accompanied by a prospectus. To obtain an additional prospectus, call (800) 778-1482 or your financial representative. We advise you to carefully consider the product's objectives, risks, charges and expenses before investing. The prospectus contains this and other important information about the product. Please read the prospectus carefully before you invest.

NOT FDIC/NCUA INSURED NO BANK GUARANTEE MAY LOSE VALUE NOT A DEPOSIT NOT INSURED BY ANY FEDERAL GOVERNMENT AGENCY

Investments in variable portfolios involve risk. Some portfolios have more risk than others. These include portfolios that allow exposure to or otherwise concentrate investments in certain sectors, geographic regions, security types, market capitalization or foreign securities (e.g., political or economic instability, which can be accentuated in Emerging Market countries). Please read the prospectus for specific details regarding its investments and risk profile.

DWS Investments is part of Deutsche Bank's Asset Management division and, within the US, represents the retail asset management activities of Deutsche Bank AG, Deutsche Bank Trust Company Americas, Deutsche Investment Management Americas Inc. and DWS Trust Company.

## **Performance Summary**

#### **DWS Balanced VIP**

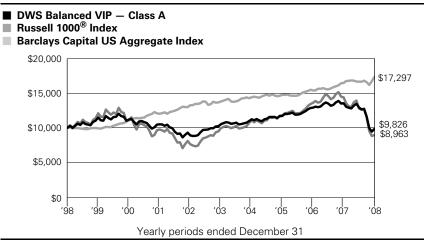

All performance shown is historical, assumes reinvestment of all dividend and capital gain distributions and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so that, when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please contact your participating insurance company for the Portfolio's most recent month-end performance. Performance doesn't reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option. These charges and fees will reduce returns. While all share classes have the same underlying portfolio, their performance will differ.

The total annual Portfolio operating expense ratios, gross of any fee waivers or expense reimbursements, as stated in the fee table of the prospectus dated May 1, 2008 are 0.52% and 0.77% for Class A and Class B shares, respectively. Please see the Information About Your Portfolio's Expenses, the Financial Highlights and Notes to the Financial Statements (Note C, Related Parties) sections of this report for gross and net expense related disclosure for the period ended December 31, 2008.

#### **Risk Considerations**

The Portfolio is subject to stock market risk, meaning stocks in the Portfolio may decline in value for extended periods of time due to the activities and financial prospects of individual companies, or due to general market and economic conditions. The Portfolio also invests in individual bonds whose yields and market values fluctuate so that your investment may be worth more or less than its original cost. Bond investments are subject to interest-rate risk such that when interest rates rise, the prices of the bonds, and thus the value of the bond portfolio, can decline and the investor can lose principal value. The Portfolio invests in derivatives seeking to hedge positions in certain securities and to generate income in order to enhance the Portfolio's returns. Derivatives can be more volatile and less liquid than traditional fixed-income securities. In the current market environment, mortgage-backed securities are experiencing increased volatility. Please read this Portfolio's prospectus for specific details regarding its investments and risk profile. Portfolio returns for all periods shown reflect a fee waiver and/or expense reimbursement. Without this waiver/reimbursement, returns would have been lower.

#### Growth of an Assumed \$10,000 Investment in DWS Balanced VIP

The Russell 1000<sup>®</sup> Index is an unmanaged index that measures the performance of the 1,000 largest companies in the Russell 3000 Index, which represents approximately 92% of the total market capitalization of the Russell 3000 Index. Index returns assume reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

The Barclays Capital US Aggregate Index (name changed from Lehman Brothers US Aggregate Index, effective November 3, 2008) is an unmanaged, market value-weighted measure of treasury issues, agency issues, corporate bond issues and mortgage securities. Index returns, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

#### **Comparative Results**

DWS Balanced VIP		1-Year	3-Year	5-Year	10-Year
Class A	Growth of \$10,000	\$7,267	\$8,399	\$9,342	\$9,826
	Average annual total return	-27.33%	-5.65%	-1.35%	18%
Russell 1000 Index	Growth of \$10,000	\$6,240	\$7,621	\$9,022	\$8,963
	Average annual total return	-37.60%	-8.66%	-2.04%	-1.09%
Barclays Capital US Aggregate Index	Growth of \$10,000	\$10,524	\$11,745	\$12,552	\$17,297
	Average annual total return	5.24%	5.51%	4.65%	5.63%

The growth of \$10,000 is cumulative.

DWS Balanced VIP		1-Year	3-Year	5-Year	Life of Class <sup>*</sup>
Class B	Growth of \$10,000	\$7,235	\$8,298	\$9,162	\$10,326
	Average annual total return	-27.65%	-6.03%	-1.74%	.49%
Russell 1000 Index	Growth of \$10,000	\$6,240	\$7,621	\$9,022	\$10,532
	Average annual total return	-37.60%	-8.66%	-2.04%	.80%
Barclays Capital US Aggregate Index	Growth of \$10,000	\$10,524	\$11,745	\$12,552	\$13,881
	Average annual total return	5.24%	5.51%	4.65%	5.17%

The growth of \$10,000 is cumulative.

The Portfolio commenced offering Class B shares on July 1, 2002. Index returns began on June 30, 2002.

## **Information About Your Portfolio's Expenses**

#### **DWS Balanced VIP**

As an investor of the Portfolio, you incur two types of costs: ongoing expenses and transaction costs. Ongoing expenses include management fees, distribution and service (12b-1) fees and other Portfolio expenses. Examples of transaction costs include contract charges, redemption fees and account maintenance fees, which are not shown in this section. The following tables are intended to help you understand your ongoing expenses (in dollars) of investing in the Portfolio and to help you compare these expenses with the ongoing expenses of investing in other mutual funds. In the most recent six-month period, the Portfolio limited these expenses, had it not done so, expenses would have been higher. The example in the table is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire period (July 1, 2008 to December 31, 2008).

The tables illustrate your Portfolio's expenses in two ways:

 Actual Portfolio Return. This helps you estimate the actual dollar amount of ongoing expenses (but not transaction costs) paid on a \$1,000 investment in the Portfolio using the Portfolio's actual return during the period. To estimate the expenses you paid over the period, simply divide your account value by 1,000 (for example, an 8,600 account value divided by 1,000 = 8.6), then multiply the result by the number in the "Expenses Paid per 1,000" line under the share class you hold.

Hypothetical 5% Portfolio Return. This helps you to compare your Portfolio's ongoing expenses (but not transaction costs) with those of other mutual funds using the Portfolio's actual expense ratio and a hypothetical rate of return of 5% per year before expenses. Examples using a 5% hypothetical Portfolio return may be found in the shareholder reports of other mutual funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in these tables are meant to highlight your ongoing expenses only and do not reflect any transaction costs. The "Expenses Paid per \$1,000" line of the tables is useful in comparing ongoing expenses only and will not help you determine the relative total expense of owning different funds. If these transaction costs had been included, your costs would have been higher.

#### Expenses and Value of a \$1,000 Investment for the six months ended December 31, 2008

Actual Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$ 760.70	\$ 756.40
Expenses Paid per \$1,000*	\$ 2.88	\$ 3.66
Hypothetical 5% Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
	¢1 001 07	\$1.020.96
Ending Account Value 12/31/08	\$1,021.87	\$1,020.90

\* Expenses are equal to the Portfolio's annualized expense ratio for each share class, multiplied by the average account value over the period, multiplied by the number of days in the most recent six-month period, then divided by 366.

Annualized Expense Ratios	Class A	Class B	
DWS Variable Series II — DWS Balanced VIP	.65%	.83%	

For more information, please refer to the Portfolio's prospectus.

These tables do not reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option.

## **Management Summary**

### **DWS Balanced VIP**

For the 12 months ended December 31, 2008, the DWS Balanced VIP had a return of –27.33% (Class A shares, unadjusted for contract charges.) The Russell 3000<sup>®</sup> Index, which is generally regarded as a good indicator of the broad stock market, had a negative return of –37.31% for the year. The Barclays Capital US Aggregate Index, the Portfolio's bond benchmark, which is considered indicative of broad bond market trends, returned 5.24% for the year. The Russell 1000<sup>®</sup> Index, the Portfolio's equity benchmark, returned –37.60%.

In December of 2007, the managers transitioned the Portfolio to a new strategic asset allocation, expanded the global tactical asset allocation overlay strategy, which the Advisor calls iGAP (integrated Global Alpha Platform), to 100% of the Portfolio's assets and increased diversification by adding more managers and investment styles. The full transition was completed in the beginning of April of 2008. The Portfolio's underperformance during 2008 was due to the underperformance of the underlying strategies, in particular the core fixed income strategy and the iGap strategy.

During 2008, in the large-cap US equity portion of the Portfolio, the quantitative strategy underperformed. Within the international portion of the Portfolio, the quantitative strategy outperformed. During this extremely volatile period, broad diversification in terms of asset classes as well as investment styles within asset classes has been more important than ever.

				413,553	174,116

\*\*\* Floating rate notes are securities whose yields vary with a designated market index or market rate, such as the coupon-equivalent of the US Treasury bill rate. These securities are shown at their current rate as of December 31, 2008.

\*\*\*\* Annualized yield at time of purchase; not a coupon rate.

<sup>†</sup> The cost for federal income tax purposes was \$362,091,444. At December 31, 2008, net unrealized depreciation for all securities based on tax cost was \$51,362,547. This consisted of aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost of \$13,170,091 and aggregate gross unrealized depreciation for all securities in which there was an excess of tax cost value of \$64,532,638.

(a) Principal amount is stated in US dollars unless otherwise noted.

(b) Security has deferred its 6/15/2008 interest payment until 6/30/2009.

(c) Date shown is call date; not a maturity date for the perpetual preferred securities.

(d) At December 31, 2008, this security has been pledged, in whole or in part, to cover initial margin requirements for open futures contracts.

(e) All or a portion of these securities were on loan (see Notes to Financial Statements). The value of all securities loaned at December 31, 2008 amounted to \$5,315,625, which is 1.7% of net assets.

(f) Affiliated fund managed by Deutsche Investment Management Americas Inc. The rate shown is the annualized seven-day yield at period end.

(g) Represents collateral held in connection with securities lending. Income earned by the Portfolio is net of borrower rebates.

144A: Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers.

ADR: American Depositary Receipt

CVA: Certificaten van Aandelen

FDR: Fiduciary Depositary Receipt

LIBOR: Represents the London InterBank Offered Rate.

MSCI: Morgan Stanley Capital International

PIK: Denotes that all or a portion of the income is paid in-kind.

PPS: Price Protected Shares

Principal Only: Principal Only (PO) bonds represent the "principal only" portion of payments on a pool of underlying mortgage or mortgage-backed securities.

REG S: Securities sold under Regulation S may not be offered, sold or delivered within the United States or to, or for the account or benefit of, US persons, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act.

REIT: Real Estate Investment Trust

RSP: Risparmio (Convertible Savings Shares)

SDR: Swedish Depositary Receipt

Included in the portfolio are investments in mortgage or asset-backed securities which are interests in separate pools of mortgages or assets. Effective maturities of these investments may be shorter than stated maturities due to prepayments. Some separate investments in the Federal National Mortgage Association and the Federal Home Loan Mortgage Corp. issues which have similar coupon rates have been aggregated for presentation purposes in this investment portfolio.

At December 31, 2008, open futures contracts purchased were as follows:

Futures	Expiration Date	Contracts	Aggregated Face Value (\$)	Value (\$)	Unrealized Appreciation/ (Depreciation) (\$)

Total net unrea	alized depreciatio	n				(56)

(h) The maximum potential amount of future undiscounted payments that the Portfolio could be required to make under a credit default swap contract would be the notional amount of the contract. These potential amounts would be partially offset by any recovery values of the referenced debt obligation or net amounts received from the settlement of buy protection credit default swap contracts entered into by the Portfolio for the same referenced debt obligation.

(i) The quality ratings represent the lower of Moody's Investors Service, Inc. ("Moody's") or Standard & Poor's Corporation ("S&P") credit ratings.

Counterparty:

<sup>1</sup> Merrill Lynch, Pierce, Fenner & Smith, Inc.

At December 31, 2008, the Portfolio had the following open forward foreign currency exchange contracts:

Contracts to Deliver		In Ex	cchange For	Settlement Date	Unrealized Appreciation (\$)

#### Fair Value Measurements

The following is a summary of the inputs used as of December 31, 2008 in valuing the Portfolio's investments. For information on the Portfolio's policy regarding the valuation of investments and of the valuation inputs, and the aggregate levels used in the tables below, please refer to the Security Valuation section of Note A in the accompanying Notes to the Financial Statements.

Valuation Inputs	Investments in Other Financial Securities Instruments <sup>††</sup>
Level 1	\$ 151,137,200 \$ 271,972
Level 2	159,428,604 1,691,874
Level 3	163,093 —
Total	\$ 310,728,897 \$ 1,963,846

<sup>††</sup> Other financial instruments are derivative instruments not reflected in the Investment Portfolio, such as futures contracts, forward foreign currency exchange contracts and swap contracts, which are valued at the unrealized appreciation (depreciation) on the instrument.

The following is a reconciliation of the Portfolio's Level 3 investments for which significant unobservable inputs were used in determining value at December 31, 2008:

		nents in rities
Balance as of January 1, 2008	\$	109,579
Total realized gain (loss)		(3,540)
Change in unrealized appreciation (depreciation)	(	230,402)

## **Financial Highlights**

#### **Class A**

Years Ended December 31,	2008	2007	2006	2005	2004
Selected Per Share Data					
Net asset value, beginning of period	\$24.81	\$24.46	\$22.75	\$22.37	\$21.32
Income (loss) from investment operations:					
Net investment income <sup>a</sup>	.61	.74	.69 <sup>c</sup>	.59	.47
Net realized and unrealized gain (loss)	(7.20)	.42	1.60	.34	.93
Total from investment operations	(6.59)	1.16	2.29	.93	1.40
Less distributions from:					
Net investment income	(.87)	(.81)	(.58)	(.55)	(.35)
Net asset value, end of period	\$17.35	\$24.81	\$24.46	\$22.75	\$22.37
Total Return (%)	(27.33) <sup>b</sup>	4.84 <sup>b</sup>	10.24 <sup>b,c</sup>	4.30 <sup>b</sup>	6.64
Ratios to Average Net Assets and Supplemental Data					
Net assets, end of period (\$ millions)	307	528	600	653	622
Ratio of expenses before expense reductions (%)	.64	.52	.55	.55	.59
Ratio of expenses after expense reductions (%)	.62	.51	.51	.53	.59
Ratio of net investment income (%)	2.83	3.00	2.99 <sup>c</sup>	2.66	2.18
Portfolio turnover rate (%)	263	199	108	122	140

<sup>a</sup> Based on average shares outstanding during the period.

<sup>b</sup> Total return would have been lower had certain expenses not been reduced.

<sup>c</sup> Includes non-recurring income from the Advisor recorded as a result of an administrative proceeding regarding disclosure of brokerage allocation practices in connection with sales of DWS Funds. The non-recurring income resulted in an increase in net investment income of \$0.024 per share and an increase in the ratio of net investment income of 0.10%. Excluding this non-recurring income, total return would have been 0.10% lower.

Class B					
Years Ended December 31,	2008	2007	2006	2005	2004
Selected Per Share Data					
Net asset value, beginning of period	\$24.78	\$24.43	\$22.72	\$22.33	\$21.28
Income (loss) from investment operations: Net investment income <sup>a</sup>	.53	.65	.60 <sup>c</sup>	.51	.39
Net realized and unrealized gain (loss)	(7.20)	.41	1.60	.35	.92
Total from investment operations	(6.67)	1.06	2.20	.86	1.31
Less distributions from: Net investment income	(.78)	(.71)	(.49)	(.47)	(.26)
Net asset value, end of period	\$17.33	\$24.78	\$24.43	\$22.72	\$22.33
Total Return (%)	(27.65) <sup>b</sup>	4.43 <sup>b</sup>	9.82 <sup>b,c</sup>	3.90 <sup>b</sup>	6.26
Ratios to Average Net Assets and Supplemental Data					
Net assets, end of period (\$ millions)	.05	7	30	34	33
Ratio of expenses before expense reductions (%)	.96	.89	.93	.95	.97
Ratio of expenses after expense reductions (%)	.93	.88	.89	.91	.97
Ratio of net investment income (%)	2.52	2.63	2.61 <sup>c</sup>	2.28	1.80

Portfolio turnover rate (%)

<sup>a</sup> Based on average shares outstanding during the period.

<sup>b</sup> Total return would have been lower had certain expenses not been reduced.

<sup>c</sup> Includes non-recurring income from the Advisor recorded as a result of an administrative proceeding regarding disclosure of brokerage allocation practices in connection with sales of DWS Funds. The non-recurring income resulted in an increase in net investment income of \$0.024 per share and an increase in the ratio of net investment income of 0.10%. Excluding this non-recurring income, total return would have been 0.10% lower.

## **Performance Summary**

### **DWS Blue Chip VIP**

All performance shown is historical, assumes reinvestment of all dividend and capital gain distributions and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so that, when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please contact your participating insurance company for the Portfolio's most recent month-end performance. Performance doesn't reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option. These charges and fees will reduce returns. While all share classes have the same underlying portfolio, their performance will differ.

The total annual Portfolio operating expense ratios, gross of any fee waivers or expense reimbursements, as stated in the fee table of the prospectus dated May 1, 2008 are 0.71% and 0.96% for Class A and Class B shares, respectively. Please see the Information About Your Portfolio's Expenses, the Financial Highlights and Notes to the Financial Statements (Note C, Related Parties) sections of this report for gross and net expense related disclosure for the period ended December 31, 2008.

### **Risk Considerations**

This Portfolio is subject to stock market risk, meaning stocks in the Portfolio may decline in value for extended periods of time due to the activities and financial prospects of individual companies, or due to general market and economic conditions. It may focus its investments on certain economic sectors, thereby increasing its vulnerability to any single economic, political or regulatory development. This may result in greater share price volatility. Derivatives may be more volatile and less liquid than traditional securities, and the Portfolio could suffer losses on its derivative positions. Please read this Portfolio's prospectus for specific details regarding its investments and risk profile.

Portfolio returns shown during all periods reflect a fee waiver and/or expense reimbursement. Without this waiver/reimbursement, returns would have been lower.

Growth of an Assumed \$10,000 Investment in DWS Blue Chip VIP

The Russell 1000<sup>®</sup> Index is an unmanaged index that measures the performance of the 1,000 largest companies in the Russell 3000<sup>®</sup> Index, which measures the performance of the 3,000 largest US companies based on total market capitalization. The Russell 1000 Index represents approximately 92% of the total market capitalization of the Russell 3000 Index.

Index returns assume reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

#### **Comparative Results**

DWS Blue Chip VIP		1-Year	3-Year	5-Year	10-Year
Class A	Growth of \$10,000	\$6,151	\$7,362	\$9,402	\$9,054
	Average annual total return	-38.49%	-9.71%	-1.23%	99%
Russell 1000 Index	Growth of \$10,000	\$6,240	\$7,621	\$9,022	\$8,963
	Average annual total return	-37.60%	-8.66%	-2.04%	-1.09%
DWS Blue Chip VIP		1-Year	3-Year	5-Year	Life of Class <sup>*</sup>
Class B	Growth of \$10,000	\$6,152	\$7,310	9,264	\$10,681
	Average annual total return	-38.48%	-9.92%	-1.52%	1.02%
Russell 1000 Index	Growth of \$10,000	\$6,240	\$7,621	\$9,022	\$10,532

The growth of \$10,000 is cumulative.

The Portfolio commenced offering Class B shares on July 1, 2002. Index returns began on June 30, 2002.

## **Information About Your Portfolio's Expenses**

### **DWS Blue Chip VIP**

As an investor of the Portfolio, you incur two types of costs: ongoing expenses and transaction costs. Ongoing expenses include management fees, distribution and service (12b-1) fees and other Portfolio expenses. Examples of transaction costs include contract charges, redemption fees and account maintenance fees, which are not shown in this section. The following tables are intended to help you understand your ongoing expenses (in dollars) of investing in the Portfolio and to help you compare these expenses with the ongoing expenses of investing in other mutual funds. In the most recent six-month period, the Portfolio limited these expenses; had it not done so, expenses would have been higher. The example in the table is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire period (July 1, 2008 to December 31, 2008).

The tables illustrate your Portfolio's expenses in two ways:

 Actual Portfolio Return. This helps you estimate the actual dollar amount of ongoing expenses (but not transaction costs) paid on a \$1,000 investment in the Portfolio using the Portfolio's actual return during the period. To estimate the expenses you paid over the period, simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the "Expenses Paid per \$1,000" line under the share class you hold.

Hypothetical 5% Portfolio Return. This helps you to compare your Portfolio's ongoing expenses (but not transaction costs) with those of other mutual funds using the Portfolio's actual expense ratio and a hypothetical rate of return of 5% per year before expenses. Examples using a 5% hypothetical Portfolio return may be found in the shareholder reports of other mutual funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in these tables are meant to highlight your ongoing expenses only and do not reflect any transaction costs. The "Expenses Paid per \$1,000" line of the tables is useful in comparing ongoing expenses only and will not help you determine the relative total expense of owning different funds. If these transaction costs had been included, your costs would have been higher.

### Expenses and Value of a \$1,000 Investment for the six months ended December 31, 2008

Actual Portfolio Return	Class A	Class B	
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00	
Ending Account Value 12/31/08	\$ 691.80	\$ 693.40	
Expenses Paid per \$1,000*	\$ 3.27	\$ 5.02	
Hypothetical 5% Portfolio Return	Class A	Class B	
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00	
	\$1,021.27	\$1.019.20	
Ending Account Value 12/31/08	ψ1,021.27	ψ1,010.20	

\* Expenses are equal to the Portfolio's annualized expense ratio for each share class, multiplied by the average account value over the period, multiplied by the number of days in the most recent six-month period, then divided by 366.

Annualized Expense Ratios	Class A	Class B	
DWS Variable Series II — DWS Blue Chip VIP	.77%	1.18%	

For more information, please refer to the Portfolio's prospectus.

These tables do not reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option.

## **Management Summary**

### **DWS Blue Chip VIP**

The year just ended was the worst in many decades for the US equity markets. Essentially all equity indices posted negative returns for this period, as markets reflected economic problems including a housing slump, rising unemployment, a crisis of confidence and an extreme credit crunch. The Russell 3000<sup>®</sup> Index, which is generally regarded as a good indicator of the broad stock market, had a return of –37.31% for the 12 months ended December 31, 2008. With a return of –38.49% (Class A shares, unadjusted for contract charges), the Portfolio's return was in line with that of its benchmark, the Russell 1000<sup>®</sup> Index, which posted a return of –37.60%.

The major contributors to the Portfolio's performance were underweights and stock selection in the financials and consumer discretionary sectors.<sup>1</sup> In the financials sector, the Portfolio's performance benefited from not owning many of the worst-performing stocks. In the consumer discretionary sector, performance benefited from overweight positions in The DIRECTV Group, Inc., AutoZone, Inc. and McDonald's Corp.

The major detractors from the Portfolio's performance relative to its benchmark were stock selection in the energy and materials sectors. In the energy sector, performance was hurt by an underweight position in ExxonMobil Corp., which was down less than the sector, and by overweights in coal producers Walter Industries, Inc. and Massey Energy Co. In the materials sector, overweight positions in Terra Industries, Inc. and CF Industries Holdings, Inc., both of which produce fertilizer and other agricultural products, detracted from performance.

Robert Wang, Julie Abbett and James B. Francis, CFA

Portfolio Managers, Deutsche Investment Management Americas Inc.

The Russell 3000 Index is an unmanaged index that measures the performance of the 3,000 largest US companies based on total market capitalization, which represents approximately 98% of the investable US equity market.

The Russell 1000 Index is an unmanaged index that measures the performance of the 1,000 largest companies in the Russell 3000 Index, which measures the performance of the 3,000 largest US companies based on total market capitalization. The Russell 1000 Index represents approximately 92% of the total market capitalization of the Russell 3000 Index.

Index returns assume the reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

<sup>1</sup> "Overweight" means the portfolio holds a higher weighting in a given sector or security than the benchmark. "Underweight" means the portfolio holds a lower weighting.

Portfolio management market commentary is as of December 31, 2008, and may not come to pass. This information is subject to change at any time based on market and other conditions. Past performance does not guarantee future results. Current and future portfolio holdings are subject to risk.

\* Non-income producing security.

\*\* Annualized yield at time of purchase; not a coupon rate.

<sup>†</sup> The cost for federal income tax purposes was \$145,284,545. At December 31, 2008, net unrealized depreciation for all securities based on tax cost was \$34,966,453. This consisted of aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost of \$4,176,823 and aggregate gross unrealized depreciation for all securities in which there was an excess of over value of \$39,143,276.

**Net Assets** 

(a) All or a portion of these securities were on loan (see Notes to Financial Statements). The value of all securities loaned at December 31, 2008 amounted to \$3,967,514, which is 3.7% of net assets.

(b) At December 31, 2008, this security has been pledged, in whole or in part, to cover initial margin requirements for open futures contracts.

(c) Affiliated fund managed by Deutsche Investment Management Americas Inc. The rate shown is the annualized seven-day yield at period end.

(d) Represents collateral held in connection with securities lending. Income earned by the Portfolio is net of borrower rebates.

ADR: American Depositary Receipt

GDR: Global Depositary Receipt

REIT: Real Estate Investment Trust

At December 31, 2008, open futures contracts purchased were as follows:

			Aggregate		
_	Expiration	-	Face		Unrealized
Futures	Date	Contracts	Value (\$)	Value (\$)	Appreciation (\$)
S&P 500 Index	3/20/2009	18	796,812	810,090	13,278

#### Fair Value Measurements

The following is a summary of the inputs used as of December 31, 2008 in valuing the Portfolio's investments. For information on the Portfolio's policy regarding the valuation of investments and of the valuation inputs, and the aggregate levels used in the table below, please refer to the Security Valuation section of Note A in the accompanying Notes to the Financial Statements.

Valuation Inputs	Investments in Securities	Other Financial Instruments <sup>††</sup>
Level 1	\$ 109,418,091	\$ 13,278
Level 2	900,001	_
Level 3	—	—
Total	\$ 110,318,092	\$ 13,278

<sup>††</sup> Other financial instruments are derivative instruments not reflected in the Investment Portfolio, such as future contracts, which are valued at the unrealized appreciation (depreciation) on the instrument.

The accompanying notes are an integral part of the financial statements.

Net assets, end of period (\$ millions)	.13	11	46	44	37
Ratio of expenses before expense reductions (%)	1.22	1.09	1.09	1.09	1.08
Ratio of expenses after expense reductions (%)	1.21	1.09	1.09	1.09	1.08
Ratio of net investment income (%)	.67	.75	.74 <sup>c</sup>	.61	.70
Portfolio turnover rate (%)	127	275	226	288	249

<sup>a</sup> Based on average shares outstanding during the period.

<sup>b</sup> Total return would have been lower had certain expenses not been reduced.

<sup>c</sup> Includes non-recurring income from the Advisor recorded as a result of an administrative proceeding regarding disclosure of brokerage allocation practices in connection with sales of DWS Funds. The non-recurring income resulted in an increase in net investment income of \$0.003 per share and an increase in the ratio of net investment income of 0.02%. Excluding this non-recurring income, total return would have been 0.02% lower.

# **Performance Summary**

### **DWS Core Fixed Income VIP**

All performance shown is historical, assumes reinvestment of all dividend and capital gain distributions and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so that, when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please contact your participating insurance company for the Portfolio's most recent month-end performance. Performance doesn't reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option. These charges and fees will reduce returns. While all share classes have the same underlying portfolio, their performance will differ.

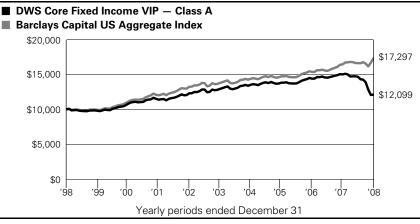

The total annual portfolio operating expense ratios, gross of any fee waivers or expense reimbursements, as stated in the fee table of the prospectus dated May 1, 2008 are 0.66% and 0.91% for Class A and Class B shares, respectively. Please see the Information About Your Portfolio's Expenses, the Financial Highlights and Notes to the Financial Statements (Note C, Related Parties) sections of this report for gross and net expense related disclosure for the period ended December 31, 2008.

#### **Risk Considerations**

This Portfolio invests in individual bonds whose yields and market values fluctuate so that your investment may be worth more or less than its original cost. Bond investments are subject to interest-rate risk such that when interest rates rise, the prices of the bonds, and thus the value of the Portfolio, can decline and the investor can lose principal value. In the recent market environment, mortgage-backed securities are experiencing increased volatility. Investments by the Portfolio in lower-rated bonds present greater risk to principal and income than investments in higher-quality securities. Additionally, investing in foreign securities presents certain risks, such as currency fluctuation and changes in political/economic conditions and market risks. All of these factors may result in greater share price volatility. Please see this Portfolio's prospectus for specific details regarding its investments and risk profile.

Portfolio returns shown for all periods reflect a fee waiver and/or expense reimbursement. Without this waiver/reimbursement, returns would have been lower.

### Growth of an Assumed \$10,000 Investment in DWS Core Fixed Income VIP

The Barclays Capital US Aggregate Index (name changed from Lehman Brothers US Aggregate Index, effective November 3, 2008) is an unmanaged, market value-weighted measure of Treasury issues, agency issues, corporate bond issues and mortgage securities.

Index returns, unlike Portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

# **Information About Your Portfolio's Expenses**

## **DWS Core Fixed Income VIP**

As an investor of the Portfolio, you incur two types of costs: ongoing expenses and transaction costs. Ongoing expenses include management fees, distribution and service (12b-1) fees and other Portfolio expenses. Examples of transaction costs include contract charges, redemption fees and account maintenance fees, which are not shown in this section. The following tables are intended to help you understand your ongoing expenses (in dollars) of investing in the Portfolio and to help you compare these expenses with the ongoing expenses of investing in other mutual funds. In the most recent six-month period, the Portfolio limited these expenses, had it not done so, expenses would have been higher. The example in the table is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire period (July 1, 2008 to December 31, 2008).

The tables illustrate your Portfolio's expenses in two ways:

 Actual Portfolio Return. This helps you estimate the actual dollar amount of ongoing expenses (but not transaction costs) paid on a \$1,000 investment in the Portfolio using the Portfolio's actual return during the period. To estimate the expenses you paid over the period, simply divide your account value by 1,000 (for example, an 8,600 account value divided by 1,000 = 8.6), then multiply the result by the number in the "Expenses Paid per 1,000" line under the share class you hold.

Hypothetical 5% Portfolio Return. This helps you to compare your Portfolio's ongoing expenses (but not transaction costs) with those of other mutual funds using the Portfolio's actual expense ratio and a hypothetical rate of return of 5% per year before expenses. Examples using a 5% hypothetical Portfolio return may be found in the shareholder reports of other mutual funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in these tables are meant to highlight your ongoing expenses only and do not reflect any transaction costs. The "Expenses Paid per \$1,000" line of the tables is useful in comparing ongoing expenses only and will not help you determine the relative total expense of owning different funds. If these transaction costs had been included, your costs would have been higher.

### Expenses and Value of a \$1,000 Investment for the six months ended December 31, 2008

Actual Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$ 825.60	\$ 823.70
Expenses Paid per \$1,000*	\$ 3.07	\$ 4.91
Hypothetical 5% Portfolio Return		Class B
hypothetical 5 % Portiono Return	Class A	Class D
	\$1,000.00	\$1,000.00
Beginning Account Value 7/1/08 Ending Account Value 12/31/08		

\* Expenses are equal to the Portfolio's annualized expense ratio for each share class, multiplied by the average account value over the period, multiplied by the number of days in the most recent six-month period, then divided by 366.

Annualized Expense Ratios	Class A	Class B	
DWS Variable Series II — DWS Core Fixed Income VIP	.67%	1.07%	

For more information, please refer to the Portfolio's prospectus.

These tables do not reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option.

# **Management Summary**

### **DWS Core Fixed Income VIP**

Entering the year, banks were pulling back financing from the markets as they were forced to come to terms with losses related to the subprime mortgage crisis that had emerged in the summer of 2007. As 2008 progressed, ongoing fallout from the collapse in housing and mortgages led to the failure, forced merger or government bailout of a number of leading global financial institutions in both the US and Europe. The result was further tightening of credit that caused global economic growth to pull back sharply during the fourth quarter. Given this backdrop, investors' risk tolerance approached zero and liquidity all but evaporated. What ensued was a frantic "flight to quality" into the safe haven of US Treasuries and underperformance for all other segments of the bond market. As investor risk aversion peaked in October and November, even AAA-rated mortgage-backed issues experienced a collapse in demand.<sup>1</sup> Over the 12-month period, the US Federal Reserve Board (the Fed) cut the benchmark federal funds rate (the overnight rate charged by banks when they borrow money from each other) from 4.25% to basically zero as it sought to provide market participants with liquidity, and Treasury yields fell dramatically.

During the 12-month period ended December 31, 2008, the Portfolio provided a total return of –19.33% (Class A shares, unadjusted for contract charges) compared with the 5.24% return of its benchmark, the Barclays Capital US Aggregate Index.

The portfolio's underperformance versus the benchmark is the result of our focus on fixed-income sectors that trade at a yield spread to Treasuries.<sup>2</sup> The positive return of the benchmark is the result of extraordinary Treasury performance driven by the unprecedented flight to quality, and masks steep declines in other, credit-sensitive segments of the bond market. In particular, our holdings of commercial mortgage-backed securities and non-agency residential mortgage-backed securities suffered historically poor performance, especially late in the year. Entering 2009, yield spreads are at all-time highs in many sectors. We have repositioned the Portfolio to maximize the potential upside when the credit cycle ultimately turns for the better. This has meant selling the Portfolio's below-AAA-rated positions in favor of AAA-rated securities that are structured to provide a significant degree of protection against rising defaults. We believe the rapid deterioration in the outlook and pricing of AAA-rated bonds toward the end of the year has made this positioning very attractive at this time.

The following portfolio managers were responsible for the day-to-day management of the Portfolio for the period covered by this report.

Gary W. Bartlett, CFA	J. Christopher Gagnier	Daniel R. Taylor, CFA

The Barclays Capital US Aggregate Index (name changed from Lehman Brothers US Aggregate Index, effective November 3, 2008) is an unmanaged, market-value-weighted measure of Treasury issues, agency issues, corporate bond issues and mortgage securities. Index returns, unlike Portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

<sup>1</sup> Credit quality (credit rating) is a measure of a bond issuer's ability to repay interest and principal in a timely manner. Rating agencies assign letter designations such as AAA, AA and so forth. The lower the rating, the higher the probability of default.

<sup>2</sup> The yield spread is the difference between the yield of a security and the yield of a comparable-duration Treasury. A large spread indicates that investors require yields substantially above those of Treasuries in order to invest in lower-quality bonds. This is generally indicative of a higher-risk environment. A smaller spread generally indicates a more positive environment, since investors are less concerned about risk and therefore willing to accept lower yields. A drop in the yield spread is a positive.

Portfolio management market commentary is as of December 31, 2008, and may not come to pass. This information is subject to change at any time based on market and other conditions. Past performance does not guarantee future results. Current and future portfolio holdings are subject to risk.

Asset allocation, bond diversification, quality and effective maturity are subject to change.

Weighted average effective maturity: 7.9 years and 6.7 years, respectively.

The quality ratings represent the lower of Moody's Investors Service, Inc. ("Moody's") or Standard & Poor's Corporation ("S&P") credit ratings. The ratings of Moody's and S&P represent their opinions as to the quality of the securities they rate. Ratings are relative and subjective and are not absolute standards of quality. The Portfolio's quality does not remove market risk.

For more complete details about the Portfolio's investment portfolio, see page 45. A complete list of portfolio holdings of the portfolio is posted as of the month end on www.dws-investments.com on or about the 15th day of the following month. More frequent posting of portfolio holdings information may be made from time to time on www.dws-investments.com.

Following the Portfolio's fiscal first and third quarter-end, a complete portfolio holdings listing is filed with the SEC on Form N-Q. The form will be available on the SEC's Web site at www.sec.gov, and it also may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. Information on the operation of the SEC's Public Reference Room may be obtained by calling (800) SEC-0330.

\* Non-income producing security.

\*\* Floating rate notes are securities whose yields vary with a designated market index or market rate, such as the coupon-equivalent of the US Treasury bill rate. These securities are shown at their current rate as of December 31, 2008.

<sup>†</sup> The cost for federal income tax purposes was \$185,975,228. At December 31, 2008, net unrealized depreciation for all securities based on tax cost was \$34,741,950. This consisted of aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost of \$3,032,806 and aggregate gross unrealized depreciation for all securities in which there was an excess of over value of \$37,774,756.

The accompanying notes are an integral part of the financial statements.

**48** | DWS Variable Series II — DWS Core Fixed Income VIP

- (a) All or a portion of these securities were on loan (see Notes to Financial Statements). The value of all securities loaned at December 31, 2008 amounted to \$8,124,165, which is 5.7% of net assets.
- (b) Bond is insured by one of these companies:

Insurance Coverage	As a % of Total Investment Portfolio
Ambac Financial Group, Inc.	0.6
Assured Guaranty Corp.	0.7
Financial Security Assurance, Inc.	0.8

(c) At December 31, 2008, this security has been pledged, in whole or in part, to cover initial margin requirements for open futures contracts.

- (d) Date shown is call date; not a maturity date for the perpetual preferred securities.
- (e) Affiliated fund managed by Deutsche Investment Management Americas Inc. The rate shown is the annualized seven-day yield at period end.

(f) Represents collateral held in connection with securities lending. Income earned by the Portfolio is net of borrower rebates.

144A: Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers.

REIT: Real Estate Investment Trust

At December 31, 2008, open future contracts purchased were as follows:

Futures	Expiration Date	Contracts	Aggregated Face Value (\$)	Value (\$)	Unrealized Appreciation (\$)
5 Year US Treasury Note	3/31/2009	157	18,051,752	18,691,586	639,834

At December 31, 2008, open future contracts sold were as follows:

	Expiration		Aggregated Face		Unrealized
Futures	Date	Contracts	Value (\$)	Value (\$)	Depreciation (\$)
10 Year US Treasury Note	3/20/2009	106	12,614,537	13,329,500	(714,963)

Included in the portfolio are investments in mortgage or asset-backed securities which are interests in separate pools of mortgages or assets. Effective maturities of these investments may be shorter than stated maturities due to prepayments. Some separate investments in the Federal National Mortgage Association issues which have similar coupon rates have been aggregated for presentation purposes in the investment portfolio.

#### Fair Value Measurements

The following is a summary of the inputs used as of December 31, 2008 in valuing the Portfolio's investments. For information on the Portfolio's policy regarding the valuation of investments and of the valuation inputs, and the aggregate levels used in the tables below, please refer to the Security Valuation section of Note A in the accompanying Notes to the Financial Statements.

Valuation Inputs	Investments in Securities	Other Financial Instruments <sup>††</sup>	
Level 1	\$ 8,500,441	\$ (75,129)	
Level 2	142,535,718	—	
Level 3	197,119	—	
Total	\$ 151,233,278	\$ (75,129)	

Other financial instruments are derivative instruments not reflected in the Investment Portfolio, such as future contracts, which are valued at the unrealized appreciation (depreciation) on the instrument.

The following is a reconciliation of the Portfolio's Level 3 investments for which significant unobservable inputs were used in determining value at December 31, 2008:

In	Investments in Securities		
\$	249,925		
	(558,566)		
	(406,992)		
	—		
	912,752		
	—		
\$	197,119

# **Performance Summary**

## **DWS Davis Venture Value VIP**

All performance shown is historical, assumes reinvestment of all dividend and capital gain distributions and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so that, when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please contact your participating insurance company for the Portfolio's most recent month-end performance. Performance doesn't reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option. These charges and fees will reduce returns. While all share classes have the same underlying portfolio, their performance will differ.

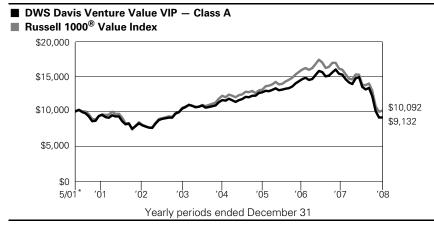

The total annual Portfolio operating expense ratios, gross of any fee waivers or expense reimbursements, as stated in the fee table of the prospectus dated May 1, 2008 are 1.02% and 1.27% for Class A and Class B shares, respectively. Please see the Information About Your Portfolio's Expenses, the Financial Highlights and Notes to the Financial Statements (Note C, Related Parties) sections of this report for gross and net expense related disclosure for the period ended December 31, 2008.

#### **Risk Considerations**

The Portfolio is subject to stock market and equity risks, meaning stocks in the Portfolio may decline in value for extended periods of time due to the activities and financial prospects of individual companies, or due to general market and economic conditions. Additionally, investing in foreign securities presents certain risks such as currency fluctuation, political and economic changes and market risks. Please read this Portfolio's prospectus for specific details regarding its investments and risk profile.

Portfolio returns shown for all periods reflect a fee waiver and/or expense reimbursement. Without this waiver/reimbursement, returns would have been lower.

#### Growth of an Assumed \$10,000 Investment in DWS Davis Venture Value VIP from 5/1/2001 to 12/31/2008

The Russell 1000<sup>®</sup> Value Index is an unmanaged index that consists of those stocks in the Russell 1000<sup>®</sup> Index with lower price-to-book ratios and lower forecasted-growth values.

Index returns assume reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

#### **Comparative Results**

DWS Davis Venture Value VIP		1-Year	3-Year	5-Year	Life of Portfolio <sup>*</sup>

\* The Portfolio commenced operations on May 1, 2001. Index returns began on April 30, 2001.

\*\* The Portfolio commenced offering Class B shares on July 1, 2002. Index returns began on June 30, 2002.

# **Information About Your Portfolio's Expenses**

### **DWS Davis Venture Value VIP**

As an investor of the Portfolio, you incur two types of costs: ongoing expenses and transaction costs. Ongoing expenses include management fees, distribution and service (12b-1) fees and other Portfolio expenses. Examples of transaction costs include contract charges, redemption fees and account maintenance fees, which are not shown in this section. The following tables are intended to help you understand your ongoing expenses (in dollars) of investing in the Portfolio and to help you compare these expenses with the ongoing expenses of investing in other mutual funds. In the most recent six-month period, the Portfolio limited these expenses; had it not done so, expenses would have been higher. The example in the table is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire period (July 1, 2008 to December 31, 2008).

The tables illustrate your Portfolio's expenses in two ways:

 Actual Portfolio Return. This helps you estimate the actual dollar amount of ongoing expenses (but not transaction costs) paid on a \$1,000 investment in the Portfolio using the Portfolio's actual return during the period. To estimate the expenses you paid over the period, simply divide your account value by 1,000 (for example, an 8,600 account value divided by 1,000 = 8.6), then multiply the result by the number in the "Expenses Paid per 1,000" line under the share class you hold.

Hypothetical 5% Portfolio Return. This helps you to compare your Portfolio's ongoing expenses (but not transaction costs) with those of other mutual funds using the Portfolio's actual expense ratio and a hypothetical rate of return of 5% per year before expenses. Examples using a 5% hypothetical Portfolio return may be found in the shareholder reports of other mutual funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in these tables are meant to highlight your ongoing expenses only and do not reflect any transaction costs. The "Expenses Paid per \$1,000" line of the tables is useful in comparing ongoing expenses only and will not help you determine the relative total expense of owning different funds. If these transaction costs had been included, your costs would have been higher.

### Expenses and Value of a \$1,000 Investment for the six months ended December 31, 2008

Actual Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$ 676.00	\$ 674.50
Expenses Paid per \$1,000*	\$ 3.88	\$ 4.92
Hypothetical 5% Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Beginning Account Value 7/1/08 Ending Account Value 12/31/08	\$1,000.00 \$1,020.51	\$1,000.00 \$1,019.25

\* Expenses are equal to the Portfolio's annualized expense ratio for each share class, multiplied by the average account value over the period, multiplied by the number of days in the most recent six-month period, then divided by 366.

Annualized Expense Ratios	Class A	Class B	
DWS Variable Series II — DWS Davis Venture Value VIP	.92%	1.17%	

For more information, please refer to the Portfolio's prospectus.

These tables do not reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option.

# **Management Summary**

### **DWS Davis Venture Value VIP**

For the year ended December 31, 2008, Class A shares of DWS Davis Venture Value VIP returned –40.23% (unadjusted for contract charges), compared to its benchmark, the Russell 1000<sup>®</sup> Value Index, which returned –36.85%.

The Portfolio's financial companies outperformed the corresponding sector within the index (–49% versus –52% for the index), but were still the largest detractors from performance. A higher relative average weighting in this sector (32% versus 27% for the index) detracted from both absolute and relative performance. American International Group, Inc., American Express Co., Merrill Lynch & Co., Inc., Berkshire Hathaway, Inc., Loews Companies, Inc., Wachovia Corp. and JPMorgan Chase & Co. were among the top detractors from performance. Two financial companies, Wells Fargo & Co. and Hartford Financial Services Group, Inc., were among the top contributors to the Portfolio's performance.

The second-largest detractors from performance were energy companies. The Portfolio's energy companies underperformed the corresponding sector within the index (–36% versus –27%). A higher relative average weighting in this sector (18% versus 17% for the index) also detracted from performance. ConocoPhillips was among the top detractors.

Individual companies among the largest contributors to performance over the year included H&R Block, Inc. (a consumer discretionary company) and Wal-Mart Stores (a consumer staples company). The Portfolio no longer owns Wal-Mart Stores.

The Portfolio held 12% of net assets in foreign companies at year-end December 31, 2008. As a whole, these companies underperformed the domestic companies held by the Portfolio.

Christopher C. Davis Kenneth Charles Feinberg

Portfolio Managers, Davis Selected Advisers, L.P., Subadvisor to the Portfolio

The Russell 1000 Value Index is an unmanaged index that consists of those stocks in the Russell 1000 Index with lower price-to-book ratios and lower forecasted growth values. Index returns assume reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

Portfolio management market commentary is as of December 31, 2008, and may not come to pass. This information is subject to change at any time based on market and other conditions. Past performance does not guarantee future results. Current and future portfolio holdings are subject to risk.

For more complete details about the Portfolio's investment portfolio, see page 57. A complete list of portfolio holdings of the portfolio is posted as of the month end on www.dws-investments.com on or about the 15th day of the following month. More frequent posting of portfolio holdings information may be made from time to time on www.dws-investments.com.

Following the Portfolio's fiscal first and third quarter-end, a complete portfolio holdings listing is filed with the SEC on Form N-Q. The form will be available on the SEC's Web site at www.sec.gov, and it also may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. Information on the operation of the SEC's Public Reference Room may be obtained by calling (800) SEC-0330.

Net Assets

- \* Non-income producing security.
- <sup>†</sup> The cost for federal income tax purposes was \$152,071,271. At December 31, 2008, net unrealized depreciation for all securities based on tax cost was \$6,713,748. This consisted of aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost of \$30,817,617 and aggregate gross unrealized depreciation for all securities in which there was an excess of tax cost over value of \$37,531,365.
- (a) All or a portion of these securities were on loan (see Notes to Financial Statements). The value of all securities loaned at December 31, 2008 amounted to \$14,060,943, which is 10.7% of net assets.
- (b) Affiliated fund managed by Deutsche Investment Management Americas Inc. The rate shown is the annualized seven-day yield at period end.
- (c) Represents collateral held in connection with securities lending. Income earned by the Portfolio is net of borrower rebates.

ADR: American Depositary Receipt

#### Fair Value Measurements

The following is a summary of the inputs used as of December 31, 2008 in valuing the Portfolio's investments. For information on the Portfolio's policy regarding the valuation of investments and of the valuation inputs, and the aggregate levels used in the table below, please refer to the Security Valuation section of Note A in the accompanying Notes to the Financial Statements.

Valuation Inputs	Investments in Securities
Level 1	\$ 135,382,566
Level 2	9,974,957
Level 3	—
Total	\$ 145,357,523

# **Performance Summary**

### **DWS Dreman High Return Equity VIP**

All performance shown is historical, assumes reinvestment of all dividend and capital gain distributions and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so that, when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please contact your participating insurance company for the Portfolio's most recent month-end performance. Performance doesn't reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option. These charges and fees will reduce returns. While all share classes have the same underlying portfolio, their performance will differ.

The total annual portfolio operating expense ratios, gross of any fee waivers or expense reimbursements, as stated in the fee table of the prospectus dated May 1, 2008 are 0.78% and 1.13% for Class A and Class B shares, respectively. Please see the Information About Your Portfolio's Expenses, the Financial Highlights and Notes to the Financial Statements (Note C, Related Parties) sections of this report for gross and net expense related disclosure for the period ended December 31, 2008.

#### **Risk Considerations**

This Portfolio is subject to stock market risk, meaning stocks in the Portfolio may decline in value for extended periods of time due to the activities and financial prospects of individual companies, or due to general market and economic conditions. In addition, the Portfolio may focus its investments on certain economic sectors, thereby increasing its vulnerability to any single economic, political or regulatory development. This may result in greater share price volatility. Please read this Portfolio's prospectus for specific details regarding this product's investments and risk profile.

Portfolio returns shown for all periods reflect a waiver and/or expense reimbursement. Without this waiver/reimbursement, returns would have been lower.

#### DWS Dreman High Return Equity VIP – Class A S&P 500<sup>®</sup> Index \$25,000 \$20,000 \$15,000 \$10.000 \$9 879 \$8,700 \$5.000 \$0 ′d0 'd2 'd3 'd4 'd5 'd6 ′d7 'd1 dq '98 'ດ່ጸ Yearly periods ended December 31

#### Growth of an Assumed \$10,000 Investment in DWS Dreman High Return Equity VIP

The Standard & Poor's 500<sup>®</sup> (S&P 500) Index is an unmanaged capitalization-weighted index of 500 stocks. The index is designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.

Index returns assume reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

#### **Comparative Results**

	Average annual total return	-37.00%	-8.36%	-2.19%	.51%

The growth of \$10,000 is cumulative.

The Portfolio commenced offering Class B shares on July 1, 2002. Index returns began on June 30, 2002.

# **Information About Your Portfolio's Expenses**

# DWS Dreman High Return Equity VIP

As an investor of the Portfolio, you incur two types of costs: ongoing expenses and transaction costs. Ongoing expenses include management fees, distribution and service (12b-1) fees and other Portfolio expenses. Examples of transaction costs include contract charges, redemption fees and account maintenance fees, which are not shown in this section. The following tables are intended to help you understand your ongoing expenses (in dollars) of investing in the Portfolio and to help you compare these expenses with the ongoing expenses of investing in other mutual funds. In the most recent six-month period, the Portfolio limited these expenses; had it not done so, expenses would have been higher. The example in the table is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire period (July 1, 2008 to December 31, 2008).

The tables illustrate your Portfolio's expenses in two ways:

 Actual Portfolio Return. This helps you estimate the actual dollar amount of ongoing expenses (but not transaction costs) paid on a \$1,000 investment in the Portfolio using the Portfolio's actual return during the period. To estimate the expenses you paid over the period, simply divide your account value by 1,000 (for example, an 8,600 account value divided by 1,000 = 8.6), then multiply the result by the number in the "Expenses Paid per 1,000" line under the share class you hold.

Hypothetical 5% Portfolio Return. This helps you to compare your Portfolio's ongoing expenses (but not transaction costs) with those of other mutual funds using the Portfolio's actual expense ratio and a hypothetical rate of return of 5% per year before expenses. Examples using a 5% hypothetical Portfolio return may be found in the shareholder reports of other mutual funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in these tables are meant to highlight your ongoing expenses only and do not reflect any transaction costs. The "Expenses Paid per \$1,000" line of the tables is useful in comparing ongoing expenses only and will not help you determine the relative total expense of owning different funds. If these transaction costs had been included, your costs would have been higher.

### Expenses and Value of a \$1,000 Investment for the six months ended December 31, 2008

Actual Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$ 652.30	\$ 651.30
Expenses Paid per \$1,000*	\$ 3.36	\$ 4.77
Hypothetical 5% Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Beginning Account Value 7/1/08 Ending Account Value 12/31/08	\$1,000.00 \$1,021.06	\$1,000.00 \$1,019.36

\* Expenses are equal to the Portfolio's annualized expense ratio for each share class, multiplied by the average account value over the period, multiplied by the number of days in the most recent six-month period, then divided by 366.

Annualized Expense Ratios	Class A	Class B	
DWS Variable Series II — DWS Dreman High Return Equity VIP	.81%	1.15%	

For more information, please refer to the Portfolio's prospectus.

These tables do not reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option.

# **Management Summary**

# **DWS Dreman High Return Equity VIP**

The year just ended was the worst in many decades for the US equity markets. Essentially all equity indices posted negative returns for this period, as markets reflected economic problems including a housing slump, rising unemployment, a crisis of confidence and an extreme credit crunch. The Russell 3000<sup>®</sup> Index, which is generally regarded as a good indicator of the broad stock market, had a negative return of –37.31% for the 12 months ended December 31, 2008. With a return of –45.98% (Class A shares, unadjusted for contract charges), DWS Dreman High Return Equity VIP underperformed its benchmark, the Standard & Poor's<sup>®</sup> 500 (S&P 500) Index, which posted a return of –37.00%.

The Portfolio's underperformance relative to the benchmark resulted mainly from a significant overweight and stock selection in the financial sector. Large positions that performed poorly included Washington Mutual, Inc., Fannie Mae, Freddie Mac and Wachovia Corp.; all of these except Washington Mutual have been eliminated from the Portfolio, and the overweight position in financials has been reduced.<sup>1</sup> Severe liquidity problems throughout the financial industry have caused essentially all financial stocks to perform poorly.

An overweight position in energy contributed to performance relative to the benchmark. We find this sector attractive because we believe there is likely to be substantial long-term growth in worldwide demand for energy. Other positives were positions in retailer Lowe's Companies, Inc. and UST, Inc., a producer of smokeless tobacco products, which was acquired by Altria Group, Inc. after the end of the period.

David N. Dreman	F. James Hutchinson	E. Clifton Hoover, Jr.	
Lead Portfolio Manager	Portfolio Managers, Drem	nan Value Management L.L.C.	, Subadvisor to the Portfolio

The Russell 3000 Index is an unmanaged index that measures the performance of the 3,000 largest US companies based on total market capitalization, which represents approximately 98% of the investable US equity market.

The Standard & Poor's 500 (S&P 500) Index is an unmanaged, capitalization-weighted index of 500 stocks. The index is designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries. Index returns assume reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

<sup>1</sup> "Overweight" means the portfolio holds a higher weighting in a given sector or security than the benchmark. "Underweight" means the portfolio holds a lower weighting.

Portfolio management market commentary is as of December 31, 2008, and may not come to pass. This information is subject to change at any time based on market and other conditions. Past performance does not guarantee future results. Current and future portfolio holdings are subject to risk.

- \* Non-income producing security.
- <sup>†</sup> The cost for federal income tax purposes was \$359,927,600. At December 31, 2008, net unrealized depreciation for all securities based on tax cost was \$37,565,747. This consisted of aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost of \$48,500,450 and aggregate gross unrealized depreciation for all securities in which there was an excess of over value of \$86,066,197.
- (a) All or a portion of these securities were on loan (see Notes to Financial Statements). The value of all securities loaned at December 31, 2008 amounted to \$12,970,979, which is 4.2% of net assets.
- (b) Affiliated fund managed by Deutsche Investment Management Americas Inc. The rate shown is the annualized seven-day yield at period end.
- (c) Represents collateral held in connection with securities lending. Income earned by the Portfolio is net of borrower rebates.

ADR: American Depositary Receipt

#### Fair Value Measurements

The following is a summary of the inputs used as of December 31, 2008 in valuing the Portfolio's investments. For information on the Portfolio's policy regarding the valuation of investments and of the valuation inputs, and the aggregate levels used in the table below, please refer to the Security Valuation section of Note A in the accompanying Notes to the Financial Statements.

Valuation Inputs	Investments in Securities
Level 1	\$ 322,361,853
Level 2	_
Level 3	_
Total	\$ 322,361,853

# **Performance Summary**

### **DWS Dreman Small Mid Cap Value VIP**

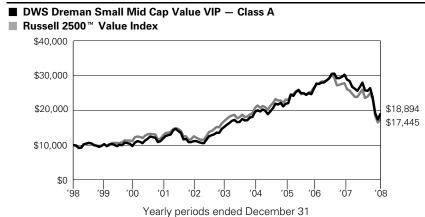

All performance shown is historical, assumes reinvestment of all dividend and capital gain distributions and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so that, when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please contact your participating insurance company for the Portfolio's most recent month-end performance. Performance doesn't reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option. These charges and fees will reduce returns. While all share classes have the same underlying portfolio, their performance will differ.

The total annual Portfolio operating expense ratios, gross of any fee waivers or expense reimbursements, as stated in the fee table of the prospectus dated May 1, 2008 are 0.78% and 1.17% for Class A and Class B shares, respectively. Please see the Information About Your Portfolio's Expenses, the Financial Highlights and Notes to the Financial Statements (Note C, Related Parties) sections of this report for gross and net expense related disclosure for the period ended December 31, 2008.

#### **Risk Considerations**

This Portfolio is subject to stock market risk. Stocks of small and medium-sized companies involve greater risk than securities of larger, more-established companies, as they often have limited product lines, markets or financial resources and may be exposed to more erratic and abrupt market movements. Small and mid-cap company stocks tend to experience steeper price fluctuations — down as well as up — than stocks of larger companies. Small and mid-cap company stocks are typically less liquid than large company stocks. The Portfolio may focus its investments on certain economic sectors, thereby increasing its vulnerability to any single economic, political, or regulatory development. This may result in greater share price volatility. Please read this Portfolio's prospectus for specific details regarding this product's investments and risk profile.

Portfolio returns shown for all periods reflect a fee waiver and/or expense reimbursement. Without this waiver/reimbursement, returns would have been lower.

#### Growth of an Assumed \$10,000 Investment in DWS Dreman Small Mid Cap Value VIP

The Russell 2500 <sup>™</sup> Value Index is an unmanaged Index of those securities in the Russell 3000<sup>®</sup> Index with a lower price-to-book and lower forecasted growth values.

Index returns assume reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

#### **Comparative Results**

DWS Dreman Small Mid Cap Value VIP		1-Year	3-Year	5-Year	10-Year

	Average annual total return	-33.67%	-5.33%	3.17%	5.22%
Russell 2500 Value Index	Average annual total return Growth of \$10,000	-33.67% \$6,801	-5.33% \$7,579	3.17% \$9,928	5.22% \$12,383

The growth of \$10,000 is cumulative.

The Portfolio commenced offering Class B shares on July 1, 2002. Index returns began on June 30, 2002.

# **Information About Your Portfolio's Expenses**

## **DWS Dreman Small Mid Cap Value VIP**

As an investor of the Portfolio, you incur two types of costs: ongoing expenses and transaction costs. Ongoing expenses include management fees, distribution and service (12b-1) fees and other Portfolio expenses. Examples of transaction costs include contract charges, redemption fees and account maintenance fees, which are not shown in this section. The following tables are intended to help you understand your ongoing expenses (in dollars) of investing in the Portfolio and to help you compare these expenses with the ongoing expenses of investing in other mutual funds. In the most recent six-month period, the Portfolio limited these expenses, had it not done so, expenses would have been higher. The example in the table is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire period (July 1, 2008 to December 31, 2008).

The tables illustrate your Portfolio's expenses in two ways:

 Actual Portfolio Return. This helps you estimate the actual dollar amount of ongoing expenses (but not transaction costs) paid on a \$1,000 investment in the Portfolio using the Portfolio's actual return during the period. To estimate the expenses you paid over the period, simply divide your account value by 1,000 (for example, an 8,600 account value divided by 1,000 = 8.6), then multiply the result by the number in the "Expenses Paid per 1,000" line under the share class you hold.

Hypothetical 5% Portfolio Return. This helps you to compare your Portfolio's ongoing expenses (but not transaction costs) with those of other mutual funds using the Portfolio's actual expense ratio and a hypothetical rate of return of 5% per year before expenses. Examples using a 5% hypothetical Portfolio return may be found in the shareholder reports of other mutual funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in these tables are meant to highlight your ongoing expenses only and do not reflect any transaction costs. The "Expenses Paid per \$1,000" line of the tables is useful in comparing ongoing expenses only and will not help you determine the relative total expense of owning different funds. If these transaction costs had been included, your costs would have been higher.

### Expenses and Value of a \$1,000 Investment for the six months ended December 31, 2008

Actual Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$ 735.60	\$ 734.00
Expenses Paid per \$1,000*	\$ 3.62	\$ 5.10
Hypothetical 5% Portfolio Return	Class A	Class B
, pomonou o /o i o mono motam		
	\$1,000.00	\$1,000.00
Beginning Account Value 7/1/08 Ending Account Value 12/31/08	\$1,000.00 \$1,020.96	\$1,000.00 \$1,019.25

\* Expenses are equal to the Portfolio's annualized expense ratio for each share class, multiplied by the average account value over the period, multiplied by the number of days in the most recent six-month period, then divided by 366.

Annualized Expense Ratios	Class A	Class B	
DWS Variable Series II — DWS Dreman Small Mid Cap Value VIP	.83%	1.17%	

For more information, please refer to the Portfolio's prospectus.

These tables do not reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option.

# **Management Summary**

### **DWS Dreman Small Mid Cap Value VIP**

The year just ended was the worst in many decades for the US equity markets. Essentially all equity indices posted negative returns for this period, as markets reflected economic problems including a housing slump, rising unemployment, a crisis of confidence and an extreme credit crunch. The Russell 3000<sup>®</sup> Index, which is generally regarded as a good indicator of the broad stock market, had a return of -37.31% for the 12 months ended December 31, 2008. Small-cap stocks, as measured by the Russell 2000<sup>®</sup> Index, were slightly stronger than large-cap, as measured by the Russell 1000<sup>®</sup> Index. Mid-cap stocks were the weakest category, as measured by the Russell Midcap<sup>®</sup> Index, which returned -41.46%. Within the Portfolio's capitalization range, value stocks were stronger than growth stocks: the Russell 2500 Value <sup>™</sup> Index returned -31.99%, while the Russell 2500 <sup>™</sup> Growth Index returned -41.50%. The DWS Dreman Small Mid Cap VIP (Class A shares, unadjusted for contract charges) returned -33.42% for 2008, underperforming its benchmark, the Russell 2500 Value Index.

In this very difficult market environment, the Portfolio's performance benefited from avoiding some of the worst-performing stocks, particularly in information technology and health care. Holdings with positive returns included IPC Holdings Ltd., a provider of catastrophe reinsurance, and Healthspring, Inc., a managed care organization focused on Medicare. An overweight and stock selection in the energy sector detracted from performance; stock selection in financials also detracted.<sup>1</sup> Positions that performed particularly well included Walter Industries, Inc., a company with a diversified line of products and services, including coal and natural gas, furnace and foundry coke and slag fiber, mortgage financing and home construction; and Superior Energy Services, Inc., a provider of specialized oilfield services and equipment. Positions that detracted from performance included Protective Life Corp.\*, a life insurance company; CommScope, Inc., which provides infrastructure solutions for communications networks; and General Cable Corp., which produces copper, aluminum and fiber optic wire and cable products.

David N. DremanE. Clifton Hoover, Jr.Mark RoachLead Portfolio ManagerPortfolio ManagersDreman Value Management, L.L.C., Subadvisor to the Portfolio

The Russell 3000 Index is an unmanaged index that measures the performance of the 3,000 largest US companies based on total market capitalization, which represents approximately 98% of the investable US equity market.

The Russell 2000 Index is an unmanaged, capitalization-weighted measure of approximately 2,000 of the smallest companies in the Russell 3000 Index.

The Russell 1000 Index is an unmanaged index that measures the performance of the 1,000 largest companies in the Russell 3000 Index, which represents approximately 92% of the total market capitalization of the Russell 3000 Index.

The Russell Midcap Index measures the performance of the 800 smallest companies in the Russell 1000 Index, which represents approximately 25% of the total market capitalization of the Russell 1000 Index.

The Russell 2500 Value Index is an unmanaged index of those securities in the Russell 3000 Index with a lower price-to-book ratio and lower forecasted growth values.

The Russell 2500 Growth Index is an unmanaged index of those securities with high price-to-book and higher forecasted growth values. Index returns assume reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

- <sup>1</sup> "Overweight" means the portfolio holds a higher weighting in a given sector or security than the benchmark. "Underweight" means the portfolio holds a lower weighting.
- \* Not held in the Portfolio as of December 31, 2008.

Portfolio management market commentary is as of December 31, 2008, and may not come to pass. This information is subject to change at any time based on market and other conditions. Past performance does not guarantee future results. Current and future portfolio holdings are subject to risk.

а Based on average shares outstanding during the period.

b Total return would have been lower had certain expenses not been reduced.

# **Performance Summary**

# **DWS Global Thematic VIP**

All performance shown is historical, assumes reinvestment of all dividend and capital gain distributions and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so that, when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please contact your participating insurance company for the Portfolio's most recent month-end performance. Performance doesn't reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option. These charges and fees will reduce returns. While all share classes have the same underlying portfolio, their performance will differ.

The total annual Portfolio operating expense ratios, gross of any fee waivers or expense reimbursements, as stated in the fee table of the prospectus dated May 1, 2008 are 1.33% and 1.68% for Class A and Class B shares, respectively. Please see the Information About Your Portfolio's Expenses, the Financial Highlights and Notes to the Financial Statements (Note C, Related Parties) sections of this report for gross and net expense related disclosure for the period ended December 31, 2008.

#### **Risk Considerations**

This Portfolio is subject to stock market risk, meaning stocks in the Portfolio may decline in value for extended periods of time due to the activities and financial prospects of individual companies, or due to general market and economic conditions. Additionally, investing in foreign securities presents certain risks, such as currency fluctuation, political and economic changes and market risks. This may result in greater share price volatility. Please read this Portfolio's prospectus for specific details regarding its investments and risk profile.

Portfolio returns shown for all periods reflect a fee waiver and/or expense reimbursement. Without this waiver/reimbursement, returns would have been lower.

#### DWS Global Thematic VIP – Class A MSCI World Index \$25,000 \$20,000 \$15,000 \$11,480 \$10.000 \$9,379 \$5.000 \$0 'dg 'do 'd2 '03 'd4 'd5 'd6 'd7 '98 'd1 'ក់ន Yearly periods ended December 31

#### Growth of an Assumed \$10,000 Investment in DWS Global Thematic VIP

The Morgan Stanley Capital International (MSCI) World Index is an unmanaged, capitalization weighted measure of global stock markets including the US, Canada, Europe, Australia and the Far East. The index is calculated using closing local market prices and translates into US dollars using the London close foreign exchange rates.

Index returns assume reinvestment of dividends and, unlike Portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

#### **Comparative Results**

DWS Global Thematic VIP		1-Year	3-Year	5-Year	10-Year

	Average annual total return	-47.75%	-10.26%	.39%	1.39%
MSCI World Index	Growth of \$10,000	\$5,929	\$7,762	\$9,749	\$9,379
	Average annual total return	-40.71%	-8.10%	51%	64%
DWS Global Thematic VIP		1-Year	3-Year	5-Year	Life of Class*
Class B	Growth of \$10,000	\$5,213	\$7,153	\$10,018	\$11,596
	Average annual total return	-47.87%	-10.57%	.04%	2.30%
MSCI World Index		<b>¢E 020</b>	<b>Φ</b> 7 700	¢0 740	Ф11 401
MSCI World Index	Growth of \$10,000	\$5,929	\$7,762	\$9,749	\$11,401

The growth of \$10,000 is cumulative.

The Portfolio commenced offering Class B shares on July 1, 2002. Index returns began on June 30, 2002.

# **Information About Your Portfolio's Expenses**

### **DWS Global Thematic VIP**

As an investor of the Portfolio, you incur two types of costs: ongoing expenses and transaction costs. Ongoing expenses include management fees, distribution and service (12b-1) fees and other Portfolio expenses. Examples of transaction costs include contract charges, redemption fees and account maintenance fees, which are not shown in this section. The following tables are intended to help you understand your ongoing expenses (in dollars) of investing in the Portfolio and to help you compare these expenses with the ongoing expenses of investing in other mutual funds. In the most recent six-month period, the Portfolio limited these expenses; had it not done so, expenses would have been higher. The example in the table is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire period (July 1, 2008 to December 31, 2008).

The tables illustrate your Portfolio's expenses in two ways:

 Actual Portfolio Return. This helps you estimate the actual dollar amount of ongoing expenses (but not transaction costs) paid on a \$1,000 investment in the Portfolio using the Portfolio's actual return during the period. To estimate the expenses you paid over the period, simply divide your account value by 1,000 (for example, an 8,600 account value divided by 1,000 = 8.6), then multiply the result by the number in the "Expenses Paid per 1,000" line under the share class you hold.

Hypothetical 5% Portfolio Return. This helps you to compare your Portfolio's ongoing expenses (but not transaction costs) with those of other mutual funds using the Portfolio's actual expense ratio and a hypothetical rate of return of 5% per year before expenses. Examples using a 5% hypothetical Portfolio return may be found in the shareholder reports of other mutual funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in these tables are meant to highlight your ongoing expenses only and do not reflect any transaction costs. The "Expenses Paid per \$1,000" line of the tables is useful in comparing ongoing expenses only and will not help you determine the relative total expense of owning different funds. If these transaction costs had been included, your costs would have been higher.

### Expenses and Value of a \$1,000 Investment for the six months ended December 31, 2008

Actual Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$ 594.10	\$ 593.30
Expenses Paid per \$1,000*	\$ 4.41	\$ 5.85
Hypothetical 5% Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$1,019.61	\$1,017.80

\* Expenses are equal to the Portfolio's annualized expense ratio for each share class, multiplied by the average account value over the period, multiplied by the number of days in the most recent six-month period, then divided by 366.

Annualized Expense Ratios	Class A	Class B	
DWS Variable Series II — DWS Global Thematic VIP	1.10%	1.46%	

For more information, please refer to the Portfolio's prospectus.

These tables do not reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option.

# **Management Summary**

### **DWS Global Thematic VIP**

Global equities performed poorly during 2008, the worst perfomance in many decades, reflecting an environment characterized by slowing economic growth, the evolution of the financial and credit crises, and elevated risk aversion among investors. The Class A shares of the Portfolio (unadjusted for contract charges) returned –47.75%, underperforming the –40.71% return of the MSCI World Index.

In managing the Portfolio, we look for long-term themes in the global economy, then we use a combination of quantitative analysis and intensive fundamental research to identify companies that can benefit as these themes unfold. During the past year, our themes related to global agribusiness, energy and basic materials led us to hold above-market weightings in these sectors — a negative for performance at a time of sharply slowing global growth.<sup>1</sup> Among the leading individual detractors in these sectors were the Russian energy company Gazprom, the Brazilian port operator Santos Brasil Participacoes SA and the food company Bunge Ltd.\* On the plus side, we added value through themes that invest in health care stocks, including Mylan, Inc., and gold mining companies, such as Newmont Mining Corp.\* and Barrick Gold Corp.\*

We remain committed to investing in high-quality franchises with unique competitive advantages. Specifically, we want to own those companies that can expand their assets with little leverage and, in most cases, also grow their earnings despite the difficult environment. We continue to believe that emerging markets and global agribusiness are among the best opportunities over the next three to five years. In our view, current valuations reflect a selling panic that is inconsistent with the outstanding growth potential in both areas.

### Oliver Kratz

Portfolio Manager, Deutsche Investment Management Americas Inc.

The Morgan Stanley Capital International (MSCI) World Index is an unmanaged, capitalization-weighted measure of global stock markets around the world, including North America, Europe, Australia and the Far East. The index is calculated using closing local market prices and translates into US dollars using the London close foreign exchange rates. Index returns assume reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

- <sup>1</sup> Above market weightings means the Portfolio holds a higher weighting in a given sector or security than the benchmark.
- \* Not held in the Portfolio as of December 31, 2008.

Portfolio management market commentary is as of December 31, 2008, and may not come to pass. This information is subject to change at any time based on market and other conditions. Past performance does not guarantee future results. Current and future portfolio holdings are subject to risk.

- \* Non-income producing security.
- <sup>†</sup> The cost for federal income tax purposes was \$92,552,472. At December 31, 2008, net unrealized depreciation for all securities based on tax cost was \$22,227,008 This consisted of aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost of \$1,966,217 and aggregate gross unrealized depreciation for all securities in which there was an excess of tax cost over value of \$24,193,225.
- (a) All or a portion of these securities were on loan amounting to \$6,151,506. In addition, included in other assets and liabilities, net is a pending sale, amounting to \$147,815, that is also on loan (see Notes to Financial Statements). The value of all securities loaned at December 31, 2008 amounted to \$6,299,321, which is 10.0% of net assets.
- (b) Affiliated fund managed by Deutsche Investment Management Americas Inc. The rate shown is the annualized seven-day yield at period end.

(c) Represents collateral held in connection with securities lending. Income earned by the Portfolio is net of borrower rebates.

144A: Security exempt from registration under Rule 144A of the Securities Act of 1933. This security may be resold in transactions exempt from registration, normally to qualified institutional buyers.

ADR: American Depositary Receipt

GDR: Global Depositary Receipt

#### Fair Value Measurements

The following is a summary of the inputs used as of December 31, 2008 in valuing the Portfolio's investments. For information on the Portfolio's policy regarding the valuation of investments and of the valuation inputs, and the aggregate levels used in the tables below, please refer to the Security Valuation section of Note A in the accompanying Notes to the Financial Statements.

Valuation Inputs	Investments in Securities
Level 1	\$ 42,755,529
Level 2	27,225,589
Level 3	344,346
Total	\$ 70,325,464

The following is a reconciliation of the Portfolio's Level 3 investments for which significant unobservable inputs were used in determining value at December 31, 2008:

	Investments in Securities

# **Financial Highlights**

#### Class A

Years Ended December 31,	2008	2007	2006	2005	2004
Selected Per Share Data					
Net asset value, beginning of period	\$15.66	\$17.39	\$14.44	\$11.78	\$10.39
Income (loss) from investment operations:					
Net investment income (loss) <sup>a</sup>	.11	.14	.15 <sup>c</sup>	.12	.04
Net realized and unrealized gain (loss)	(5.83)	.88	4.02	2.58	1.48
Total from investment operations	(5.72)	1.02	4.17	2.70	1.52
Less distributions from:					
Net investment income	(.19)	(.11)	(.09)	(.04)	(.13)
Net realized gains	(3.91)	(2.64)	(1.13)	_	
Total distributions	(4.10)	(2.75)	(1.22)	(.04)	(.13)
Net asset value, end of period	\$ 5.84	\$15.66	\$17.39	\$14.44	\$11.78
Total Return (%) <sup>b</sup>	(47.75)	6.29	30.14 <sup>c</sup>	22.94	14.76
Ratios to Average Net Assets and Supplemental Data					
Net assets, end of period (\$ millions)	59	151	143	85	63
Ratio of expenses before expense reductions (%)	1.47	1.44	1.38	1.41	1.44
Ratio of expenses after expense reductions (%)	1.09	1.11	1.04	1.28	1.43
Ratio of net investment income (%)	1.09	.82	.92 <sup>c</sup>	.98	.38
Portfolio turnover rate (%)	229	191	136	95	81

<sup>a</sup> Based on average shares outstanding during the period.
 <sup>b</sup> Total return would have been lower had certain expenses not been lower had certain expenses.

<sup>b</sup> Total return would have been lower had certain expenses not been reduced.

<sup>c</sup> Includes non-recurring income from the Advisor recorded as a result of an administrative proceeding regarding disclosure of brokerage allocation practices in connection with sales of DWS Funds. The non-recurring income resulted in an increase in net investment income of \$0.004 per share and an increase in the ratio of net investment income of 0.03%. Excluding this non-recurring income, total return would have been 0.02% lower.

Class B					
Years Ended December 31,	2008	2007	2006	2005	2004
Selected Per Share Data					
Net asset value, beginning of period	\$15.66	\$17.38	\$14.43	\$11.78	\$10.38
Income (loss) from investment operations: Net investment income (loss) <sup>a</sup>	.07	.07	.09 <sup>c</sup>	.07	.00 <sup>d</sup>

Portfolio turnover rate (%)	229	191	136	95	81

<sup>a</sup> Based on average shares outstanding during the period.

<sup>b</sup> Total return would have been lower had certain expenses not been reduced.

<sup>c</sup> Includes non-recurring income from the Advisor recorded as a result of an administrative proceeding regarding disclosure of brokerage allocation practices in connection with sales of DWS Funds. The non-recurring income resulted in an increase in net investment income of \$0.004 per share and an increase in the ratio of net investment income of 0.03%. Excluding this non-recurring income, total return would have been 0.02% lower.

<sup>d</sup> Amount is less than \$.005 per share.

# **Performance Summary**

### **DWS Government & Agency Securities VIP**

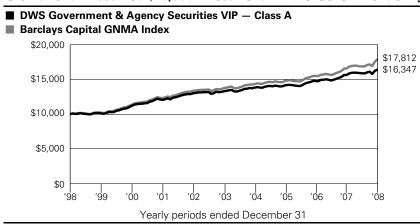

All performance shown is historical, assumes reinvestment of all dividend and capital gain distributions and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so that, when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please contact your participating insurance company for the Portfolio's most recent month-end performance. Performance doesn't reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option. These charges and fees will reduce returns. While all share classes have the same underlying portfolio, their performance will differ.

The total annual portfolio operating expense ratios, gross of any fee waivers or expense reimbursements, as stated in the fee table of the prospectus dated May 1, 2008 are 0.66% and 1.04% for Class A and Class B shares, respectively. Please see the Information About Your Portfolio's Expenses, the Financial Highlights and Notes to the Financial Statements (Note C, Related Parties) sections of this report for gross and net expense related disclosure for the period ended December 31, 2008.

### **Risk Considerations**

The guarantee on US Government Guaranteed Securities relates only to the prompt payment of principal and interest and does not remove market risks. Additionally, yields will fluctuate in response to changing interest rates and may be affected by the prepayment of mortgage-backed securities. Bond investments are subject to interest-rate risk such that when interest rates rise, the prices of the bonds, and thus the value of the investment, can decline and the investor can lose principal value. In the current market environment, mortgage-backed securities are experiencing increased volatility. Please read this Portfolio's prospectus for specific details regarding its investments and risk profile.

Portfolio returns shown for all periods reflect a fee waiver and/or expense reimbursement. Without this waiver/reimbursement, returns would have been lower.

#### Growth of an Assumed \$10,000 Investment in DWS Government & Agency Securities VIP

The Barclays Capital GNMA Index (name changed from Lehman Brothers GNMA Index, effective November 3, 2008) is an unmanaged market-value-weighted measure of all fixed-rate securities backed by mortgage pools of the Government National Mortgage Association.

Index returns, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

#### **Comparative Results**

<b>DWS Government &amp; Agency Secur</b>	ities VIP	1-Year	3-Year	5-Year	10-Year

Class B Barclays Capital GNMA Index				• 1	

The growth of \$10,000 is cumulative.

The Portfolio commenced offering Class B shares on July 1, 2002. Index returns began on June 30, 2002.

# **Information About Your Portfolio's Expenses**

# **DWS Government & Agency Securities VIP**

As an investor of the Portfolio, you incur two types of costs: ongoing expenses and transaction costs. Ongoing expenses include management fees, distribution and service (12b-1) fees and other Portfolio expenses. Examples of transaction costs include contract charges, redemption fees and account maintenance fees, which are not shown in this section. The following tables are intended to help you understand your ongoing expenses (in dollars) of investing in the Portfolio and to help you compare these expenses with the ongoing expenses of investing in other mutual funds. In the most recent six-month period, the Portfolio limited these expenses; had it not done so, expenses would have been higher. The example in the table is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire period (July 1, 2008 to December 31, 2008).

The tables illustrate your Portfolio's expenses in two ways:

 Actual Portfolio Return. This helps you estimate the actual dollar amount of ongoing expenses (but not transaction costs) paid on a \$1,000 investment in the Portfolio using the Portfolio's actual return during the period. To estimate the expenses you paid over the period, simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the "Expenses Paid per \$1,000" line under the share class you hold.

Hypothetical 5% Portfolio Return. This helps you to compare your Portfolio's ongoing expenses (but not transaction costs) with those of other mutual funds using the Portfolio's actual expense ratio and a hypothetical rate of return of 5% per year before expenses. Examples using a 5% hypothetical Portfolio return may be found in the shareholder reports of other mutual funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in these tables are meant to highlight your ongoing expenses only and do not reflect any transaction costs. The "Expenses Paid per \$1,000" line of the tables is useful in comparing ongoing expenses only and will not help you determine the relative total expense of owning different funds. If these transaction costs had been included, your costs would have been higher.

### Expenses and Value of a \$1,000 Investment for the six months ended December 31, 2008

Actual Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$1,032.50	\$1,030.80
Expenses Paid per \$1,000*	\$ 3.32	\$ 5.00
Hypothetical 5% Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
5 5		
Ending Account Value 12/31/08	\$1,021.87	\$1,020.21

\* Expenses are equal to the Portfolio's annualized expense ratio for each share class, multiplied by the average account value over the period, multiplied by the number of days in the most recent six-month period, then divided by 366.

Annualized Expense Ratios	Class A	Class B	
DWS Variable Series II — DWS Government & Agency Securities VIP	.65%	.98%	

For more information, please refer to the Portfolio's prospectus.

These tables do not reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option.

# **Management Summary**

### **DWS Government & Agency Securities VIP**

Throughout 2008, the fixed-income markets continued to deal with the fallout from the housing and credit crises, which led to the outright failure or forced mergers of numerous financial institutions in both the United States and Europe. In the first half of September alone, Federal National Mortgage Association (Fannie Mae) and Federal Home Loan Mortgage Corporation (Freddie Mac) were placed into conservatorship by the government, leading investment bank Lehman Brothers failed and global insurance conglomerate AIG was bailed out by the US Treasury. This was followed shortly by the conversion of Morgan Stanley and Goldman Sachs to bank holding companies as they sought shelter from the credit market storm, and the Federal Deposit Insurance Corporation (FDIC) seizure and sale of certain operations to JPMorgan Chase of giant thrift Washington Mutual. As these events unfolded, the Bush administration won approval of a mammoth rescue package designed to unfreeze the credit markets. This failed, however, to prevent a credit crunch from spurring a dramatic slowdown in global economic growth late in the year. In this environment, investors' risk appetites evaporated and liquidity all but disappeared. This led to a frantic "flight to quality" into the safe haven of US Treasuries. Over the 12-month period, the US Federal Reserve Board (the Fed) cut the benchmark federal funds rate (the overnight rate banks charge when they borrow money from each other) from 4.25% to basically zero as it sought to provide market participants with liquidity.

During the 12-month period ended December 31, 2008, the Portfolio provided a total return of 4.93% (Class A shares, unadjusted for contract charges) compared with the 7.87% return of its benchmark, the Barclays Capital GNMA Index.

The Portfolio's underweight position of 15-year mortgages and relatively long-duration profile helped performance in a declining rate environment.<sup>1</sup> Concentration on lower-coupon mortgage-backed securities was the principal constraint on performance during the year. We purchased these lower coupons, expecting falling interest rates to result in a pickup in prepayments on higher-coupon issues. The Portfolio's modest exposure to Fannie Mae and Freddie Mac securities also held back performance to a degree, as risk-averse investors favored the explicit government guarantee offered by GNMAs. As the period progressed, the Portfolio's holdings of securities selling at a discount to their par value began to add to performance as falling market interest rates caused previously issued mortgage-backed securities to trade at a premium. Late in the year, our focus on lower coupons and managing prepayment risk began to be rewarded as well. We believe the Portfolio is well positioned going into the new fiscal period given the Fed's focus on lowering borrowing rates. We will continue to monitor the credit and interest rate environment closely as we seek to maintain an attractive dividend for investors.

William Chepolis, CFA Matthew F. MacDonald, CFA *Co-Managers*, Deutsche Investment Management Americas Inc.

The Barclays Capital GNMA Index (name changed from Lehman Brothers GNMA Index, effective November 3, 2008) is an unmanaged, market-value-weighted measure of all fixed-rate securities backed by mortgage pools of the Government National Mortgage Association. Index returns, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

<sup>1</sup> "Overweight" means the portfolio holds a higher weighting in a given sector or security than the benchmark. "Underweight" means the portfolio holds a lower weighting.

Portfolio management market commentary is as of December 31, 2008, and may not come to pass. This information is subject to change at any time based on market and other conditions. Past performance does not guarantee future results. Current and future portfolio holdings are subject to risk.

* Floating rate notes are securities US Treasury bill rate. These secu	s whose yields va urities are shown	ary with a designa at their current ra	ted market index or market rate, such as ate as of December 31, 2008.	the coupon-equ	vivalent of the

These securities are shown at their current rate as of December 31, 2008.

\*\*\* Annualized yield at time of purchase; not a coupon rate.

The cost for federal income tax purposes was \$231,862,148. At December 31, 2008, net unrealized appreciation for all securities based on tax cost was \$4,584,630. This consisted of aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost of \$5,175,130 and aggregate gross unrealized depreciation for all securities in which there was an excess of tax cost over value of \$590,500.

(a) At December 31, 2008, this security has been pledged, in whole or in part, to cover initial margin requirements for open futures contracts.

Affiliated fund managed by Deutsche Investment Management Americas Inc. The rate shown is the annualized seven-day yield at (b) period end.

When-issued or delayed delivery securities included. (c)

Interest Only: Interest Only (IO) bonds represent the "interest only" portion of payments on a pool of underlying mortgages or mortgage-backed securities. IO securities are subject to prepayment risk of the pool of underlying mortgages. Principal Only: Principal Only (PO) bonds represent the "principal only" portion of payments on a pool of underlying mortgages or

mortgage-backed securities.

At December 31, 2008, open futures contracts purchased were as follows:

Futures	Expiration Date	Contracts	Aggregate Face Value (\$)	Value (\$)	Unrealized Appreciation (\$)
2 Year US Treasury Note	3/31/2009	78	16,743,406	17,008,875	265,469
At December 31, 2008, open futures contracts sold were as follows			_		

Futures	Expiration Date	Contracts	Aggregate Face Value (\$)	Value (\$)	Unrealized Appreciation/ (Depreciation) (\$)
10 Year US Treasury Note	3/20/2009	428	50,187,097	53,821,000	(3,633,903)
5 Year US Treasury Note	3/31/2009	19	2,280,244	2,262,039	18,205
Total net unrealized depreciation					(3,615,698)

Included in the portfolio are investments in mortgage or asset-backed securities which are interests in separate pools of mortgages or assets. Effective maturities of these investments may be shorter than stated maturities due to prepayments. Some separate investments in the Federal Home Loan Mortgage Corp., Federal National Mortgage Association and Government National Mortgage Association issues which have similar coupon rates have been aggregated for presentation purposes in this investment portfolio.

#### Fair Value Measurements

The following is a summary of the inputs used as of December 31, 2008 in valuing the Portfolio's investments. For information on the Portfolio's policy regarding the valuation of investments and of the valuation inputs, and the aggregate levels used in the table below, please refer to the Security Valuation section of Note A in the accompanying Notes to the Financial Statements.

Valuation Inputs	Investments in Securities	Other Financial Instruments <sup>††</sup>
Level 1	\$ —	\$ (3,350,229)
Level 2	236,446,778	_
Level 3	_	_
Total	\$ 236,446,778	\$ (3,350,229)

++ Other financial instruments are derivative instruments not reflected in the Investment Portfolio, such as futures contracts, which are valued at the unrealized appreciation (depreciation) on the instrument.

а Based on average shares outstanding during the period.

b Total return would have been lower had certain expenses not been reduced.

# Performance Summary

### **DWS High Income VIP**

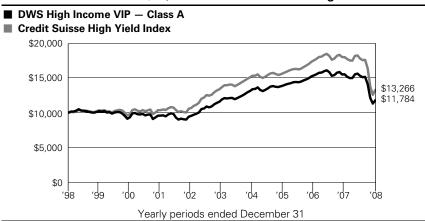

All performance shown is historical, assumes reinvestment of all dividend and capital gain distributions and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so that, when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please contact your participating insurance company for the Portfolio's most recent month-end performance. Performance doesn't reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option. These charges and fees will reduce returns. While all share classes have the same underlying portfolio, their performance will differ.

The total annual portfolio operating expense ratios, gross of any fee waivers or expense reimbursements, as stated in the fee table of the prospectus dated May 1, 2008 are 0.69% and 0.94% for Class A and Class B shares, respectively. Please see the Information About Your Portfolio's Expenses, the Financial Highlights and Notes to the Financial Statements (Note C, Related Parties) sections of this report for gross and net expense related disclosure for the period ended December 31, 2008.

### **Risk Considerations**

Investing in foreign securities presents certain risks, such as currency fluctuation, political and economic changes and market risks. Additionally, the Portfolio may invest in lower-quality and nonrated securities which present greater risk of loss of principal and interest than higher-quality securities. All of these factors may result in greater share price volatility. Bond investments are subject to interest-rate risk such that when interest rates rise, the prices of the bonds, and thus the value of the investment, can decline and the investor can lose principal value. Please read this Portfolio's prospectus for specific details regarding its investments and risk profile.

Portfolio returns shown for all periods reflect a fee waiver and/or expense reimbursement. Without this waiver/reimbursement, returns would have been lower.

#### Growth of an Assumed \$10,000 Investment in DWS High Income VIP

The Credit Suisse High Yield Index is an unmanaged, trader-priced portfolio constructed to mirror the global high-yield debt market.

Index returns, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

#### **Comparative Results**

Class B	Growth of \$10,000	\$7,587	\$8,400	\$9,736	\$12,388
	Average annual total return	-24.13%	-5.65%	53%	3.35%
Caradit Colore a History Vialationale of	Growth of \$10,000	\$7.383	\$8,481	\$9,710	\$12,787
Credit Suisse High Yield Index	Growth of \$10,000				

The growth of \$10,000 is cumulative.

The Portfolio commenced offering Class B shares on July 1, 2002. Index returns began on June 30, 2002.

# **Information About Your Portfolio's Expenses**

### **DWS High Income VIP**

As an investor of the Portfolio, you incur two types of costs: ongoing expenses and transaction costs. Ongoing expenses include management fees, distribution and service (12b-1) fees and other Portfolio expenses. Examples of transaction costs include contract charges, redemption fees and account maintenance fees, which are not shown in this section. The following tables are intended to help you understand your ongoing expenses (in dollars) of investing in the Portfolio and to help you compare these expenses with the ongoing expenses of investing in other mutual funds. The example in the table is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire period (July 1, 2008 to December 31, 2008).

The tables illustrate your Portfolio's expenses in two ways:

• Actual Portfolio Return. This helps you estimate the actual dollar amount of ongoing expenses (but not transaction costs) paid on a \$1,000 investment in the Portfolio using the Portfolio's actual return during the period. To estimate the expenses you paid over the period, simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the "Expenses Paid per \$1,000" line under the share class you hold.

Hypothetical 5% Portfolio Return. This helps you to compare your Portfolio's ongoing expenses (but not transaction costs) with those of other mutual funds using the Portfolio's actual expense ratio and a hypothetical rate of return of 5% per year before expenses. Examples using a 5% hypothetical Portfolio return may be found in the shareholder reports of other mutual funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in these tables are meant to highlight your ongoing expenses only and do not reflect any transaction costs. The "Expenses Paid per \$1,000" line of the tables is useful in comparing ongoing expenses only and will not help you determine the relative total expense of owning different funds. If these transaction costs had been included, your costs would have been higher.

Actual Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$ 771.00	\$ 771.30
Expenses Paid per \$1,000*	\$ 3.52	\$ 4.59
Hypothetical 5% Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$1,021.17	\$1,019.96
Expenses Paid per \$1,000*	\$ 4.01	\$ 5.23

### Expenses and Value of a \$1,000 Investment for the six months ended December 31, 2008

\* Expenses are equal to the Portfolio's annualized expense ratio for each share class, multiplied by the average account value over the period, multiplied by the number of days in the most recent six-month period, then divided by 366.

Annualized Expense Ratios	Class A	Class B	
DWS Variable Series II — DWS High Income VIP	.79%	1.03%	

For more information, please refer to the Portfolio's prospectus.

These tables do not reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option.

# **Management Summary**

### **DWS High Income VIP**

High-yield bonds were particularly vulnerable to the crosscurrents affecting the broader financial system in 2008, producing a negative absolute return and underperforming the broader bond market by a wide margin. First, concerns about a sharp economic slowdown fueled speculation that the high-yield default rate would move considerably higher. Second, the financial crisis caused a number of corporations to lose access to credit — at least temporarily — an issue of particular importance for companies in the high-yield sector. And third, forced selling by institutional investors put additional pressure on bond prices. While the market recovered somewhat in December, the Credit Suisse High Yield Index, the Portfolio's benchmark, finished the year with a return of -26.17%. Class A shares of the Portfolio outperformed its benchmark with a return of -23.94% (unadjusted for contract charges).

From a sector standpoint, the Portfolio benefited from its above-benchmark weightings in less cyclical groups such as health care, utilities and wireless telecommunication. Among individual securities, some of the leading contributors to performance were Charter Communications Operating LLC; Kansas City Southern Railway Co.; and DRS Technologies, Inc., a defense-related firm that was bid for by the investment-grade-rated company Finmeccanica SpA. Notable detractors included Lyondell Chemical Co.\*, Young Broadcasting, Inc. and Hawker Beechcraft Acquisition Co., LLC.

We believe a cautious investment approach remains necessary in the current environment. Given the uncertainty in the global financial markets, we believe that the key to outperformance throughout 2009 will be the avoidance of individual credit defaults. We continue to focus carefully on research and the fundamental credit strength of issuers in the Portfolio in order to minimize default risk to the greatest extent possible.

Gary Sullivan, CFA

Portfolio Manager, Deutsche Investment Management Americas Inc.

The Credit Suisse High Yield Index is an unmanaged, trader-priced portfolio constructed to mirror the global high-yield debt market. Index returns, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

\* Not held in the Portfolio as of December 31, 2008.

Portfolio management market commentary is as of December 31, 2008, and may not come to pass. This information is subject to change at any time based on market and other conditions. Past performance does not guarantee future results. Current and future portfolio holdings are subject to risk.

\*\*\* Floating rate notes are securities whose yields vary with a designated market index or market rate, such as the coupon-equivalent of the US Treasury bill rate. These securities are shown at their current rate as of December 31, 2008.

<sup>†</sup> The cost for federal income tax purposes was \$215,921,526. At December 31, 2008, net unrealized depreciation for all securities based on tax cost was \$64,273,900. This consisted of aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost of \$234,812 and aggregate gross unrealized depreciation for all securities in which there was an excess of over value of \$64,508,712.

(a) Principal amount stated in US dollars unless otherwise noted.

(b) Security has deferred its 6/15/2008 interest payment until 6/30/2009.

(c) All or a portion of these securities were on loan (see Notes to Financial Statements). The value of all securities loaned at December 31, 2008 amounted to \$1,052,835, which is 0.7% of net assets.

(d) Date shown is call date; not a maturity date for the perpetual preferred securities.

(e) Affiliated fund managed by Deutsche Investment Management Americas Inc. The rate shown is the annualized seven-day yield at period end.

(f) Represents collateral held in connection with securities lending. Income earned by the Portfolio is net of borrower rebates.

144A: Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers.

LIBOR: Represents the London InterBank Offered Rate.

PIK: Denotes that all or a portion of the income is paid in-kind.

REG S: Securities sold under Regulation S may not be offered, sold or delivered within the United States or to, or for the account or benefit of, US persons, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act. At December 31, 2008, open credit default swap contracts purchased were as follows:

Effective/ Expiration Date	Notional Amount (\$) (g)	Fixed Cash Flows Paid by the Portfolio	Underlying Debt Obligation/Quality Rating (h)	Value (\$)	Upfront Premiums Paid/(Received) (\$)	Unrealized Appreciation (\$)
5/2/2008 6/20/2013	400,000 <sup>1</sup>	7.25%	ARCO Chemical Co., 9.8%, 2/1/2020, D	289,930	_	288,963

At December 31, 2008, open credit default swap contracts sold were as follows:

Effective/ Expiration Date	Notional Amount (\$) (g)	Fixed Cash Flows Received by the Portfolio	Underlying Debt Obligation/Quality Rating (h)	Value (\$)	Upfront Premiums Paid/(Received) (\$)	Unrealized Appreciation/ (Depreciation) (\$)
2/14/2008 3/20/2009	405,000 <sup>1</sup>	3.8%	HCA, Inc., 6.375%, 1/15/2015, B–	(1,746)	_	(1,276)
2/26/2008 3/20/2009	430,000 <sup>1</sup>	5.0%	Tenet Healthcare Corp., 7.375%, 2/1/2013, B	152	_	869
Total net unrealize	zed depreciation					(407)

Counterparty:

Merrill Lynch, Pierce, Fenner & Smith, Inc.

(g) The maximum potential amount of future undiscounted payments that the Portfolio could be required to make under a credit default swap contract would be the notional amount of the contract. These potential amounts would be partially offset by any recovery values of the referenced debt obligation or net amounts received from the settlement of buy protection credit default swap contracts entered into by the Portfolio for the same referenced debt obligation.

At December 31, 2008, the Portfolio had the following open forward foreign currency exchange contracts:

USD 3,824,293	1/15/2009	104 761
	1,10,2000	134,761
USD 86,729	1/15/2009	467

In Exchange For	Settlement Date	Unrealized Depreciation (\$)
USD 52,036	1/15/2009	(194)
	In Exchange For	Settlement In Exchange For Date

EUR Euro

USD United States Dollar

#### Fair Value Measurements

The following is a summary of the inputs used as of December 31, 2008 in valuing the Portfolio's investments. For information on the Portfolio's policy regarding the valuation of investments and of the valuation inputs, and the aggregate levels used in the tables below, please refer to the Security Valuation section of Note A in the accompanying Notes to the Financial Statements.

Valuation Inputs	Investments in Other Financia Securities Instruments <sup>††</sup>
Level 1	\$    1,127,073  \$
Level 2	148,519,776 423,590
Level 3	2,000,777 —
Total	\$ 151,647,626 \$ 423,590

\*\* Other financial instruments are derivative instruments not reflected in the Investment Portfolio, such as forward foreign currency exchange contracts and credit default swap contacts, which are valued at the unrealized appreciation (depreciation) on the instrument.

The following is a reconciliation of the Portfolio's Level 3 investments for which significant unobservable inputs were used in determining value at December 31, 2008:

	Investments in Securities
Balance as of January 1, 2008	\$ 999,801
Total realized gain (loss)	(2,252)
Change in unrealized appreciation (depreciation)	(1,853,276)
Amortization Premium/Discount	12,609
Net purchases (sales)	975,542
Net transfers in (out) of Level 3	1,868,353
Balance as of December 31, 2008	\$ 2,000,777

<sup>(</sup>h) The quality ratings represent the lower of Moody's Investors Service, Inc. ("Moody's") or Standard & Poor's Corporation ("S&P") credit ratings.

# **Performance Summary**

### **DWS International Select Equity VIP**

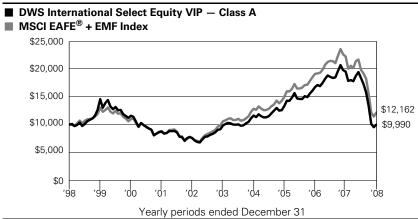

All performance shown is historical, assumes reinvestment of all dividend and capital gain distributions and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so that, when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please contact your participating insurance company for the Portfolio's most recent month-end performance. Performance doesn't reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option. These charges and fees will reduce returns. While all share classes have the same underlying portfolio, their performance will differ.

The total annual Portfolio operating expense ratios, gross of any fee waivers or expense reimbursements, as stated in the fee table of the prospectus dated May 1, 2008 are 0.93% and 1.18% for Class A and Class B shares, respectively. Please see the Information About Your Portfolio's Expenses, the Financial Highlights and Notes to the Financial Statements (Note C, Related Parties) sections of this report for gross and net expense related disclosure for the period ended December 31, 2008.

#### **Risk Considerations**

This Portfolio is subject to stock market risk, meaning stocks in the Portfolio may decline in value for extended periods of time due to the activities and financial prospects of individual companies, or due to general market and economic conditions. Additionally, investing in foreign securities presents certain risks, such as currency fluctuation, political and economic changes and market risks. This may result in greater share price volatility. Please read this Portfolio's prospectus for specific details regarding its investments and risk profile.

Portfolio returns shown for all periods reflect a fee waiver and/or expense reimbursement. Without this waiver/reimbursement, returns would have been lower.

#### Growth of an Assumed \$10,000 Investment in DWS International Select Equity VIP

The MSCI EAFE<sup>®</sup> + EMF Index (Morgan Stanley Capital International Europe, Australasia, Far East and Emerging Markets Free Index) is an unmanaged index generally accepted as a benchmark for major overseas markets plus emerging markets. The index is calculated using closing local market prices and translates into US dollars using the London close foreign exchange rates.

Index returns assume reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

### **Comparative Results**

MSCI EAFE + EMF Index	Growth of \$10,000	\$5,476	\$8,136	\$11,485	\$13,910
MSCI EAFE + EMF Index	GIOWLII 01 \$10,000	\$5,470	<i>\\\</i> ,100	φ11,100	\$10/010

The growth of \$10,000 is cumulative.

The Portfolio commenced offering Class B shares on July 1, 2002. Index returns began on June 30, 2002.

# **Information About Your Portfolio's Expenses**

### **DWS International Select Equity VIP**

As an investor of the Portfolio, you incur two types of costs: ongoing expenses and transaction costs. Ongoing expenses include management fees, distribution and service (12b-1) fees and other Portfolio expenses. Examples of transaction costs include contract charges, redemption fees and account maintenance fees, which are not shown in this section. The following tables are intended to help you understand your ongoing expenses (in dollars) of investing in the Portfolio and to help you compare these expenses with the ongoing expenses of investing in other mutual funds. The example in the table is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire period (July 1, 2008 to December 31, 2008).

The tables illustrate your Portfolio's expenses in two ways:

• Actual Portfolio Return. This helps you estimate the actual dollar amount of ongoing expenses (but not transaction costs) paid on a \$1,000 investment in the Portfolio using the Portfolio's actual return during the period. To estimate the expenses you paid over the period, simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the "Expenses Paid per \$1,000" line under the share class you hold.

Hypothetical 5% Portfolio Return. This helps you to compare your Portfolio's ongoing expenses (but not transaction costs) with those of other mutual funds using the Portfolio's actual expense ratio and a hypothetical rate of return of 5% per year before expenses. Examples using a 5% hypothetical Portfolio return may be found in the shareholder reports of other mutual funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in these tables are meant to highlight your ongoing expenses only and do not reflect any transaction costs. The "Expenses Paid per \$1,000" line of the tables is useful in comparing ongoing expenses only and will not help you determine the relative total expense of owning different funds. If these transaction costs had been included, your costs would have been higher.

Actual Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$ 544.70	\$ 543.90
Expenses Paid per \$1,000*	\$ 4.04	\$ 5.05
Hypothetical 5% Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$1,019.91	\$1,018.60
Expenses Paid per \$1,000*	\$ 5.28	\$ 6.60

### Expenses and Value of a \$1,000 Investment for the six months ended December 31, 2008

\* Expenses are equal to the Portfolio's annualized expense ratio for each share class, multiplied by the average account value over the period, multiplied by the number of days in the most recent six-month period, then divided by 366.

Annualized Expense Ratios	Class A	Class B	
DWS Variable Series II — DWS International Select Equity VIP	1.04%	1.30%	

For more information, please refer to the Portfolio's prospectus.

These tables do not reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option.

# **Management Summary**

### **DWS International Select Equity VIP**

The MSCI EAFE<sup>®</sup> + EMF Index (the Portfolio's benchmark) returned –45.24% during 2008, a year that was characterized by the rapid expansion of the global financial crisis, slowing economic growth and sharply elevated investor risk aversion. Class A shares of the Portfolio returned –48.81% (unadjusted for contract charges), underperforming the index. The primary reason for underperformance was that the Portfolio held a substantial exposure to higher-risk stocks coming into the autumn downturn. Upon taking over for the previous management team in mid-August, we sought to reduce risk by decreasing the Portfolio's weightings in higher-risk areas such as mid- and small-caps, emerging-market stocks, and cyclicals. Unfortunately, we did not make these changes quickly enough to prevent underperformance.

For the full year, the Portfolio's return was helped by an underweight in financials and favorable stock selection in the information technology and health care sectors, but this was offset by weaker stock selection in the consumer staples and consumer discretionary sectors.<sup>1</sup> The leading contributors to performance included iShares MSCI Japan Index Fund, Telefonica SA and BASF SE. The most significant detractors were the Russian gas company Gazprom and the brewer Carlsberg AS.

Believing that recovery in the global economy will likely occur slowly, we are maintaining a defensive positioning in the Portfolio. We are favoring sectors with high cash flows, stable earnings, and a low sensitivity to economic trends, such as health care and telecommunications. At the same time, the Portfolio is underweight in areas that are more dependent on economic growth, such as industrials, financials and the consumer discretionary sector. Although defensive for now, we are also keeping a close eye on stock-specific opportunities given that dividend yields are attractive and price-to-book values are at their lowest level of the past 10–15 years.

Joseph Axtell, CFA Lead Portfolio Manager, Deutsche Investment Management Americas Inc.

Michael Sieghart, CFA

Consultant, Deutsche Investment Management Americas Inc.

The MSCI EAFE + EMF Index (Morgan Stanley Capital International Europe, Australasia, Far East and Emerging Markets Free Index) is an unmanaged index generally accepted as a benchmark for major overseas markets plus emerging markets. The index is calculated using closing local market prices and translates into US dollars using the London close foreign exchange rates. Index returns assume reinvested dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

<sup>1</sup> "Overweight" means the portfolio holds a higher weighting in a given sector or security than the benchmark. "Underweight" means the portfolio holds a lower weighting.

Portfolio management market commentary is as of December 31, 2008, and may not come to pass. This information is subject to change at any time based on market and other conditions. Past performance does not guarantee future results. Current and future portfolio holdings are subject to risk.

Net Assets	100.0	90,649,072

\* Non-income producing security.

<sup>†</sup> The cost for federal income tax purposes was \$123,010,114. At December 31, 2008, net unrealized depreciation for all securities based on tax cost was \$23,858,882. This consisted of aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost of \$6,936,104 and aggregate gross unrealized depreciation for all securities in which there was an excess of over value of \$30,794,986.

(a) All or a portion of these securities were on loan (see Notes to Financial Statements). The value of all securities loaned at December 31, 2008 amounted to \$8,315,612, which is 9.2% of net assets.

(b) Affiliated fund managed by Deutsche Investment Management Americas Inc. The rate shown is the annualized seven-day yield at period end.

(c) Represents collateral held in connection with securities lending. Income earned by the Portfolio is net of borrower rebates.

ADR: American Depositary Receipt

MSCI: Morgan Stanley Capital International

#### Fair Value Measurements

The following is a summary of the inputs used as of December 31, 2008 in valuing the Portfolio's investments. For information on the Portfolio's policy regarding the valuation of investments and of the valuation inputs, and the aggregate levels used in the table below, please refer to the Security Valuation section of Note A in the accompanying Notes to the Financial Statements.

Valuation Inputs	Investments in Securities
Level 1	\$ 16,844,543
Level 2	82,306,689
Level 3	_
Total	\$ 99,151,232

# **Financial Highlights**

#### **Class A**

Years Ended December 31,	2008	2007	2006	2005	2004
Selected Per Share Data					
Net asset value, beginning of period	\$16.76	\$16.31	\$13.25	\$11.91	\$10.18
Income (loss) from investment operations:					
Net investment income <sup>a</sup>	.33 <sup>d</sup>	.25	.24 <sup>b</sup>	.20	.17
Net realized and unrealized gain (loss)	(6.67)	2.24	3.11	1.48	1.67
Total from investment operations	(6.34)	2.49	3.35	1.68	1.84
Less distributions from:					
Net investment income	(.13)	(.46)	(.29)	(.34)	(.11)
Net realized gains	(4.07)	(1.58)		—	—
Total distributions	(4.20)	(2.04)	(.29)	(.34)	(.11)
Net asset value, end of period	\$ 6.22	\$16.76	\$16.31	\$13.25	\$11.91
Total Return (%)	(48.81) <sup>c,</sup>	<sup>e</sup> 16.71	25.56	14.51	18.25
Ratios to Average Net Assets and Supplemental Data					
Net assets, end of period (\$ millions)	91	236	223	196	184
Ratio of expenses before expense reductions (%)	1.02	.93	.88	.87	.89
Ratio of expenses after expense reductions (%)	1.01	.93	.88	.87	.89
Ratio of net investment income (%)	3.04 <sup>d</sup>	1.53	1.65 <sup>b</sup>	1.59	1.58
Portfolio turnover rate (%)	132	117	122	93	88

<sup>a</sup> Based on average shares outstanding during the period.

<sup>b</sup> Net investment income per share and the ratio of net investment income without non-recurring dividend income amounting to \$0.20 per share and 1.39% of average daily net assets, respectively.

<sup>c</sup> Total return would have been lower had certain expenses not been reimbursed.

<sup>d</sup> Net investment income per share and ratio of net investment income include non-recurring dividend income amounting to \$0.16 per share and 1.49% of average daily net assets, respectively.

e Includes a reimbursement from the Advisor to reimburse the effect of losses incurred as the result of certain operation errors during the period. Excluding this reimbursement, total return would have been 0.14% lower.

#### Class B

Years Ended December 31,	2008	2007	2006	2005	2004
Selected Per Share Data					
Net asset value, beginning of period	\$16.70	\$16.26	\$13.21	\$11.88	\$10.15
Income (loss) from investment operations: Net investment income <sup>a</sup>	.24 <sup>d</sup>	.19	.19 <sup>b</sup>	.15	.13
Net realized and unrealized gain (loss)	(6.61)	2.22	3.09	1.47	1.67
Total from investment operations	(6.37)	2.41	3.28	1.62	1.80
Less distributions from: Net investment income	(.07)	(.39)	(.23)	(.29)	(.07)
Net realized gains	(4.07)	(1.58)		_	_
Total distributions	(4.14)	(1.97)	(.23)	(.29)	(.07)
Net asset value, end of period	\$ 6.19	\$16.70	\$16.26	\$13.21	\$11.88
Total Return (%)	(49.07) <sup>c,</sup>	<sup>e</sup> 16.20	25.06	14.00	17.84
Ratios to Average Net Assets and Supplemental Data					
Net assets, end of period (\$ millions)	.1	15	73	62	47
Ratio of expenses before expense reductions (%)	1.39	1.30	1.26	1.26	1.28
Ratio of expenses after expense reductions (%)	1.38	1.30	1.26	1.26	1.28
Ratio of net investment income (%)	2.67 <sup>d</sup>	1.16	1.27 <sup>b</sup>	1.20	1.19
Portfolio turnover rate (%)	132	117	122	93	88

<sup>a</sup> Based on average shares outstanding during the period.

b Net investment income per share and the ratio of net investment income without non-recurring dividend income amounting to \$0.15 per share and 1.01% of average daily net assets, respectively.

<sup>c</sup> Total return would have been lower had certain expenses not been reimbursed.

<sup>d</sup> Net investment income per share and ratio of net investment income include non-recurring dividend income amounting to \$0.16 per share and 1.49% of average daily net assets, respectively.

e Includes a reimbursement from the Advisor to reimburse the effect of losses incurred as the result of certain operation errors during the period. Excluding this reimbursement, total return would have been 0.14% lower.

## **Performance Summary**

### **DWS Janus Growth & Income VIP**

All performance shown is historical, assumes reinvestment of all dividend and capital gain distributions and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so that, when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please contact your participating insurance company for the Portfolio's most recent month-end performance. Performance doesn't reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option. These charges and fees will reduce returns. While all share classes have the same underlying portfolio, their performance will differ.

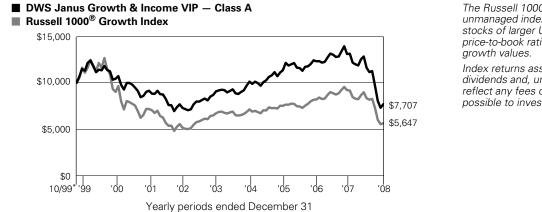

The total annual Portfolio operating expense ratio, gross of any fee waivers or expense reimbursements, as stated in the fee table of the prospectus dated May 1, 2008 is 0.90% for Class A shares. Please see the Information About Your Portfolio's Expenses, the Financial Highlights and Notes to the Financial Statements (Note C, Related Parties) sections of this report for gross and net expense related disclosure for the period ended December 31, 2008.

#### **Risk Considerations**

The Portfolio is subject to stock market risk, meaning stocks in the Portfolio may decline in value for extended periods of time due to the activities and financial prospects of individual companies, or due to general market and economic conditions. The Portfolio also invests in individual bonds whose yields and market values fluctuate so that your investment may be worth more or less than its original cost. Bond investments are subject to interest-rate risk such that when interest rates rise, the prices of the bonds, and thus the value of the Portfolio, can decline and the investor can lose principal value. Please read this Portfolio's prospectus for specific details regarding its investments and risk profile.

Portfolio returns shown for all periods reflect a fee waiver and/or expense reimbursement. Without this waiver/reimbursement, returns would have been lower.

# Growth of an Assumed \$10,000 Investment in DWS Janus Growth & Income VIP from 10/29/1999 to 12/31/2008

The Russell 1000<sup>®</sup> Growth Index is an unmanaged index composed of common stocks of larger US companies with higher price-to-book ratios and higher forecasted growth values.

Index returns assume reinvestment dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

### **Comparative Results**

DWS Janus Growth & Income VIP		1-Year	3-Year	5-Year	Life of Portfolio <sup>*</sup>
Class A	Growth of \$10,000	\$5,871	\$6,786	\$8,483	\$7,707
	Average annual total return	-41.29%	-12.13%	-3.24%	-2.80%
Russell 1000 Growth Index	Growth of \$10,000	\$6,156	\$7,508	\$8,401	\$5,647
	Average annual total return	-38.44%	-9.11%	-3.42%	-6.04%

The growth of \$10,000 is cumulative.

The Portfolio commenced operations October 29, 1999. Index returns began on October 31, 1999. Total returns would have been lower for the Life of Portfolio period if the Portfolio's expenses were not maintained.

# **Information About Your Portfolio's Expenses**

### **DWS Janus Growth & Income VIP**

As an investor of the Portfolio, you incur two types of costs: ongoing expenses and transaction costs. Ongoing expenses include management fees and other Portfolio expenses. Examples of transaction costs include contract charges, redemption fees and account maintenance fees, which are not shown in this section. The following tables are intended to help you understand your ongoing expenses (in dollars) of investing in the Portfolio and to help you compare these expenses with the ongoing expenses of investing in other mutual funds. The example in the table is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire period (July 1, 2008 to December 31, 2008).

The tables illustrate your Portfolio's expenses in two ways:

• Actual Portfolio Return. This helps you estimate the actual dollar amount of ongoing expenses (but not transaction costs) paid on a \$1,000 investment in the Portfolio using the Portfolio's actual return during the period. To estimate the expenses you paid over the period, simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the "Expenses Paid per \$1,000" line under the share class you hold.

Hypothetical 5% Portfolio Return. This helps you to compare your Portfolio's ongoing expenses (but not transaction costs) with those of other mutual funds using the Portfolio's actual expense ratio and a hypothetical rate of return of 5% per year before expenses. Examples using a 5% hypothetical Portfolio return may be found in the shareholder reports of other mutual funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in these tables are meant to highlight your ongoing expenses only and do not reflect any transaction costs. The "Expenses Paid per \$1,000" line of the tables is useful in comparing ongoing expenses only and will not help you determine the relative total expense of owning different funds. If these transaction costs had been included, your costs would have been higher.

Class A

### Expenses and Value of a \$1,000 Investment for the six months ended December 31, 2008

Actual Portfolio Return	Class A
Beginning Account Value 7/1/08	\$1,000.00
Ending Account Value 12/31/08	\$ 662.40
Expenses Paid per \$1,000*	\$ 3.55
Hypothetical 5% Portfolio Return	Class A
	Class A \$1,000.00
Hypothetical 5% Portfolio Return Beginning Account Value 7/1/08 Ending Account Value 12/31/08	

\* Expenses are equal to the Portfolio's annualized expense ratio, multiplied by the average account value over the period, multiplied by the number of days in the most recent six-month period, then divided by 366.

#### **Annualized Expense Ratios**

DWS Variable Series II — DWS Janus Growth & Income VIP	.85%

For more information, please refer to the Portfolio's prospectus.

These tables do not reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option.

# **Management Summary**

### **DWS Janus Growth & Income VIP**

Continuing turmoil from the credit crisis and concerns over a prolonged recession characterized US equity markets during the 12-month period ending December 31, 2008. For that same period, the Portfolio's Class A shares (unadjusted for contract charges) returned –41.29%, while its benchmark, the Russell 1000<sup>®</sup> Growth Index, returned –38.44%.

Holdings within the consumer discretionary and information technology sectors were the main laggards during the period. In terms of contributors, select materials names coupled with a significant underweight in financials aided relative performance.<sup>1</sup>

Google, Inc. has been impacted by investor worries that the current Internet advertising climate favors advertisers who can pay less for clicks. Given the difficult economic climate, we chose to exit the position during the fourth quarter. Hess Corp., an exploration and production company and a key contributor to the Portfolio in 2008, was impacted by the steep decline in oil prices during the second half of the year.

Yahoo! Inc. was one of the top contributors to performance for the year. We sold the Portfolio's position in the Internet software company early in the period after Microsoft Corp. made an offer to buy the company. Genentech, Inc., a California-based biotechnology leader, moved ahead during the second half of the year after receiving a take-out bid from Swiss-based Roche, which already owned a majority share of the company.

The magnitude of the economic and financial downturn in 2008 caught many of us by surprise. While we recognize the potential for a long series of negative economic data points hitting financial markets, we believe there is ample reason to be optimistic, recognizing that valuations are at historically low levels by any measure and that the market typically discounts an eventual economic recovery prior to it showing up in the data.

### Marc Pinto, CFA

Portfolio Manager, Janus Capital Management LLC, Subadvisor to the Portfolio

The Russell 1000 Growth Index is an unmanaged index composed of common stocks of larger US companies with higher price-to-book ratios and higher forecasted growth values. Index returns assume reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

<sup>1</sup> "Overweight" means the portfolio holds a higher weighting in a given sector or security than the benchmark. "Underweight" means the portfolio holds a lower weighting.

Portfolio management market commentary is as of December 31, 2008, and may not come to pass. This information is subject to change at any time based on market and other conditions. Past performance does not guarantee future results. Current and future portfolio holdings are subject to risk.

For more complete details about the Portfolio's investment portfolio, see page 127. A complete list of portfolio holdings of the portfolio is posted as of the month end on www.dws-investments.com on or about the 15th day of the following month. More frequent posting of portfolio holdings information may be made from time to time on www.dws-investments.com.

Following the Portfolio's fiscal first and third quarter-end, a complete portfolio holdings listing is filed with the SEC on Form N-Q. The form will be available on the SEC's Web site at www.sec.gov, and it also may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. Information on the operation of the SEC's Public Reference Room may be obtained by calling (800) SEC-0330.

#### Fair Value Measurements

The following is a summary of the inputs used as of December 31, 2008 in valuing the Portfolio's investments. For information on the Portfolio's policy regarding the valuation of investments and of the valuation inputs, and the aggregate levels used in the table below, please refer to the Security Valuation section of Note A in the accompanying Notes to the Financial Statements.

Valuation Inputs	Investments in Other Financial Securities Instruments <sup>††</sup>
Level 1	\$ 66,238,678 \$
Level 2	17,385,577 (161,472)
Level 3	
Total	\$ 83,624,255 \$ (161,472)

<sup>††</sup> Other financial instruments are derivative instruments not reflected in the Investment Portfolio, such as forward foreign currency exchange contracts, which are valued at the unrealized appreciation (depreciation) on the instrument.

# **Financial Highlights**

### Class A

Years Ended December 31,	2008	2007	2006	2005	2004
Selected Per Share Data					
Net asset value, beginning of period	\$12.62	\$11.91	\$11.05	\$ 9.88	\$ 8.86
Income (loss) from investment operations: Net investment income (loss) <sup>a</sup>	.11	.12	.07	.05	.03
Net realized and unrealized gain (loss)	(4.98)	.66	.86	1.14	.99
Total from investment operations	(4.87)	.78	.93	1.19	1.02
Less distributions from: Net investment income	(.12)	(.07)	(.07)	(.02)	
Net realized and unrealized gain (loss) on investment transactions	(.84)	_	_	_	
Total distributions	(.96)	(.07)	(.07)	(.02)	
Net asset value, end of period	\$ 6.79	\$12.62	\$11.91	\$11.05	\$ 9.88
Total Return (%)	(41.29) <sup>b</sup>	6.59	8.43	12.11	11.51
Ratios to Average Net Assets and Supplemental Data					
Net assets, end of period (\$ millions)	73	169	193	195	187
Ratio of expenses before expense reductions (%)	.91	.90	.85	.92	1.06
Ratio of expenses after expense reductions (%)	.90	.90	.85	.92	1.06
Ratio of net investment income (loss) (%)	1.10	.93	.68	.45	.34
Portfolio turnover rate (%)	58	73	44	32	52

<sup>a</sup> Based on average shares outstanding during the period.

<sup>b</sup> Total return would have been lower had certain expenses not been reduced.

# **Performance Summary**

### **DWS Large Cap Value VIP**

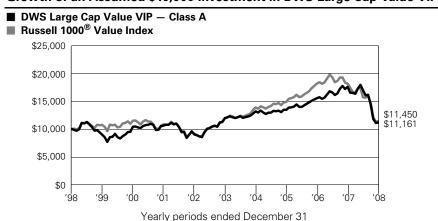

All performance shown is historical, assumes reinvestment of all dividend and capital gain distributions and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so that, when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please contact your participating insurance company for the Portfolio's most recent month-end performance. Performance doesn't reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option. These charges and fees will reduce returns. While all share classes have the same underlying portfolio, their performance will differ.

The total annual Portfolio operating expense ratios, gross of any fee waivers or expense reimbursements, as stated in the fee table of the prospectus dated May 1, 2008 are 0.83% and 1.08% for Class A and Class B shares, respectively. Please see the Information About Your Portfolio's Expenses, the Financial Highlights and Notes to the Financial Statements (Note C, Related Parties) sections of this report for gross and net expense related disclosure for the period ended December 31, 2008.

#### **Risk Considerations**

The Portfolio is subject to stock market risk. The Portfolio may focus its investments on certain economic sectors, thereby increasing its vulnerability to any single economic, political or regulatory development. This may result in greater share price volatility. Please read this Portfolio's prospectus for specific details regarding its investments and risk profile.

Portfolio returns shown for all periods reflect a fee waiver and/or expense reimbursement. Without this waiver/reimbursement, returns would have been lower.

#### Growth of an Assumed \$10,000 Investment in DWS Large Cap Value VIP

The Russell 1000<sup>®</sup> Value Index is an unmanaged index, which consists of those stocks in the Russell 1000 Index with lower price-to-book ratios and lower forecasted-growth values.

Index returns assume reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

#### **Comparative Results**

DWS Large Cap Value VIP		1-Year	3-Year	5-Year	10-Year
Class A	Growth of \$10,000	\$6,360	\$8,306	\$9,322	\$11,161
	Average annual total return	-36.40%	-6.00%	-1.39%	1.10%
Russell 1000 Value Index	Growth of \$10,000	\$6,315	\$7,707	\$9,611	\$11,450
	Average annual total return	-36.85%	-8.32%	79%	1.36%
DWS Large Cap Value VIP		1-Year	3-Year	5-Year	Life of Class*
Class B	Growth of \$10,000	\$6,336	\$8,213	\$9,148	\$10,634
	Average annual total return	-36.64%	-6.35%	-1.77%	.95%
	Growth of \$10,000	\$6.315	\$7,707	\$9,611	\$11,087
Russell 1000 Value Index	GIOWEII OI \$10,000	<i>\$67616</i>	• • •		

The growth of \$10,000 is cumulative.

\* The Portfolio commenced offering Class B shares on July 1, 2002. Index returns began on June 30, 2002.

# **Information About Your Portfolio's Expenses**

### **DWS Large Cap Value VIP**

As an investor of the Portfolio, you incur two types of costs: ongoing expenses and transaction costs. Ongoing expenses include management fees, distribution and service (12b-1) fees and other Portfolio expenses. Examples of transaction costs include contract charges, redemption fees and account maintenance fees, which are not shown in this section. The following tables are intended to help you understand your ongoing expenses (in dollars) of investing in the Portfolio and to help you compare these expenses with the ongoing expenses of investing in other mutual funds. In the most recent six-month period, the Portfolio limited these expenses, had it not done so, expenses would have been higher. The example in the table is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire period (July 1, 2008 to December 31, 2008).

The tables illustrate your Portfolio's expenses in two ways:

 Actual Portfolio Return. This helps you estimate the actual dollar amount of ongoing expenses (but not transaction costs) paid on a \$1,000 investment in the Portfolio using the Portfolio's actual return during the period. To estimate the expenses you paid over the period, simply divide your account value by 1,000 (for example, an 8,600 account value divided by 1,000 = 8.6), then multiply the result by the number in the "Expenses Paid per 1,000" line under the share class you hold.

Hypothetical 5% Portfolio Return. This helps you to compare your Portfolio's ongoing expenses (but not transaction costs) with those of other mutual funds using the Portfolio's actual expense ratio and a hypothetical rate of return of 5% per year before expenses. Examples using a 5% hypothetical Portfolio return may be found in the shareholder reports of other mutual funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in these tables are meant to highlight your ongoing expenses only and do not reflect any transaction costs. The "Expenses Paid per \$1,000" line of the tables is useful in comparing ongoing expenses only and will not help you determine the relative total expense of owning different funds. If these transaction costs had been included, your costs would have been higher.

### Expenses and Value of a \$1,000 Investment for the six months ended December 31, 2008

Actual Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$ 658.30	\$ 657.30
Expenses Paid per \$1,000*	\$ 3.54	\$ 5.00
Hypothetical 5% Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Beginning Account Value 7/1/08 Ending Account Value 12/31/08	\$1,000.00 \$1,020.86	\$1,000.00 \$1,019.10

\* Expenses are equal to the Portfolio's annualized expense ratio for each share class, multiplied by the average account value over the period, multiplied by the number of days in the most recent six-month period, then divided by 366.

Annualized Expense Ratios	Class A	Class B	
DWS Variable Series II — DWS Large Cap Value VIP	.85%	1.20%	

For more information, please refer to the Portfolio's prospectus.

These tables do not reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option.

# **Management Summary**

### **DWS Large Cap Value VIP**

The year just ended was the worst in many decades for the US equity markets. Essentially all equity indices posted negative returns for this period, as markets reflected economic problems including a housing slump, rising unemployment, a crisis of confidence and an extreme credit crunch. The Russell 3000<sup>®</sup> Index, which is generally regarded as a good indicator of the broad stock market, had a negative return of –37.31% for the 12 months ended December 31, 2008. Value stocks, as measured by the Russell 1000<sup>®</sup> Value index, performed somewhat better than growth stocks, as measured by the Russell 1000<sup>®</sup> Growth Index. With a return of –36.40% (Class A shares, unadjusted for contract charges), the Portfolio's performance was in line with that of its benchmark, the Russell 1000 Value Index, which had a return of –36.85%.

The major contributor to performance relative to the benchmark was an underweight and stock selection in the financials sector, where the Portfolio benefited from avoiding many of the worst-performing stocks.<sup>1</sup> Also positive was a position in PG&E Corp. in the utilities sector, a regulated company with an attractive yield.

Performance relative to the benchmark was hurt by an overweight and stock selection in the energy sector, which weakened significantly as oil prices dropped. Energy positions that detracted from performance include Suncor Energy, Inc. and Transocean Ltd.

#### Thomas Schuessler, Ph.D.

Portfolio Manager, Deutsche Asset Management International GmbH, Subadvisor to the Portfolio

The Russell 3000 Index is an unmanaged index that measures the performance of the 3,000 largest US companies based on total market capitalization, which represents approximately 98% of the investable US equity market.

The Russell 1000 Value Index is an unmanaged, capitalization-weighted index which consists of those stocks in the Russell 1000 Index with lower price-to-book ratios and lower forecasted growth values.

The Russell 1000 Growth Index is an unmanaged, capitalization-weighted index, consisting of those stocks in the Russell 1000 Index that have greater-than-average growth orientation.

Index returns assume the reinvestment of all dividends and, unlike portfolio returns, do not include fees or expenses. It is not possible to invest directly into an index.

<sup>1</sup> "Overweight" means the portfolio holds a higher weighting in a given sector or security than the benchmark. "Underweight" means the portfolio holds a lower weighting.

Portfolio management market commentary is as of December 31, 2008, and may not come to pass. This information is subject to change at any time based on market and other conditions. Past performance does not guarantee future results. Current and future portfolio holdings are subject to risk.

For more complete details about the Portfolio's investment portfolio, see page 137. A complete list of portfolio holdings of the portfolio is posted as of the month end on www.dws-investments.com on or about the 15th day of the following month. More frequent posting of portfolio holdings information may be made from time to time on www.dws-investments.com.

Following the Portfolio's fiscal first and third quarter-end, a complete portfolio holdings listing is filed with the SEC on Form N-Q. The form will be available on the SEC's Web site at www.sec.gov, and it also may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. Information on the operation of the SEC's Public Reference Room may be obtained by calling (800) SEC-0330.

\* Non-income producing security.

<sup>†</sup> The cost for federal income tax purposes was \$145,375,182. At December 31, 2008, net unrealized depreciation for all securities based on tax cost was \$22,320,016. This consisted of aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost of \$5,597,260 and aggregate gross unrealized depreciation for all securities in which there was an excess of tax cost over value of \$27,917,276.

(a) All or a portion of these securities were on loan (see Notes to Financial Statements). The value of all securities loaned at December 31, 2008 amounted to \$2,357,044 which is 2.0% of net assets.

(b) Affiliated fund managed by Deutsche Investment Management Americas Inc. The rate shown is the annualized seven-day yield at period end.

(c) Represents collateral held in connection with securities lending. Income earned by the Portfolio is net of borrower rebates.

ADR: American Depositary Receipt

# **Financial Highlights**

#### Class A

Years Ended December 31,	2008	2007	2006	2005	2004
Selected Per Share Data					
Net asset value, beginning of period	\$19.21	\$17.96	\$15.81	\$15.79	\$14.57
Income (loss) from investment operations:					
Net investment income (loss) <sup>a</sup>	.21	.26	.29 <sup>c</sup>	.26	.27
Net realized and unrealized gain (loss)	(5.68)	1.98	2.12	.04	1.18
Total from investment operations	(5.47)	2.24	2.41	.30	1.45
Less distributions from:					
Net investment income	(.34)	(.32)	(.26)	(.28)	(.23)
Net realized gains	(4.48)	(.67)	_	_	
Total Distributions	(4.82)	(.99)	(.26)	(.28)	(.23)
Net asset value, end of period	\$ 8.92	\$19.21	\$17.96	\$15.81	\$15.79
Total Return (%)	(36.40) <sup>b</sup>	13.15 <sup>b,d</sup>	15.41 <sup>c</sup>	1.97 <sup>b</sup>	10.07
Ratios to Average Net Assets and Supplemental Data					
Net assets, end of period (\$ millions)	118	229	275	268	274
Ratio of expenses before expense reductions (%)	.87	.83	.83	.80	.80
Ratio of expenses after expense reductions (%)	.86	.82	.83	.80	.80
Ratio of net investment income (loss) (%)	1.59	1.43	1.73 <sup>c</sup>	1.64	1.84
Portfolio turnover rate (%)	97	103	76	64	40

<sup>a</sup> Based on average shares outstanding during the period.

<sup>b</sup> Total return would have been lower had certain expenses not been reduced.

<sup>c</sup> Includes non-recurring income from the Advisor recorded as a result of an administrative proceeding regarding disclosure of brokerage allocation practices in connection with sales of DWS Funds. The non-recurring income resulted in an increase in net investment income of \$0.008 per share and an increase in the ratio of net investment income of 0.04%. Excluding this non-recurring income, total return would have been 0.04% lower.

<sup>d</sup> Includes a reimbursement from the Advisor to reimburse the effect of losses incurred as the result of certain operation errors during the period. Excluding this reimbursement, total return would have been 0.04% lower.

#### **Class B**

Years Ended December 31,	2008	2007	2006	2005	2004
Selected Per Share Data					
Net asset value, beginning of period	\$19.20	\$17.94	\$15.79	\$15.77	\$14.55
Income (loss) from investment operations:

Portfolio turnover rate (%)	97	103	76	64	40
<sup>a</sup> Based on average shares outstanding during the period					

<sup>a</sup> Based on average shares outstanding during the period.

<sup>b</sup> Total return would have been lower had certain expenses not been reduced.

<sup>c</sup> Includes non-recurring income from the Advisor recorded as a result of an administrative proceeding regarding disclosure of brokerage allocation practices in connection with sales of DWS Funds. The non-recurring income resulted in an increase in net investment income of \$0.008 per share and an increase in the ratio of net investment income of 0.04%. Excluding this non-recurring income, total return would have been 0.04% lower.

<sup>d</sup> Includes a reimbursement from the Advisor to reimburse the effect of losses incurred as the result of certain operation errors during the period. Excluding this reimbursement, total return would have been 0.04% lower.

# **Performance Summary**

### DWS Mid Cap Growth VIP

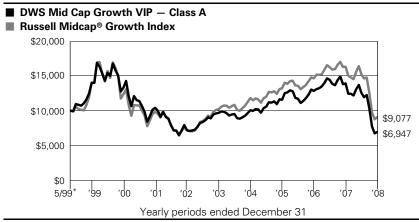

All performance shown is historical, assumes reinvestment of all dividend and capital gain distributions and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so that, when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please contact your participating insurance company for the Portfolio's most recent month-end performance. Performance doesn't reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option. These charges and fees will reduce returns. While all share classes have the same underlying portfolio, their performance will differ.

The total annual Portfolio operating expense ratios, gross of any fee waivers or expense reimbursements, as stated in the fee table of the prospectus dated May 1, 2008 are 0.95% and 1.20% for Class A and Class B shares, respectively. Please see the Information About Your Portfolio's Expenses, the Financial Highlights and Notes to the Financial Statements (Note C, Related Parties) sections of this report for gross and net expense related disclosure for the period ended December 31, 2008.

#### **Risk Considerations**

This Portfolio is subject to stock market risk, meaning stocks in the Portfolio may decline in value for extended periods of time due to the activities and financial prospects of individual companies, or due to general market and economic conditions. Stocks of medium-sized companies involve greater risk than securities of larger, more established companies, as they often have limited product lines, markets or financial resources and may be subject to more-erratic and more-abrupt market movements. Please read this Portfolio's prospectus for specific details regarding its investments and risk profile.

Portfolio returns shown for all periods reflect a fee waiver and/or expense reimbursement. Without this waiver/reimbursement, returns would have been lower.

#### Growth of an Assumed \$10,000 Investment in DWS Mid Cap Growth VIP from 5/1/1999 to 12/31/2008

Russell Midcap® Growth Index is an unmanaged index that measures the performance of those Russell Midcap companies with higher price-to-book ratios and higher forecasted growth values. The stocks are also members of the Russell 1000<sup>®</sup> Growth Index.

Index returns assume reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

### **Comparative Results**

DWS Mid Cap Growth VIP		1-Year	3-Year	5-Year	Life of Portfolio <sup>*</sup>
Class A	Growth of \$10,000	\$4,996	\$6,007	\$7,181	\$6,947
	Average annual total return	-50.04%	-15.62%	-6.41%	-3.70%
Russell Midcap Growth Index	Growth of \$10,000	\$5,568	\$6,865	\$8,887	\$9,077
	Average annual total return	-44.32%	-11.79%	-2.33%	-1.00%
DWS Mid Cap Growth VIP		1-Year	3-Year	5-Year	Life of Class**
Class B	Growth of \$10,000	\$4,974	\$5,934	\$7,049	\$8,937
	Average annual total return	-50.04%	-15.97%	-6.76%	-1.71%
Russell Midcap Growth Index	Growth of \$10,000	\$5,568	\$6,865	\$8,887	\$11,466
	Average annual total return	-44.32%	-11.79%	-2.33%	2.13%

The growth of \$10,000 is cumulative.

<sup>\*</sup> The Portfolio commenced operations on May 1, 1999. Index returns began on April 30, 1999.

\*\* The Portfolio commenced offering Class B shares on July 1, 2002. Index returns began on June 30, 2002.

# **Information About Your Portfolio's Expenses**

### **DWS Mid Cap Growth VIP**

As an investor of the Portfolio, you incur two types of costs: ongoing expenses and transaction costs. Ongoing expenses include management fees, distribution and service (12b-1) fees and other Portfolio expenses. Examples of transaction costs include contract charges, redemption fees and account maintenance fees, which are not shown in this section. The following tables are intended to help you understand your ongoing expenses (in dollars) of investing in the Portfolio and to help you compare these expenses with the ongoing expenses of investing in other mutual funds. In the most recent six-month period, the Portfolio limited these expenses; had it not done so, expenses would have been higher. The example in the table is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire period (July 1, 2008 to December 31, 2008).

The tables illustrate your Portfolio's expenses in two ways:

 Actual Portfolio Return. This helps you estimate the actual dollar amount of ongoing expenses (but not transaction costs) paid on a \$1,000 investment in the Portfolio using the Portfolio's actual return during the period. To estimate the expenses you paid over the period, simply divide your account value by 1,000 (for example, an 8,600 account value divided by 1,000 = 8.6), then multiply the result by the number in the "Expenses Paid per 1,000" line under the share class you hold.

Hypothetical 5% Portfolio Return. This helps you to compare your Portfolio's ongoing expenses (but not transaction costs) with those of other mutual funds using the Portfolio's actual expense ratio and a hypothetical rate of return of 5% per year before expenses. Examples using a 5% hypothetical Portfolio return may be found in the shareholder reports of other mutual funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in these tables are meant to highlight your ongoing expenses only and do not reflect any transaction costs. The "Expenses Paid per \$1,000" line of the tables is useful in comparing ongoing expenses only and will not help you determine the relative total expense of owning different funds. If these transaction costs had been included, your costs would have been higher.

### Expenses and Value of a \$1,000 Investment for the six months ended December 31, 2008

Actual Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$ 554.20	\$ 552.00
Expenses Paid per \$1,000*	\$ 4.06	\$ 6.20
Hypothetical 5% Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Beginning Account Value 7/1/08 Ending Account Value 12/31/08	\$1,000.00 \$1,019.91	\$1,000.00 \$1,017.14

\* Expenses are equal to the Portfolio's annualized expense ratio for each share class, multiplied by the average account value over the period, multiplied by the number of days in the most recent six-month period, then divided by 366.

Annualized Expense Ratios	Class A	Class B	
DWS Variable Series II — DWS Mid Cap Growth VIP	1.04%	1.59%	

For more information, please refer to the Portfolio's prospectus.

These tables do not reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio of any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option.

# **Management Summary**

### **DWS Mid Cap Growth VIP**

The past year has proven to be the most difficult period for global financial markets since the 1930s, with virtually all market indices posting decisively negative results. The bursting of the US housing market bubble set in motion a chain of events that culminated late last summer in the near paralysis of the global financial system. These events led to a widening in credit spreads and a complete seize-up of credit-related activity.<sup>1</sup> As the crisis grew, and market volatility hit an all-time high, the federal government intervened to prevent the failure of once venerable institutions such as AIG, Fannie Mae and Freddie Mac. The growing inability of businesses and consumers to access credit led to a sharp contraction in global economic activity by the fourth quarter. Central banks around the world cut key interest rates in an effort to jump-start economic activity. Determined not to repeat the policy errors that led to the Great Depression, the US Federal Reserve Board (the Fed) gradually lowered its target for short-term interest rates to a range between 0% and 0.25%, and has aggressively used its balance sheet to provide credit market liquidity. President-elect Obama has called the revival of the economy his first priority, and the new administration intends to implement a huge fiscal stimulus plan.

For the 12-month period ended December 31, 2008, the Portfolio returned –50.04% (Class A shares, unadjusted for contract charges), compared with the –44.32% return of the Russell Midcap<sup>®</sup> Growth Index.

Positive contributors to performance for the 12-month period included an overweight position in telecom services and underweight positions in utilities and materials.<sup>2</sup> Stock selection was positive in the energy and utilities sectors but was offset by unfavorable stock selection within financials, industrials, health care and consumer staples. Individual detractors from performance included Affiliated Managers Group, Inc.\* in the financials sector, and BE Aerospace, Inc.\* from the industrials sector. Within the energy and utilities sectors, respectively, the Portfolio's holdings in Southwestern Energy Co. and Constellation Energy Group, Inc.\* contributed to performance. We continue to maintain a long-term perspective, investing in quality mid-cap growth stocks.

Joseph Axtell, CFA Rafaelina M. Lee Jeffrey Saeger, CFA *Portfolio Managers*, Deutsche Investment Management Americas Inc.

The Russell Midcap Growth Index is an unmanaged index that measures the performance of those Russell Midcap companies with higher price-to-book ratios and higher forecasted growth values. The stocks are also members of the Russell 1000<sup>®</sup> Growth Index. Index returns assume reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

<sup>1</sup> Credit spread is the additional yield provided by non-Treasury fixed-income securities versus Treasury securities.

- <sup>2</sup> "Overweight" means the portfolio holds a higher weighting in a given sector or security than the benchmark. "Underweight" means the portfolio holds a lower weighting.
- \* Not held in the Portfolio as of December 31, 2008.

Portfolio management market commentary is as of December 31, 2008, and may not come to pass. This information is subject to change at any time based on market and other conditions. Past performance does not guarantee future results. Current and future portfolio holdings are subject to risk.

Non-income producing security.

ŧ The cost for federal income tax purposes was \$29,521,967. At December 31, 2008, net unrealized depreciation for all securities based on tax cost was \$5,617,128. This consisted of aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost of \$798,063 and aggregate gross unrealized depreciation for all securities in which there was an excess of tax cost over value of \$6,415,191.

(a) All or a portion of these securities were on loan amounting to \$5,557,998 (see Notes to Financial Statements). In addition, included in other assets and liabilities, net is a pending sale, amounting to \$13,097, that is also on loan. The value of all securities loaned at December 31, 2008 amounted to \$5,571,095, which is 30.4% of net assets.

(b) Affiliated fund managed by Deutsche Investment Management Americas Inc. The rate shown is the annualized seven-day yield at period end.

Represents collateral held in connection with securities lending. Income earned by the Portfolio is net of borrower rebates. (c)

ADR: American Depositary Receipt

#### Fair Value Measurements

The following is a summary of the inputs used as of December 31, 2008 in valuing the Portfolio's investments. For information on the Portfolio's policy regarding the valuation of investments and of the valuation inputs, and the aggregate levels used in the table below, please refer to the Security Valuation section of Note A in the accompanying Notes to the Financial Statements.

Portfolio turnover rate (%)	82	68	46	104	103

<sup>a</sup> Based on average shares outstanding during the period.

<sup>b</sup> Total return would have been lower had certain expenses not been reduced.

<sup>c</sup> Includes non-recurring income from the Advisor recorded as a result of an administrative proceeding regarding disclosure of brokerage allocation practices in connection with sales of DWS Funds. The non-recurring income resulted in an increase in net investment income of \$0.003 per share and an increase in the ratio of net investment income of 0.03%. Excluding this non-recurring income, total return would have been 0.03% lower.

# **Information About Your Portfolio's Expenses**

### **DWS Money Market VIP**

As an investor of the Portfolio, you incur two types of costs: ongoing expenses and transaction costs. Ongoing expenses include management fees, distribution and service (12b-1) fees and other Portfolio expenses. Examples of transaction costs include contract charges, redemption fees and account maintenance fees, which are not shown in this section. The following tables are intended to help you understand your ongoing expenses (in dollars) of investing in the Portfolio and to help you compare these expenses with the ongoing expenses of investing in other mutual funds. In the most recent six-month period, the Portfolio limited these expenses; had they not done so, expenses would have been higher. The example in the table is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire period (July 1, 2008 to December 31, 2008).

The tables illustrate your Portfolio's expenses in two ways:

 Actual Portfolio Return. This helps you estimate the actual dollar amount of ongoing expenses (but not transaction costs) paid on a \$1,000 investment in the Portfolio using the Portfolio's actual return during the period. To estimate the expenses you paid over the period, simply divide your account value by 1,000 (for example, an 8,600 account value divided by 1,000 = 8.6), then multiply the result by the number in the "Expenses Paid per 1,000" line under the share class you hold.

Hypothetical 5% Portfolio Return. This helps you to compare your Portfolio's ongoing expenses (but not transaction costs) with those of other mutual funds using the Portfolio's actual expense ratio and a hypothetical rate of return of 5% per year before expenses. Examples using a 5% hypothetical Portfolio return may be found in the shareholder reports of other mutual funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in these tables are meant to highlight your ongoing expenses only and do not reflect any transaction costs. The "Expenses Paid per \$1,000" line of the tables is useful in comparing ongoing expenses only and will not help you determine the relative total expense of owning different funds. If these transaction costs had been included, your costs would have been higher.

### Expenses and Value of a \$1,000 Investment for the six months ended December 31, 2008

Actual Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$1,011.50	\$1,010.30
Expenses Paid per \$1,000*	\$ 2.58	\$ 3.59
Hypothetical 5% Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
5 5 5 5 5 5 5 5 5 5 5 5 5 5 5 5 5 5 5 5		
Ending Account Value 12/31/08	\$1,022.57	\$1,021.57

\* Expenses are equal to the Portfolio's annualized expense ratio for each share class, multiplied by the average account value over the period, multiplied by the number of days in the most recent six-month period, then divided by 366.

Annualized Expense Ratios	Class A	Class B	
DWS Variable Series II — DWS Money Market VIP	.51%	.71%	

For more information, please refer to the Portfolio's prospectus.

These tables do not reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option.

# **Management Summary**

### **DWS Money Market VIP**

Over the course of 2008, we witnessed unprecedented events in the money markets as well as in financial markets worldwide. The massive credit crunch that originated with problems in the US subprime mortgage market as well as securitized mortgages eventually brought down several financial firms, including Bear Stearns and Lehman Brothers, and transformed Wall Street. September in particular was a traumatic month for the financial industry as severe losses and the general liquidity squeeze forced major financial companies such as Merrill Lynch, AIG, Washington Mutual and Wachovia to seek a rescue through government bailout or merger. In response to a general freeze-up in money market liquidity, the US government created new lending facilities for commercial paper and asset-backed commercial paper, as well for the money markets. The government also issued new short-term Treasury instruments to meet strong investor demand. By the fourth quarter, these new government programs seemed to be restoring some measure of liquidity in the money markets, though we believe it will take some time for normalcy to be restored.

During the 12-month period ended December 31, 2008, the Portfolio provided a total return of 2.64% (Class A shares, unadjusted for contract charges) compared with the 2.23% average return for the 106 funds in the Lipper Money Market Variable Annuity Funds category for the same period, according to Lipper Inc. The 7-day current yield as of December 31, 2008 was 1.59%. The investment advisor has agreed to waive certain fees/reimburse expenses. Without such fee waivers/expense reimbursements, the 7-day current yield would have been 1.31% as of December 31, 2008.

Given the difficult situation throughout the investment markets, and understanding that the credit crunch would not be a short-term phenomenon, our strategy for DWS Money Market VIP during the earlier part of 2008 was to emphasize liquidity and high credit quality while looking for ways to maximize yield potential when opportunities presented themselves. In mid-September, when conditions in the money markets worsened drastically, we enacted a significantly more defensive strategy for the Portfolio, holding more overnight securities in the form of repurchase agreements.<sup>1</sup> We also purchased Treasury and agency instruments as well as corporate commercial paper, seeking the highest quality portfolio given the extremely difficult market conditions. As market conditions eased, we extended maturity with the highest quality securities.

A group of investment professionals is responsible for the day-to-day management of the Portfolio. These investment professionals have a broad range of experience managing money market funds. Deutsche Investment Management Americas Inc.

All performance shown is historical, assumes reinvestment of all dividend and capital gain distributions and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so that, when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please contact your participating insurance company for the Portfolio's most recent month-end performance. Performance doesn't reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option. These charges and fees will reduce returns. The yield quotation more closely reflects the current earnings of the Portfolio than the total return quotation.

Yields are historical, will fluctuate and do not guarantee future performance. The 7-day current yield refers to the income paid by the Portfolio over a 7-day period expressed as an annual percentage rate of the Portfolio's shares outstanding.

#### **Risk Considerations**

An investment in this Portfolio is not insured or guaranteed by the Federal Deposit Insurance Corporation or by any other government agency. Although the Portfolio seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in the Portfolio. Please read this Portfolio's prospectus for specific details regarding its investment and risk profile.

The Lipper Money Market Variable Annuity Funds category includes funds that invest in high-quality financial instruments rated in the top two grades with dollar-weighted average maturities of less than 90 days, and that intend to keep a constant net asset value. It is not possible to invest directly in a Lipper category.

Repurchase Agreements (Repos) — an agreement between a seller and a buyer, usually of government securities, where the seller agrees to repurchase the securities at a given price and usually at a stated time. Repos are widely used money market instruments that serve as an interest-bearing, short-term "parking place" for large sums of money.

Portfolio management market commentary is as of December 31, 2008, and may not come to pass. This information is subject to change at any time based on market and other conditions. Past performance does not guarantee future results. Current and future portfolio holdings are subject to risk.

× Floating rate notes are securities whose yields vary with a designated market index or market rate, such as the coupon-equivalent of the US Treasury bill rate. These securities are shown at their current rate as of December 31, 2008.

\* \* Annualized yield at time of purchase; not a coupon rate.

Reset date; not a maturity date. (a)

(b) Collateralized by \$24,644,933 Federal National Mortgage Association, with various coupon rates from 5.0–6.0%, with various maturity dates of 6/1/2018-10/1/2038, with a value of \$25,500,681.

144A: Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers.

#### Fair Value Measurements

The following is a summary of the inputs used as of December 31, 2008 in valuing the Portfolio's investments. For information on the Portfolio's policy regarding the valuation of investments and of the valuation inputs, and the aggregate levels used in the table below, please refer to the Security Valuation section of Note A in the accompanying Notes to the Financial Statements.

Valuation Inputs	Investments in Securities
Level 1	\$ —
Level 2	398,111,737
Level 3	—
Total	\$ 398,111,737

# **Performance Summary**

### **DWS Small Cap Growth VIP**

All performance shown is historical, assumes reinvestment of all dividend and capital gain distributions and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so that, when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please contact your participating insurance company for the Portfolio's most recent month-end performance. Performance doesn't reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option. These charges and fees will reduce returns. While all share classes have the same underlying portfolio, their performance will differ.

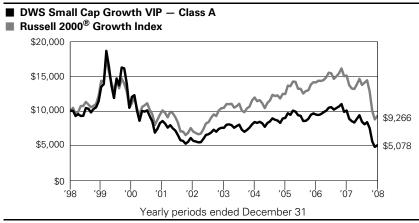

The total annual Portfolio operating expense ratios, gross of any fee waivers or expense reimbursements, as stated in the fee table of the prospectus dated May 1, 2008 are 0.75% and 1.00% for Class A and Class B shares, respectively. Please see the Information About Your Portfolio's Expenses, the Financial Highlights and Notes to the Financial Statements (Note C, Related Parties) sections of this report for gross and net expense related disclosure for the period ended December 31, 2008.

#### **Risk Considerations**

This Portfolio is subject to stock market risk, meaning stocks in the Portfolio may decline in value for extended periods of time due to the activities and financial prospects of individual companies, or due to general market and economic conditions. Additionally, stocks of small companies involve greater risk than securities of larger, more-established companies, as they often have limited product lines, markets or financial resources and may be subject to more erratic and abrupt market movements. Finally, derivatives may be more volatile and less liquid than traditional securities and the Portfolio could suffer losses on its derivatives positions. Please read this Portfolio's prospectus for specific details regarding this product's investments and risk profile.

Portfolio returns shown for all periods reflect a fee waiver and/or expense reimbursement. Without this waiver/reimbursement, returns would have been lower.

#### Growth of an Assumed \$10,000 Investment in DWS Small Cap Growth VIP

The Russell 2000<sup>®</sup> Growth Index is an unmanaged, capitalization-weighted measure of 2,000 of the smallest capitalized US companies with a greater-than-average growth orientation and whose common stocks trade on the NYSE, NYSE Alternext US (formerly known as the American Stock Exchange (AMEX)) and Nasdaq.

Index returns assume reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

#### **Comparative Results**

DWS Small Cap Growth VIP		1-Year	3-Year	5-Year	10-Year
Class A	Growth of \$10,000	\$5,050	\$5,645	\$6,711	\$5,078
	Average annual total return	-49.50%	-17.35%	-7.67%	-6.55%
Russell 2000 Growth Index	Growth of \$10,000	\$6,146	\$7,457	\$8,878	\$9,266
	Average annual total return	-38.54%	-9.32%	-2.35%	76%
DWS Small Cap Growth VIP		1-Year	3-Year	5-Year	Life of Class <sup>*</sup>
Class B	Growth of \$10,000	\$5,098	\$5,653	\$6,670	\$8,019
	Average annual total return	-49.09%	-17.31%	-7.78%	-3.34%
Russell 2000 Growth Index	Growth of \$10,000	\$6,146	\$7,457	\$8,878	\$11,127
	Average annual total return	-38.54%	-9.32%	-2.35%	1.66%

The growth of \$10,000 is cumulative.

<sup>t</sup> The Portfolio commenced offering Class B shares on July 1, 2002. Index returns began on June 30, 2002.

# **Information About Your Portfolio's Expenses**

### **DWS Small Cap Growth VIP**

As an investor of the Portfolio, you incur two types of costs: ongoing expenses and transaction costs. Ongoing expenses include management fees, distribution and service (12b-1) fees and other Portfolio expenses. Examples of transaction costs include contract charges, redemption fees and account maintenance fees, which are not shown in this section. The following tables are intended to help you understand your ongoing expenses (in dollars) of investing in the Portfolio and to help you compare these expenses with the ongoing expenses of investing in other mutual funds. In the most recent six-month period, the Portfolio limited these expenses; had it not done so, expenses would have been higher. The example in the table is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire period (July 1, 2008 to December 31, 2008).

The tables illustrate your Portfolio's expenses in two ways:

 Actual Portfolio Return. This helps you estimate the actual dollar amount of ongoing expenses (but not transaction costs) paid on a \$1,000 investment in the Portfolio using the Portfolio's actual return during the period. To estimate the expenses you paid over the period, simply divide your account value by 1,000 (for example, an 8,600 account value divided by 1,000 = 8.6), then multiply the result by the number in the "Expenses Paid per 1,000" line under the share class you hold.

Hypothetical 5% Portfolio Return. This helps you to compare your Portfolio's ongoing expenses (but not transaction costs) with those of other mutual funds using the Portfolio's actual expense ratio and a hypothetical rate of return of 5% per year before expenses. Examples using a 5% hypothetical Portfolio return may be found in the shareholder reports of other mutual funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in these tables are meant to highlight your ongoing expenses only and do not reflect any transaction costs. The "Expenses Paid per \$1,000" line of the tables is useful in comparing ongoing expenses only and will not help you determine the relative total expense of owning different funds. If these transaction costs had been included, your costs would have been higher.

### Expenses and Value of a \$1,000 Investment for the six months ended December 31, 2008

Actual Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$ 602.10	\$ 614.70
Expenses Paid per \$1,000*	\$ 3.58	\$ 5.07
Hypothetical 5% Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Beginning Account Value 7/1/08 Ending Account Value 12/31/08	\$1,000.00	\$1,000.00 \$1,018.85

\* Expenses are equal to the Portfolio's annualized expense ratio for each share class, multiplied by the average account value over the period, multiplied by the number of days in the most recent six-month period, then divided by 366.

Annualized Expense Ratios	Class A	Class B	
DWS Variable Series II — DWS Small Cap Growth VIP	.89%	1.25%	

For more information, please refer to the Portfolio's prospectus.

These tables do not reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option.

# **Management Summary**

### **DWS Small Cap Growth VIP**

The past year has proven to be the most difficult period for global financial markets since the 1930s, with virtually all market indices posting decisively negative results. The bursting of the US housing market bubble set in motion a chain of events that culminated late last summer in the near paralysis of the global financial system. This led to a widening in credit spreads and a complete seize-up of credit-related activity.<sup>1</sup> As the crisis grew, and market volatility hit an all-time high, the federal government intervened to prevent the failure of once venerable institutions such as AIG, Federal National Mortgage Association (Fannie Mae) and Federal Home Loan Mortgage Corporation (Freddie Mac). The growing inability of businesses and consumers to access credit led to a sharp contraction in global economic activity. Determined not to repeat the policy errors that led to the Great Depression, the US Federal Reserve Board (the Fed) gradually lowered its target for short-term interest rates to a range between 0% and 0.25%, and has aggressively used its balance sheet to provide credit market liquidity. President-elect Obama has called the revival of the economy his first priority, and the new administration intends to implement a huge fiscal stimulus plan that could reach \$1 trillion.

For the 12-month period ended December 31, 2008, the Portfolio returned –49.50% (Class A shares, unadjusted for contract charges) compared with the –38.54% return of the Russell 2000<sup>®</sup> Growth Index.

Positive contributors to performance over the 12-month period included an overweight position in consumer staples, and underweights to telecom services, utilities and materials.<sup>2</sup> Stock selection was positive within the consumer staples sector, and contributions to performance from the sector came from Green Mountain Coffee Roasters, Inc. and Pantry, Inc. Detractors from performance included unfavorable stock selection in health care, financials and energy. Individual detractors from returns included positions in the energy company Tesco Corp. and from financials, E\*TRADE Financial Corp. Overweight positions in consumer discretionary and information technology also subtracted from returns, as did an underweight to health care. We continue to maintain a long-term perspective, investing in quality small-cap growth stocks.

Joseph Axtell, CFARafaelina M. LeeJeffrey Saeger, CFAPortfolio Managers, Deutsche Investment Management Americas Inc.

The Russell 2000 Growth Index is an unmanaged, capitalization-weighted index of those securities in the Russell 2000 Index with a higher price-to-book ratio and higher forecasted growth values. Index returns assume reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

<sup>1</sup> Credit spread is the additional yield provided by non-Treasury fixed-income securities versus Treasury securities.

<sup>2</sup> "Overweight" means the portfolio holds a higher weighting in a given sector or security than the benchmark. "Underweight" means the portfolio holds a lower weighting.

Portfolio management market commentary is as of December 31, 2008, and may not come to pass. This information is subject to change at any time based on market and other conditions. Past performance does not guarantee future results. Current and future portfolio holdings are subject to risk.

\* Non-income producing security.

<sup>†</sup> The cost for federal income tax purposes was \$110,551,428. At December 31, 2008, net unrealized depreciation for all securities based on tax cost was \$25,059,121. This consisted of aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost of \$4,803,766 and aggregate gross unrealized depreciation for all securities in which there was an excess of over value of \$29,862,887.

(a) All or a portion of these securities were on loan amounting to \$14,779,614. In addition, included in other assets and liabilities, net is a pending sale, amounting to \$147,346 that is also on loan (see Notes to Financial Statements). The value of all securities loaned at December 31, 2008 amounted to \$14,926,960, which is 21.5% of net assets.

(b) Affiliated fund managed by Deutsche Investment Management Americas Inc. The rate shown is the annualized seven-day yield at period end.

(c) Represents collateral held in connection with securities lending. Income earned by the Portfolio is net of borrower rebates.

ADR: American Depositary Receipt

#### Fair Value Measurements

The following is a summary of the inputs used as of December 31, 2008 in valuing the Portfolio's investments. For information on the Portfolio's policy regarding the valuation of investments and of the valuation inputs, and the aggregate levels used in the table below, please refer to the Security Valuation section of Note A in the accompanying Notes to the Financial Statements.

Valuation Inputs		vestments in Securities

a Based on average shares outstanding during the period.

<sup>b</sup> Total return would have been lower had certain expenses been reduced.

<sup>c</sup> In 2005, the Portfolio realized a gain of \$49,496 on the disposal of an investment not meeting the Portfolio's investment restrictions. This violation had no negative impact on the total return.

<sup>d</sup> Includes non-recurring income from the Advisor recorded as a result of an administrative proceeding regarding disclosure of brokerage allocation practices in connection with sales of DWS Funds. The non-recurring income resulted in an increase in net investment income of \$0.008 per share and an increase in the ratio of net investment income of 0.06%. Excluding this non-recurring income, total return would have been 0.06% lower.

Class B

<sup>c</sup> In 2005, the Portfolio realized a gain of \$49,496 on the disposal of an investment not meeting the Portfolio's investment restrictions. This violation had no negative impact on the total return.

<sup>d</sup> Includes non-recurring income from the Advisor recorded as a result of an administrative proceeding regarding disclosure of brokerage allocation practices in connection with sales of DWS Funds. The non-recurring income resulted in an increase in net investment income of \$0.008 per share and an increase in the ratio of net investment income of 0.06%. Excluding this non-recurring income, total return would have been 0.06% lower.

# **Performance Summary**

### **DWS Strategic Income VIP**

All performance shown is historical, assumes reinvestment of all dividend and capital gain distributions and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so that, when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please contact your participating insurance company for the Portfolio's most recent month-end performance. Performance doesn't reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option. These charges and fees will reduce returns. While all share classes have the same underlying portfolio, their performance will differ.

The total annual portfolio operating expense ratios, gross of any fee waivers or expense reimbursements, as stated in the fee table of the prospectus dated May 1, 2008 are 0.89% and 1.14% for Class A and Class B shares, respectively. Please see the Information About Your Portfolio's Expenses, the Financial Highlights and Notes to the Financial Statements (Note C, Related Parties) sections of this report for gross and net expense related disclosure for the period ended December 31, 2008.

### **Risk Considerations**

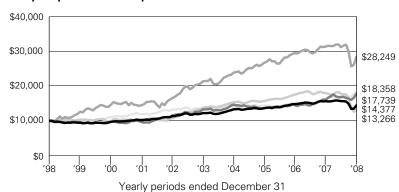

The Portfolio invests in individual bonds whose yields and market values fluctuate so that your investment may be worth more or less than its original cost. Bond investments are subject to interest-rate risk such that when interest rates rise, the prices of the bonds, and thus the value of the bond investment, can decline and the investor can lose principal value. Additionally, investments by the Portfolio in lower-rated bonds present greater risk to principal and income than investments in higher-quality securities. The Portfolio invests in derivatives seeking to hedge positions in certain securities and to generate income in order to enhance the Portfolio's returns. Derivatives can be more volatile and less liquid than traditional fixed-income securities. Finally, investing in foreign securities presents certain risks, such as currency fluctuation, political and economic changes and market risks. All of these factors may result in greater share price volatility. Please read this Portfolio's prospectus for specific details regarding its investments and risk profile.

Portfolio returns for all periods shown reflect a fee waiver and/or expense reimbursement. Without this waiver/reimbursement, returns would have been lower.

#### Growth of an Assumed \$10,000 Investment in DWS Strategic Income VIP

- Citigroup World Government Bond Index
- JP Morgan Emerging Markets Bond Index Plus
- Credit Suisse High Yield Index
- Barclays Capital US Treasury Index

The Citigroup World Government Bond Index is an unmanaged index comprised of government bonds from 22 developed countries (including the US) with maturities greater than one year. The JP Morgan Emerging Markets Bond Index Plus is an unmanaged foreign securities index of US dollar- and other

external-currency-denominated Brady bonds, loans, Eurobonds and local market debt instruments traded in emerging markets. The Credit Suisse High Yield Index is an unmanaged, trader-priced portfolio constructed to mirror the global high-yield debt market. The Barclays Capital US Treasury Index (name changed from Lehman Brothers US Treasury Index, effective November 3, 2008) is an unmanaged index reflecting the performance of all public obligations and does not focus on one particular segment of the Treasury market.

Index returns, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

The growth of \$10,000 is cumulative.

\* The Portfolio commenced offering Class B shares on May 1, 2003. Index returns began on April 30, 2003.

# **Information About Your Portfolio's Expenses**

### **DWS Strategic Income VIP**

As an investor of the Portfolio, you incur two types of costs: ongoing expenses and transaction costs. Ongoing expenses include management fees, distribution and service (12b-1) fees and other Portfolio expenses. Examples of transaction costs include contract charges, redemption fees and account maintenance fees, which are not shown in this section. The following tables are intended to help you understand your ongoing expenses (in dollars) of investing in the Portfolio and to help you compare these expenses with the ongoing expenses of investing in other mutual funds. In the most recent six-month period, the Portfolio limited these expenses; had it not done so, expenses would have been higher. The example in the table is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire period (July 1, 2008 to December 31, 2008).

The tables illustrate your Portfolio's expenses in two ways:

 Actual Portfolio Return. This helps you estimate the actual dollar amount of ongoing expenses (but not transaction costs) paid on a \$1,000 investment in the Portfolio using the Portfolio's actual return during the period. To estimate the expenses you paid over the period, simply divide your account value by 1,000 (for example, an 8,600 account value divided by 1,000 = 8.6), then multiply the result by the number in the "Expenses Paid per 1,000" line under the share class you hold.

Hypothetical 5% Portfolio Return. This helps you to compare your Portfolio's ongoing expenses (but not transaction costs) with those of other mutual funds using the Portfolio's actual expense ratio and a hypothetical rate of return of 5% per year before expenses. Examples using a 5% hypothetical Portfolio return may be found in the shareholder reports of other mutual funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in these tables are meant to highlight your ongoing expenses only and do not reflect any transaction costs. The "Expenses Paid per \$1,000" line of the tables is useful in comparing ongoing expenses only and will not help you determine the relative total expense of owning different funds. If these transaction costs had been included, your costs would have been higher.

### Expenses and Value of a \$1,000 Investment for the six months ended December 31, 2008

Actual Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$ 920.90	\$ 932.60
Expenses Paid per \$1,000*	\$ 4.15	\$ 5.49
Hypothetical 5% Portfolio Return	Class A	Class B
	\$1,000.00	\$1,000.00
Beginning Account Value 7/1/08 Ending Account Value 12/31/08		\$1,000.00 \$1,019.46

\* Expenses are equal to the Portfolio's annualized expense ratio for each share class, multiplied by the average account value over the period, multiplied by the number of days in the most recent six-month period, then divided by 366.

Annualized Expense Ratios	Class A	Class B	
DWS Variable Series II — DWS Strategic Income VIP	.86%	1.13%	

For more information, please refer to the Portfolio's prospectus.

These tables do not reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option.

# **Management Summary**

### **DWS Strategic Income VIP**

While the rapid swings and overall decline in stock prices garnered most of the headlines during the past 12 months, the bond market also had its share of volatility. The cause of this volatility was the ongoing fallout from the housing and credit crises, which led to the outright failure or forced mergers of numerous financial institutions in both the United States and Europe. The resulting credit crunch led to a slowdown in global economic growth, which accelerated late in the period. In this environment, investors' risk appetites evaporated and liquidity all but disappeared. This led to a frantic "flight to quality" into the safe haven of US Treasuries and underperformance for virtually all other segments of the bond market. Lower-quality issues — most notably corporate bonds with the lowest credit ratings — underperformed the broader bond market by a wide margin. The situation was largely the same overseas, where the best performance was generated by the government bond markets of the developed economies.

The Portfolio posted a –7.75% return for the period ending December 31, 2008 (Class A shares, unadjusted for contract charges). This compares with the Portfolio benchmarks' returns of –9.70% for the JPMorgan Emerging Markets Bond Index Plus, –26.17% for the Credit Suisse High Yield Index, 13.74% for the Barclays Capital US Treasury Index and 10.89% for the Citigroup World Government Bond Index.

In the past, the Portfolio's broad exposure to a wide range of fixed-income asset classes has been one of the most important factors in its strong long-term track record. During the past year, however, the severe underperformance of the non-government segments of the bond market made such diversification a liability. During the year, we maintained significant exposure to both high-yield and emerging-markets bonds. This positioning had a negative impact on the Portfolio's relative return for the period, as both asset classes were down sharply. On the positive side, the Portfolio's relatively long overall duration during the year aided performance in a declining interest rate environment.<sup>1</sup> Over the second half of the year, we began shifting the Portfolio to a higher-quality profile in view of the continued weak outlook for the global economy, trimming our exposure to high-yield and emerging-markets bonds. In addition, we have been seeking to increase exposure to the Eurozone, UK and Canada, where central banks have more room to lower rates than in the US.

In addition to the main investment strategy, we employ a global tactical asset allocation strategy. This strategy, which the Advisor calls iGAP (integrated Global Alpha Platform) detracted from the Portfolio's return.

Gary Sullivan, CFAWilliam Chepolis, CFAMatthew F. MacDonald, CFAThomas PicciochiRobert WangPortfolio Managers, Deutsche Investment Management Americas Inc.

The JPMorgan Emerging Markets Bond Index Plus is an unmanaged foreign securities index of US dollar and other external-currency-denominated Brady bonds, loans, Eurobonds and local market debt instruments traded in emerging markets.

Credit Suisse High Yield Index is an unmanaged, trader-priced portfolio constructed to mirror the global high-yield debt market.

The Barclays Capital US Treasury Index (name changed from Lehman Brothers US Treasury Index, effective November 3, 2008) is an unmanaged index reflecting the performance of all public obligations and does not focus on one particular segment of the Treasury market.

The Citigroup World Government Bond Index is an unmanaged index comprised of government bonds from 22 developed countries, including the US, with maturities greater than one year.

Index returns, unlike portfolio returns, do not reflect fees or expenses. It is not possible to invest directly into an index.

<sup>1</sup> Duration is a measure of bond price volatility. Duration can be defined as the approximate percentage change in price for a 100-basis-point (one single percentage point) change in market interest rate levels. A duration of 1.25, for example, means that the price of a bond or bond portfolio should rise by approximately 1.25% for a one-percentage-point drop in interest rates, and that it should fall by 1.25% for a one-percentage-point rise in interest rates.

Portfolio management market commentary is as of December 31, 2008, and may not come to pass. This information is subject to change at any time based on market and other conditions. Past performance does not guarantee future results. Current and future portfolio holdings are subject to risk.

Asset allocation, quality, effective maturity and interest rate sensitivity are subject to change.

The quality ratings represent the lower of Moody's Investors Service, Inc. ("Moody's") or Standard & Poor's Corporation ("S&P") credit ratings. The ratings of Moody's and S&P represent their opinions as to the quality of the securities they rate. Ratings are relative and subjective and are not absolute standards of quality. The Portfolio's credit quality does not remove market risk.

For more complete details about the Portfolio's investment portfolio, see page 173. A complete list of portfolio holdings of the portfolio is posted as of the month end on www.dws-investments.com on or about the 15th day of the following month. More frequent posting of portfolio holdings information may be made from time to time on www.dws-investments.com.

Following the Portfolio's fiscal first and third quarter-end, a complete portfolio holdings listing is filed with the SEC on Form N-Q. The form will be available on the SEC's Web site at www.sec.gov, and it also may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. Information on the operation of the SEC's Public Reference Room may be obtained by calling (800) SEC-0330.

				522,185	155,460

\*\*\* Floating rate notes are securities whose yields vary with a designated market index or market rate, such as the coupon-equivalent of the US Treasury bill rate. These securities are shown at their current rate as of December 31, 2008.

\*\*\*\*\* Annualized yield at time of purchase; not a coupon rate.

<sup>†</sup> The cost for federal income tax purposes was \$83,894,744. At December 31, 2008, net unrealized depreciation for all securities based on tax cost was \$8,970,305. This consisted of aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost of \$2,592,990 and aggregate gross unrealized depreciation for all securities in which there was an excess of tax cost over value of \$11,563,295.

(a) Principal amount stated in US dollars unless otherwise noted.

(b) All or a portion of these securities were on loan (see Notes to Financial Statements). The value of all securities loaned at December 31, 2008 amounted to \$1,822,255, which is 2.5% of net assets.

(c) Security has deferred its 6/15/2008 interest payment until 6/30/2009.

(d) At December 31, 2008, this security has been pledged, in whole or in part, to cover initial margin requirements for open futures contracts.

(e) Bond is insured by one of these companies:

Insurance Coverage	As a % of Total Investment Portfolio
Financial Security Assurance, Inc.	1.5

(f) Date shown is call date; not a maturity date for the perpetual preferred securities.

(g) Affiliated fund managed by Deutsche Investment Management Americas Inc. The rate shown is the annualized seven-day yield at period end.

(h) Represents collateral held in connection with securities lending. Income earned by the Portfolio is net of borrower rebates.

(i) When-issued or delayed delivery securities included.

144A: Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers.

LIBOR: Represents the London InterBank Offered Rate.

PIK: Denotes that all or a portion of the income is paid in-kind.

Prerefunded: Bonds which are prerefunded are collateralized usually by US Treasury securities which are held in escrow and used to pay principal and interest on tax-exempt issues and to retire the bonds in full at the earliest refunding date.

REG S: Securities sold under Regulation S may not be offered, sold or delivered within the United States or to, or for the account or benefit of, US persons, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act. At December 31, 2008, open futures contracts purchased were as follows:

Futures	Expiration Date	Contracts	Aggregate Face Value (\$)	Value (\$)	Unrealized Appreciation/ (Depreciation) (\$)

#### Fair Value Measurements

The following is a summary of the inputs used as of December 31, 2008 in valuing the Portfolio's investments. For information on the Portfolio's policy regarding the valuation of investments and of the valuation inputs, and the aggregate levels used in the tables below, please refer to the Security Valuation section of Note A in the accompanying Notes to the Financial Statements.

Valuation Inputs	vestments in Securities	Options Written, at value	er Financial truments <sup>††</sup>
Level 1	\$ 1,916,492	\$ —	\$ (6,060)
Level 2	71,130,364	(118,705)	682,499
Level 3	1,877,583	_	_
Total	\$ 74,924,439	\$ (118,705)	\$ 676,439

Other financial instruments are derivative instruments not reflected in the Investment Portfolio, such as futures contracts, forward foreign exchange contracts, credit default and total return swap contracts, which are valued at the unrealized appreciation (depreciation) on the instrument.

. .

1. . . .

The following is a reconciliation of the Portfolio's Level 3 investments for which significant unobservable inputs were used in determining value at December 31, 2008:

	Investments in Securities
Balance as of January 1, 2008	\$ 533,240
Net realized gain (loss)	(10,075)
Change in unrealized appreciation (depreciation)	(370,181)
Amortization Premium/Discount	(32)
Net purchases (sales)	1,546,583
Net transfers in (out) of Level 3	178,048
Balance as of December 31, 2008	\$ 1,877,583

а Based on average shares outstanding during the period.

b Total return would have been lower had certain expenses not been reduced.

# **Performance Summary**

## **DWS Technology VIP**

All performance shown is historical, assumes reinvestment of all dividend and capital gain distributions and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so that, when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please contact your participating insurance company for the Portfolio's most recent month-end performance. Performance doesn't reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option. These charges and fees will reduce returns. While all share classes have the same underlying portfolio, their performance will differ.

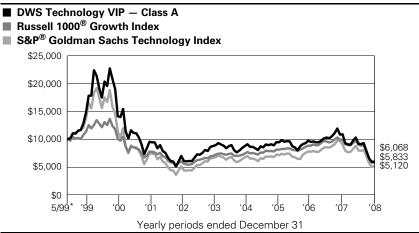

The total annual Portfolio operating expense ratios, gross of any fee waivers or expense reimbursements, as stated in the fee table of the prospectus dated May 1, 2008 are 0.91% and 1.29% for Class A and Class B shares, respectively. Please see the Information About Your Portfolio's Expenses, the Financial Highlights and Notes to the Financial Statements (Note C, Related Parties) sections of this report for gross and net expense related disclosure for the period ended December 31, 2008.

#### **Risk Considerations**

This Portfolio is subject to stock market risk, meaning stocks in the Portfolio may decline in value for extended periods of time due to the activities and financial prospects of individual companies, or due to general market and economic conditions. Investments by the Portfolio in small companies present greater risk of loss than investments in larger, more established companies. Concentration of the Portfolio's investment in technology stocks may present a greater risk than investments in a more diversified portfolio. Investments by the Portfolio in emerging technology companies present greater risk than investments in more established technology companies. This Portfolio is non-diversified and can take larger positions in fewer companies, increasing its overall potential risk. Please read this Portfolio's prospectus for specific details regarding this product's investments and risk profile.

Portfolio returns shown during all periods reflect a fee waiver and/or expense reimbursement. Without this waiver/reimbursement, returns would have been lower.

#### Growth of an Assumed \$10,000 Investment in DWS Technology VIP from 5/1/1999 to 12/31/2008

The Russell 1000<sup>®</sup> Growth Index is an unmanaged index that consists of those stocks in the Russell 1000 Index with higher price-to-book ratios and higher forecasted growth values.

The S&P<sup>®</sup> Goldman Sachs Technology Index is an unmanaged capitalization-weighted index based on a universe of technology-related stocks.

Index returns assume reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

The growth of \$10,000 is cumulative.

\* The Portfolio commenced operations on May 1, 1999. Index returns began on April 30, 1999.

\*\* The Portfolio commenced offering Class B shares on July 1, 2002. Index returns began on June 30, 2002.

# **Information About Your Portfolio's Expenses**

## **DWS Technology VIP**

As an investor of the Portfolio, you incur two types of costs: ongoing expenses and transaction costs. Ongoing expenses include management fees, distribution and service (12b-1) fees and other Portfolio expenses. Examples of transaction costs include contract charges, redemption fees and account maintenance fees, which are not shown in this section. The following tables are intended to help you understand your ongoing expenses (in dollars) of investing in the Portfolio and to help you compare these expenses with the ongoing expenses of investing in other mutual funds. The example in the table is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire period (July 1, 2008 to December 31, 2008).

The tables illustrate your Portfolio's expenses in two ways:

• Actual Portfolio Return. This helps you estimate the actual dollar amount of ongoing expenses (but not transaction costs) paid on a \$1,000 investment in the Portfolio using the Portfolio's actual return during the period. To estimate the expenses you paid over the period, simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the "Expenses Paid per \$1,000" line under the share class you hold.

Hypothetical 5% Portfolio Return. This helps you to compare your Portfolio's ongoing expenses (but not transaction costs) with those of other mutual funds using the Portfolio's actual expense ratio and a hypothetical rate of return of 5% per year before expenses. Examples using a 5% hypothetical Portfolio return may be found in the shareholder reports of other mutual funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in these tables are meant to highlight your ongoing expenses only and do not reflect any transaction costs. The "Expenses Paid per \$1,000" line of the tables is useful in comparing ongoing expenses only and will not help you determine the relative total expense of owning different funds. If these transaction costs had been included, your costs would have been higher.

Actual Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$ 636.50	\$ 634.40
Expenses Paid per \$1,000*	\$ 4.03	\$ 5.42
Hypothetical 5% Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$1,020.21	\$1,018.50

### Expenses and Value of a \$1,000 Investment for the six months ended December 31, 2008

\* Expenses are equal to the Portfolio's annualized expense ratio for each share class, multiplied by the average account value over the period, multiplied by the number of days in the most recent six-month period, then divided by 366.

Annualized Expense Ratios	Class A	Class B	
DWS Variable Series II — DWS Technology VIP	.98%	1.32%	

For more information, please refer to the Portfolio's prospectus.

These tables do not reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option.

# **Management Summary**

## **DWS Technology VIP**

Technology stocks produced a negative absolute return and underperformed the broader market during 2008. Slowing economic growth led to reduced spending by both consumers and corporations, causing sharp reductions to the earnings estimates for tech companies. With this as the backdrop, the Portfolio's benchmarks, the S&P<sup>®</sup> Goldman Sachs Technology Index and the Russell 1000<sup>®</sup> Growth Index returned –43.33% and –38.44 respectively, during the annual period. Class A shares of DWS Technology VIP (unadjusted for contract charges) returned –46.22%. Key contributors to relative performance were positions in Foundry Networks\* (which was bid for by Brocade Communications Systems in July), Taiwan Semiconductor Manufacturing Co. Ltd. and Visa, Inc. Notable detractors were Ciena Corp., Nvidia Corp.\* and an underweight in International Business Machines Corp.<sup>1</sup>

The fund's management team changed on November 21, 2008. While many features of the previous approach remain intact, such as an emphasis on looking for investment ideas across the entire market capitalization spectrum, there is now also a thematic component to the Portfolio's strategy. Among the investment themes that we will focus on are the growing need for firms to use technology to meet their compliance and regulation requirements, server/storage/desktop virtualization, technologies that help increase network bandwidth capacity, and continued growth in e-commerce and Internet traffic.

While we remain cautious on the near-term outlook for technology stocks, we believe much of the bad news has already been factored into stock prices. As a result, we are finding compelling values among stocks with rising market share, strong product and/or service offerings, and healthy balance sheets. We will continue to focus our bottom-up research efforts on unearthing these opportunities in the year ahead.

Kelly P. DavisClark ChangLead Portfolio ManagerPortfolio Manager, Deutsche Investment Management Americas Inc.

The S&P Goldman Sachs Technology Index is an unmanaged, capitalization-weighted index based on a universe of technology-related stocks. The Russell 1000 Growth Index is an unmanaged index that consists of those stocks in the Russell 1000 Index with higher price-to-book ratios and higher forecasted growth values.

Index returns assume reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

<sup>1</sup> "Overweight" means the Portfolio holds a higher weighting in a given sector or security than the benchmark. "Underweight" means the Portfolio holds a lower weighting.

\* Not held in the Portfolio as of December 31, 2008.

Portfolio management market commentary is as of December 31, 2008, and may not come to pass. This information is subject to change at any time based on market and other conditions. Past performance does not guarantee future results. Current and future portfolio holdings are subject to risk.

Asset allocation and sector diversification are subject to change.

For more complete details about the Portfolio's investment portfolio, see page 190. A complete list of portfolio holdings of the portfolio is posted as of the month end on www.dws-investments.com on or about the 15th day of the following month. More frequent posting of portfolio holdings information may be made from time to time on www.dws-investments.com.

Following the Portfolio's fiscal first and third quarter-end, a complete portfolio holdings listing is filed with the SEC on Form N-Q. The form will be available on the SEC's Web site at www.sec.gov, and it also may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. Information on the operation of the SEC's Public Reference Room may be obtained by calling (800) SEC-0330.

Other Assets and Liabilities, Net Net Assets	(13.8) 100.0	(8,438,502) 61,194,287

- \* Non-income producing security.
- <sup>†</sup> The cost for federal income tax purposes was \$93,123,829. At December 31, 2008, net unrealized depreciation for all securities based on tax cost was \$23,491,040. This consisted of aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost of \$3,949,503 and aggregate gross unrealized depreciation for all securities in which there was an excess of tax cost over value of \$27,440,543.
- (a) All or a portion of these securities were on loan (see Notes to Financial Statements). The value of all securities loaned at December 31, 2008 amounted to \$8,327,493, which is 13.6% of net assets.
- (b) Affiliated fund managed by Deutsche Investment Management Americas Inc. The rate shown is the annualized seven-day yield at period end.

(c) Represents collateral held in connection with securities lending. Income earned by the Portfolio is net of borrower rebates.

ADR: American Depositary Receipt

REIT: Real Estate Investment Trust

#### Fair Value Measurements

The following is a summary of the inputs used as of December 31, 2008 in valuing the Portfolio's investments. For information on the Portfolio's policy regarding the valuation of investments and of the valuation inputs, and the aggregate levels used in the table below, please refer to the Security Valuation section of Note A in the accompanying Notes to the Financial Statements.

Valuation Inputs	Investments Securities	
Level 1	\$ 67,345,7	738
Level 2	2,287,0	)51
Level 3		
Total	\$ 69,632,7	789

Net asset value, end of period	\$ 5.64	\$10.53	\$ 9.25	\$ 9.21	\$ 8.93
Total Return (%)	(46.44) <sup>b</sup>	13.84	.43 <sup>c</sup>	3.27	1.48 <sup>b</sup>
Ratios to Average Net Assets and Supplemental Data					
Net assets, end of period (\$ millions)	2	3	14	16	16
Ratio of expenses before expense reductions (%)	1.35	1.29	1.28	1.26	1.22
Ratio of expenses after expense reductions (%)	1.35	1.29	1.28	1.26	1.21
Ratio of net investment income (loss) (%)	(.35)	(.53)	(.51) <sup>c</sup>	(.76)	.05
Portfolio turnover rate (%)	71	91	49	135	112

<sup>a</sup> Based on average shares outstanding during the period.

<sup>b</sup> Total return would have been lower had certain expenses not been reduced.

<sup>c</sup> Includes non-recurring income from the Advisor recorded as a result of an administrative proceeding regarding disclosure of brokerage allocation practices in connection with sales of DWS Funds. The non-recurring income resulted in an increase in net investment income of \$0.017 per share and an increase in the ratio of net investment income of 0.18%. Excluding this non-recurring income, total return would have been 0.19% lower.

# **Performance Summary**

## **DWS Turner Mid Cap Growth VIP**

All performance shown is historical, assumes reinvestment of all dividend and capital gain distributions and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so that, when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please contact your participating insurance company for the Portfolio's most recent month-end performance. Performance doesn't reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option. These charges and fees will reduce returns. While all share classes have the same underlying portfolio, their performance will differ.

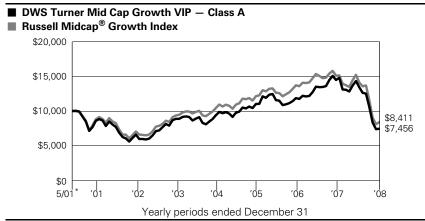

The total annual portfolio operating expense ratios, gross of any fee waivers or expense reimbursements, as stated in the fee table of the prospectus dated May 1, 2008 are 0.91% and 1.16% for Class A and Class B shares, respectively. Please see the Information About Your Portfolio's Expenses, the Financial Highlights and Notes to the Financial Statements (Note C, Related Parties) sections of this report for gross and net expense related disclosure for the period ended December 31, 2008.

#### **Risk Considerations**

The Portfolio is subject to stock market risk, meaning stocks in the Portfolio may decline in value for extended periods of time due to the activities and financial prospects of individual companies, or due to general market and economic conditions. Stocks of medium-sized companies involve greater risk than securities of larger, more established companies, as they often have limited product lines, markets or financial resources and may be subject to more-erratic and more-abrupt market movements. Please read this Portfolio's prospectus for specific details regarding this product's investments and risk profile.

Portfolio returns shown for all periods reflect a fee waiver and/or expense reimbursement. Without this waiver/reimbursement, returns would have been lower.

#### Growth of an Assumed \$10,000 Investment in DWS Turner Mid Cap Growth VIP from 5/1/2001 to 12/31/2008

The Russell Midcap® Growth Index is an unmanaged index that measures the performance of those Russell Midcap companies with higher price-to-book ratios and higher forecasted growth values.

Index returns assume reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly in an index.

#### **Comparative Results**

DWS Turner Mid Cap Growth VIP		1-Year	3-Year	5-Year	Life of Portfolio <sup>*</sup>
Class A	Growth of \$10,000	\$5,051	\$6,766	\$8,396	\$7,456
	Average annual total return	-49.49%	-12.21%	-3.44%	-3.76%
Russell Midcap Growth Index	Growth of \$10,000	\$5,568	\$6,865	\$8,887	\$8,411
	Average annual total return	-44.32%	-11.79%	-2.33%	-2.23%
DWS Turner Mid Cap Growth VIP		1-Year	3-Year	5-Year	Life of Class**
Class B	Growth of \$10,000	\$4,946	\$6,573	\$8,090	\$10,836

Russell Midcap Growth Index	Growth of \$10,000	\$5,568	\$6,865	\$8,887	\$11,466
	Average annual total return	-44.32%	-11.79%	-2.33%	2.13%

The growth of \$10,000 is cumulative.

<sup>\*</sup> The Portfolio commenced operations on May 1, 2001. Index returns began on April 30, 2001.

\*\* The Portfolio commenced offering Class B shares on July 1, 2002. Index returns began on June 30, 2002.

# **Information About Your Portfolio's Expenses**

## **DWS Turner Mid Cap Growth VIP**

As an investor of the Portfolio, you incur two types of costs: ongoing expenses and transaction costs. Ongoing expenses include management fees, distribution and service (12b-1) fees and other Portfolio expenses. Examples of transaction costs include contract charges, redemption fees and account maintenance fees, which are not shown in this section. The following tables are intended to help you understand your ongoing expenses (in dollars) of investing in the Portfolio and to help you compare these expenses with the ongoing expenses of investing in other mutual funds. In the most recent six-month period, the Portfolio limited these expenses, had it not done so, expenses would have been higher. The example in the table is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire period (July 1, 2008 to December 31, 2008).

The tables illustrate your Portfolio's expenses in two ways:

 Actual Portfolio Return. This helps you estimate the actual dollar amount of ongoing expenses (but not transaction costs) paid on a \$1,000 investment in the Portfolio using the Portfolio's actual return during the period. To estimate the expenses you paid over the period, simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the "Expenses Paid per \$1,000" line under the share class you hold.

Hypothetical 5% Portfolio Return. This helps you to compare your Portfolio's ongoing expenses (but not transaction costs) with those of other mutual funds using the Portfolio's actual expense ratio and a hypothetical rate of return of 5% per year before expenses. Examples using a 5% hypothetical Portfolio return may be found in the shareholder reports of other mutual funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in these tables are meant to highlight your ongoing expenses only and do not reflect any transaction costs. The "Expenses Paid per \$1,000" line of the tables is useful in comparing ongoing expenses only and will not help you determine the relative total expense of owning different funds. If these transaction costs had been included, your costs would have been higher.

## Expenses and Value of a \$1,000 Investment for the six months ended December 31, 2008

Actual Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Ending Account Value 12/31/08	\$ 556.00	\$ 541.70
Expenses Paid per \$1,000*	\$ 4.11	\$ 4.84
Hypothetical 5% Portfolio Return	Class A	Class B
Beginning Account Value 7/1/08	\$1,000.00	\$1,000.00
Beginning Account Value 7/1/08 Ending Account Value 12/31/08	\$1,000.00 \$1,019.86	\$1,000.00 \$1,018.85

\* Expenses are equal to the Portfolio's annualized expense ratio for each share class, multiplied by the average account value over the period, multiplied by the number of days in the most recent six-month period, then divided by 366.

Annualized Expense Ratios	Class A	Class B	
DWS Variable Series II — DWS Turner Mid Cap Growth VIP	1.05%	1.25%	

For more information, please refer to the Portfolio's prospectus.

These tables do not reflect charges and fees ("contract charges") associated with the separate account that invests in the Portfolio or any variable life insurance policy or variable annuity contract for which the Portfolio is an investment option.

# **Management Summary**

## **DWS Turner Mid Cap Growth VIP**

Faced with one of the most challenging markets that many have not seen in their lifetimes, DWS Turner Mid Cap Growth VIP, which emphasizes earnings growth, returned –49.49% during the period ending December 31, 2008 (Class A shares, unadjusted for contract charges). This trailed the results of the Russell Midcap<sup>®</sup> Growth Index, the Portfolio's benchmark, which returned –44.32% for the same period. The Portfolio underperformed in part due to relative weak results in the consumer discretionary, health care and technology sectors. Alternatively, the financial services sector contributed the most to results, helped in part by our general avoidance of credit-sensitive companies.

The consumer discretionary sector continued to be an area of concern, as most consumer-sensitive industries (apparel, gaming, restaurants) detracted meaningfully from relative results. Guess? Inc., the apparel retailer and wholesaler, was negatively affected by a beaten-down retail environment and was forced to lower its outlook for 2008. Casino operator Wynn Resorts Ltd. fell substantially, as its Las Vegas casino/hotel could not overcome a cautious consumer faced with numerous recessionary forces.

The health care sector was the second-largest detractor for the year, and our stock selection contributed to the Portfolio's underperformance versus the benchmark. Shares in Charles River Labs\*, a drug discovery and development company, fell during the holding period, as the economy was negatively impacting its core client base: biotech and major pharmaceutical companies. United Therapeutics Corp., a biotechnology company, traded lower on the news of a failed trial for its oral version of the blood pressure drug Remodulin.

As was the case in 2007, the financial services sector again played a pivotal role in the equity markets this past year and is largely responsible for the current economic condition. From a Portfolio perspective, our stance on avoiding credit-sensitive companies continues to be the key to the relative outperformance of the financial services sector of the Portfolio. Two areas of the sector that had a positive impact on performance were insurance brokers (AON Corp.) and savings banks (Hudson City Bancorp, Inc.).

The Russell Midcap Growth Index is an unmanaged index that measures the performance of those Russell Midcap companies with higher price-to-book ratios and higher forecasted growth values. Index returns assume reinvestment of dividends and, unlike portfolio returns, do not reflect any fees or expenses. It is not possible to invest directly into an index.

\* Not held in the Portfolio as of December 31, 2008.

Portfolio management market commentary is as of December 31, 2008, and may not come to pass. This information is subject to change at any time based on market and other conditions. Past performance does not guarantee future results. Current and future portfolio holdings are subject to risk.

\* Non-income producing security.

<sup>†</sup> The cost for federal income tax purposes was \$72,195,203. At December 31, 2008, net unrealized depreciation for all securities based on tax cost was \$9,666,098. This consisted of aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost of \$3,245,475 and aggregate gross unrealized depreciation for all securities in which there was an excess of tax cost value of \$12,911,573.

(a) All or a portion of these securities were on loan (see Notes to Financial Statements). The value of all securities loaned at December 31, 2008 amounted to \$13,623,057, which is 28.0% of net assets.

(b) Affiliated fund managed by Deutsche Investment Management Americas Inc. The rate shown is the annualized seven-day yield at period end.

(c) Represents collateral held in connection with securities lending. Income earned by the Portfolio is net of borrower rebates. Fair Value Measurements

The following is a summary of the inputs used as of December 31, 2008 in valuing the Portfolio's investments. For information on the Portfolio's policy regarding the valuation of investments and of the valuation inputs, and the aggregate levels used in the table below, please refer to the Security Valuation section of Note A in the accompanying Notes to the Financial Statements.

b Total return would have been lower had certain expenses not been reduced.

\* Amount is less than \$.005.

# **Notes to Financial Statements**

## A. Significant Accounting Policies

DWS Variable Series II (the "Trust") is registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as an open-end management investment company organized as a Massachusetts business trust. The Trust offers twenty-one portfolios (hereinafter referred to individually as "Portfolio" or collectively as "Portfolios"). Each Portfolio (except DWS Technology VIP) is classified as a diversified open-end management investment company. DWS Technology VIP is classified as a non-diversified, open-end management investment company.

**Multiple Classes of Shares of Beneficial Interest.** The Trust offers two classes of shares (Class A shares and Class B shares). Effective July 31, 2008, Class B shares of DWS Janus Growth & Income VIP were liquidated. Sales of Class B shares are subject to record keeping fees up to 0.15% and Rule 12b-1 fees under the 1940 Act equal to an annual rate of 0.25%, of the average daily net assets of the Class B shares of the applicable Portfolio. Class A shares are not subject to such fees.

Investment income, realized and unrealized gains and losses, and certain portfolio-level expenses and expense reductions, if any, are borne pro rata on the basis of relative net assets by the holders of all classes of shares except that each class bears certain expenses unique to that class (including the applicable Rule 12b-1 fee and record keeping fees). Differences in class-level expenses may result in payment of different per share dividends by class. All shares have equal rights with respect to voting subject to class-specific arrangements.

The Trust's financial statements are prepared in accordance with accounting principles generally accepted in the United States of America which require the use of management estimates. Actual results could differ from those estimates. The policies described below are followed consistently by the Trust in the preparation of its financial statements.

**Security Valuation.** DWS Money Market VIP values all securities utilizing the amortized cost method permitted in accordance with Rule 2a-7 under the 1940 Act and certain conditions therein. Under this method, which does not take into account unrealized capital gains or losses on securities, an instrument is initially valued at its cost and thereafter assumes a constant accretion/amortization rate to maturity of any discount or premium.

Investments in securities are stated at value determined as of the close of regular trading on the New York Stock Exchange on each day the exchange is open for trading. Equity securities are valued at the most recent sale price or official closing price reported on the exchange (US or foreign) or over-the-counter market on which the security is traded most extensively. Securities for which no sales are reported are valued at the calculated mean between the most recent bid and asked quotations on the relevant market or, if a mean cannot be determined, at the most recent bid quotation.

Exchange traded funds ("ETFs") are valued at the most recent sale price or official closing price reported on the exchange on which the ETFs are traded most extensively. ETFs for which no sales are reported are valued at the calculated mean between the most recent bid and asked quotations on the relevant market or, if a mean cannot be determined, at the most recent bid quotation.

Debt securities are valued by independent pricing services approved by the Trustees of the Portfolios. If the pricing services are unable to provide valuations, the securities are valued at the most recent bid quotation or evaluated price, as applicable, obtained from one or more broker-dealers. Such services may use various pricing techniques which take into account appropriate factors such as yield, quality, coupon rate, maturity, type of issue, trading characteristics and other data, as well as broker quotes.

Money market instruments purchased with an original or remaining maturity of sixty days or less, maturing at par, are valued at amortized cost. Investments in open-end investment companies and Cash Management QP Trust are valued at their net asset value each business day.

Securities and other assets for which market quotations are not readily available or for which the above valuation procedures are deemed not to reflect fair value are valued in a manner that is intended to reflect their fair value as determined in accordance with procedures approved by the Trustees. Certain Portfolios may use a fair valuation model to value international equity securities in order to adjust for events which may occur between the close of the foreign exchanges and the close of the New York Stock Exchange.

Each Portfolio adopted Financial Accounting Standards Board ("FASB") Statement of Financial Accounting Standards No. 157, "Fair Value Measurements" ("FAS 157"), effective at the beginning of each Portfolio's fiscal year. FAS 157 establishes a three-tier hierarchy for measuring fair value and requires additional disclosure about the classification of fair value measurements.

Various inputs are used in determining the value of each Portfolio's investments. These inputs are summarized in three broad levels. Level 1 includes quoted prices in active markets for identical securities. Level 2 includes other

significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds and credit risk). Level 3 includes significant unobservable inputs (including each Portfolio's own assumptions in determining the fair value of investments). The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. Securities held by a money market fund are reflected as Level 2 because the securities are valued at amortized cost (which approximates fair value) and, accordingly, the inputs used to determine value are not quoted prices in an active market.

The aggregate value by input level, as of December 31, 2008, for each Portfolio's investments, as well as a reconciliation of Level 3 assets for which significant unobservable inputs were used in determining value, is included at the end of each Portfolio's Investment Portfolio.

**New Accounting Pronouncement.** In March 2008, the FASB issued Statement of Financial Accounting Standards No. 161 ("FAS 161"), "Disclosures about Derivative Instruments and Hedging Activities". FAS 161 requires enhanced disclosure about an entity's derivative and hedging activities including qualitative disclosures about the objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. FAS 161 is effective for fiscal years and interim periods beginning after November 15, 2008. Management is currently reviewing the enhanced disclosure requirements for the adoption of FAS 161.

**Foreign Currency Translations.** The books and records of the Trust are maintained in US dollars. Investment securities and other assets and liabilities denominated in a foreign currency are translated into US dollars at the prevailing exchange rates at period end. Purchases and sales of investment securities, income and expenses are translated into US dollars at the prevailing exchange rates on the respective dates of the transactions.

Net realized and unrealized gains and losses on foreign currency transactions represent net gains and losses between trade and settlement dates on securities transactions, the disposition of forward foreign currency exchange contracts and foreign currencies and the difference between the amount of net investment income accrued and the US dollar amount actually received. That portion of both realized and unrealized gains and losses on investments that results from fluctuations in foreign currency exchange rates is not separately disclosed but is included with net realized and unrealized gain/appreciation and loss/depreciation on investments.

**Repurchase Agreements.** Each Portfolio may enter into repurchase agreements with certain banks and broker/dealers whereby each Portfolio, through its custodian or sub-custodian bank, receives delivery of the underlying securities, the amount of which at the time of purchase and each subsequent business day is required to be maintained at such a level that the value is equal to at least the principal amount of the repurchase price plus accrued interest. The custodian bank holds the collateral in a separate account until the agreement matures. If the value of the securities falls below the principal amount of the repurchase agreement plus accrued interest, the financial institution deposits additional collateral by the following business day. If the financial institution either fails to deposit the required additional collateral or fails to repurchase the securities as agreed, the Portfolio has the right to sell the securities and recover any resulting loss from the financial institution. If the financial institution enters into bankruptcy, the Portfolio's claim on the collateral may be subject to legal proceedings.

**Securities Lending.** Each Portfolio, except DWS Money Market VIP, may lend securities to financial institutions. The Portfolio retains beneficial ownership of the securities it has loaned and continues to receive interest and dividends paid by the issuer of securities and to participate in any changes in their market value. The Portfolio requires the borrowers of the securities to maintain collateral with the Portfolio consisting of liquid, unencumbered assets having a value at least equal to the value of the securities loaned. When the collateral falls below specified amounts, the lending agents will use their best efforts to obtain additional collateral on the next business day to meet required amounts under the security lending agreement. The Portfolio may invest the cash collateral into a joint trading account in an affiliated money market fund pursuant to Exemptive Orders issued by the SEC. The Portfolio receives compensation for lending its securities either in the form of fees or by earning interest on invested cash collateral net of borrower rebates and fees paid to a lending agent. Either the Portfolio or the borrower may terminate the loan. There may be risks of delay and costs in recovery of securities or even loss of rights in the collateral should the borrower of the securities fail financially. The Portfolio is also subject to all investment risks associated with the reinvestment of any cash collateral received, including, but not limited to, interest rate, credit and liquidity risk associated with such investments.

**Interest Rate Swap Contracts.** DWS Balanced VIP and DWS Strategic Income VIP may enter into interest rate swap transactions to reduce the interest rate risk inherent in the Portfolio's underlying investments. The use of interest rate swaps is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio security transactions. In an interest rate swap, the Portfolio agrees to pay to the other party to the interest rate swap (which is known as the "counterparty") a fixed rate payment in exchange for the counterparty agreeing to pay to the Portfolio a variable rate payment, or the Portfolio agrees to receive from the counterparty a fixed rate payment in exchange for the counterparty agreeing to receive from the Portfolio a variable rate payment. The payment obligations are based on the notional amount of the swap. Certain

risks may arise when entering into swap transactions including counterparty default, liquidity or unfavorable changes in interest rates. Payments received or made at the end of the measurement period are recorded as realized gain or loss on the Statement of Operations. The value of the swap is adjusted daily based upon a price supplied by a board approved pricing vendor and the change in value is recorded as unrealized appreciation or depreciation.

Credit Default Swap Contracts. A credit default swap is a contract between a buyer and a seller of protection against pre-defined credit events for the reference entity. DWS Balanced VIP, DWS High Income VIP and DWS Strategic Income VIP may buy or sell credit default swap contracts to seek to increase the Portfolio's income, to add leverage to the portfolio, to gain exposure to an underlying issuer's credit quality characteristics without directly investing in that issuer, or to hedge the risk of default on Portfolio securities. As a seller in the credit default swap contract, the Portfolio is required to pay the par (or other agreed-upon) value of the referenced entity to the counterparty with the occurrence of a credit event by a third party, such as a US or foreign corporate issuer, on the reference entity, which would likely result in a loss to the Portfolio. In return, the Portfolio receives from the counterparty a periodic stream of payments over the term of the contract provided that no credit event has occurred. If no credit event occurs, the Portfolio keeps the stream of payments with no payment obligations. The Portfolio may also buy credit default swap contracts in order to hedge against the risk of a credit event on debt securities, in which case the Portfolio functions as the counterparty referenced above. This involves the risk that the contract may expire worthless. It also involves counterparty risk — that the seller may fail to satisfy its payment obligations to the Portfolio with the occurrence of a credit event. When the Portfolio sells a credit default swap contract it will "cover" its commitment. This may be achieved by, among other methods, maintaining cash or liquid assets equal to the aggregate notional value of the reference entities for all outstanding credit default swap contracts sold by the Portfolio.

Credit default swap contracts are marked to market daily based upon quotations from a board approved pricing vendor and the change in value, if any, is recorded daily as unrealized gain or loss. An upfront payment made by the Portfolio is recorded as an asset on the Statement of Assets and Liabilities. An upfront payment received by the Portfolio is recorded as a liability on the Statement of Assets and Liabilities. Under the terms of the credit default swap contracts, the Portfolio receives or makes quarterly payments based on a specified interest rate on a fixed notional amount. These payments are recorded as a realized gain or loss on the Statement of Operations. Payments received or made as a result of a credit event or termination of the contract are recognized, net of a proportional amount of the upfront payment, as realized gains or losses.

The Portfolio adopted FASB Staff Position (FSP) FAS 133-1 and FIN 45-4, "Disclosures about Credit Derivatives and Certain Guarantees: An Amendment of FASB Statement No.133 and FASB Interpretation No. 45", effective November 30, 2008. The amendments to FAS 133 include required disclosure for (i) the nature and terms of the credit derivative, reasons for entering into the credit derivative, the events or circumstances that would require the seller to perform under the credit derivative, and the current status of the payment/performance risk of the credit derivative, (ii) the undiscounted maximum potential amount of future payments the seller could be required to make under the credit derivative, (iii) the fair value of the credit derivative, and (iv) the nature of any recourse provisions and assets held either as collateral or by third parties.

The amendments to FIN 45 require additional disclosure about the current status of the payment/performance risk of a guarantee. All changes to accounting policies have been made in accordance with the FSP and incorporated for the current period in this note and at the end of the Portfolio's Investment Portfolio.

**Total Return Swap Contracts.** Total return swaps involve commitments to pay interest in exchange for a market-linked return based on a notional amount. DWS Strategic Income VIP may enter into total return swap transactions to hedge against market and interest rate risk or to enhance returns. To the extent the total return of the reference security or index underlying the total return swap exceeds or falls short of the offsetting interest rate obligation, the Portfolio will receive a payment or make a payment to the counterparty, respectively. Certain risks may arise when entering into swap transactions including counterparty default, liquidity or unfavorable changes in the value of underlying reference security or index. Payments received or made at the end of each measurement period are recorded as realized gain or loss on the Statement of Operations. The value of the swap is adjusted daily based upon a price supplied by a board approved pricing vendor and the change in value is recorded as unrealized appreciation or depreciation.

**Options.** An option contract is a contract in which the writer (seller) of the option grants the buyer of the option, upon payment of a premium, the right to purchase from (call option), or sell to (put option), the writer a designated instrument at a specified price within a specified period of time. Certain options, including options on indices, will require cash settlement by the Portfolio if the option is exercised. Each Portfolio, except for DWS Money Market VIP, may enter into option contracts in order to hedge against potential adverse price movements in the value of portfolio assets; as a temporary substitute for selling selected investments; to lock in the purchase

price of a security or currency which it expects to purchase in the near future; as a temporary substitute for purchasing selected investments; and to enhance potential gain.

The liability representing the Portfolio's obligation under an exchange traded written option or investment in a purchased option is valued at the last sale price or, in the absence of a sale, the mean between the closing bid and asked prices or at the most recent asked price (bid for purchased options) if no bid and asked price are available. Over-the-counter written or purchased options are valued using dealer-supplied quotations. Gain or loss is recognized when the option contract expires or is closed.

If the Portfolio writes a covered call option, the Portfolio foregoes, in exchange for the premium, the opportunity to profit during the option period from an increase in the market value of the underlying security above the exercise price. If the Portfolio writes a put option it accepts the risk of a decline in the value of the underlying security below the exercise price. Over-the-counter options have the risk of the potential inability of counterparties to meet the terms of their contracts. The Portfolio's maximum exposure to purchased options is limited to the premium initially paid. In addition, certain risks may arise upon entering into option contracts including the risk that an illiquid secondary market will limit the Portfolio's ability to close out an option contract prior to the expiration date and that a change in the value of the option contract may not correlate exactly with changes in the value of the securities or currencies hedged.

**Futures Contracts.** A futures contract is an agreement between a buyer or seller and an established futures exchange or its clearinghouse in which the buyer or seller agrees to take or make a delivery of a specific amount of a financial instrument at a specified price on a specific date (settlement date). Each Portfolio, except for DWS Money Market VIP, may enter into futures contracts as a hedge against anticipated interest rate, currency or equity market changes and for duration management, risk management and return enhancement purposes. DWS Balanced VIP and DWS Strategic Income VIP may also enter into futures contracts as part of each Portfolio's global tactical asset allocation strategy.

Upon entering into a futures contract, the Portfolio is required to deposit with a financial intermediary an amount ("initial margin") equal to a certain percentage of the face value indicated in the futures contract. Subsequent payments ("variation margin") are made or received by the Portfolio dependent upon the daily fluctuations in the value of the underlying security and are recorded for financial reporting purposes as unrealized gains or losses by the Portfolio. When entering into a closing transaction, the Portfolio will realize a gain or loss equal to the difference between the value of the futures contract to sell and the futures contract to buy. Futures contracts are valued at the most recent settlement price.

Certain risks may arise upon entering into futures contracts, including the risk that an illiquid secondary market will limit the Portfolio's ability to close out a futures contract prior to the settlement date and that a change in the value of a futures contract may not correlate exactly with the changes in the value of the securities or currencies hedged. When utilizing futures contracts to hedge, the Portfolio gives up the opportunity to profit from favorable price movements in the hedged positions during the term of the contract. Risk of loss may exceed amounts recognized on the Statement of Assets and Liabilities.

**Forward Foreign Currency Exchange Contracts.** A forward foreign currency exchange contract (forward currency contract) is a commitment to purchase or sell a foreign currency at the settlement date at a negotiated rate. Each Portfolio, except for DWS Money Market VIP, may enter into forward currency contracts in order to hedge its exposure to changes in foreign currency exchange rates on its foreign currency denominated portfolio holdings and to facilitate transactions in foreign currency contracts as part of each Portfolio's global tactical asset allocation strategy.

Forward currency contracts are valued at the prevailing forward exchange rate of the underlying currencies and unrealized gain (loss) is recorded daily. Sales and purchases of forward currency contracts having the same settlement date and broker are offset and any gain (loss) is realized on the date of offset; otherwise, gain (loss) is realized on settlement date. Realized and unrealized gains and losses which represent the difference between the value of a forward currency contract to buy and a forward currency contract to sell are included in net realized and unrealized gain (loss) from foreign currency.

Certain risks may arise upon entering into forward currency contracts from the potential inability of counterparties to meet the terms of their contracts. Additionally, when utilizing forward currency contracts to hedge, the Portfolio gives up the opportunity to profit from favorable exchange rate movements during the term of the contract.

**Loan Participations and Assignments.** DWS Balanced VIP, DWS High Income VIP and DWS Strategic Income VIP may invest in Loan Participations and Assignments. Loan Participations and Assignments are portions of loans originated by banks and sold in pieces to investors. These US dollar-denominated fixed and floating rate loans ("Loans") in which the Portfolio invests, are arranged between the borrower and one or more financial institutions

("Lenders"). These Loans may take the form of Senior Loans, which are corporate obligations often issued in connection with recapitalizations, acquisitions, leveraged buy-outs and refinancings, and Sovereign Loans, which are debt instruments between a foreign sovereign entity and one or more financial institutions. The Portfolio invests in such Loans in the form of participations in Loans ("Participations") or assignments of all or a portion of Loans from third parties ("Assignments"). Participations typically result in the Portfolio having a contractual relationship only with the Lender, not with the borrower. The Portfolio has the right to receive payments of principal, interest and any fees to which it is entitled from the Lender selling the Participation and only upon receipt by the Lender of the payments from the borrower. In connection with the terms of the loan agreement relating to the Loan, or any rights of set-off against the borrower, and the Portfolio will not benefit directly from any collateral supporting the Loan in which it has purchased the Participation. As a result, the Portfolio assumes the credit risk of both the borrower and the Lender that is selling the Participation. Assignments typically result in the Portfolio having a direct contractual relationship with the borrower, and the Portfolio may enforce compliance by the borrower with the terms of the loan agreement risk, liquidity risk and credit risk, including the potential default or insolvency of the borrower.

**Mortgage Dollar Rolls.** DWS Core Fixed Income VIP, DWS Government & Agency Securities VIP and DWS Balanced VIP may enter into mortgage dollar rolls in which the Portfolio sells to a bank or broker/dealer (the "counterparty") mortgage-backed securities for delivery in the current month and simultaneously contracts to repurchase similar, but not identical, securities on a fixed date. The counterparty receives all principal and interest payments, including prepayments, made on the security while it is the holder. The Portfolio receives compensation as consideration for entering into the commitment to repurchase. The compensation is paid in the form of a lower price for the security upon its repurchase, or alternatively, a fee. Mortgage dollar rolls may be renewed with a new sale and repurchase price and a cash settlement made at each renewal without physical delivery of the securities subject to the contract.

Certain risks may arise upon entering into mortgage dollar rolls from the potential inability of counterparties to meet the terms of their commitments. Additionally, the value of such securities may change adversely before the Portfolio is able to repurchase them. There can be no assurance that the Portfolio's use of the cash that it receives from a mortgage dollar roll will provide a return that exceeds its costs.

**When-Issued/Delayed Delivery Securities.** DWS Balanced VIP, DWS Core Fixed Income VIP, DWS Government & Agency Securities VIP, DWS High Income VIP and DWS Strategic Income VIP may purchase securities with delivery or payment to occur at a later date beyond the normal settlement period. At the time the Portfolios enter into a commitment to purchase a security, the transaction is recorded and the value of the security is reflected in the net asset value. The price of such security and the date when the security will be delivered and paid for are fixed at the time the transaction is negotiated. The value of the security may vary with market fluctuations. No interest accrues to the Portfolios until payment takes place. At the time the Portfolios enter into this type of transaction it is required to segregate cash or other liquid assets at least equal to the amount of the commitment.

Certain risks may arise upon entering into when-issued or delayed delivery securities from the potential inability of counterparties to meet the terms of their contracts or if the issuer does not issue the securities due to political, economic, or other factors. Additionally, losses may arise due to changes in the value of the underlying securities.

**Taxes.** Each Portfolio's policy is to comply with the requirements of the Internal Revenue Code, as amended, which are applicable to regulated investment companies and to distribute all of its taxable income to its shareholders.

Additionally, based on the Portfolios' understanding of the tax rules and rates related to income, gains and transactions for the foreign jurisdictions in which they invest, the Portfolios will provide for foreign taxes, and where appropriate, deferred foreign taxes.

At December 31, 2008, the following Portfolios had an approximate net tax basis capital loss carryforward which may be applied against any realized net taxable capital gains of each succeeding year until fully utilized or until the following expiration dates, whichever occurs first:

Portfolio	Capital Loss Carryforward (\$)	Expiration Date	Capital Loss Carryforward Utilized (\$)	Capital Loss Carryforward Expired (\$)
DWS Balanced VIP	1,789,000	12/31/2010	_	_

In addition, from November 1, 2008 through December 31, 2008, the following Portfolios incurred net realized capital losses. As permitted by tax regulations, the Portfolios intend to elect to defer these losses and treat them as arising in the fiscal year ended December 31, 2009.

DWS Balanced VIP	\$ 20,377,000
DWS Blue Chip VIP	12,172,000
DWS Core Fixed Income VIP	14,342,000
DWS Davis Venture Value VIP	1,077,000
DWS Dreman High Return Equity VIP	78,628,000
DWS Dreman Small Mid Cap Value VIP	22,331,000
DWS Global Thematic VIP	12,260,000
DWS Government & Agency Securities VIP	4,625,000
DWS High Income VIP	6,542,000
DWS International Select Equity VIP	15,109,000
DWS Janus Growth & Income VIP	7,200,000
DWS Large Cap Value VIP	8,279,000
DWS Mid Cap Growth VIP	3,503,000
DWS Small Cap Growth VIP	14,538,000
DWS Strategic Income VIP	1,428,000
DWS Technology VIP	6,328,000
DWS Turner Mid Cap Growth VIP	9,753,000

The Portfolios have reviewed the tax positions for the open tax years as of December 31, 2008 and have determined that no provision for income tax is required in the Portfolios' financial statements. The Portfolios' federal tax returns for the prior three fiscal years remain subject to examination by the Internal Revenue Service.

**Distribution of Income and Gains.** Distributions of net investment income, if any, for each Portfolio, except DWS Money Market VIP, are made annually. Net realized gains from investment transactions, in excess of

available capital loss carryforwards, would be taxable to each Portfolio if not distributed and, therefore, will be distributed to shareholders at least annually. Net investment income of DWS Money Market VIP is declared as a daily dividend and is distributed to shareholders monthly. DWS Money Market VIP may take into account capital gains and losses in its daily dividend declarations. DWS Money Market VIP may also make additional distributions for tax purposes if necessary.

The timing and characterization of certain income and capital gains distributions are determined annually in accordance with federal tax regulations which may differ from accounting principles generally accepted in the United States of America. These differences primarily relate to net operating losses, investments in foreign denominated investments, investments in forward foreign currency exchange contracts, investments in futures, income received from Passive Foreign Investment Companies and Real Estate Investment Trusts and certain securities sold at a loss. As a result, net investment income (loss) and net realized gain (loss) on investment transactions for a reporting period may differ significantly from distributions during such period. Accordingly, each Portfolio may periodically make reclassifications among certain of its capital accounts without impacting the net asset value of the Portfolio.

At December 31, 2008, the Portfolios' components of distributable earnings on a tax basis were as follows:

Portfolio	Undistributed Ordinary Income (\$)*	Undistributed Net Long-Term Capital Gains (\$)	Capital Loss Carryforwards (\$)	Unrealized Appreciation (Depreciation) on Investments (\$)
DWS Balanced VIP	11,623,050	_	(24,581,000)	(51,362,547)
DWS Blue Chip VIP	1,995,128	_	(26,695,000)	(34,966,453)

\* For tax purposes, short-term capital gain distributions are considered ordinary income distributions.

**Expenses.** Expenses arising in connection with a specific Portfolio are allocated to that Portfolio. Trust expenses are allocated between each Portfolio in proportion to its relative net assets.

**Contingencies.** In the normal course of business, each Portfolio may enter into contracts with service providers that contain general indemnification clauses. The Portfolios' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Portfolios that have not yet been made. However, based on experience, the Portfolios expect the risk of loss to be remote.

**Real Estate Investment Trusts.** DWS Balanced VIP and DWS Dreman Small Mid Cap Value VIP periodically recharacterize distributions received from a Real Estate Investment Trust ("REIT") investment based on information provided by the REIT into the following categories: ordinary income, long-term and short-term capital gains, and return of capital. If information is not available timely from a REIT, the recharacterization will be estimated and a recharacterization will be made in the following year when such information becomes available. Distributions received from REITs in excess of income are recorded as either a reduction of cost of investments or realized gains. The Portfolios distinguish between dividends on a tax basis and a financial reporting basis and only distributions in excess of tax basis earnings and profits are reported in the financial statements as a tax return of capital.

**Other.** Investment transactions are accounted for on a trade date plus one basis for daily net asset value calculations. However, for financial reporting purposes, investment transactions are reported on trade date. Interest income is recorded on the accrual basis. Dividend income is recorded on the ex-dividend date net of foreign withholding taxes. Certain dividends from foreign securities may be recorded subsequent to the ex-dividend date as soon as the Portfolio is informed of such dividends. Realized gains and losses from investment transactions are recorded on an identified cost basis. All discounts and premiums are accreted/amortized for both tax and financial reporting purposes for each Portfolio, with the exception of securities in default of principal.

## **B.** Purchases and Sales of Securities

During the year ended December 31, 2008, purchases and sales of investment transactions (excluding short-term investments) were as follows:

Portfolio	Purchases (\$)	Sales (\$)
DWS Balanced VIP		
excluding US Treasury Obligations	813,891,432	883,115,897
US Treasury Obligations	250,216,900	254,136,016
DWS Blue Chip VIP	224,979,664	283,841,847
DWS Core Fixed Income VIP excluding US Treasury Obligations	110,882,243	138,529,428
US Treasury Obligations	341,692,001	368,373,444

DWS Turner Mid Cap Growth VIP	153,306,708	178,375,782

For the year ended December 31, 2008, transactions for written options on interest rate swaps were as follows for DWS Strategic Income VIP:

	Contract Amount	Premiums
Outstanding, beginning of period	—	\$ _
Options written	12,000,000	70,950
Outstanding, end of period	12,000,000	\$ 70,950

For the year ended December 31, 2008, transactions for written options on securities were as follows for DWS Technology VIP:

	Number of Contracts	Premiums
Outstanding, beginning of period	—	\$ _
Options written	2,161	225,556
Options closed	557	66,840
Options expired	1,604	158,716
Outstanding, end of period	_	\$ _

## **C. Related Parties**

**Management Agreement.** Under the Amended and Restated Investment Management Agreement with Deutsche Investment Management Americas Inc. ("DIMA" or the "Advisor"), an indirect, wholly owned subsidiary of Deutsche Bank AG, the Advisor directs the investments of each Portfolio in accordance with its investment objectives, policies and restrictions. The Advisor determines the securities, instruments and other contracts relating to investments to be purchased, sold or entered into by each Portfolio or delegates such responsibility to each Portfolio's subadvisor.

Prior to May 1, 2008, in addition to portfolio management services, the Advisor provided certain administrative services in accordance with the Investment Management Agreement. For the period from January 1, 2008 through April 30, 2008, the fees pursuant to the Investment Management Agreement were equivalent to the annual rates shown below of each Portfolio's average daily net assets, computed and accrued daily and payable monthly:

In addition, for the year ended December 31, 2008, the Advisor waived record keeping expenses of Class B shares of each Portfolio as follows:

Portfolio	Waived (\$)
DWS Dreman High Return Equity VIP	2,522
DWS Large Cap Value VIP	94
DWS Money Market VIP	129
DWS Small Cap Growth VIP	468

Administration Fee. Pursuant to an Administrative Services Agreement, DIMA provides most administrative services to DWS Large Cap Value VIP. For all services provided under the Administrative Services Agreement, the Portfolio pays DIMA an annual fee ("Administration Fee") of 0.10% of the Portfolio's average daily net assets, computed and accrued daily and payable monthly. For the year ended December 31, 2008, DIMA received an Administration Fee of \$186,852, of which \$9,823 is unpaid.

Effective May 1, 2008, the Portfolios noted below entered into an Administrative Services Agreement with DIMA, pursuant to which the Advisor provides most administrative services to the Portfolios. For all services provided under the Administrative Services Agreement, the Portfolios pay DIMA an annual fee ("Administration Fee") of 0.10% of the Portfolios' average daily net assets, computed and accrued daily and payable monthly. For the period from May 1, 2008 through December 31, 2008, the Administration Fee was as follows:

Portfolio	Total Aggregated (\$)	Unpaid at December 31, 2008 (\$)
DWS Balanced VIP	267,755	25,322
DWS Blue Chip VIP	105,793	8,763
DWS Core Fixed Income VIP	129,626	12,210

DWS Technology VIP	66,748	5,183
DWS Turner Mid Cap Growth VIP	59,597	4,070

**Service Provider Fees.** DWS Investments Fund Accounting Corporation ("DIFA"), a subsidiary of the Advisor, is responsible for determining the daily net asset value per share and maintaining the portfolio and general accounting records of each Portfolio. DIFA receives no fee for its services to each Portfolio, other than the Portfolios noted below. In turn, DIFA has delegated certain fund accounting functions to a third-party service provider. Effective May 1, 2008, these fees are now paid under the Administrative Services Agreement. For the period from January 1, 2008 through April 30, 2008, DIFA received a fee for its services as follows:

Portfolio	Total Aggregated (\$)
DWS Davis Venture Value VIP	37,943
DWS Dreman High Return Equity VIP	40,370
DWS Global Thematic VIP	69,550
DWS Janus Growth & Income VIP	25,585

Portfolio	Total Aggregated (\$)
DWS Mid Cap Growth VIP	20,790
DWS Technology VIP	21,129
DWS Turner Mid Cap Growth VIP	22,504

DWS Investments Service Company ("DISC"), an affiliate of the Advisor, is the transfer agent, dividend-paying agent and shareholder service agent for each Portfolio. Pursuant to a sub-transfer agency agreement between DISC and DST Systems, Inc. ("DST"), DISC has delegated certain transfer agent, dividend-paying agent and shareholder service agent functions to DST. DISC compensates DST out of the shareholder servicing fee it receives from each Portfolio. For the year ended December 31, 2008, the amounts charged to each Portfolio by DISC were as follows:

Portfolio	Total Aggregated (\$)	Waived (\$)	Unpaid at December 31, 2008 (\$)

DWS Turner Mid Cap Growth VIP	8,870	2,802

**Trustees' Fees and Expenses.** The Portfolios paid each Trustee not affiliated with the Advisor retainer fees plus specified amounts for various committee services and for the Board Chairperson and Vice Chairperson.

In connection with the board consolidation on April 1, 2008, of the two DWS Funds Boards of Trustees, certain Independent Board Members retired prior to their normal retirement date, and received a one-time retirement benefit. DIMA has agreed to reimburse the Portfolios for the cost of this benefit. During the period ended

I Innoid at

December 31, 2008, each Portfolio paid its allocated portion, as follows, of the retirement benefit to the non-continuing Independent Board Members, and each Portfolio was reimbursed by DIMA for this payment.

Portfolio	Amount (\$)
DWS Balanced VIP	24,750
DWS Blue Chip VIP	11,186
DWS Core Fixed Income VIP	12,990
DWS Davis Venture Value VIP	14,728

DWS Mid Cap Growth VIP	2,216
DWS Money Market VIP	19,388
DWS Small Cap Growth VIP	7,592
DWS Strategic Income VIP	5,355
DWS Technology VIP	6,311
DWS Turner Mid Cap Growth VIP	5,807

**Cash Management QP Trust.** Pursuant to an Exemptive Order issued by the SEC, each Portfolio may invest in the Cash Management QP Trust (the "QP Trust") and other affiliated funds managed by the Advisor. The QP Trust seeks to provide as high a level of current income as is consistent with the preservation of capital and the maintenance of liquidity. The QP Trust does not pay the Advisor a management fee for the affiliated funds' investments in the QP Trust.

#### D. Investing in High Yield Securities

Investing in high yield securities may involve greater risks and considerations not typically associated with investing in US Government bonds and other high quality fixed-income securities. These securities are non-investment grade securities, often referred to as "junk bonds." Economic downturns may disrupt the high yield market and impair the ability of issuers to repay principal and pay interest. Also, an increase in interest rates would likely have an adverse impact on the value of such obligations. Moreover, high yield securities may be less liquid due to the extent that there is no established retail secondary market and because of a decline in the value of such securities.

#### E. Investing in Emerging Markets

Investing in emerging markets may involve special risks and considerations not typically associated with investing in the United States of America. These risks include revaluation of currencies, high rates of inflation, repatriation restrictions on income and capital, and future adverse political, social and economic developments. Moreover, securities issued in these markets may be less liquid, subject to government ownership controls or delayed settlements and may have prices more volatile than those of comparable securities of issuers in the United States of America.

#### F. Fee Reductions

The Portfolios have entered into an arrangement with their custodian whereby credits realized as a result of uninvested cash balances were used to reduce a portion of the Portfolios' expenses. During the year ended December 31, 2008, the Portfolios' custodian fee was reduced under the arrangement as follows:

Portfolio	Amount (\$)
DWS Balanced VIP	4,543
DWS Blue Chip VIP	52
DWS Core Fixed Income VIP	890
DWS Davis Venture Value VIP	337
DWS Dreman High Return Equity VIP	794
DWS Dreman Small Mid Cap Value VIP	706

Portfolio	Amount (\$)
DWS Government & Agency Securities VIP	182
DWS High Income VIP	2,091
DWS Janus Growth & Income VIP	295
DWS Large Cap Value VIP	519
DWS Mid Cap Growth VIP	68
DWS Money Market VIP	654
DWS Small Cap Growth VIP	158
DWS Strategic Income VIP	1,449
DWS Technology VIP	74
DWS Turner Mid Cap Growth VIP	370

#### G. Ownership of the Portfolios

At December 31, 2008, the beneficial ownership in each Portfolio was as follows:

**DWS Balanced VIP:** Three Participating Insurance Companies were owners of record of 10% or more of the total outstanding Class A shares of the Portfolio, each owning 42%, 23% and 16%. One Participating Insurance Company was the owner of record of 10% or more of the total outstanding Class B shares of the Portfolio, owning 100%.

**DWS Blue Chip VIP:** Two Participating Insurance Companies were owners of record of 10% or more of the total outstanding Class A shares of the Portfolio, each owning 58% and 36%. One Participating Insurance Company was the owner of record of 10% or more of the total outstanding Class B shares of the Portfolio, owning 100%.

**DWS Core Fixed Income VIP:** Three Participating Insurance Companies were owners of record of 10% or more of the total outstanding Class A shares of the Portfolio, each owning 42%, 38% and 12%. One Participating Insurance Company was the owner of record of 10% or more of the total outstanding Class B shares of the Portfolio, owning 100%.

**DWS Davis Venture Value VIP:** Two Participating Insurance Companies were owners of record of 10% or more of the total outstanding Class A shares of the Portfolio, each owning 74% and 23%. One Participating Insurance Company was the owner of record of 10% or more of the total outstanding Class B shares of the Portfolio, owning 100%.

**DWS Dreman High Return Equity VIP:** Two Participating Insurance Companies were owners of record of 10% or more of the total outstanding Class A shares of the Portfolio, each owning 62% and 27%. Four Participating Insurance Companies were owners of record of 10% or more of the total outstanding Class B shares of the Portfolio, each owning 27%, 21%, 14% and 12%.

**DWS Dreman Small Mid Cap Value VIP:** Three Participating Insurance Companies were owners of record of 10% or more of the total outstanding Class A shares of the Portfolio, each owning 49%, 25% and 13%. Four Participating Insurance Companies were owners of record of 10% or more of the total outstanding Class B shares of the Portfolio, each owning 40%, 17%, 17% and 11%.

**DWS Global Thematic VIP:** Two Participating Insurance Companies were owners of record of 10% or more of the total outstanding Class A shares of the Portfolio, each owning 65% and 30%. One Participating Insurance Company was the owner of record of 10% or more of the total outstanding Class B shares of the Portfolio, owning 99%.

**DWS Government & Agency Securities VIP:** Three Participating Insurance Companies were owners of record of 10% or more of the total outstanding Class A shares of the Portfolio, each owning 43%, 37% and 14%. One Participating Insurance Company was the owner of record of 10% or more of the total outstanding Class B shares of the Portfolio, owning 97%.

**DWS High Income VIP:** Three Participating Insurance Companies were owners of record of 10% or more of the total outstanding Class A shares of the Portfolio, each owning 34%, 30% and 29%. One Participating Insurance Company was the owner of record of 10% or more of the total outstanding Class B shares of the Portfolio, owning 100%.

**DWS International Select Equity VIP:** Three Participating Insurance Companies were owners of record of 10% or more of the total outstanding Class A shares of the Portfolio, each owning 49%, 26% and 25%. One Participating Insurance Company was the owner of record of 10% or more of the total outstanding Class B shares of the Portfolio, owning 100%.

**DWS Janus Growth & Income VIP:** Two Participating Insurance Companies were owners of record of 10% or more of the total outstanding Class A shares of the Portfolio, each owning 70% and 29%.

**DWS Large Cap Value VIP:** Three Participating Insurance Companies were owners of record of 10% or more of the total outstanding Class A shares of the Portfolio, each owning 42%, 29% and 17%. Two Participating Insurance Companies were owners of record of 10% or more of the total outstanding Class B shares of the Portfolio, each owning 77% and 23%.

**DWS Mid Cap Growth VIP:** Two Participating Insurance Companies were owners of record of 10% or more of the total outstanding Class A shares of the Portfolio, each owning 63% and 35%. One Participating Insurance Company was the owner of record of 10% or more of the total outstanding Class B shares of the Portfolio, owning 100%.

**DWS Money Market VIP:** Three Participating Insurance Companies were owners of record of 10% or more of the total outstanding Class A shares of the Portfolio, each owning 43%, 20% and 12%. One Participating Insurance Company was the owner of record of 10% or more of the total outstanding Class B shares of the Portfolio, owning 100%.

**DWS Small Cap Growth VIP:** Three Participating Insurance Companies were owners of record of 10% or more of the total outstanding Class A shares of the Portfolio, each owning 46%, 24% and 24%. One Participating Insurance Company was the owner of record of 10% or more of the total outstanding Class B shares of the Portfolio, owning 100%.

**DWS Strategic Income VIP:** Two Participating Insurance Companies were owners of record of 10% or more of the total outstanding Class A shares of the Portfolio, each owning 64% and 34%. **DWS Technology VIP:** Two Participating Insurance Companies were owners of record of 10% or more of the total outstanding Class A shares of the Portfolio, each owning 59% and 34%. One Participating Insurance Company was the owner of record of 10% or more of the outstanding Class B shares of the Portfolio, owning 92%.

**DWS Turner Mid Cap Growth VIP:** Two Participating Insurance Companies were owners of record of 10% or more of the total outstanding Class A shares of the Portfolio, each owning 81% and 19%. One Participating Insurance Company was the owner of record of 10% or more of the total outstanding Class B shares of the Portfolio, owning 100%.

#### H. Line of Credit

The Trust and other affiliated funds (the "Participants") share in a \$490 million revolving credit facility provided by a syndication of banks. The Portfolios may borrow for temporary or emergency purposes, including the meeting of redemption requests that otherwise might require the untimely disposition of securities. The Participants are charged an annual commitment fee which is allocated based on net assets, among each of the Participants. Interest is calculated at the Federal Funds Rate plus 0.35 percent. The facility borrowing limit for each Portfolio as a percentage of net assets is as follows:

Portfolio	Facility Borrowing Limit
DWS Balanced VIP	33%
DWS Blue Chip VIP	33%
DWS Core Fixed Income VIP	33%
DWS Davis Venture Value VIP	33%
DWS Dreman High Return Equity VIP	33%
DWS Dreman Small Mid Cap Value VIP	33%
DWS Global Thematic VIP	33%
DWS Government & Agency Securities VIP	33%
DWS High Income VIP	33%
DWS International Select Equity VIP	33%
DWS Janus Growth & Income VIP	33%
DWS Large Cap Value VIP	33%
DWS Mid Cap Growth VIP	33%
DWS Money Market VIP	33%
DWS Small Cap Growth VIP	33%
DWS Strategic Income VIP	33%
DWS Technology VIP	5%
DWS Turner Mid Cap Growth VIP	33%

At December 31, 2008, DWS Core Fixed Income VIP had a \$250,000 outstanding loan. Interest expense incurred on the borrowing was \$8,024 for the year ended December 31, 2008. The average dollar amount of the borrowings was \$1,772,936, the weighted average interest rate on these borrowings was 1.49% and the Portfolio had a loan outstanding for 109 days throughout the period.

At December 31, 2008, DWS Dreman High Return Equity VIP had a \$450,000 outstanding loan. Interest expense incurred on the borrowing was \$15,847 for the year ended December 31, 2008. The average dollar amount of the borrowings was \$1,566,583, the weighted average interest rate on these borrowings was 1.82% and the Portfolio had a loan outstanding for 199 days throughout the period.

At December 31, 2008, DWS Large Cap Value VIP had a \$750,000 outstanding loan. Interest expense incurred on the borrowing was \$197 for the year ended December 31, 2008. The average dollar amount of the borrowings was \$520,588, the weighted average interest rate on these borrowings was 0.80% and the Portfolio had a loan outstanding for 17 days throughout the period.

#### I. Payments Made by Affiliates

During the year ended December 31, 2008, the Advisor fully reimbursed DWS Balanced VIP, DWS High Income VIP and DWS Strategic Income VIP \$11,599, \$6 and \$1,022, respectively, for losses incurred on trades executed incorrectly. The amounts of the losses were less than 0.01% of each Portfolio's average net assets, thus having no impact on each Portfolio's total return.

In addition, during the year ended December 31, 2008, the Advisor fully reimbursed DWS International Select Equity VIP \$354,782 for losses incurred on trades executed incorrectly.

#### J. Participation in the Treasury's Temporary Guarantee Program

The U.S. Department of the Treasury (the "Treasury") has established a Temporary Guarantee Program for Money Market Funds (the "Program"). DWS Money Market VIP is participating in the Program.

The Program is designed to protect the value of accounts in the Portfolio as of the close of business on September 19, 2008. According to the terms of the Program, any investment made by a shareholder after September 19, 2008 in excess of the amount held in the account as of the close of business on that date will not be covered by the Program. Any purchase of shares of the Portfolio for an account opened after September 19, 2008 will also not be covered under the Program. The Program guarantee will apply to the lesser of (i) the number of shares held in an account as of the close of business on September 19, 2008, or (ii) the number of shares held in the account on the date the Program guarantee is triggered. Subject to certain conditions and limitations, the Program guarantee is triggered if the Portfolio's net asset value falls below \$0.995 and the Portfolio is liquidated. Guarantee payments under the Program will not exceed the amount available within the Treasury's Exchange Stabilization Fund ("ESF") on the date of payment. As of the date of this report, ESF assets are approximately \$52 billion. The Treasury and the Secretary of the Treasury have the authority to use assets from the ESF for purposes other than those of the Program.

The Portfolio bears the expenses of participating in the Program. The expense is determined by the product of (i) the number of shares outstanding of each class as of September 19, 2008 valued at \$1.00; and (ii) the applicable Program participation fee rate, which is based upon the market-based net asset value outstanding of each share class as of September 19, 2008. For the initial period ending December 18, 2008, the Program participation fee was equal to 0.010%. For the coverage under the Program beginning on December 19, 2008 and ending on April 30, 2009, the Program participation fee is equal to 0.015%. This expense is being amortized over the length of the participation in the Program and is included in "Other" expense on the Statement of Operations. Through December 31, 2008, the Portfolio has accrued \$45,679. The Program is set to terminate on April 30, 2009, unless extended by the Treasury. The Treasury may extend the program through the close of business on September 18, 2009. If the Program is extended beyond April 30, 2009, the Portfolio would need to pay an additional fee and there can be no assurances that the Portfolio would continue to participate. This expense is borne by the Portfolio without regard to any expense limitation currently in effect for the Portfolio.

Neither the Portfolio nor Deutsche Investment Management Americas Inc., the Portfolio's investment advisor, are in any manner approved, endorsed, sponsored or authorized by the Treasury.

#### K. Subsequent Event

The Board of Trustees has approved the termination of AAMI as the subadvisor for DWS Core Fixed Income VIP. Effective on or about February 27, 2009, DIMA will assume all day-to-day advisory responsibilities for the Portfolio that were previously delegated to AAMI.

#### L. Mergers

On November 21, 2008, the Board of Trustees of the Portfolios approved, in principle, the mergers of the DWS Davis Venture Value VIP (the "Acquired Portfolio") into the DWS Large Cap Value VIP and DWS Janus Growth & Income VIP (the "Acquired Portfolio") into the DWS Capital Growth VIP.

Completion of the mergers is subject to a number of conditions, including approval by shareholders of the Acquired Portfolios at the shareholder meeting expected to be held on or about April 20, 2009.

The Board of Trustees of the Trust has also approved the combination of the Class B shares of DWS Balanced VIP, DWS International Select Equity VIP, DWS Mid Cap Growth VIP, DWS Money Market VIP, DWS Small Cap Growth VIP, DWS Strategic Income VIP and DWS Turner Mid Cap Growth VIP into the Class A shares of the same Portfolio. The combinations are scheduled to become effective on or about March 6, 2009 (effective February 3, 2009 for the DWS Money Market VIP).

## **Report of Independent Registered Public Accounting Firm**

#### To the Board of Trustees and Shareholders of DWS Variable Series II:

We have audited the accompanying statements of assets and liabilities of the DWS Balanced VIP, DWS Blue Chip VIP, DWS Core Fixed Income VIP, DWS Davis Venture Value VIP, DWS Dreman High Return Equity VIP, DWS Dreman Small Mid Cap Value VIP, DWS Global Thematic VIP, DWS Government & Agency Securities VIP, DWS High Income VIP, DWS International Select Equity VIP, DWS Janus Growth & Income VIP, DWS Large Cap Value VIP, DWS Mid Cap Growth VIP, DWS Money Market VIP, DWS Small Cap Growth VIP, DWS Strategic Income VIP, DWS Technology VIP and DWS Turner Mid Cap Growth VIP, eighteen of the portfolios constituting the DWS Variable Series II (the "Trust"), including the investment portfolios, as of December 31, 2008, and the related statements of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the periods indicated therein. These financial statements and financial highlights are the responsibility of the Trust's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Trust's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Trust's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of December 31, 2008, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers were not received. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of the aforementioned portfolios of the DWS Variable Series II at December 31, 2008, the results of their operations for the year then ended, the changes in their net assets for each of the two years in the period then ended, and the financial highlights for each of the periods indicated therein, in conformity with U.S. generally accepted accounting principles.

Boston, Massachusetts February 13, 2009

Ernst + Young LLP

# **Tax Information**

The following Portfolios paid distributions from net long-term capital gains during the year ended December 31, 2008 as follows:

Portfolio	Distribution Per Share (\$)	% Representing 15% Rate Gains
DWS Blue Chip VIP	1.14	100
DWS Davis Venture Value VIP	1.47	100
DWS Dreman High Return Equity VIP	1.77	100
DWS Dreman Small Mid Cap Value VIP	5.64	100
DWS Global Thematic VIP	1.98	100
DWS International Select Equity VIP	2.04	100
DWS Janus Growth & Income VIP	.84	100
DWS Large Cap Value VIP	3.43	100
DWS Strategic Income VIP	.10	100
DWS Turner Mid Cap Growth VIP	1.72	100

The following Portfolio designated as capital gain dividends for their year ended December 31, 2008:

Portfolio	Capital Gain (\$)	% Representing 15% Rate Gains
DWS Davis Venture Value VIP	12,927,000	100

For corporate shareholders, the following percentage of income dividends paid during the following Portfolios' fiscal year ended December 31, 2008 qualified for the dividends received deduction:

Portfolio	Dividends Received %
DWS Balanced VIP	20
DWS Blue Chip VIP	84
DWS Davis Venture Value VIP	89
DWS Dreman High Return Equity VIP	88
DWS Dreman Small Mid Cap Value VIP	83
DWS Global Thematic VIP	22
DWS Janus Growth & Income VIP	35
DWS Large Cap Value VIP	93

DWS Global Thematic VIP paid foreign taxes of \$158,191 and earned \$659,182 of foreign source income during the year ended December 31, 2008. Pursuant to section 853 of the Internal Revenue Code, the Portfolio designates \$0.01 per share as foreign taxes paid and \$0.06 per share as income earned from foreign sources for the year ended December 31, 2008.

DWS International Select Equity VIP paid foreign taxes of \$454,368 and earned \$5,467,917 of foreign source income during the year ended December 31, 2008. Pursuant to Section 853 of the Internal Revenue Code, the Portfolio designates \$0.03 per share as foreign taxes paid and \$0.38 per share as income earned from foreign sources for the year ended December 31, 2008.

Please consult a tax advisor if you have questions about federal or state income tax laws, or on how to prepare your tax returns. If you have specific questions about your account, please call (800) 621-1048.

## **Proxy Voting**

The Trust's policies and procedures for voting proxies for portfolio securities and information about how the Trust voted proxies related to its portfolio securities during the 12-month period ended June 30 are available on our Web site — www.dws-investments.com (click on "proxy voting" at the bottom of the page) — or on the SEC's Web site — www.sec.gov. To obtain a written copy of the Trust's policies and procedures without charge, upon request, call us toll free at (800) 621-1048.

## **Investment Management Agreement Approval**

The Board of Trustees, including the Independent Trustees, approved the renewal of each Fund's investment management agreement (the "Investment Management Agreements") with Deutsche Investment Management Americas Inc. ("DIMA") and, for each sub-advised Fund, the sub-advisory agreement (the "Sub-Advisory Agreements," and together with the Investment Management Agreements, the "Agreements") between DIMA and the sub-advisor (the "Sub-Advisors") in September 2008.<sup>1</sup>

In terms of the process that the Board followed prior to approving the Agreements, shareholders should know that:

- At the present time, all but one of the Funds' Trustees are independent of DIMA and its affiliates.
- The Trustees meet frequently to discuss fund matters. Each year, the Trustees dedicate part or all of several meetings to contract review matters. Over the course of several months, the Board's Contract Committee, in coordination with the Board's Equity Oversight Committee and Fixed Income and Quant Oversight Committee, reviewed comprehensive materials received from DIMA, independent third parties and independent counsel. These materials included an analysis of each Fund's performance, fees and expenses, and profitability compiled by the Funds' independent fee consultant. The Board also received extensive information throughout the year regarding performance of each Fund.
- The Independent Trustees regularly meet privately with their independent counsel (and, as needed, other advisors) to discuss contract review and other matters. In addition, the Independent Trustees were also advised by the Funds' independent fee consultant in the course of their review of each Fund's contractual arrangements and considered a comprehensive report prepared by the independent fee consultant in connection with their deliberations (the "IFC Report").
- In connection with reviewing the Agreements, the Board also reviewed the terms of each Fund's Rule 12b-1 plan (as applicable), distribution agreement, administrative services agreement, transfer agency agreement and other material service agreements.
- Based on its evaluation of the information provided, the Contract Committee presented its findings and recommendations to the Independent Trustees as a group. The Independent Trustees reviewed the Contract Committee's findings and recommendations and presented their recommendations to the full Board.

In connection with the contract review process, the Contract Committee and the Board considered the factors discussed below, among others. The Board also considered that DIMA and its predecessors have managed each Fund since its inception, and the Board believes that a long-term relationship with a capable, conscientious advisor is in the best interests of each Fund. The Board considered, generally, that shareholders chose to invest or remain invested in each Fund knowing that DIMA managed the Fund, and that the Agreements were approved by the Fund's shareholders at a special meeting held in 2008. DIMA is part of Deutsche Bank, a major global banking institution that is engaged in a wide range of financial services. The Board believes that there are significant advantages to being part of a global asset management business that offers a wide range of investing expertise and resources, including hundreds of portfolio managers and analysts with research capabilities in many countries throughout the world.

While shareholders may focus primarily on fund performance and fees, the Board considers these and many other factors, including the quality and integrity of DIMA's and the Sub-Advisors' personnel and such other issues as back-office operations, fund valuations, and compliance policies and procedures.

**Nature, Quality and Extent of Services.** The Board considered the terms of the Agreements, including the scope of advisory services provided under the Agreements. The Board noted that, under the Agreements, DIMA and the Sub-Advisors provide portfolio management services to the Funds and that, pursuant to a separate administrative services agreement, DIMA provides administrative services to the Funds. The Board considered the experience and skills of senior management and investment personnel, the resources made available to such

<sup>&</sup>lt;sup>1</sup> The Sub-Advisors are: Davis Selected Advisers, L.P. (DWS Davis Venture Value VIP); Dreman Value Management L.L.C. (DWS Dreman Small Mid Cap Value VIP and DWS Dreman High Return Equity VIP); Aberdeen Asset Management, Inc. (DWS Core Fixed Income VIP); Janus Capital Management LLC (DWS Janus Growth & Income VIP); Turner Investment Partners, Inc. (DWS Turner Mid Cap Growth VIP); and Deutsche Asset Management International GmbH, an affiliate of DIMA (DWS Large Cap Value VIP and DWS Balanced VIP).

personnel, the ability of DIMA and the Sub-Advisors to attract and retain high-quality personnel, and the organizational depth and stability of DIMA and the Sub-Advisors. The Board reviewed each Fund's performance over short-term and long-term periods and compared those returns to various agreed-upon performance measures, including market indices and a peer universe compiled by the independent fee consultant using information supplied by Lipper Inc. ("Lipper"). The Board also noted that it has put a process into place of identifying "Focus Funds" (e.g., funds performing poorly relative to their benchmark or a peer group compiled by Lipper), and receives more frequent reporting and information from DIMA regarding such funds, along with DIMA's remedial plans to address underperformance. The Board believes this process is an effective manner of identifying and addressing underperforming funds.

On the basis of this evaluation and the ongoing review of investment results by the Board, the Board concluded that the nature, quality and extent of services provided by DIMA and the Sub-Advisors historically have been and continue to be satisfactory.

**Fees and Expenses.** The Board considered each Fund's investment management fee schedule, operating expenses, and total expense ratios, and comparative information provided by Lipper and the independent fee consultant regarding investment management fee rates paid to other investment advisors by similar funds (1st quartile being the most favorable and 4th quartile being the least favorable). The Board considered each Fund's management fee rate as compared to fees charged by DIMA and certain of its affiliates for comparable mutual funds and considered differences in fund and fee structures between the DWS Funds. The Board also considered how each Fund's total (net) operating expenses compared to the total (net) operating expenses of a more customized peer group selected by Lipper (based on such factors as asset size).

On the basis of the information provided, the Board concluded that management fees were reasonable and appropriate in light of the nature, quality and extent of services provided by DIMA and the Sub-Advisors.

Profitability. The Board reviewed detailed information regarding revenues received by DIMA under the Investment Management Agreements. The Board considered the estimated costs and pre-tax profits realized by DIMA from advising the DWS Funds, as well as estimates of the pre-tax profits attributable to managing each Fund in particular. The Board also received information regarding the estimated enterprise-wide profitability of the DWS Investments organization with respect to all fund services in totality and by fund. The Board reviewed DIMA's methodology in allocating its costs to the management of each Fund. Based on the information provided, the Board concluded that the pre-tax profits realized by DIMA in connection with the management of each Fund were not unreasonable. The Board also reviewed information regarding the profitability of certain similar investment management firms. The Board noted that while information regarding the profitability of such firms is limited (and in some cases is not necessarily prepared on a comparable basis), DIMA and its affiliates' overall profitability with respect to the DWS Investments fund complex (after taking into account distribution and other services provided to the funds by DIMA and its affiliates) was lower than the overall profitability levels of many comparable firms for which such data was available. The Board also considered the estimated profitability of the Sub-Advisors based on revenues and expenses provided by the Sub-Advisors and concluded that the estimated profitability realized by each Sub-Advisor in connection with the management of its respective Fund(s) was not unreasonable.

**Economies of Scale.** The Board considered whether there are economies of scale with respect to the management of each Fund and whether each Fund benefits from any economies of scale. The Board noted that each Fund's management fee schedule includes fee breakpoints. The Board concluded that each Fund's fee schedule represents an appropriate sharing between the Fund and DIMA of such economies of scale as may exist in the management of the Fund at current asset levels.

**Other Benefits to DIMA and the Sub-Advisors and Their Affiliates.** The Board also considered the character and amount of other incidental benefits received by DIMA and the Sub-Advisors and their affiliates, including any fees received by DIMA for administrative services provided to each Fund and any fees received by an affiliate of DIMA for distribution services. The Board also considered benefits to DIMA and the Sub-Advisors related to brokerage and soft-dollar allocations, including allocating brokerage to pay for research generated by parties other than the executing broker dealers, which pertain primarily to funds investing in equity securities, along with the incidental public relations benefits to DIMA and the Sub-Advisors related to DWS Funds advertising and cross-selling

opportunities among DWS Investments products and services. The Board concluded that management fees were reasonable in light of these fallout benefits.

**Compliance.** The Board considered the significant attention and resources dedicated by DIMA to documenting and enhancing its compliance processes in recent years. The Board noted in particular (i) the experience and seniority of DIMA's chief compliance officer; (ii) the large number of compliance personnel who report to DIMA's chief compliance officer; and (iii) the substantial commitment of resources by DIMA and its affiliates to compliance matters.

In connection with the factors described above, the Board considered factors specific to each Fund, as discussed below.

#### **DWS Mid Cap Growth VIP**

**Nature, Quality and Extent of Services.** Based on the information provided, the Board noted that for the one-, three- and five-year periods ended December 31, 2007, the Fund's performance (Class A shares) was in the 4th quartile and 4th quartile, respectively, of the applicable Lipper universe (the 1st quartile being the best performers and the 4th quartile being the worst performers). The Board also observed that the Fund has underperformed its benchmark in each of the one- and five-year periods ended December 31, 2007 and outperformed its benchmark in the three-year period ended December 31, 2007. The Board noted the disappointing investment performance of the Fund in recent periods and continued to discuss with senior management of DIMA the factors contributing to such underperformance and actions being taken to improve performance. The Board recognized that DIMA has made significant changes in its investment personnel and processes in recent years in an effort to improve long-term performance.

**Fees and Expenses.** With respect to management fees paid to other investment advisors by similar funds, the Board noted that the contractual fee rates paid by the Fund, which include the 0.10% fee paid to DIMA under the Fund's administrative services agreement, were lower than the median (1st quartile) of the applicable Lipper peer group (based on Lipper data provided as of December 31, 2007). The Board noted that the Fund's Class A shares' total (net) operating expenses were expected to be higher than the median (3rd quartile) of the applicable Lipper expense universe (based on Lipper data provided as of December 31, 2007, and analyzing Lipper expense universe Class A expenses less any applicable 12b-1 fees) ("Lipper Universe Expenses"). The Board also reviewed each other share class's total (net) operating expenses relative to the Lipper Universe Expenses. The Board also noted that the expense limitations agreed to by DIMA helped to ensure that the Fund's total (net) operating expenses would be competitive relative to the applicable Lipper universe.

#### **DWS Blue Chip VIP**

**Nature, Quality and Extent of Services.** Based on the information provided, the Board noted that for the one-, three- and five-year periods ended December 31, 2007, the Fund's performance (Class A shares) was in the 3rd quartile, 2nd quartile and 2nd quartile, respectively, of the applicable Lipper universe (the 1st quartile being the best performers and the 4th quartile being the worst performers). The Board also observed that the Fund has underperformed its benchmark in the one-year period ended December 31, 2007 and outperformed its benchmark in each of the three- and five-year periods ended December 31, 2007.

**Fees and Expenses.** With respect to management fees paid to other investment advisors by similar funds, the Board noted that the contractual fee rates paid by the Fund, which include the 0.10% fee paid to DIMA under the Fund's administrative services agreement, were lower than the median (1st quartile) of the applicable Lipper peer group (based on Lipper data provided as of December 31, 2007). The Board noted that the Fund's Class A shares' total (net) operating expenses were expected to be lower than the median (2nd quartile) of the applicable Lipper expense universe (based on Lipper data provided as of December 31, 2007). The Board analyzing Lipper expense universe Class A expenses less any applicable 12b-1 fees) ("Lipper Universe Expenses"). The Board also reviewed each other share class's total (net) operating expenses relative to the Lipper Universe Expenses. The Board also noted that the expense limitation agreed to by DIMA helped to ensure that the Fund's total (net) operating expenses would be competitive relative to the applicable Lipper universe.

#### **DWS Davis Venture Value VIP**

**Nature, Quality and Extent of Services.** Based on the information provided, the Board noted that for the one-, three- and five-year periods ended December 31, 2007, the Fund's performance (Class A shares) was in the 3rd quartile, 2nd quartile and 1st quartile, respectively, of the applicable Lipper universe (the 1st quartile being the best performers and the 4th quartile being the worst performers). The Board also observed that the Fund has outperformed its benchmark in each of the one- and three-year periods ended December 31, 2007 and underperformed it benchmark in the five-year period ended December 31, 2007.

**Fees and Expenses.** With respect to management fees paid to other investment advisors by similar funds, the Board noted that the contractual fee rates paid by the Fund, which include the 0.10% fee paid to DIMA under the Fund's administrative services agreement, were higher than the median (4th quartile) of the applicable Lipper peer group (based on Lipper data provided as of December 31, 2007). With respect to the sub-advisory fee paid to the Sub-Advisor, the Board noted that the fee is paid by DIMA out of its fee and not directly by the Fund. The Board noted that the Fund's Class A shares' total (net) operating expenses were expected to be higher than the median (4th quartile) of the applicable Lipper expense universe (based on Lipper data provided as of December 31, 2007). The Board noted that the Fund's Class A shares' total (net) operating expenses were expected to be higher than the median (4th quartile) of the applicable Lipper expense universe (based on Lipper data provided as of December 31, 2007, and analyzing Lipper expense universe Class A expenses less any applicable 12b-1 fees) ("Lipper Universe Expenses"). The Board also reviewed each other share class's total (net) operating expenses relative to the Lipper Universe Expenses. The Board also noted that the expense limitations agreed to by DIMA helped to ensure that the Fund's total (net) operating expenses would be competitive relative to the applicable Lipper universe.

### **DWS Dreman High Return Equity VIP**

**Nature, Quality and Extent of Services.** Based on the information provided, the Board noted that for the one-, three- and five-year periods ended December 31, 2007, the Fund's performance (Class A shares) was in the 4th quartile and 2nd quartile, respectively, of the applicable Lipper universe (the 1st quartile being the best performers and the 4th quartile being the worst performers). The Board also observed that the Fund has underperformed its benchmark in each of the one- and three-year periods ended December 31, 2007 and outperformed its benchmark in the five-year period ended December 31, 2007. The Board noted the disappointing investment performance of the Fund in recent periods and continued to discuss with senior management of DIMA and the Sub-Advisor the factors contributing to such underperformance and actions being taken to improve performance. The Board recognized that DIMA and the Sub-Advisor have made significant changes in investment performance and processes in recent years in an effort to improve long-term performance.

**Fees and Expenses.** With respect to management fees paid to other investment advisors by similar funds, the Board noted that the contractual fee rates paid by the Fund, which include the 0.10% fee paid to DIMA under the Fund's administrative services agreement, were lower than the median (2nd quartile) of the applicable Lipper peer group (based on Lipper data provided as of December 31, 2007). With respect to the sub-advisory fee paid to the Sub-Advisor, the Board noted that the fee is paid by DIMA out of its fee and not directly by the Fund. The Board noted that the Fund's Class A shares' total (net) operating expenses were expected to be higher than the median (3rd quartile) of the applicable Lipper expense universe (based on Lipper data provided as of December 31, 2007, and analyzing Lipper expense universe Class A expenses less any applicable 12b-1 fees) ("Lipper Universe Expenses"). The Board also reviewed each other share class's total (net) operating expenses relative to the Lipper Universe Expenses. The Board also noted that the expense limitations agreed to by DIMA helped to ensure that the Fund's total (net) operating expenses would be competitive relative to the applicable Lipper universe.

#### . . . . .

Based on all of the information considered and the conclusions reached, the Board (including a majority of the Independent Trustees) determined that the continuation of the Agreements is in the best interests of each Fund. In making this determination the Board did not give particular weight to any single factor identified above. The Board considered these factors over the course of numerous meetings, certain of which were in executive session with only the Independent Trustees and their counsel present. It is possible that individual Trustees may have weighed these factors differently in reaching their individual decisions to approve the continuation of the Agreements.

# Summary of Management Fee Evaluation by Independent Fee Consultant

#### October 24, 2008

Pursuant to an Order entered into by Deutsche Investment Management Americas and affiliates (collectively, "DeAM") with the Attorney General of New York, I, Thomas H. Mack, have been appointed the Independent Fee Consultant for the DWS Funds (formerly the DWS Scudder Funds). My duties include preparing an annual written evaluation of the management fees DeAM charges the Funds, considering among other factors the management fees charged by other mutual fund companies for like services, management fees DeAM charges other clients for like services, DeAM's costs of supplying services under the management agreements and related profit margins, possible economies of scale if a Fund grows larger, and the nature and quality of DeAM's services, including fund performance. This report summarizes my evaluation for 2008, including my qualifications, the evaluation process for each of the DWS Funds, consideration of certain complex-level factors, and my conclusions. I served in substantially the same capacity in 2007.

#### Qualifications

For more than 35 years I have served in various professional capacities within the investment management business. I have held investment analysis and advisory positions, including securities analyst, portfolio strategist and director of investment policy with a large investment firm. I have also performed business management functions, including business development, financial management and marketing research and analysis.

Since 1991, I have been an independent consultant within the asset management industry. I have provided services to over 125 client organizations, including investment managers, mutual fund boards, product distributors and related organizations. Over the past ten years I have completed a number of assignments for mutual fund boards, specifically including assisting boards with management contract renewal.

I hold a Master of Business Administration degree, with highest honors, from Harvard University and Master of Science and Bachelor of Science (highest honors) degrees from the University of California at Berkeley. I am an independent director and audit committee financial expert for two closed-end mutual funds, serve on the board of directors of a private market research company, and have served in various leadership and financial oversight capacities with non-profit organizations.

#### **Evaluation of Fees for each DWS Fund**

My work focused primarily on evaluating, fund-by-fund, the fees charged to each of the 129 Fund portfolios in the DWS Fund family. For each Fund, I considered each of the key factors mentioned above, as well as any other relevant information. In doing so I worked closely with the Funds' Independent Directors in their annual contract renewal process, as well as in their approval of contracts for several new funds (documented separately).

In evaluating each Fund's fees, I reviewed comprehensive materials provided by or on behalf of DeAM, including expense information prepared by Lipper Analytical, comparative performance information, profitability data, manager histories, and other materials. I also accessed certain additional information from the Lipper, Strategic Insight, and Morningstar databases and drew on my industry knowledge and experience.

To facilitate evaluating this considerable body of information, I prepared for each Fund a document summarizing the key data elements in each area as well as additional analytics discussed below. This made it possible to consider each key data element in the context of the others.

In the course of contract renewal, DeAM agreed to implement a number of fee and expense adjustments requested by the Independent Directors which will favorably impact future fees and expenses, and my evaluation includes the effects of these changes.

#### Fees and Expenses Compared with Other Funds

The competitive fee and expense evaluation for each fund focused on two primary comparisons:

The Fund's contractual management fee (the advisory fee plus the administration fee where applicable) compared with those of a group of typically 12–15 funds in the same Lipper investment category (e.g. Large Capitalization Growth) having similar distribution arrangements and being of similar size.

The Fund's total expenses compared with a broader universe of funds from the same Lipper investment category and having similar distribution arrangements.

These two comparisons provide a view of not only the level of the fee compared with funds of similar scale but also the total expense the Fund bears for all the services it receives, in comparison with the investment choices available in the Fund's investment category and distribution channel. The principal figure-of-merit used in these comparisons was the subject Fund's percentile ranking against peers.

#### **DeAM's Fees for Similar Services to Others**

DeAM provided management fee schedules for all of its US domiciled fund and non-fund investment management accounts in any of the investment categories where there is a DWS Fund. These similar products included the other DWS Funds, non-fund pooled accounts, institutional accounts and sub-advisory accounts. Using this information, I calculated for each Fund the fee that would be charged to each similar product, at the subject Fund's asset level.

Evaluating information regarding non-fund products is difficult because there are varying levels of services required for different types of accounts, with mutual funds generally requiring considerably more regulatory and administrative types of service as well as having more frequent cash flows than other types of accounts. Also, while mutual fund fees for similar fund products can be expected to be similar, there will be some differences due to different pricing conditions in different distribution channels (e.g. retail funds versus those used in variable insurance products), differences in underlying investment processes and other factors.

#### **Costs and Profit Margins**

DeAM provided a detailed profitability analysis for each Fund. After making some adjustments so that the presentation would be more comparable to the available industry figures, I reviewed profit margins from investment management alone, from investment management plus other fund services (excluding distribution) provided to the Funds by DeAM (principally shareholder services), and DeAM profits from all sources, including distribution. A later section comments on overall profitability.

#### **Economies of Scale**

Economies of scale — an expected decline in management cost per dollar of fund assets as fund assets grow — are very rarely quantified and documented because of inherent difficulties in collecting and analyzing relevant data. However, in virtually every investment category that I reviewed, larger funds tend to have lower fees and lower total expenses than smaller funds. To see how each DWS Fund compares with this industry observation, I reviewed:

The trend in Fund assets over the last five years and the accompanying trend in total expenses. This shows if the Fund has grown and, if so, whether total expense (management fees as well as other expenses) have declined as a percent of assets.

Whether the Fund has break-points in its management fee schedule, the extent of the fee reduction built into the schedule and the asset levels where the breaks take effect, and in the case of a sub-advised Fund how the Fund's break-points compare with those of the sub-advisory fee schedule.

How the Fund's contractual fee schedule compares with trends in the industry data. To accomplish this, I constructed a chart showing how actual latest-fiscal-year contractual fees of the Fund and of other similar funds relate to average fund assets, with the subject Fund's contractual fee schedule superimposed.

#### **Quality of Service – Performance**

The quality-of-service evaluation focused on investment performance, which is the principal result of the investment management service. Each Fund's performance was reviewed over the past 1, 3, 5 and 10 years, as

applicable, and compared with that of other funds in the same investment category and with a suitable market index.

In addition, I calculated and reviewed risk-adjusted returns relative to an index of similar mutual funds' returns and a suitable market index. The risk-adjusted returns analysis provides a way of determining the extent to which the Fund's return comparisons are mainly the product of investment value-added (or lack thereof) or alternatively taking considerably more or less risk than is typical in its investment category.

I also received and considered the history of portfolio manager changes for each Fund, as this provided an important context for evaluating the performance results.

#### **Complex-Level Considerations**

While this evaluation was conducted mainly at the individual fund level, there are some issues relating to the reasonableness of fees that can alternatively be considered across the whole fund complex:

I reviewed DeAM's profitability analysis for all DWS Funds, with a view toward determining if the allocation procedures used were reasonable and how profit levels compared with public data for other investment managers.

I considered whether DeAM and affiliates receive any significant ancillary or "fall-out" benefits that should be considered in interpreting the direct profitability results. These would be situations where serving as the investment manager of the Funds is beneficial to another part of the Deutsche Bank organization.

I considered how aggregated DWS Fund expenses had varied over the years, by asset class and in the context of trends in asset levels.

I reviewed the structure of the DeAM organization, trends in staffing levels, and information on compensation of investment management and other professionals compared with industry data.

#### Findings

Based on the process and analysis discussed above, which included reviewing a wide range of information from management and external data sources and considering among other factors the fees DeAM charges other clients, the fees charged by other fund managers, DeAM's costs and profits associated with managing the Funds, economies of scale, possible fall-out benefits, and the nature and quality of services provided, in my opinion the management fees charged the DWS Funds are reasonable.

# Summary of Administrative Fee Evaluation by Independent Fee Consultant

#### September 29, 2008

Pursuant to an Order entered into by Deutsche Asset Management (DeAM) with the Attorney General of New York, I, Thomas H. Mack, have been appointed the Independent Fee Consultant for the DWS Funds and have as part of my duties evaluated the reasonableness of the proposed management fees to be charged by DeAM to the DWS Funds, taking onto account a proposal to pass through to the funds certain fund accounting-related charges in connection with new regulatory requirements. My evaluation considered the following:

- While the proposal would alter the services to be provided under the Administration Agreement, which I consider to be part of fund management under the Order, it is my opinion that the change in services is slight and that the scope of prospective services under the combination of the Advisory and Administration Agreements continues to be comparable with those typically provided to competitive funds under their management agreements.
- While the proposal would increase fund expenses, according to a pro forma analysis performed by management, the prospective effect is less than .01% for all but seven of the DeAM Funds' 438 active share classes, and in all cases the effect is less than .03% and overall expenses would remain reasonable in my opinion.

Based on the foregoing considerations, in my opinion the fees and expenses for all of the DWS Funds will remain reasonable if the Directors adopt this proposal.

Thomas H. Mack

## **Board Members and Officers**

The following table presents certain information regarding the Board Members and Officers of the Trust as of December 31, 2008. Each Board Member's year of birth is set forth in parentheses after his or her name. Unless otherwise noted, (i) each Board Member has engaged in the principal occupation(s) noted in the table for at least the most recent five years, although not necessarily in the same capacity; and (ii) the address of each Independent Board Member is c/o Dawn-Marie Driscoll, PO Box 100176, Cape Coral, FL 33904. Except as otherwise noted below, the term of office for each Board Member is until the election and qualification of a successor, or until such Board Member sooner dies, resigns, is removed or as otherwise provided in the governing documents of the fund. Because the fund does not hold an annual meeting of shareholders, each Board Member will hold office for an indeterminate period. The Board Members may also serve in similar capacities with other funds in the fund complex. The Length of Time Served represents the year in which the Board Member joined the board of one or more DWS funds now overseen by the Board.

Name, Year of Birth, Position with the Fund and Length of Time Served <sup>1</sup>	Business Experience and Directorships During the Past Five Years	Number of Funds in DWS Fund Complex Overseen
Paul K. Freeman (1950) Chairperson since 2009 <sup>2</sup> Board Member since 1993	Consultant, World Bank/Inter-American Development Bank; Governing Council of the Independent Directors Council (governance, executive committees); formerly, Project Leader, International Institute for Applied Systems Analysis (1998–2001); Chief Executive Officer, The Eric Group, Inc. (environmental insurance) (1986–1998)	134
